Upon the harvested area of wheat in Canada of 10,293,900 acres, including fall wheat, the aggregate yield is estimated at 159,660,000 bushels, as compared with last year's excellent outturn of 231,717,000 bushels and with 204,712,000 bushels, the annual average for the four years 1910-13. Of oats the estimate is for 327,732,000 bushels against 404,669,000 bushels last year and 351,246,000 bushels the four-year average. Barley is estimated to yield 37,014,000 bushels, compared with 48,319,000 bushels in 1913 and 42,745,000 bushels, the annual average, rye 2,019,000 bushels, against 2,300,000 bushels and 2,189,000 bushels, and flaxseed 9,042,000 bushels, compared with 7,539,000 bushels last year and 14,497,000 bushels, the annual average for the years 1910-13.

For the three Northwest provinces alone the total estimated yields are as follows:—Wheat, including fall wheat, 139,672,000 bushels, rye 515,000 bushels, oats 160,796,000 bushels, barley 20,320,000 bushels and flaxseed 8,962,000 bushels. According to a bulletin issued by the census and statistics office, giving the preliminary estimate of the yield of the principal cereal crops in Canada, according to reports of correspondents made at the end of August.

Large Acreage Deducted.

Continued drought, especially in the northwest provinces, has seriously affected the yield per acre which is lower than that of any year since the season of 1910 and lower than the average of the six years ended 1913. From the areas sown to wheat, oats, barley and flax in the Northwest provinces it has been necessary, in estimating the yields, to deduct a considerable acreage, which owing to drought, is reported as failing to produce any grain. For the three provinces of Manitoba, Saskatchewan and Alberta, the areas thus deducted amount to 728,100 acres of wheat, 753,000 acres of oats, 102,000 acres of barley and 79,000 acres of flax, these areas representing percentages of the areas sown of from 3 to 7½ in Manitoba, 7 to 13 in Saskatchewan and 7 to 15½ in Alberta.

For all Canada the yield per acre for spring wheat is just under 15 bushels, as compared with 20.81 bushels last year and with 19.2 bushels, the average of the four years 1910-13, for oats the yield is 32.5 bushels against 38.7 last year and 36.3 the four-year average, for barley 24.7 in 1914, compared with 29.9 and 28.5, for rye 18 against 19.3 and 17.8 and for flax 8.3 against 11.3 and 11.5.

Maritime Provinces were Better.

Describing generally the conditions of the month of August, correspondents state that owing to the dryness of the season the grain ripened much earlier than usual with the straw short and the yield much shrunken. In Northern Saskatchewan the grain was practically all cut and threshing well under way. In Northern Alberta the yield promised to equal the average, but in Southern Alberta the excessive heat and drought had a bad effect upon what in the early part of the season was a promising crop. Whilst in Quebec and Ontario the grain crops have suffered from a dry season, the conditions have not been so unfavorable as in the west. In Ontario the grain yield is not greatly below that of 1913 and in Quebec the yield of oats is even superior. In the Maritime provinces the season is favorable and the preliminary estimates give yields superior to those of last year.

The average condition of the principal field crops, as expressed in percentage of the standard representing a full crop, was returned on August 31 as follows:—Spring wheat 75, oats 76, barley 74, rye 79, peas 74, beans 82, buckwheat 80, mixed grains 87 flax 63, corn for husking 77, potatoes 76, other roots 78, alfalfa 72, corn for fodder 85, sugar beets 79, pasture 67 and hay and clover 71. In the case of cereals the figures of condition are about 10 or 12 points below those of last year at the same date, and in the Northwest provinces the condition of wheat, oats and barley ranges from about 20 to 30 points below last year.

CANADA TO SELL TO SOUTH AMERICA

Department of Trade and Commerce Points the Way to Exporters—Home Purchases Can Be Increased

"A decided check has been given to German trade with South American countries. A rearrangement of commercial relations must, therefore, ensue whereby other countries, including Canada, will find an opportunity. The country, moreover, that is the first to fully realize the significance of this opportunity will have a decided advantage over others in their efforts to capture a share of the South American trade, lost for a time to Germany and other warring nations of Europe," states a bulletin of Canada's trade and commerce department. It is pointed out that the United States is fully alive to the importance of this trade as evidenced by the establishment of a South American bureau.

The first South American country dealt with is the Argentine Republic, which imports from Germany goods to the value of about $[illegible] as compared with but $2,200,000 from Canada at present. The imports are largely of finished manufactured goods, and Germany has principally supplied pig and sheet iron, steel rails, wire, machinery, electrical supplies, automobiles, hardware, cutlery, tools, clocks, jewellery, silk, woollen and cotton goods, hosiery, drugs, dyes and chemicals, paper and wood pulp, pianos, canned and fancy foodstuffs. It is thought Canadian manufacturers' opportunities will be principally in the supply of canned goods, fish, paper and wood pulp, metallic goods and hardware.

Fifty-three Millions of Business.

Brazil is another South American market in which an exceptional opportunity is created by the war for Canadian producers to gain a foothold from which permanent trade should inevitably follow. Germany supplied $5[illegible],018,07[illegible] worth of exports to Brazil in 1912, as compared with but $1,165,8[illegible] from Canada. The imports from Germany include arms and ammunition, cement, earthenware, industrial machinery, motor cars, locomotives, phonographs, paints, scientific instruments, stationery, toys, pig and sheet iron, steel rails, wire, machinery, electrical supplies, automobiles, hardware, cutlery, textiles, paper and foodstuffs of a fancy character.

How Home Employment Can be Augmented.

The Department of Trade and Commerce has also issued a table under the caption, "Home purchases means home employment," showing the value of importations into Canada of articles in common use and the number of factories and employees engaged in making such goods in Canada.

"Every dollar's worth of goods formerly imported and which could be got in Canada adds so much to the employment and comfort of our own working people," it states. In the line of cotton goods, for instance, it is pointed out that during the last fiscal year goods valued at $[illegible] were imported, whereas in Canada there are [illegible] factories employing 13,641 people and paying $4,8[illegible] in salaries which turn out these manufactures.

◆

TRADE OPENINGS IN RUSSIA

Mr. Sergius Sazonoff, the Russian foreign minister, has issued the following statement:—

"I quite realize that accounts of victories and reverses, [illegible] of heroism and magnificence [illegible] now fill newspapers, but above and beyond all [illegible] exists a situation and an opportunity in trade and commerce in Russia which to Britain and America [illegible] in the [illegible] to come than it is easy to realize.

"Russia opens opportunities for industrial outlet such as can hardly be overestimated. We have an empire of 170,000,0000 souls, and the [illegible] we have been paying Germany yearly is but the beginning of a demand that will soon make Russia among the most desirable and valuable markets in the world."

USE "MILNES' COAL"

HIGHEST GRADE OF ANTHRACITE

The Price is just the same as other grades. Why not buy the Best?

Head Office: 88 KING STREET EAST
Private Exchange: MAIN 5597

FUNCTIONS OF GRAIN EXCHANGE

It is Essential in Modern Marketing of the World's Crops

"The Winnipeg grain exchange may be defined simply as a market place, which enables people to buy and sell grain freely and which, in order to facilitate such trading, has for its fundamental object the promotion of uniformity in custom and usage; the inculcation of principles of justice and equity in trade; the dissemination of valuable commercial and economic information and the regulating of the conduct of its members with uniform rules and regulations which tend to maintain a high standard of commercial conduct," said Mr. A. V. Godfrey, retiring president, at the annual meeting of the Winnipeg grain and produce exchange.

"The exchange itself transacts no business and is in nowise concerned with the business affairs of those who compose its membership. The charge for service exacted by a member for transacting business is small, and has been maintained by the courts to be reasonable and just. We endeavor by establishing a fixed commission charge for certain services to promote competition in the rendering of service, for by emphasizing the quality of the service to the customer we promote efficiency.

Agent Must be Efficient.

"The charge being the same to all customers, it stands to reason that in order to obtain business the member must be able to establish the fact that he is more efficient and produces better results for his customers than his competitor.

"We make it possible for the producer to sell his grain whenever he so desires rather than hold it and speculate on the increase or decrease in price. He is able to do this by reason of the opportunity afforded by the exchange to buy and sell grain for future delivery.

"The farmer who desires to sell grain at a time when there is no immediate milling or export demand would have to do so at a great sacrifice, were it not possible for those who buy his grain to meet a future demand, being able to protect themselves by selling the future, or option, as it is commonly called.

Crop Was High Grade.

"It is safe to assume that the exporter, the miller or the warehouse man would not feel justified in assuming this risk on the present narrow margin of profit without the opportunity of protecting himself, which is afforded by the future or option market. Not having this protection against the risk of market declines he would naturally buy it at a much wider margin; in other words, pay the farmer much less for the grain in order to protect himself against the market contingencies. On the other hand, those who buy grain for the purpose of milling or exporting at some future date are enabled to purchase this grain through the agency of the future market.

"When the final figures are available I think they will show that the favorable conditions under which the crop of 1913 was matured and harvested resulted in the three western provinces producing about 190,000,000 bushels of wheat and 225,000,000 bushels of oats, both being of a very high grade and quality."

◆

ENEMIES OF THE COUNTRY

These are some of the enemies of our country:—The man who hoards gold; the man who hoards food; the employer who discharges a man except from the direst necessity; the man who does anything to disturb the normal condition of business; the man who thinks of his profits before his country; the man who needlessly cancels a contract; the man who needlessly takes advantage of a moratorium; the man who puts up prices except to cover increased costs; the man who by any exceptional action seeks to protect himself at the expense of his fellow-countrymen.

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100.00 invested has produced all the way from $127.00 to $193.00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

RESULT OF A 20 PAY LIFE POLICY

in The Great-West Life, maturing this month.
$5 000 on the 20 Pay Life Plan, age 30.
Premium $150 30 per annum.

OPTIONS AVAILABLE.

(1) Take Total Cash Value	Guarantee	$2,405 00
	Surplus	1 920 00
Total Cash Value		$4,325 00
(2) Continue Policy for $5,000 fully paid up, sharing in future profits, and		
(a) Withdraw Surplus in cash		$1,920.00
or (b) Apply Surplus to purchase fully paid up Policy without profits		3,770.00
(3) Purchase a Life Annuity of		326.65

This Result is typical of scores of others under the popular Plans of

The Great-West Life Assurance Co.

ADVICE FROM CALGARY BANKER

Put Home Interests First—Money for Commercial Needs and Crop Transportation

"Canadian banks are doing business as usual," stated Mr. C. G. K. Nourse, manager of the Bank of Commerce, at Calgary, "and I firmly believe that every legitimate demand for carrying on commercial transactions in Calgary will be properly cared for.

There is no doubt whatever that the banks will scrutinize more carefully all requests for accommodation, and it may be taken for granted that all loans which are required for real estate, oil or other speculative purposes will be turned down.

While the European situation is dark, Mr. Nourse does not think there is any need for pessimism, since the Canadian banks are in a strong position, enabling them to meet conditions. The government have strengthened their position by making all Canadian bank bills legal tender. Consequently there is money to be had for all bona fide business concerns.

Supply of Money for Crops.

Mr. Nourse said, for moving the crop, the banks were prepared to loan as liberally as in any previous year. For this purpose, so important to the country, there would be a supply of money.

When presiding at a meeting of retail merchants, Mr. Nourse remarked:—"The bankers should use their best efforts to keep interest rates down. No Canadian bank has yet attempted to take advantage of the situation and to raise its rates. Then they should see that lenient measures are taken toward obligants. There are lots of good men who are willing to pay but who cannot pay. Not only bankers, but wholesalers as well, might well refrain from issuing writs, except in exceptional cases. It is a difficult and delicate matter, but we might all get together and declare a voluntary moratorium for the man who is willing to pay but can't. It would assist matters in Calgary.

Calgary First.

"Another important thing is that of encouraging buying at home, of patronizing Calgary industries, Calgary factories, Calgary stores. It is an old, old campaign, but it was never more important than it is now, this campaign for Calgary first. It should readily be accepted by the people at the present time."

◆

GOLD RESERVES OF BANKS

In reply to a question in the British house of commons as to what were the estimated amounts, in pounds sterling, of the gold reserves held by the Bank of England, the Bank of France, the Imperial Bank of St. Petersburg and the Reichsbank of Germany, respectively, at the beginning of January and the beginning of July of each of the years 1911, 1912, 1913 and 1914, Mr. Lloyd George replied that he had no official information in regard to the gold reserves of the foreign banks referred to in the question. The figures (compiled as regards these banks from general sources of information) are:—

	Bank of England.	Bank of France.	Bank of Russia.	Reichsbank.
	£	£	£	£
Jan., 1911...	[illegible]	[illegible]	[illegible]	[illegible]
July, 1911...	[illegible]	[illegible]	[illegible]	42,141,000
Jan., 1912...	33,635,000	[illegible]	[illegible]	[illegible]
July, 1912...	38,524,000	[illegible]	[illegible]	[illegible]
Jan., 1913...	30,177,000	[illegible]	[illegible]	[illegible]
July, 1913...	35,452,000	[illegible]	[illegible]	54,075,000
Jan., 1914...	[illegible]	[illegible]	[illegible]	[illegible]
July, 1914...	38,476,000	[illegible]	[illegible]	[illegible]

The figures for the Bank of England exclude gold coin in the banking department (which is not shown separately in the returns) and those for the Bank of Russia exclude balances held abroad by that bank. In any comparison of the figures it is, of course, necessary to bear in mind the great differences between the banking and currency systems of the respective countries.

FINANCING TORONTO HARBOR IMPROVEMENT

Revenue Shows Increase—Bond Issue Sold in States—Anticipated Heavy Expenditures

Toronto's harbor commissioners' net revenue for the year 1913, exclusive of receipts from the sale of debentures, [illegible] payments [illegible] balanced by contra accounts, amounted to $[illegible], of which sum $50,[illegible] was received in rentals, $6,50[illegible] in harbor dues, $2,51[illegible] from the public dock, $[illegible] and $[illegible] being interest on debentures on deposit with the Bank of Toronto. This revenue shows an increase of $[illegible] over the revenue of 1912, the greater portion of this amounting to $[illegible] being the increase in rentals received.

The expenditures on revenue account during the year amounted to $[illegible], leaving a balance of $[illegible].

Revenue will be Small.

During the years 1912 and 1913 various expenditures on capital account were made out of revenue as no provision was then made for finances to meet the capital expenditures. A capital account was kept of all such expenditures, and upon the sale of the first issue of bonds the amount of $[illegible] was transferred from capital to revenue account to repair the deficiency thus created. It is necessary that the revenue account should be carefully safeguarded as [illegible] during the first two or three years of operation heavy capital expenditures will have to be met before any large revenue can be looked for, and the interest on the bonds issued for the purpose of meeting these capital expenditures will have to be met out of the revenue account.

The expenditure on capital account during the year 1913 amounted to $[illegible],821.

Debentures and Investment.

A debenture issue of $1,500,000 was sold to Messrs. Wm. A. Read and Company, of New York City, the price realized being 89½ with accrued interest, the sale netting the commissioners $1,342,500, and the accrued interest up to the date of the delivery of the first block of bonds amounted to $1[illegible],214. As the largest portion of this money would not be needed until the work was well under way, arrangements were made with the Toronto General Trusts Corporation and the National Trust Company, under which almost the entire amount received from the sale of bonds was placed with these companies for investment on their guaranteed plan. Under this plan the companies used the money for investment only in certain prescribed securities paying interest to the commissioners for the use of it at 5 per cent. per annum, and guaranteeing the return of the principal by a certain date. In this way the commissioners were assured of sufficient capital to commence operations, and at the same time were at but little loss by reason of having the money lying idle in the bank.

Contracts were Let.

Such substantial progress was made during 1913 in the preparation of detail working plans and the completion of arrangements for the letting of contracts and starting the actual work, states Mr. A. C. Lewis, secretary to the commissioners, in his report, that a contract was made for the dredging operations under the commissioners' jurisdiction which provides for the filling of the industrial district and reclamation of other lands at a minimum cost of $[illegible], and an option to increase the amount of dredging at the same unit price per cubic yard, at the will of the commissioners, up to an amount not to exceed a total cost of $[illegible]. At the same time the government let a contract for the construction of a breakwater extending from Woodbine Avenue to the eastern channel and the eastern lake front, the construction of a breakwater extending from the western channel to the Humber River, the dredging of the western channel and the construction and dredging of the ship channel in the industrial district, the total contract price being an expenditure of $[illegible].

The government has thus undertaken the construction of the bridges, the eastern and western entrances to the harbor, and of the ship channel in the industrial district.

It is our fault if we do not try to do business. The British navy is doing its part to help us.

SUSPENSION OF MUNICIPAL SINKING FUNDS

London Authority Advocates It for England—Not Good for Canada

"At the present time a great deal of attention is being directed towards the solving of the problem of keeping as large a number of people as possible employed in this country to counteract the effect of the cessation of trade with the continent and the disorganization of our overseas commerce with other countries," says the London Financial Times. "It is obvious that the greater the amount of unemployment the smaller must be the spending power within the country, and this will further adversely affect trade. This further reduction in trade in its turn would again react on the workers, and so there would be a continuous chain of accumulating distress. Many people have been devising schemes, some practical and many impractical, whereby trade may be stimulated so that the movement of employment may be upward instead of increasingly downward, and Government aid is being asked for from many quarters, and measures are being pressed for in order that some of the schemes may be carried out.

"In some quarters it is urged that public works, Government or municipal, should be pressed forward, and that new works at present only in contemplation should be started in order to give employment. For this purpose, as regards municipal works, the suggestion has been put forward that a measure should be passed whereby for the period of the war all municipal sinking funds and other repayments of capital indebtedness be suspended wherever there would otherwise be an actual increase in the rates."

London Banker's Opinion.

"Seen on this question of the suspension of sinking funds, a prominent banker pointed out to a representative of the London Financial Times that in the ordinary course the tampering with such funds was to be severely discouraged. The times, however, were abnormal, and the great thing to be done at present was to get trade going and to keep it going. If it were a question of whether either the works or the sinking fund would have to be suspended, then, he said, by all means suspend the latter.

"A temporary suspension of a sinking fund would not materially affect the credit of the municipality or the value of the stock, especially where the loan was not repayable for a number of years to come. The amount involved in the sinking fund in a temporary suspension during the war would be small compared with the total of the loan and could be made up later. The inhabitants of the municipality would have to pay eventually, but the present was obviously not a good time for raising rates."

Position in Canada.

This procedure is a serious one at any time anywhere, but in Canada efforts should be made especially to keep sinking funds intact. The municipal sinking fund position here generally is by no means stronger than it should be. The investment of a municipality's own debentures in its sinking fund has not the objections which sinking fund suspension possesses, and the former course may give a substantial measure of relief.

◆

The present season has been one of exceptional activity in the extension of Saskatchewan's rural telephone system, and it is expected that the end of the present season will show the greatest increases in mileage of rural lines and number of rural subscribers of any year since the organization of the rural telephone branch of the department of telephones. At present, about 4,000 miles of line are under construction, and of this amount 500 miles, the property of 19 companies, have been completed and passed inspection; while 20 other systems are built and awaiting inspection. The services of four inspectors are constantly required to supervise and inspect the work. The department has also on hand the applications of a large number of companies which have not been able to commence construction. It was hoped that a considerable number of these might be approved in time to allow the completion of their systems this fall, but owing to the financial situation caused by conditions in Europe, the sale of debentures has fallen off almost entirely, and the only companies registered are those which are able to dispose of their debentures.

COMPANIES INCREASING CAPITAL

The following companies in Ontario have increased their capital stock: Irish and Maulson, Limited, from $250,000 to $500,000; the Stormont Electric Light and Power Company, Limited, from $50,000 to $200,000.

The following company in Saskatchewan has increased its capital stock. The Hanley Development Company, Limited, from $20,000 to $30,000.

◆

ANOTHER CROP ESTIMATE

Secretary Fowler, of the Northwestern Grain Dealers' Association, reports as follows on crops in Canada:—

	Acreage, bush.	Yield per acre, bush.	Crop, bush.
Wheat	10,952,000	13.5	147,852,000
Oats	6,916,000	29.0	174,493,000
Barley	1,226,000	20.5	25,143,000
Flax	918,000	7.0	6,646,000

Last year's wheat crop was roundly 209,000,000 bushels.

◆

DRY DOCK AT PRINCE RUPERT

The construction of the floating dry dock and ship repairing plant of the Grand Trunk Pacific Railway Company at Prince Rupert, B.C., are making good progress. The first pontoon was launched August 24th. The second pontoon or section will be launched during September and within the next 60 days a section of the dry dock will be available for repairs to craft in that locality.

When completed the dock will consist of 12 pontoons surmounted by steel wings in three sections, securely tying together in one case six pontoons and in the other case three each. There will then be available for practical use three separate docks which can all be placed together or arranged in any combination desired.

The capacity displacement of the whole 12 pontoons is 20,000 tons; each pontoon has two 12-inch centrifugal pumps so that after the dock is sunk and the ship slipped in place, the water can be pumped out in two hours, raising a ship of 20,000 tons (or a smaller ship in a proportionate time). The length of the dock will be 600 feet.

It will furnish an important industry to Prince Rupert and will be of great importance and advantage in repairing the increasing shipping to that port, it being the only dry dock on the Canadian Pacific coast north of Esquimalt.

◆

BRITISH CASH AS A WEAPON

"British tenacity and British courage always come in, and they always will. But let us remember that British cash tells, too."—Lloyd George.

The third batch of treasury bills issued for war purposes was floated in London last week with the same ease as were the earlier issues. $75,000,000 was divided equally between six months' and 12 months' bills. Tenders of $492.41 were received for the former, and of $481.22 for the 12 months' bills.

The news has filtered through to London from Berlin that Germany's internal war loan of a quarter of billion dollars was unsuccessful, only one-fifth of the amount being applied for.

London hears also that the notes of the German Reichsbank have already depreciated 20 per cent., and that even at this rate attempts to negotiate them in Holland have failed. A parcel of Reichsbank notes were sent by neutrals to London in the vain hope that they could be disposed of at a 20 per cent. discount.

August Bank Statement's Sharp Changes

SINCE the War Outbreak and to the end of August, $49,500,000 of Loans have been Brought back from New York—Circulation was Increased Greatly—More Municipal Loans Advanced—Deposits have Declined.

	August, 1913.	July, 1914.	August, 1914.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$358,321,925	$346,854,051	$338,984,418	— 5.3	— 2.2
Deposits after notice	619,032,847	671,214,125	659,399,151	+ 6.5	— 1.7
***Current loans in Canada**	899,132,894	876,570,959	876,238,633	— 2.5	— 0.03
Loans to municipalities	41,310,281	36,372,334	39,664,534	— 3.9	+ 9.05
Current loans elsewhere	46,339,928	48,013,052	47,314,832	+ 2.1	— 1.4
Call loans in Canada	67,233,983	68,441,816	69,229,045	+ 2.9	+ 1.1
Call loans elsewhere	90,041,292	125,545,287	96,495,473	+ 7.1	— 23.1
Circulation	105,806,914	94,815,561	114,551,525	+ 8.2	+ 20.8

*Including loans to municipalities.

The above were the principal changes during August in the statement of the chartered banks. The most notable are the heavy decrease in call loans abroad; the extension of circulation; and the increase in loans to municipalities. Other changes are not as striking. Call loans abroad were reduced during August by $29,000,000, or 23.1 per cent. During July, they were decreased by $12,500,000. Since the outbreak of war, therefore, and to the end of August, Canadian bank loans abroad, largely in New York, have been recalled to the extent of $41,500,000, and the recall is still proceeding. That is the best possible reply to critics of this bank account. Mr. W. F. Maclean, M.P., for instance, early in August expressed the opinion that practically none of these loans could be called by the Canadian banks at a time of emergency. Since that opinion was given, $41,500,000 have come back to Canada. Circulation has increased $20,000,000, or 20.8 per cent. Loans to municipalities have been increased by $3,300,000, or 9.05 per cent.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1913—August	$899,132,894	$67,233,983
September	903,717,013	70,047,291
October	900,150,736	71,118,255
November	865,888,832	70,123,101
December	852,906,548	72,862,071
1914—January	840,883,750	71,248,242
February	842,084,073	71,374,602
March	855,381,265	69,088,240
April	865,873,876	68,523,774
May	872,152,263	67,210,504
June	875,536,909	67,401,484
July	876,570,959	68,441,816
August	876,238,633	69,229,045

Current loans in Canada, including loans to municipalities (for the sake of comparison), were reduced only about $350,000 during August, or 0.03 per cent. This is a gratifying exhibit. Loans to municipalities were increased by a little more than $3,000,000, and probably this account will show a further increase in the September statement. Call loans in Canada made a slight gain in August.

The following table shows the expansion of loans at home and abroad, during the past four years:—

August.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1910	$657,813,770	$38,609,568	$60,427,906	$100,447,288
1911	734,683,962	33,689,196	65,106,110	101,713,820
1912	852,045,624	37,846,222	75,194,735	114,847,864
1913	899,132,894	46,339,928	67,233,983	90,041,292
1914	876,238,633	47,314,832	69,229,045	96,495,473

Current loans in Canada are about $23,000,000 less than a year ago and $24,000,000 more than they were in August, 1912. Current loans abroad are only a million dollars more than last year, while domestic call loans are $2,000,000 more than a year ago. Call loans abroad have decreased sharply and are $18,000,000 less than they were two years ago.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice
1913—August	$358,321,925	$619,032,847
September	381,727,513	621,249,585
October	380,856,507	621,511,207
November	384,486,046	625,803,150
December	381,375,509	624,692,326
1914—January	339,811,339	635,135,955
February	337,516,505	640,927,130
March	345,590,642	646,143,604
April	350,515,903	653,679,223
May	340,748,488	663,945,753

(Continued on page 8).

T. C. BOVILLE,

Deputy Minister of Finance.

AUGUST BANK STATEMENT'S SHARP CHANGES

(Continued from page 5).

	On demand.	After notice.
June	$355,006,229	$663,650,230
July	346,854,051	671,214,125
August	338,984,418	659,399,151

Demand deposits in August declined about $8,000,000, approximately the same decrease as in July. The percentage loss during the month was 2.2 and during the year 5.3. While savings deposits decreased about $12,000,000 in August, or 1.7 per cent., they were still $40,000,000 higher than in August, 1913.

The deposits record for the past five years for the month of August is given in the following table compiled by *The Monetary Times*:—

August.	On demand.	After notice.	Total.
1910	$256,613,172	$545,357,452	$801,970,624
1911	311,111,668	575,740,956	886,852,624
1912	360,575,425	643,663,596	1,004,239,021
1913	358,321,925	619,032,847	977,354,772
1914	338,984,418	659,399,151	998,383,569

Total deposits have declined slightly below the billion dollar mark. After notice deposits were higher last August than during that month of the past five years. Demand deposits are $19,000,000 less than a year ago and $22,000,000 less than in August, 1912.

The August bank statement is the first to reflect war conditions, and, all things considered, is generally conceded to indicate as healthy a condition as possible in banking and business spheres.

BANK BRANCHES OPENED AND CLOSED

During August thirteen branches of Canadian chartered banks were opened and eight closed. Since January 1st, 1914, there have been 198 branches opened and 61 closed. Houston's Bank Directory gives the following particulars for August:—

Branches Opened—Thirteen.

Bronte, Ont.	Bank of Toronto.
Clarence Creek, Ont.	Banque Provinciale du Canada.
Copetown, Ont.	Royal Bank of Canada.
Foster, Que.	Molsons Bank.
Freelton, Ont	Bank of Toronto.
London East, Ont.	Royal Bank of Canada.
Rockland, Ont.	Union Bank of Canada.
St. Catharines, Ont. (Geneva and Welland Ave.)	Union Bank of Canada.
St. Thomas, Ont.	Royal Bank of Canada.
Thorold, Ont.	Merchants Bank of Canada.
Valcartier Military Camp, Que.	Bank of Montreal.
Valcartier Military Camp, Que.	Union Bank of Canada.
Vanderhoof, B.C.	Union Bank of Canada.

Branches Closed—Eight

Calgary, Alta. (Hillhurst Branch)	Dominion Bank.
Calgary, Alta. (Riverside Branch)	Dominion Bank.
Fingal, Ont.	Sterling Bank of Canada.
Kelvinhurst, Sask.	Merchants Bank of Canada.
Milner, B.C.	Bank of Hamilton.
Nicola, B.C.	Bank of Montreal.
Prince Albert, Sask. (River Street)	Canadian Bank of Commerce.
Victoria, B.C. (North End)	Merchants Bank of Canada.

◆

Be up and doing, not down and drooping.

The Canadian government has decided to grant $50,000 to the fund for the relief of the Belgian sufferers through the destructive European war.

BRITISH MORATORIUM WILL END SOON

Ontario's Act Retroactive—Reason's Against Canadian Moratoria

A London despatch says that it has been decided there shall be no further extension of the moratorium, so far as it applies to debts due by retail traders in respect of their business, for rent, or relating to bills of exchange, other than cheques or bills on demand.

As regards other debts to which the general moratorium applies, there will be an extension for one month from October 4, subject to the condition that the interest due under past proclamations is paid.

On November 4 the moratorium will come to an end as regards all debts.

Ontario's Legislation.

In reply to a question concerning the actual date from which the proposed moratorium act in Ontario is to be made effective, Hon. I. B. Lucas, provincial treasurer, states that in all probability it will be fixed as of August 4 last.

In view of possible misunderstandings as to the position of litigants who have foreclosure proceedings already under way, or will require to seek this relief before the legislature meets, it is understood that the law will be framed so that no legitimate case in which the present law should take its course will be prejudiced. It is to make the legislation elastic enough to fit almost all circumstances that the power to decide whether deferred payments will be permitted is to be given to the courts.

Moratoria in Canada.

The opinion of *The Monetary Times* regarding the question of moratoria in Canada, is supported by the Canadian Courier, which says:—"A moratorium is possible in Britain, because all Britain's creditors are her own people. The British consols, which represent her public debt, are held in Britain. All stocks and mortgages on public or private properties are held by other Britishers. But in Canada the case is different. Many mortgages on Canadian properties are held by British investors. Some are held by Canadian loan companies, but the loan companies in turn get this money from abroad. Hence a moratorium here would be a serious blow at Canadian credit abroad.

"In the east many believe that the moratorium on mortgages passed by the Manitoba legislature last week is a great mistake, and that no other province will imitate it. Saskatchewan is reported to have decided that such action would only add fuel to the fire and would ultimately reflect unfavorably on investments in that province. Ontario has decided not to pass a moratorium, but to leave the judges the power to relieve any extreme cases.

Must Maintain Credit.

"Canadians must remember that our greatest asset is our credit abroad. To destroy that is to set Canada back a generation. Therefore the Dominion government refuses to declare a moratorium, although parliament gave it the power to do so. This should be a warning to the nine provincial governments that the safest way to safeguard their credit is to avoid even the mildest form of moratoria. If there are extreme cases, let the provincial government take care of them temporarily. Shifting the burden to the loan companies or banks is only a subterfuge."

NOTES AGAINST APPROVED SECURITIES

The finance department at Ottawa reports that up to August 31st, 1914, Dominion notes to the amount of $750,000 had been issued against approved securities under the emergency legislation of the war session. This covers only seven days after the legislation went into effect.

◆

There is no excuse for pessimism.

Business never comes to the man who waits and whistles, but it does to the man who whistles and works.

The Royal Bank has opened a branch at Beaumont Street, Montreal.

TO THOSE WHO BOUGHT GERMAN GOODS

Samples of Importations Should Be Shown and Canadian Manufacturers Asked to Quote—How Boards of Trade Can Help

Editor, *The Monetary Times*:—

Sir, The newspapers and periodicals of Canada have devoted considerable space in recent issues to notices which have for their intention the stimulation of the manufacturer to secure some portion of the trade which the German manufacturers formerly had. In conversation with a number of parties the general opinion seems to be that while the manufacturer is quite ready and willing to "go after the trade" he does not know in which direction to go. The ordinary concern has not sufficient means to undertake an investigation of the trade requirements of Canada or of any other country in the particular line manufactured by the concern. It would seem, therefore, that the government of the Dominion and of the respective provinces should take some active measures to indicate definitely to the manufacturer the commodities, and the parties, which might be dealt with in connection with this attempt to secure a portion of the German trade.

Quote for Similar Articles.

I have been informed by one gentleman of a method which, I think, could be beneficially adopted by all. The gentleman in question (a manufacturer) was notified by a large firm that he could see their German importations in his line and the prices which had been paid for them and was asked to quote for similar articles. If all parties who have been importing or selling German articles were to submit samples of German goods to the manufacturers in Canada whom they think might supply them, the manufacturer could then have something definite to which to devote his energy.

To bring this to a more definite form it might be suggested:—

(1) That the boards of trade of the country should ask their members, who have imported or sold German or Austrian merchandise, to submit a list of their requirements (omitting quantities if need be), the lists to be open to the manufacturers and producers at the board of trade offices. and,

(2) That the respective governments should be approached to assist in the prosecution of a vigorous campaign on the German trade by primarily and immediately establishing sample rooms and price bureaus in connection with the boards of trade and also granting funds to the various universities to cover cost of research in industrial chemistry by qualified men and to stimulate such research by the offering of suitable prizes and rewards. The results of experiments in industrial chemistry made under such circumstances to be the property of the Canadian public at large.

Scheme Not Costly.

By adopting some such plan we would have a well defined means of bringing the needs and opportunities of trade into touch with all those interested. The scheme above outlined would not be costly and should benefit all concerned. The first essential is to have the lists of German importations forwarded to some bureau where they can be available to the manufacturer.

Yours, etc.,

JOHN B. ROBERTSON.

Toronto, September 27th.

* * *

Canada is prickly with hard facts for pessimists.

Make your criticism constructive.

Surely all that talk of a "great country" was not a bluff

The Dominion government's interior elevator at Saskatoon will be ready for operations on October 15th, under the management of Mr. James R. Wilson who has had wide milling and grain experience. The elevator has 84 tubular concrete bins, and can accommodate 3,000,000 bushels of grain.

NEW INCORPORATIONS

Imperial Pipe Line Company of Sarnia is the Largest Company to Receive Charter This Week

Canada's new companies incorporated this week number 24. The head offices of these companies are located in three provinces. The total capitalization amounts to $2,379,000. The largest company is:—

The Imperial Pipe Line Company, Limited, Sarnia, Ont. $1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Manitoba	1	$ 20,000
Ontario	9	1,320,000
Quebec	14	1,039,000
	24	$2,379,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Lindsay, Ont.—Boxall and Matthie, Limited, $40,000. J. Boxall, G. H. Matthie, A. Gamble.

Petrolea, Ont.—Peninsular Motor Sales Company, Limited. $40,000. O. L. Macklem, E. Beasley, A. Beasley.

Berlin, Ont.—The Feick Manufacturing Company, Limited, $40,000. A. W. Feick, C. W. Feick, H. O. Feick.

Welland, Ont. Welland Co-Operative Society, Limited, $10,000. A. Almond, J. D. Smith, W. Baggott.

Brantford, Ont.—Brantford Bowling and Athletic Club, Limited, $10,000. D. J. Wilkes, T. J. Barton, C. Coulson.

Winnipeg, Man.—The New York Salvage Company, Limited. $20,000. H. Spurr, S. N. Constantine Hoannidi, C. E. Halpin.

Toronto, Ont.—Malt Products Company of Canada, Limited. $40,000. A. Foulds, Jr., W. W. Davidson, M. Thurlow. S. Caulfield and Sons, Limited, $40,000. F. J. Foley, D. J. Coffey, R. E. MacKinnon.

Sarnia, Ont.—The Sarnia Metal Products Company, Limited, $100,000. M. S. Babcock, M. MacKenzie, L. Lott. The Imperial Pipe Line Company, Limited, $1,000,000. J. H. Archbold, H. V. Otto, N. L. LeSueur.

Montreal, Que.—Dubrule Manufacturing Company, Limited, $50,000. L. A. Dubrule, P. LaRue Dubrule, M. H. Dubrule. La Compagnie des Marchands Tailleurs, Limited, $150,000. L. A. Blanchet, F. Vanasse, N. Turner. Dominion Fancy Goods, Limited, $30,000. R. T. Heneker, W. S. Johnson, G. A. Coughlin, Union Clothing Company, Limited, $100,000. S. W. Jacobs, A. R. Hall, J. A Budyk. The Power Buffet, Limited, $20,000. P. Hayes, S. Alberg, M. Ostrogursky. H. Cote, Limited. $20,000. H. Cote, H Gendron, L. A. Gendron. E. Leclerc, Limited, $20,000. E. Leclerc, M. Gagnon, L. Leclerc. F. X. St. Jean, Limited, $20,000. F. St. Jean, M. Pharand. Z. St. Jean. Le Garage Laurier, Limited, $40,000. G. Beausoleil, A. F. Jeannotte, L. Gravel Broadway Hotel Company, Limited, $20,000. J. M. Parker, J. T. Parker, J. Morrow. Aime DeMontigny, Limited, $20,000. L. J. S. Morin, C. H. Desjardins, R. Dumouchel Canadian Road Contractors Company, $500,000. A. C. Attendu, B. Danais, F. X. Gagnon. J. A. Lefebvre, Limited, $20,000. J. A. Lefebvre, E Dubuc, A. Lefebvre. Cabana Freres, Limited, $20,000. J. N. Cabana, F. A. Cabana, L Bourgeois.

Application has been made for letters patent for the following companies:—

Port Elgin, N.B.—Botsford Farmers, Limited, $49,000. A. E. Wry, M. G. Siddall, J. G. Lamb.

Saint Stephen, N.B.—The Boundary Fur Farms, Limited, $45,000. J. A. Thompson, T. A. Whirty, C. R. Donaldson.

Kensington, P.E.I.—The High Quality Silver Black Fox Company, Limited, $48,000. F. W. Jardine, G. R. McMahon, J. Pickering, Jr.

"Business as Usual"

BRITISH WAR ORDERS FOR CANADA

The British War Office is placing large orders in Canada for socks, sweaters, blankets, boots and other clothing necessaries of the troops in the field. The Canadian Government has been asked to make necessary arrangements for the supplies required. The war orders will have an important bearing in keeping many woolen and other mills in Canada busy this winter.

Orders for shrapnel shells are also said to have been placed.

BUSINESS IN THE MARITIME PROVINCES

Mr. D. Lorne McGibbon, who has visited the Maritime Provinces recently, says that outside of Sydney and New Glasgow, trade conditions may be said to be normal in the east. The agencies and warehouses of the Ames Holden-McCready and Canadian Consolidated Rubber find business much less affected there by the war than in many other parts of the country. The Maritime Provinces did not experience the recent wild speculative period as elsewhere in Canada. Consequently there is not the same contraction there during the present depression.

BUSINESS MOVING HERE

The Mercury Knitting Mills, of Hamilton, is working overtime, so rapid has been the incoming of sorting orders. The demand for next season's goods will be larger than usual owing to the stopping of exports from Germany and Austria, which formerly shipped considerable knitted goods into Canada.

Canadian companies will be able to build up a trade with the United States, which has hitherto been buying considerably in Germany and Austria.

Announcement is made that the old Tyron Woolen Mills at Charlottetown, P.E.I., are being remodelled and will be reopened by the Reid-Raynor Knitting Mills, Limited, capitalized at $36,000.

NO MORATORIUM FOR BRITISH COLUMBIA

Sir Richard McBride, after carefully considering the question with his Cabinet, has decided that it would be inadvisable to put a moratorium in effect in British Columbia. He thinks that the credit of the province will be impaired, and that such an action will undoubtedly lead to disturbed conditions. He does not feel it necessary to proclaim a moratorium in advance of the Dominion Government, which already has the power to do so, but has refrained. Sir Richard says that in his opinion business can be best maintained by continuing in the usual course, thereby relieving any alarmist cries.

EASTERN TOWNSHIPS CONDITIONS EXCELLENT

"It is not the privilege of every man to go to the front but those who have gone and those who will go, expect us who remain at home to keep the business of the country moving along, that hardships may be averted. It is, therefore, our imperative duty to avoid panic, to combat every sign of discouragement or down-heartedness, to ourselves feel and make others feel that we must and will do business as usual in order that all may be employed. I have reports from a number of boards of trade forming part of this Associated Board which show conditions in the Eastern Townships to be excellent. With the exception of hay, which is below the average, all crops are good. Business is reported as good, and in some cases a considerable improvement over last year; in one or two sections only have reports indicated a slowing down of manufacturing and general business."—Mr. R. C. Wilkins, in an address at the quarterly meeting of Eastern Townships Associated Boards of Trade.

TALK IS RESPONSIBLE

"Talk is largely responsible for the dullness of business just now," says Mr. W. R. Brock, the dry goods merchant. "Conditions in the country are really better than normal. Farmers have never been as prosperous. In sections where calamity howlers do not penetrate, business is really ahead of any previous year."

LARGE LAND DEALS AT MONTREAL

Recent large sales of Montreal real estate include one for $231,000,—the purchase by the St. Cloud Land Company, Limited, of 1,676 lots of land at Pointe aux Trembles, and a transaction in property at the corner of St. Catherine Street and Papineau Avenue, which was sold by Mr. Charles E. Deakin to Mr. John Henry Hand, for the sum of $189,012. The property which is officially known as lots 637-1 to 14 St. Mary ward, has a superficial area of 47,253 feet.

MILLING COMPANY ON 24-HOUR SHIFT

Mr. Hedley Shaw, managing director of the Maple Leaf Milling Company, says that within two weeks his company have shipped 100,00 bags of flour to Bordeaux, France. They have also sent 300,000 to 400,000 bags to Britain and 40,000 to Holland. Meanwhile inquiries are in from Norway and Sweden and some other countries. The company's mills are working 24 hours a day to meet the demand. As a result of the present situation this year promises to be profitable for the milling companies.

ORDERS FOR CANADIAN PAPER

Mr. J. N. Greenshields, president of Wayagamack Pulp and Paper, states that before the beginning of the war there were 27 mills in Germany making kraft paper and shipping it all over the world. This supply had been completely cut off and orders were now being received by the Wayagamack Paper Company from firms who heretofore had been direct buyers from German houses. A large order running into four figures had been received by that company within the last two days. All that was necessary for industrials which were in a position to handle business in the new markets was to make an effort and they could secure it.

TEN THOUSAND ACRES SOLD

A syndicate, composed of United States bankers and financiers, has bought 10,000 acres of land 26 miles north of Bassano. Buildings are being erected on the property, and the United States capitalists intend to raise extensively cattle and hogs and go in for other branches of mixed farming. Big herds of pure-bred cattle will be placed on the land, probably next spring, by Mr. A. C. Weaver, who has been appointed manager. The men interested in the ranching scheme include Messrs. Jos. Talbot, vice-president of the New York National City Bank; Homer A. Miller, director of the Chicago North Western Railway Company; J. Felton, president of the Chicago Great Western Railway Company; E. C. Fienkdiene, president of the Green Bay Lumber Company, Des Moines, Iowa; H. Taylor banker, Bloomfield, Iowa; and others. The land, which is unimproved, was purchased from the Canadian Pacific Railway.

◆

A moratorium sounds good, but it is not nourishing.

"Left with the underwriters" is not half as bad as being left alone with those few who have lost faith in the Empire's granary.

The German government has promised to pay a big bonus on war loan out of indemnity received from the Allies, provided their army is successful. Krupps are reported to have subscribed $12,500,000 and Westphalian manufacturers $20,000,000. The total subscriptions thus far are reported to be $1,750,000,000.

PERSONAL NOTES

Mr. S. L. Spafford, of Lennoxville, has been elected to the directorate of the Sherbrooke Railway and Power Company.

Mr. E. F. Hebden, general manager of the Merchants Bank of Canada, has joined the board of the Guarantee Company of North America, Montreal.

Mr. W. P. Bonsall, an old employee of Dun's Agency, died at Toronto. Before entering the well-known commercial agency he was engaged in financial journalism. He was with Dun's Agency for 40 years.

Mr. C. E. Robertson, who has been with the Great-West Life at Calgary, has been appointed assistant superintendent of agencies of the Dominion Life. Mr. Roberston's early training was with the Scottish Life office of Edinburgh. Later, he represented the Canada Life in this country.

Mr. J. S. Hough, K.C., has been elected a director of the Union Bank of Canada, to succeed the late Mr. F. W. Huebach. Mr. Hough is one of the members of the legal firm of Hough, Campbell and Ferguson, and is a director of the Royal Trust Company, Royal Exchange Association, Northwest Fire Insurance Company, Lethbridge Collieries, Canada Coal Company and the Union Lumber Company.

Captain J. F. Weston, general manager of the Imperial Life Assurance Company, is at the head of the Insurance Rifle Club formed in Toronto. The members had their first meeting at the Armories the other day, about 120 being present, including a number of managers and other prominent officials of the various companies. The squad was drilled by Staff Sergeant Wright. The ranges were in charge of Staff Sergeant Medford and Color-Sergeant Bullock. The other officers are:—Alfred Wright (London and Lancashire) treasurer; R. W. Kerr (Canada Life), secretary; committee—A. M. M. Kirkpatrick (Aetna), J. B. Laidlaw (Norwich Union), Percy Quinn (Royal), C. S. Wainwright (Western), C. E. Withers (Dominion of Canada Accident) and C. W. I. Woodland (Employers' Liability). Thus are the insurance men keeping up the traditions of the profession—duty, bulls-eyes and a good policy.

Lieut.-Col. Hon. J. S. Hendrie, of Hamilton, minister without portfolio in the Ontario cabinet, has been appointed Lieutenant-Governor of Ontario in succession to Sir John Gibson. This appointment will be generally popular. Lieutenant-Colonel Hendrie is a prominent and useful citizen, and has filled the many public positions he has held with ability and tact. He was born and educated in Hamilton and has resided there all his life. He was born on August 15, 1857, being a son of the late William H. Hendrie. He received his education in a private school, then in Hamilton Grammar School, and later at Upper Canada College. Colonel Hendrie was a contractor for years, having built several railways in Canada and the United States. He was a promoter of the Hamilton Bridge Works, of which he has been president. During 1901-03 he was mayor of Hamilton. Amongst his other business connections there were:—Director Hamilton Board of Trade, director Great West Life Assurance Company, director of the Hendrie Company, of the Niagara Navigation Company, of the Northern Navigation Company, of the Mercantile Trust Company and of the Bank of Hamilton. He was first elected to the Ontario legislature for the riding of West Hamilton in 1902 and has remained in the House since. He has been a minister without portfolio in the Ontario government since its formation in 1905. In 1906 he was appointed a member of the Ontario Hydro Electric Power Commission. He was appointed a member of the National Battlefields Commission in 1908, and was chairman of the Railways Committee in the legislature.

Sir James Whitney, K.C.M.G., who died in Toronto last week, was one of the comparatively few bluff, straightforward men in Canadian politics. Political friends and foes alike admired him because he was honest and courageous. His death removes one of the most picturesque and useful workers of the Dominion. He was born in Williamsburg, Ontario, on October 2nd, 1843 and was educated at the public schools and at the Cornwall Grammar School. He studied law in the office of the late John Sandfield Macdonald, at one time premier of Ontario. Sir James was called to the Bar in 1876, and practised his profession at Morrisburg. He was first elected in a by-election in January, 18[illegible], from Dundas, and represented that constituency continuously up to the time of his death. Eight years after he entered the legislature, or in 1896, he was chosen leader of the Opposition, and on the defeat of the Ross government in 1905 was called upon to form a new government. He took office at first as premier and attorney-general, but in 1905 relinquished the office of attorney general and assumed that of president of the council. He was knighted by King George. Sir James contributed the following message to *The Monetary Times Annual*, published early this year:—"Ontario has had a year of great prosperity and can see still greater things ahead. Every advance made by western Canada gives an impetus to the older provinces by creating new demands for agricultural and manufactured products and by compelling enlargement and development in every line of business. In Ontario we are endeavoring to live up to our opportunities and we are seeking in many ways to improve ourselves. Many millions have been and are being added to the value of our agricultural and dairy products by means of scientific agricultural instruction. In every corner of the province the education of the people is being advanced in a thoroughly practical and efficient way, so that to-day Ontario has 25 per cent. less illiteracy than it had ten years ago when it was considered to be in the van of educational progress. Our highways will, in a short time, undergo a transformation through the agency of a general plan now being formulated by a government commission, and in this way modern methods of quick and cheap transportation will be encouraged and rendered possible throughout the province. We have provided cheap power by means of the Hydro-Electric Commission for the great majority of the people, and we are proceeding to furnish still cheaper power for a still larger number of the people. Ontario is solving, in a way which interests the whole world, the great question of the treatment and cure of criminality."

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September 25th:—

Peterson Lake Silver Company Mine, 62,060; Dominion Reduction Company, 86,710; La Rose Mines, Limited, 80,740; Cobalt Lake Mine, 64,150; Right-of-Way Mine, 34,210; Cobalt Townsite Mine, 85,010; McKinley-Darragh-Savage Mine, 173,140; total, 586,020 pounds, or 293 tons. The total shipments since January 1st, 1914, are now 27,985,433 pounds, or 13,992 tons.

Week ending September 25th, 1914:—

New Liskeard Casey Cobalt Mine, 130,076 pounds, or 65 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons, in 1911, 25,089 tons; in 191[illegible], 21,509 tons; in 1913, 20,261 tons.

◆

ENTITLED TO HELP FROM PATRIOTIC FUND

To have a just claim on the Canadian Patriotic Fund, it must be shown that at the time of reporting for duty, the soldier was a resident of Canada and was supporting in Canada the wife, family or dependent relative who now applies for aid. The fund recognizes as being on the same basis, not only Canadian volunteers and regulars, but also British army and navy reservists, and French, Belgian, Servian, Russian and Japanese reservists who, leaving dependants in Canada, have gone to join the colors. These soldiers are all fighting, side by side, for the common cause and their families in Canada are entitled to equal consideration.

Aid can be granted only while the soldier is on active service. It may commence, however, from the time that he gives up his employment or leaves his home and be continued so long as he is with his regiment, allowing reasonable time for his return journey to his home in Canada. The names of families receiving help should be transmitted to the central executive of the fund for verification and record.

You may not be able to do business just as usual, but much is accomplished by trying.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Caistors Corners, Ont.—Mr. Lymburner's barns. Loss unknown. Cause, lightning.

Woodhouse, Ont.—September 23—Mr. J. Farr's barn. Loss unknown. Cause, lightning.

Montreal, Que.—September 23—1180 St. Germain Street. Loss, $30,000. Cause unknown.

Renfrew, Ont.—September 25—Mr. J. Mitchell's store. Loss, $2,500. Cause unknown.

Victoria, B.C.—September 22—Brentwood Hotel. Loss, $300. Insured. Cause, sparks.

Albury, Ont.—September 28—Mr. W. Peck's shed and barn. Loss, $2,000. Cause unknown.

Marmora, Ont.—September 28—Mr. J. Green's hotel, Crow Lake. Loss and cause unknown.

Welland Port, Ont.—Mr. M. Michener's barns, Dilts Road. Loss unknown. Cause, lightning.

Huntsville, Ont.—September 17—Mr. G. Holinshead's barn, Brunel. Loss and cause unknown.

Belgrave, Ont.—September 22—Mr. G. Daly's shed and stables. Loss unknown. Cause, lightning.

Niagara Falls, Ont.—Ontario Power Company's barn, Gray farm. Loss unknown. Cause, lightning.

West Carafraxa, Ont.—September 23—Mr. J. Brett's barn, 2nd Line. Loss, $3,000. Cause, lightning.

Calgary, Alta.—September 21—Messrs. Milligan's stable, 4½ Street and 7th Avenue. Loss and cause unknown.

St. Hilaire, N.B.—September 15—Eighteen buildings destroyed. Loss, $[illegible]. Cause, supposed children.

London, Ont.—September 23—Messrs. Hoskins and Reynolds' store. Loss, $1,000. Cause, rats and matches.

St. Catharines, Ont.—Mr. W. Burtch's slaughterhouse and shed on city's limits. Loss, $3,500. Cause unknown.

Weyburn, Sask.—Mrs. Twist's residence, Third Avenue S. Loss unknown. Cause, supposed incendiary. One death.

South Vancouver, B.C.—September 23—Three houses, 315, 325, 335, 20th Avenue. Loss, $7,000. Cause unknown.

Halifax, N.S.—September 26—Intercolonial Railway's freight shed. Loss, $1,500. Cause, supposed crossed wires.

Timmins, Ont.—September 29—Gold Mint Hotel. Loss, $3,500; Mr. C. See's premises. Loss, $2,000. Cause unknown.

New Westminster, B.C.—September 23—Launch of Schakke's machine works. Loss unknown. Cause, gasoline leak.

Morris Township, Ont.—September 22—Mr. S. McEwan's barns, etc. Loss unknown. Cause, spark from threshing engine.

Cowdery, Man.—September 24—Mr. L. O. Boman's house and stable and Mr. L. Olson's stable. Loss unknown. Cause, bush fires.

Coburg, Ont.—September 25—Canadian Northern Railway's freight sheds. Loss unknown. Cause, supposed lantern ignited gasoline.

Essex, Ont.—September 28—Mr. McConnell's general store and Mr. H. Richardson's store. Loss, $45,000. Insurance, $35,000. Cause unknown.

Berlin, Ont.—September 28—Mr. S. Brubacher's barn and shed, Edna Street. Loss, $10,000. Cause, supposed spark from threshing machine.

Vancouver, B.C.—September 26—Premises occupied by the Metropolitan Press Company, the Pacific Printers and A. R. Coutts and Company, electric supplies. Smoke caused the chief damage. The loss was some $200.

St. Stephens, N.B.—September 29—Messrs. Clark Brothers' shoe factory, King Street and Messrs. Pinkerton, Russel and McClure's residences. Loss, factory, $35,000, other buildings, $10,000. Cause, supposed heater.

Langley, B.C.—September 7—Mr. F. Fisher's wood barn. Value of building, $1,000; value of contents, $800. Insurance on same $600, Mutual Company of British Columbia. Total loss, $1,800. Cause, supposed to be from spark from bog fire.

Collingwood, Ont.—September 19—Storehouse of Henderson Estate, Hurontario and First Streets. Loss and cause unknown.

September 20—Mr. J. Horton's residence, High Street. Loss unknown. Cause, upset lamp.

Saskatoon, Sask.—Fire Chief Heath's report for the week ended September 20, shows the following fires:—

September 16—Restaurant, 214 1st Avenue S., owned by S. B. Dale. Cause, woodwork too close to stove. No loss.

September 20—Rubbish heap in rear of Great West Furniture Company.

Quebec, Que.—September 22—Messrs. Marier and Trudel's shoe factory. Loss, $55,000. Insurance, Marier and Trudel—Liverpool-Manitoba, $3,500; Liverpool and London and Globe, $3,500; Etna, $2,000; Continental, $4,000; Caledonia, $2,000; German-American, $2,000; Sun, $1,500. This comprises $11,000 on stock, $1,100 on machinery and $400 on patterns. F. Blouin, owner of building—German-American, $4,500; Hartford Fire, $4,500; Royal, $5,000; Scottish Union, $2,500. This is divided as follows:—On stock, $11,500; on machinery, $5,000. Mr. F. Blouin, on building—Home, $2,500; British, $3,000; Hartford, $2,500; Scottish Union, $1,400. Mr. Luc Routhier—Quebec, $4,500; Norwich Union, $1,500; General Insurance Company, $2,500; Union of Paris, $2,500.

Toronto, Ont.—Fire Chief Thompson's report for the week ended September 22, shows the following losses:—

September 18—Shed of James Pears, rear 120 Eglinton Avenue. Cause unknown. Loss, $200; building of Russell Motor Car Company, 94-100 Richmond Street W. Cause, ignition of gasoline. Loss, contents, $300.

September 19—Dwelling of Elwood Tweedle, 66 Charles Street W., owned by Mrs. Canfield, 154 Collier Street. Cause, incendiary. Loss, contents, $275; building, $100; stores and dwellings of Palmer and Elliott, 173 Avenue Road, and C. H. Brown, 175 Avenue Road, owned by J. T. Peers. Cause unknown. Loss, contents, $500; building, $90; contents, $25; building, $10.

September 20—Dwelling of H. Young, 175 Christie Street, owned by R. W. Dockeray. Cause, gas stove set fire to floor. Loss, contents, $25; building, $25.

September 21—Dwelling of A. B. Taylor, 168 Jarvis Street. Cause, spirit lamp set fire to bedding. Loss, contents, $100.

September 22—Dwelling of C. H. Stokes, 52 Moscow Avenue. Cause unknown. Loss, contents, $50; building, $30.

◆

GIFTS TO THE MOTHERLAND

A British government return of "Correspondence relating to gifts of foodstuffs and other supplies to his Majesty's government from the Overseas Dominions and Colonies" has been published, which shows that gifts of war supplies have been as follows:—

Canada—Dominion government, 98,000,000 lbs. of flour; Alberta, 500,000 bushels of Alberta oats; Nova Scotia, 100,000 tons of Nova Scotia coal; Quebec, 4,000,000 lbs. of cheese; Prince Edward Island, 100,000 bushels of oats, also cheese and hay; Ontario, 250,000 bags of flour; Saskatchewan, 1,500 horses, value $250,000; New Brunswick, 100,000 bushels of potatoes; British Columbia, 25,000 cases of canned salmon; Manitoba, 4,900,000 lbs. of flour; Australia—Messrs. Cullen and Wallace, Rutherglen, Victoria, 1,000 gallons of port wine; collected by Brisbane Newspaper Company, Limited, 50 cases condensed milk, butter, bacon, beef, condensed milk and arrowroot; Barbados government, £20,000—accepted in form of sugar; British Guiana government, 1,000 tons of sugar; Falkland Island government, £2,500, collected privately, £750, to National Relief Fund; Jamaica government, sugar; Leeward Islands government, £5,000—accepted for Prince of Wales's Fund; Mauritius government, 1,000,000 lbs. of sugar for army, 1,000,000 lbs. of sugar for navy; and Southern Rhodesia—the Agricultural Union, maize.

◆

Marine underwriters, because of the activity of the German commerce destroyers along the coast of India, have raised insurance rates to India and the Far East to 5 per cent. The rate to South American ports has likewise been advanced to 3 per cent.

SEPTEMBER FIRE LOSSES

Total Was Smallest, With One Exception, in Four Years

The Monetary Times' estimate of Canada's fire loss during September amounted to $726,278, compared with August loss of $2,021,379 and $1,468,324 for the corresponding period of last year. The following is the estimate for the September losses:—

Fires exceeding $10,000	$473,550
Small fires	118,866
Estimates for unreported fires	133,862
	$726,278

The fire waste in each province for the first nine months of 1913 and 1914 has been estimated by *The Monetary Times* as follows:—

	1914.	1913.
Ontario	$ 6,687,661	$ 6,667,496
Quebec	3,823,269	3,467,226
British Columbia	1,477,438	862,896
New Brunswick	1,711,162	1,034,580
Alberta	1,001,329	3,461,861
Manitoba	755,092	2,039,337
Saskatchewan	750,092	1,915,106
Nova Scotia	517,774	1,508,692
Prince Edward Island	36,747	451,066
	$16,760,564	$21,408,260

The following are the monthly totals of the losses by fire for 1914, compared with the three previous years' losses:—

	1911.	1912.	1913.	1914.
January	$2,250,550	$3,002,650	$3,013,385	$2,706,312
February	941,045	1,640,153	2,037,[illegible]86	2,020,740
March	852,380	2,261,414	1,710,756	2,1[illegible]0,552
April	1,317,900	1,355,055	1,470,622	1,916,238
May	2,564,500	2,251,815	2,123,868	1,539,502
June	1,151,150	4,229,412	3,069,446	1,267,416
July	5,384,300	1,741,371	2,579,698	2,033,130
August	920,000	1,164,760	3,034,775	2,021,370
September	1,123,550	883,049	1,468,324	726,278
October	580,750	1,416,218	1,383,572	......
November	1,506,500	1,184,010	2,200,486	......
December	2,866,050	1,769,905	1,354,300	......
Totals	$21,459,575	$22,000,712	$26,346,618	$16,760,564

The fires at which the loss was estimated at $10,000 and over were:—

Deep Brook, N.S., Sept. 2	Hotel	$50,000
Winnipeg, Man., Sept. 3	Hospital laundry	10,000
Midale, Sask.	Business section	47,550
Sarnia, Ont., Sept. 9	Lumber piles	20,000
Winnipeg, Man., Sept. 9	Steamer	50,000
Moncton, N.B., Sept. 15	Car barn	11,000
St. Hilaire, N.B., Sept. 15	Village	60,000
Montreal, Que., Sept. 21	Stores	40,000
Quebec, Que., Sept. 22	Factory	55,000
Montreal, Que., Sept. 22	Tenements	30,000
Essex, Ont., Sept. 28	Stores	45,000
Berlin, Ont., Sept. 28	Barns, etc.	100,000
St. Stephens, N.B., Sept. 29	Factory	450,000

Of the presumed causes 7 were gasoline, 6 lightning, 6 sparks, 6 incendiary, 4 overheated pipes, 4 electrical defects, 2 defective chimneys, 2 engine backfiring, 2 cigar stubs, 1 each explosion, matches, smoking in bed, bush fire, gas leak, spirit lamp, rats and matches, heater, spontaneous combustion, and explosion.

The structures damaged and destroyed included 38 dwellings, 26 barns and stables, 18 stores, 19 sheds, 9 hotels, 5 factories, 3 railway stations, 1 each slaughterhouse, evaporator, clubhouse, bakery, powder plant, car barn, sash and door factory, spinning mills, gasoline launch, laundry, steamer, business section, and village.

There were burned 10 horses, 3,000 bushels of oats, 1,000 pounds of flour, 400 loaves bread, seven stacks of grain, 4 automobiles.

During August 3 persons were reported as having lost their lives through fire.

The following table compiled by *The Monetary Times* shows deaths caused by fire during the last six years:—

	1909.	1910.	1911.	1912.	1913.	1914.
January	10	27	27	27	14	26
February	8	15	12	11	21	18
March	16	20	18	24	22	27
April	18	37	20	15	11	22
May	21	15	28	18	33	8
June	16	52	13	6	18	12
July	4	15	110	9	9	8
August	17	11	22	16	29	3
September	10	10	13	6	27	5
October	26	16	17	21	15	..
November	34	19	20	22	24	..
December	33	19	17	28	13	..
Totals	219	256	317	203	236	129

The fires at which fatalities occurred were:—

Weyburn, Sask.	Burning building	1
London, Ont.	Burning building	1
Moose Jaw, Sask.	Threw gasoline on fire	1
Moose Jaw, Sask.	Pot of tar caught fire	1
Mawer, Sask.	Lit fire with gasoline	1

◆

UNITED STATES FIREWORKS COMPANY IN CANADA

The International Fireworks Company, of Schenectady, N.Y., have purchased a site in East London, Ont., adjoining the Grand Trunk Railway's Stratford branch and the Canadian Pacific Railway's main line, and in the vicinity of the Dominion Abattoir Company. Mr. Gordon Philip, the energetic industrial commissioner at London, tells *The Monetary Times* that Mr. Henry Bouttieri, a representative, recently visited London and completed arrangements for the establishment of a branch factory there to look after the Canadian business of the company. He will return early this month. The new company may build immediately and will employ about 40 hands.

◆

LIABILITY INSURANCE AT LETHBRIDGE

The tender for the liability insurance of the city of Lethbridge has been awarded to the Alberta Loan and Investment Company. City Commissioner Grace is reported to have decided, after considering the service given by the Guardian Accident Company and the fact that they had carried the past year's insurance on a city note, also that their agents, the Alberta Loan and Investment Company, were heavy taxpayers, to insure with that company.

The following tenders were received:—

	Per hundred.
Railway Passengers' Assurance Company	$2.00
North American Accident Insurance Company (Lethbridge Weyburn Realty Company)	1.25
Employers' Liability Assurance Corporation (Wilson & Skeith)	1.20
Canada Accident Assurance Company (Stafford & Stewart)	1.15
Globe Indemnity Company of Canada (Wilkie & Stephens)	1.00
Yorkshire Insurance Company, Limited (N. B. Peat & Company)	1.00
Guardian Accident and Guarantee Company (Alberta Loan and Investment Company)	1.00

The policy runs until September, 1915

◆

If it keeps up, we will find a new occupation in watching the dividends pass.

This is not the time to stop the wheels to mark the passing of the British Empire; it is the time to make them buzz faster to mark the passing of Berlin bossism.

Just to show their confidence in him, admirers have presented Mayor Martin, of Montreal, with $10,000 in sovereigns, a sword and a gold headed cane. So the mayor can now finance the city, go to war, or promenade on the civic balcony, just as he pleases, and without asking anybody.

SEPTEMBER MUNICIPAL BOND SALES

More Bonds Sold Than in August in the Home Market

The municipal bond sales in Canada for September, as compiled by *The Monetary Times*, amounted to $510,950, compared with $411,755 for August and $1,663,260 for the corresponding period of last year.

As in August no Canadian municipal loans were floated in London.

Chicago purchasers acquired $90,000 5 per cent. Edmonton debentures making the total public United States purchases for nine months $5,098,000, as compared with $20,168,053 for the whole of 1913.

The following are the particulars of the September municipal bond sales in Canada by provinces:—

Saskatchewan	$174,450
Ontario	178,500
Nova Scotia	58,000
Alberta	100,000
	$510,950

The following table, compiled from the records of *The Monetary Times*, shows the sales in the Dominion during the first nine months of 1914, compared with the three previous years:—

	1911.	1912.	1913.	1914.
January	$ 420,337	$2,133,531	$1,337,500	$1,628,337
February	1,037,287	2,596,378	1,038,806	5,995,336
March	6,271,925	1,926,716	335,492	5,108,776
April	3,910,288	927,160	3,693,857	2,708,153
May	3,946,047	1,928,748	880,630	5,655,755
June	3,983,670	1,690,344	2,435,726	4,299,294
July	1,594,566	1,067,476	1,591,924	2,154,260
August	1,493,507	1,640,547	526,300	411,755
September	1,748,778	1,998,605	1,663,260	478,950
October	1,730,075	1,060,597	3,452,282	....
November	2,915,765	1,396,664	2,481,062	....
December	1,243,593	491,590	1,113,400	....
Total	$30,295,838	$19,767,256	$20,550,239	$28,472,616

Other important statistics relative to municipal financing are loans by chartered banks. The following table gives the loans by Canada's chartered banks to municipalities during the thirteen months' period, July, 1913, to July, 1914, inclusive. The first-mentioned month's returns are the first ever issued in a separate column in the monthly statement of chartered banks. The highest total shown is in July, 1913, $43,121,384, and the lowest in January, 1914, $29,301,620. Since then the figures have shown an upward tendency reaching $30,664,534 in August of this year.

July—1913	$43,121,384
August	41,310,281
September	37,465,383
October	37,846,369
November	35,173,817
December	30,518,573
January—1914	29,301,620
February	30,372,854
March	31,800,843
April	30,168,812
May	33,680,577
June	37,260,571
July	36,372,334

A comparison of the last two months' figures compared with those of the previous year follows:—

	1913.	1914.
July	$43,121,384	$36,372,334
August	41,310,281	39,664,534

The following are the details of municipal bond sales:—

Saskatchewan.

	Amount.	Rate %	Maturity.
Francis	$ 5,500	6	1924

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

BLAMING THE WAR

The war is shouldering much undeserved blame for certain conditions in Canada. One particular fact must not be overlooked. Whether or not war had come, Canada had commenced a necessary period of readjustment. This was well under way when the European atmosphere became thick with ultimata. War has not made the readjustment less necessary. It is hastening it, and somewhat inconveniently in various directions. In other ways, it is mitigating the adverse conditions which must accompany a national change from a lengthy period of heavy construction, to what we hope will be a prosperous era of more production. The transition period is an awkward one. In passing through it, we have to prune our imagination and paper fortunes to hard facts. That the war is softening the natural hardships of the transition is seen in active factory plants, which to-day would have been working at greatly reduced capacity, had it not been for government war orders; in the fact that only a fair wheat crop in Western Canada is fetching high prices because of the war; in the fact that the temporary loss of population is helping to solve the employment problem; and in other facts.

When analyzing conditions, therefore, we should focus upon them the lenses both of the war and of economic readjustment, not the war only. The readjustment would have come whether or not the war had come.

This phase of the situation has been discussed on several occasions in these columns, and it was pleasing to hear Mr. J. W. Flavelle put the matter bluntly and effectively in a recent speech at the Canadian Club, Toronto. After referring to a disposition in some quarters to make the first burden of the trouble rest upon the working people, and to reduce the working staff, Mr. Flavelle said: "This is a readjustment of the affairs of Canada, and was inevitable with us, even without any war. When the readjustment has taken place, let us play the part of men. If we have been foolish and have entered upon engagements which we cannot meet, let us take our punishment, no matter how bitter it is, and let us start over again and learn that honest labor is the only road to success."

Similar sentiments were expressed by Mr. F. J. Dixon, member for Winnipeg Centre, in the Manitoba Legislature. He stated that the present depression is not caused by the war. There was depression before the war, and the war made it more acute. In fact, the depression had been caused largely by the land gamblers. They needed a lesson, and were no more entitled to protection than poker players and speculators in theatre tickets and other individuals who were trying to get something for nothing. Continuing, Mr. Dixon said: "We are suffering from a depression following an attack of land speculating fever, and if we are all taught a sharp lesson; if we learn that land speculation is a blighting curse to the community, it will augur well for the future of this country."

The man who has been living upon his wits, nerve and paper, must give way to the man who will help in the work of production. Discussing this point, Sir George Paish, the English authority, on his return to London after a visit to Canada in 1913, said: "British investors, who have shown so much faith in the future of Canada by subscribing capital freely for the government, municipalities and railways, would now do well to consider the question of forming trusts and loan companies for the purpose of assisting settlers on to the land, especially as farm lands in Canada are not at inflated prices. By so doing they would render powerful help to the Canadian people to produce the natural wealth for which so much municipal, railway, banking and trading machinery has been provided. It is evident that the machinery created to take care of the production of the coustry is sufficient to deal with at least twice, if not three times, the existing output, and it is obvious that the burden of interest upon the immense amount of capital supplied will be a heavy one until the productive power of the country is greatly increased."

Sir George also stated, that if the British people continue to invest in Canada, and Canada energetically applies itself to production, "the growth of production and income will be so rapid that even those people who are confident about the future of Canada will be surprised by the vastness of the country's output in a few years."

◆

Sir Rodmond Roblin said that the Manitoba bill with regard to real estate obligations "was doing no injury to the loan companies, but even it were, should they not," etc.? The answer seems to be, "Yes, no, possibly."

* * * *

While President Wilson is frowning on United States loans to belligerent nations, an order for 1,000 sets of artillery harness and 500 cavalry saddles has been placed by the British government in Richmond, Va. This neutrality business is a commercial chameleon.

* * * *

Every Canadian should read the official correspondence which passed between the ambassadors and British government prior to the outbreak of war. These documents are known as "white papers." A copy of the correspondence in the form of a blue book, "Documents Relating to the War," has been issued by the secretary of state, Ottawa. The documents tell an unvarnished story and afford material for individual deductions.

ELECTION NOT WANTED

Those who have started the talk of a general election in Canada are poor imitations of good citizens. Those who are spreading the talk are as bad. Those who support it are worse. The British Empire is engaged in the greatest struggle of its history, and the first in which the concentrated labor, energy and sacrifice of its units have been needed. To make political capital of the situation is nasty work. If certain members of the Dominion cabinet want a general election, they should recognize, first, that the people of Canada do not want one. Our citizens could not be enthusiastic in a political fight at home, when such a war rages abroad. About the causes, justice and stakes of that war, all Liberals and Conservatives in Canada are agreed. We may well be content with the leadership of Borden and the loyal assistance of Laurier. There is no need whatever to celebrate the government's policy with a general election. Whichever party had been in power, the same policy would have prevailed in this time of crisis.

◆

If the Germans in the United States invade Canada, we will show them some fine farm lands at reasonable prices.

IMAGINARY LOAN INQUIRIES

A dispatch from New York last week stated that several Canadian corporations had recently sounded financial interests there with a view to negotiating loans. It added: "According to the head of an important banking institution to which most of the inquiries have been made, the aggregate of the Canadian requirements is about $100,000,000, all for short terms. The amounts mentioned have ranged from $500,000 to $40,000,000. Among the principal would-be borrowers on behalf of whom the inquiries have been made are the large railroads."

The statement was also made in the same dispatch that: "Canadians never have been seen in the New York market when conditions were normal and when there might have been some little profit in underwriting loans for them."

Doubting very much the statements cited in this widely-circulated message, *The Monetary Times* made inquiries in New York and found that the statements had been greatly exaggerated, and, in the main, are incorrect. The dispatch is largely a revamp of a story that was going the rounds of the papers about a week or ten days ago, in which it stated the Canadian Pacific Railway was endeavoring to effect a loan in New York, and in which there was not a word of truth. There are one or two municipalities making tentative inquiries, but beyond that the story is made out of whole cloth. The statement that Canadians never have been seen in the New York market when conditions are normal is untrue, and shows ignorance of the matter discussed. Many New York houses have brought out at different times, within the last year or two, various Canadian municipal and other issues.

◆

Help business; don't make every day look like a wet one.

TRADING WITH THE ENEMY

Do not trade with the enemy. Business done by us with Germany or Austria sends our money to those countries. There it helps to buy arms and ammunition to use against the British army and the overseas contingents. Besides which, it is illegal to do business with the enemies of the British Empire. The attention of the department of trade at Ottawa has been directed to circular letters sent out from New York and other cities outside of Canada in the interests of German firms, either through brokers or receivers. The purpose of these circulars is to continue in this indirect way business which has been broken off on account of the war, and is a clear violation of the proclamation which prohibits trade between Canada and people of the enemy countries. The British Empire is at war with certain countries, and war, to be consistent and effectual, must run along certain trade lines as well as by military operations. Canadians should not be misled into affording help and comfort to producers of the enemy by this indirect channel. Canadian merchants run a great risk in having anything to do with such indirect business. At this particular time, says Sir George Foster, we must all be loyal in supporting first the makers and producers in Canada and the Empire, and thereafter those doing business in the countries of our allies. Parties receiving circulars such as noted above should send them to the department of trade and commerce at Ottawa.

◆

It may soon be, "Buy a barrel of Calgary oil stock."

PAYMENT OF DIVIDENDS

Those responsible for the declaration of dividends should know that the reasons advanced for deferring dividends are being scrutinized carefully by shareholders. The shareholder has a long memory. Things happening now he will not forget in those days after the war, when his accumulating funds are sought again. The question has arisen as to whether there are not too many announcements of deferred dividends. The Montreal Gazette rightly says that the example having been set that a dividend may be deferred without any of the commotion that accompanies such an action during stock market times, the danger is created that the thing may develop into something epidemic—that the laggardly board of this or that company may not exert itself to the utmost to maintain its obligations to shareholders, while at the same time keeping its affairs in a quite healthy situation.

There should be proper caution and economy on the part of directors. At the same time, they should remember dividend disbursements are a very important unit of the endeavor to do "business as usual." The effort to practise this worthy motto is becoming successful in England and shows signs of better results in Canada. Dividends should not be deferred, unless it is proper and legitimate financing to do so. Shareholders and directors should agree on that point.

EAT APPLES AND FISH

The war will have the effect of making us realize more than ever that certain excellent foodstuffs, although grown in Canada, are not being eaten generally by Canadians. In previous years, our best apples have been shipped abroad. This year the markets are curtailed and there will be no excuse for the Canadian home to plead ignorance of the flavor of the many brands of splendid apples grown in this country. The fruit is unusually plentiful and cheap this year and every cellar in Canada should store at least one barrel of an economical foodstuff which may be treated in so many pleasing ways. The department of trade and commerce at Ottawa will advertise during the next few weeks the value of the Canadian apple as a food product.

From the department of the naval service, Ottawa, comes a useful booklet, "Fish, and How to Cook It." It discusses fish as food, and gives a large number of recipes which will be useful to the housewife. The total value of all kinds of fish and fish products taken by Canadian fishermen is about $35,000,000 annually. The booklet points out that fish is a comparatively cheap foodstuff. It is not used in Canada as extensively as it should be. We sell much fish that might be well employed on our own tables.

DEBENTURES AWARDED.

Barton Township, Ont.—$2,[illegible] 5 per cent., to Mr. H. Barker.

Simcoe, Ont.—$40,000 6 per cent. 30 instalments, to Bank of Hamilton.

Kentville, N.S.—$2,000 5 per cent., to Eastern Securities Company, Halifax.

Edmonton, Alta.—$[illegible]00,000 5 per cent., to Messrs. Ulen and Company, Chicago.

Halifax, N.S.—$55,000 4½ 30 years, to Messrs. J. C. Mackintosh and Company, F. B. McCurdy and Company, and Eastern Securities Company, Halifax.

◆

The Bank of Montreal is one of the few large banking institutions of the continent which did not avail itself of the moratorium in its business dealings in London.

Peterborough's civic officials have taken over the plant and stock of the Peterborough Light and Power Company, and turned it over to the utilities commission (water and power), which will administrate it.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Richmond, B.C.—The provincial bond department has granted the municipality a certificate to issue $40,000 waterworks debentures.

New Westminster, B.C.—A certificate has been issued to the city by the provincial bond department for bond issues totalling $146,000.

Westmount, Que.—The sinking fund commissioners desire to acquire $4[illegible],000 debentures, those of Westmount preferred. A. F. Bell, secretary-treasurer.

Saanich, B.C.—Three by-laws, involving $825,000 and an agreement to purchase water from Victoria, have been carried by the ratepayers. A $50,000 school by-law was defeated.

Delta, B.C.—A by-law to issue $21,225 5 per cent. 20-year debentures has been passed by the council, and the sale of $22,608.74 of 20-year 5 per cent debentures has been authorized.

London, Ont.—The board of control have decided to ask the Dominion Government to pay $50,000 of the federal share towards the federal square scheme, as, until this money is forthcoming, the city hall project is stopped.

Montreal.—The board of Catholic school commissioners have adopted a resolution to issue debentures to the amount of $1,000,000, half of the bonds to be given as collateral to the Provincial and Hochelaga Banks for a loan of $400,000, it being arranged that the banks should not make use of these bonds so long as the board paid interest on the loan.

Montreal.—Interest on treasury bonds amounting to $1,460,000 will be paid immediately, according to Controller Hebert's statement. This will not be paid out of money obtained from the Bank of Montreal, but constitutes certain moneys saved by the stoppage of public works. The $3,500,000 which the city is receiving from the Bank of Montreal is to be distributed in the following manner. One million dollars for administrative purposes, $1,500,000 interest, and $1,000,000 for overdrafts and other immediate expenditures.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the first three weeks in September:—

Canadian Pacific Railway.

	1914	1913		Increase or decrease
Sept. 7	$2,110,000	$2,496,000	—	$386,000
Sept. 14	2,496,000	2,462,000	+	34,000
Sept. 21	2,578,000	2,769,000	—	191,000

Grand Trunk Railway.

	1914	1913		Increase or decrease
Sept. 7	$1,[illegible]88,113	$1,099,259	—	$ 11,146
Sept. 14	1,096,942	1,144,856	—	47,914
Sept. 21	1,134,021	1,[illegible]82,811	—	51,210

Canadian Northern Railway.

	1914	1913		Increase or decrease
Sept. 7	$ [illegible]2[illegible]	$ [illegible]82,400	—	$ [illegible]2,400
Sept. 14	458,7[illegible]	3[illegible]8,[illegible]00	—	[illegible],700
Sept. 21	56[illegible],7[illegible]	48[illegible],2[illegible]0	+	[illegible]8,500

The Canadian Pacific Railway's gross earnings for August were $9,917,7[illegible]4, working expenses were $[illegible],554,[illegible]7[illegible], and net profits, $[illegible],[illegible]6[illegible],158. For two months ended August 31st, 1914, the figures were as follows: Gross earnings, $[illegible],756, working expenses, $1[illegible],258,13[illegible]; net profits, $[illegible],141,[illegible]; in August, 1913, net profits were $3,[illegible]61,[illegible] and for two months ended August 31st, 1913, net profits were $[illegible]8,077,[illegible]2. The decrease in net profits is therefore for August, $[illegible]9[illegible],[illegible]81, and for two months ended August 31st, $[illegible].

The Canadian Northern Railway's statement of earnings and operating expenses for August, is as below:

	1914	1913		Increase or decrease.
Gross earnings	$1,367,700	$1,824,800	—	$457,100
Expenses	1,123,000	1,416,200	—	293,200
Net earnings	244,700	408,[illegible]00	—	163,900
Mileage in operation ..	4,670	4,316	+	354

LEGAL NOTICE

AMERICAN LAFRANCE FIRE ENGINE COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of June, 1914, incorporating Harry Riley and William Robert Anderson, law clerks; Thomas Stewart Hagan Giles, bookkeeper; Harold Ernest McKitrick, barrister, and John Steuart Duggan, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, import, export and deal in fire engines, fire apparatus, carriages, cars, wagons, trucks, bicycles, automobiles, motor trucks and vehicles of all kinds, however propelled, and all accessories thereto or in connection therewith; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (c) To issue paid-up shares, debentures, debenture stock, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be required by or for any services rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (d) To sell, lease, turn to account, or otherwise dispose of the whole or any branch or part of the business, undertakings, properties, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, debentures or securities of any company having objects similar to those of this company; (e) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (f) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell or otherwise dispose of shares, stocks, debentures, bonds and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents as the directors may appoint; (g) To enter into partnership or any arrangement for sharing profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined; (j) To distribute in specie or otherwise, as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company; (k) To do all or any of the matters hereby authorized either alone or in conjunction with or as factors, trustees or agents for any other companies or persons, or by or through any factors, trustees or agents; (l) The powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (m) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "American LaFrance Fire Engine Company of Canada, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1914.

THOMAS MULVEY,
Under-Secretary of State.

CONDENSED ADVERTISEMENTS

advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED—First-class experienced salesman for financial corporation. State experience and references. Apply Box 377, *Monetary Times*, Toronto.

ACCOUNTS AND BOOKS of large or small business concerns audited, systematized, written up weekly or monthly and Trial Balance taken off. Supervising bookkeepers' work a specialty. Financial and annual statements drawn up by experienced Public Accountant. Charges moderate. Address Box 373, *Monetary Times*, Toronto.

DIVIDEND NOTICE

THE A. E. REA COMPANY, LIMITED

DIVIDEND No. 39

Notice is hereby given that a dividend of 1¾ per cent. upon the paid-up preferred capital stock of the Company has been declared for the current quarter, being at the rate of 7 per cent. per annum, and also a dividend of ½ of 1 per cent., being at the rate of 2 per cent. per annum upon the common stock, and the same will be payable on and after the fifteenth day of October next.

By order of the Board,

J. A. HUTTON,
Secretary-Treasurer.

Ottawa, September 30th, 1914.

HELP BELGIUM; SHE HELPED US

We all realize how much the British Empire owes to Belgium for its splendid work in checking the German invasion of France. The results, however, were achieved at great cost, and men, women and children in Belgium are in immediate need of food and clothing. A relief committee for the victims of the war in Belgium has been formed, of which the Duke of Connaught is patron and Sir Robert Borden and Sir Wilfrid Laurier, together with other prominent citizens are vice-patrons. A letter received from Belgium by the honorary treasurer of the committee describes the suffering in that country. Here are extracts:—

"You cannot imagine the fearful misery in which our beautiful country will be within some weeks; I can assure you without any exaggeration, that our brave farmers of the Ardennes and the Hesbaye will die of hunger by the hundreds, through the absolute impossibility of procuring a piece of bread. There are here presently more than 500 families which have fled from the devastation of the rich country of Waremme and Tirlemont, without a cent, without other clothes than the ones they had on; they are living in the bathing cabins, in the public park and receive twice a day a soup prepared by the municipality. How long will it last? In Brussels there are thousands of refugees in similar condition and the German army has requisitioned all the food. The ravaged fields, the cattle all killed will not allow this population to procure their living before a year.

"It is therefore indispensable that from everywhere charity comes to our help. Our country is small, the fortunes have been cut down too much by the war and the German occupation so that we cannot alone relieve the misfortune which we undergo, certainly as much for France and England as for ourselves. Would you try to interest some Canadian personalities and some influential newspapers to the unhappy lot of our brave populations. Canada is rich and generous; let it come to our assistance."

The committee appeal confidently to all residents of Canada for urgent contributions in kind or money. The most suitable contributions in kind will be clothing of every description, new or old, for women, men and children, blankets, of wool or cotton, shoes, flour, oatmeal, sugar, dried fruits, dried vegetables, salted fish, salt, bacon, pork and beans or other canned eatables, etc. Shiploads of these will be needed. Contributions in money will be employed for purchasing goods in Canada and for freight to Belgium.

The honorary treasurer of the committee is Mr. H. Prud'homme, Room 70, 59 St. Peter Street, Montreal, to whom all communications and contributions should be sent.

* * *

The Ontario workmen's compensation act passed at the last session of the legislature is to become operative on January 1st, 1915.

The Monetary Times is informed that the present conditions have deferred indefinitely any extension contemplated on the part of the Car and General Insurance Corporation, Limited, of London, to Canada.

UNITED STATES WANT MORE TRADE

Their Consul at Toronto Points the Way and Cites Interesting Statistics

Openings for increased United States trade in Canada is discussed in a report of Consul Julius D. Dreher, Toronto, in a report dated September 11th, and issued by the department of trade and commerce at Washington. In the present disturbed conditions of European commerce the Dominion may have to look to the United States for a larger proportion of certain articles hitherto coming mainly from European countries and chiefly from the United Kingdom, France and Germany. While England and France may be able to hold much of their Canadian trade, it is evident that no goods can be imported direct from Germany or Austria-Hungary under existing conditions.

In order to give American manufacturers and exporters some idea of the openings in Canada for increased trade, the accompanying table has been compiled from the Dominion statistics for the fiscal year ended March 31, 1913, which are the latest available statistics of the kind. Of the total Canadian imports during that year, amounting to $692,032,392, the United States furnished goods to the value of $441,142,593, the United Kingdom, $[illegible]1,568, France, $[illegible]9,764, Germany, $14,214,547; Switzerland, $4,296,702; Belgium, $4,020,178; and all other countries, $74,217,040. Of the last amount the West Indies are credited with $10,576,966. The table includes only such articles as are imported into the Dominion to a large extent from the United Kingdom, France and Germany. For purposes of comparison the total amount of each article imported is stated and also the amount furnished by the United States. (See table at foot of this page.)

During the fiscal year 1912-13, Canada imported from British India jute cloth and canvas to the value of $2,418,070, from Austria-Hungary, tobacco pipes to the value of $153,840, and chinaware, $[illegible],728; from Belgium, common window glass, $685,888, and plate glass, $416,815; from Italy, hats, caps and bonnets, $145,000; and from Switzerland, cotton lace, $160,111, ribbons, $508,102, and silk and manufactures of silk, $1,528,761.

The Canadian Tariff.

It should be borne in mind that British goods enter Canada under the "preferential tariff," most of the French goods under the "intermediate tariff," and all American goods under the "general tariff" rates. The preference given to British goods is generally from 20 to 40 per cent. of the duties on American goods. On some articles it is as much as 50 per cent.

(12%) per annum upon the paid-up Capital stock of this institution has been declared for the three months ending 31st October, 1914, and that the same will be payable at the head office and branches on and after Monday, the 2nd day of November next.

The transfer books will be closed from the 17th to the 31st October, 1914, both days inclusive.

By order of the Board.

D. R. WILKIE,
General Manager.

Toronto, September, 1914.

BUSINESS AS USUAL IMPOSSIBLE

That is the Case in Germany—Some Facts About the Internal Conditions

Germany has not proclaimed a moratorium and is proud of the fact. But she has adopted financial measures entailing considerable risk, as shown in an article printed a few weeks ago in *The Monetary Times*. German business is transacted on a cash margin, which to the English mind, appears dangerously narrow, for under pressure her war credit is being enormously inflated.

In the first place, says the Westminster Gazette, discussing internal conditions in Germany, the banks are doing everything possible for their customers, and it is quite probable that owing to the great numbers of small banks in Germany advances to firms of good standing have been made more rapidly than has proved feasible in England. Secondly, a war credit bank has been set up which has the power to advance $375,000,000 upon securities. Thirdly, full scope has been given to local initiative everywhere throughout Germany and credit banks are protected or being established with the idea of helping the small man and capitalist, guaranteed by the commune or co-operative society, supported by the larger firms.

Bank Credit is Amazing.

The amount of credit which the banks are prepared to advance is amazing. At Frankfurt, for example, it proposed that credit to the amount of 10,000,000 marks shall be advanced on cash deposits of one-twentieth of that sum. A cash basis of 5 per cent. is extraordinarily flimsy, especially when the securities offered for the remainder are inconvertible.

The experiment is only possible because the German mind, as revealed in the German press up till about ten days ago, was full of confidence, owing to the advance of the army in France. The whole edifice of credit may collapse under defeat. Moreover, great though these facilities are, they are universally felt to be inadequate. Nobody seems to have any money. Everybody is being pressed to pay. Firms doing a foreign trade are said to be the worst offenders. Their defence is that they are also the worst sufferers.

Many Bills in London.

They have in their possession quantities of bills on London, the usual method of payment in international transactions which they are, of course, unable to collect on maturity, and their case is that unless they can cover their losses by obtaining cash from their customers in the home market they will collapse. But their pressure is greatly resented, and the German papers are full of protests against demands for cash passed at meetings of this or that industrial association.

To add to the manufacturers' difficulties, the closing of the ocean routes has interfered with supplies of raw materials and prices have gone up. Their best labor has been called to the front and worst of all, there is no market.

People are only buying necessaries and the textile trade in particular admits that there is no immediate prospect of disposing of stocks of goods not of use to the military. As for export trade, though a great display is made of the possibility of doing business with neighboring neutral states, or of transacting a world trade in neutral bottoms, the plain fact remains that orders are not coming in.

◆

What business are you planning for after the war?

Leave the Valcartier camp alone. That sort of talk helps the enemy. Criticize it later when we analyze the way we handled our own peace organizations in war time.

There's a man who fights for England, and he'll keep her still atop, he will guard her from dishonor in the market and the shop, he will save her homes from terror on the fields of daily bread, he's the man who sticks to business, he's the man who keeps his head. Let the foe who strikes at England hear her wheels of commerce turn, let the ships that war with England see her factory furnace burn; for the foe most fears the cannon and the heart most quails with dread, when behind the man in khaki is the man who keeps his head.—Harold Begbie.

PRESERVE CANADA'S CREDIT

War Measures of Finance Must Be Based on Sound Principles

"There is only one interest in this matter," said Mr. J. W. Flavelle at a Canadian Club luncheon at Toronto, "and that is the interest of the credit of Canada and the people of of Canada. Our duty officially is to conduct ourselves so that our credit is preserved. Our duty privately is to play the game with good courage and bear the other fellow's burden rather than ask him to bear ours."

Discussing the war measures of finance and commerce in Great Britain, Mr. Flavelle said that the conditions in Great Britain and Canada were so different that to apply the same remedies here was like using the same treatment for two diseases of the most dissimilar character. He went on to show that the various expedients adopted in Britain were purely of a domestic nature. England invested her own funds in England, bought her own securities, owned her own railroads, and then had sufficient to send to all quarters of the world.

Canada is a Borrowing Country.

Canada, on the other hand, borrowed money from wherever she could get money, and the supreme duty of every official body in Canada was to preserve the credit of the country. "England has no credit to preserve," said Mr. Flavelle, in paradox, "every country in the world owes her."

Mr. Flavelle commented on the wisdom of the finance minister in Canada making bank notes legal tender, and the extension of credit by permitting banks to deposit securities with the department and receive Dominion notes. "But we want no moratorium in this country. We want no discussion of moratorium in the chamber, much less in the newspapers. We want no special sessions of legislatures." There were men in the country who thought they could become wealthy without effort, and all they had to do was to buy up land and sit back and wait for somebody to give them 5, 10 or 20 per cent. on their price.

Manitoba's Loan Legislation.

The speaker rapped the province of Manitoba concerning its recent legislation. "Look at Manitoba. If it were not so serious it would be ludicrous," continued Mr. Flavelle, referring to the recent session of the legislature of that province passing a moratorium act, suspending payments of principal and interest on mortgages for six months.

"Look at a body of men, claiming to be legislators, saying, on the one hand, we refuse to pay our debts, and saying on the other hand, we want to borrow $2,000,000."

He admitted there would be cases of hardship that could be relieved, as was suggested in Ontario, by an application to the courts, and such relief was no doubt desirable.

Mr. Flavelle concluded by saying that he had not been speaking as a bank director or president of a trust company. The bankers themselves had not always been wise, and to those who were crying for an extension of credit he thought the credit lines had often been too slack, and no legitimate industry had ever been crushed for lack of assistance.

◆

MORE WAR CONTRIBUTIONS

The Union Bank of Canada has donated $25,000 to the Canadian National Patriotic Fund.

The legislative council of Trinidad have voted $200,000 for the purchase of Trinidad cocoa as the colony's war contribution to the mother country.

The Liverpool and London and Globe, with its affiliated companies, the Liverpool-Manitoba and Globe Indemnity, has subscribed $2,000 to the Canadian Patriotic Fund. This company had already contributed generously to the English fund.

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

SHRUNK THREE BILLIONS STERLING

Representative Stocks Affected—Twenty-five Per Cent. of Shrinkage Was in Ten Days

The shrinkage which occurred in the value of 387 representative stocks during the brief period of ten days, July 20th-30th, exceeds any previous decline which has occurred even in the space of a month, and it enables one to appreciate the tremendous adverse influences with which the City had to contend before there came the climax in the shape of the closing of the House, suggests the London Bankers' Magazine.

During the ten days in question the list of stocks showed a net depreciation of no less than £188,000,000, the exact figures being as follows:—

Aggregate value of 387 representative securities on July 20, 1914	£3,370,709,000
Aggregate value of 387 representative securities on July 30, 1914	3,182,717,000
Decrease	£ 187,992,000

While the decline in values was of a most general character, scarcely a department escaping the general debacle, the collapse was most pronounced in the markets directly affected by the chief cause operating—namely, the European political crisis. British Funds, it will be seen, show a loss for the month of about £44,000,000, and Foreign Government securities gave way to the extent of about £47,000,000. Next to those departments depreciation was specially pronounced in American Railway securities, which were affected by continental selling, while Home Railways and kindred stocks gave way in sympathy with gilt-edged descriptions. Railways in British possessions were also a very weak spot.

In noting the general bearing of this great decline in the value of stock exchange securities upon the financial position as a whole, it is important to remember that the decline in securities has been a continuous one, extending over many years. The London Bankers' Magazine's present list of stocks was selected nearly eight years ago, namely, in January, 1907, when the valuation was £3,843,000,000. Ever since that date, with some occasional interruptions, the movement has been persistently downwards, so that to-day the total shrinkage is no less than £660,000,000, and the cumulative effect of this gigantic depreciation cannot be exaggerated.

◆

SCOPE FOR MORE CAPITAL

"Capital Investments in Canada," published by *The Monetary Times*, contains information regarding the vast amount of British and foreign capital already invested in the Dominion, but there still remains plenty of scope for more. The volume will be of value when affairs have returned to normal conditions.—The Financial Times, London.

◆

BEWARE OF THE GERMAN LOAN

The British government is making inquiries about reports cabled from New York that a group of bankers with German affiliations and connections is considering taking a portion of the German government loan. While the government has no ground for protest against this action of individuals, some of these firms have important offices in London, and therefore any action on the part of New York partners would be seriously discountenanced.

◆

The cost of living—in Canada—is well worth the price.

Much of the crepe on Canadian business sentiment is really the black fog of poor bluff.

We have to eat as usual, drink as usual, sleep as usual, so may as well try to do business as usual.

As the negatively inclined office boy says: "Nobody can't afford to do nothing for nobody for nothing these days"—which is another way of saying, "Business as usual."

SELLING SASKATCHEWAN DEBENTURES

Local Government Board Restricts Authorization of Borrowing Until Provision is Made for Sale

The outbreak of the war in Europe has affected municipal financing and the complications that have arisen as a consequence of it and other recent events, have tended to increase the difficulties with which the Saskatchewan local government board has to contend in dealing with the applications which come before it for permission to contract debenture loans.

Immediately upon the opening of hostilities and its becoming apparent that financial transactions were likely to be seriously affected, the board adopted measures in dealing with local authorities coming before it, and among other things insisted in addition to other information submitted, that satisfactory evidence should be furnished to the effect that arrangements could be made for the sale of the debentures at a reasonable price. In the absence of this information authorization is withheld, notwithstanding that otherwise its issue may be warranted. This precautionary measure is also generally extended to the signing of debentures previously authorized, as the board is desirous of preventing the negotiating of municipal securities at ruinous prices, which in its opinion would not only result in hardship to the local authorities issuing them, but would contribute to the further demoralization of the market, and delay in return to normal conditions, which is hoped for after the termination of hostilities.

Sought Bond Dealers' Opinion.

With a view to confirming the view which the board had taken, and which it was convinced was a safe and correct one, a letter was addressed to the various bond houses throughout the country, setting forth the situation and asking for an expression of opinion. It was felt that the knowledge and experience of these firms would render their opinions valuable and of assistance to the board. Replies have been received to nearly all of these letters and without an exception the wisdom of the policy is endorsed.

The Saskatchewan local government board hopes that during the present disturbance, local authorities will pursue a policy of strictest economy, and endeavour as far as possible to keep out of the bond market. Such action will tend to conserve their financial interests, and will ultimately prove of benefit to them, after the present crisis has passed, and the country's business again begins to flow in its ordinary channels.

Purchases Being Made.

Even now, while events are, it is hoped, at their worst stage, some purchases of municipal bonds are being made by dealers at prices which show no indication on their part of a desire to take advantage of conditions, and it is found that in some cases local firms and individuals are showing their confidence in their respective localities by offering to purchase debentures at ordinary fair investment rates.

There is no immediate prospect for the marketing of debentures, and local authorities should reconcile themselves to this fact. When cases arise where it is considered exceptionally advisable in the public interest that certain works should be undertaken, arrangements should be made for financing them from current revenue, but in no case should they be proceeded with until the funds are in sight.

◆

Don't do business in the German navy way.

Money will be easier as soon as production is more.

Did you ever see the British bulldog repining or in tears?

If you cannot reconcile yourself to the present, plan for the future.

Confidence in the business future, and faith in Canada, are good things to have around your desk.

Some of the men who have lived on their wits, paper and nerve have now to get down to the production level—which is another favorable factor

INVESTMENT vs. SPECULATION

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

MONTREAL WINNIPEG

MEXICAN SITUATION AFFECTED EXCHANGE

Power Company Sold More of Its Product—Preparations for Issue of Notes

Owing to the continued state of political unrest in Mexico, and the consequent heavy fall in exchange, the two well-known companies, the Mexican Light and Power Company and the Mexico Tramways Company, have decided to defer for the present the payment of further dividends on share capital. The reports of both companies follow:—

The net revenue from operation of the Mexican Light and Power Company for the year 1913 amounted to 6,194,649 pesos as compared with 5,653,032 pesos for the year 1912. This revenue, converted into Canadian currency at the average monthly rate of exchange, gave a profit from operation of $2,614,829 gold. The increase over last year in pesos is 541,617, but it will be seen from the accounts that when converted into Canadian currency the profit from operation, as compared with last year, shows a decrease of $211,616 gold, and this fact is accounted for by the heavy fall in the rate of exchange.

To the profit from operation has been added the income from securities and other sources, viz., $177,861, and the credit balance of $1,184,405 brought forward from last year, making a total credit on profit and loss account for the year of $3,977,116. Out of this sum have been paid the current expenses and fixed charges, amounting to $2,281,574, and dividends at the rate of seven per cent. per annum on the preference shares and four per cent. on the ordinary share capital of the company, leaving a credit balance on the profit and loss account of $724,142, of which $405,619 has been transferred to the reserve account as mentioned below, and the balance, $318,522, has been carried forward.

Operating Expenses Were Less.

The amount standing to the credit of the reserve account at the end of the year 1912 was $300,000, which, together with $405,619 appropriated out of profits, makes a total of $705,619, and this sum has been applied in writing down the value of certain of the company's investments and accounts and providing for the extraordinary expenditures incurred by the company during the year, including the expenses of protecting its properties on account of the disturbed conditions in Mexico. Although considerable extraordinary expenditure has been incurred in connection with the company's property, the board report that the company has been able to continue operation, and has not sustained any serious damage to its properties.

An increase was made in the sale of power over previous years, but not so great as it should have been if the condition of the Republic had been normal. The operating expenses show a further reduction from 24.68 per cent. in 1912 to 23.24 per cent. in 1913.

The extension of the system of canals and tunnels to divert several rivers into the Necaxa watershed was completed before the rainy season of 1913, with the result that the storage in all the reservoirs on 31st December, 1913, was 125,340,346 cubic metres, an increase of 56,048,478 cubic metres, or 82.26 per cent. over the same day of the preceding year. With this vast storage the directors are relieved of any anxiety regarding the supply of power.

Increased Net Revenue.

The Mexico Tramways Company's net revenue from operation for the year 1913 amounted to 3,164,755 pesos, as compared with 3,018,950 pesos for the year 1912. This revenue converted into Canadian currency at the average monthly rate of exchange, gave a profit from operation of $1,340,557 gold, to which has been added the income from securities and other sources, viz., $1,391,650, and the credit balance of $1,462,928 brought forward from last year, making a total credit on profit and loss account for the year of $4,195,136. Out of this sum have been paid the current expenses and fixed charges, amounting to $1,473,410, and four quarterly dividends at the rate of seven per cent. per annum on the share capital of the company, leaving a credit balance on the profit and loss account of $1,382,066, which has been carried forward.

The ratio of operating expenses to earnings for the year 1913 was 46.48 per cent., as compared with 47 per cent. in 1912.

The amount standing to the credit of the reserve account at the end of the year 1912 was $2,547,756. The board have not found it possible to add anything to this account, but

on the other hand, have deemed it advisable to apply $711,151 thereof in writing down the value of certain of the company's investments and accounts and providing for the extraordinary expenditure incurred by the company during the year for the protection of its properties on account of the disturbed conditions in Mexico, and in writing off the expenses in connection with the issue of 35,126 additional shares in the capital of the company issued at the end of the year 1912. There now remains, therefore, to the credit of the reserve account the sum of $1,836,604.

On 31st December, 1913, the tramway system comprised 213.532 miles of single track, of which 204.087 miles were operated by electricity and 9.445 miles by mules, the electric track mileage having been increased by 10.787 miles and the mule track mileage having been reduced by 5.555 miles. The property has been maintained in good condition and repair, and for this purpose 741,610 pesos have been expended during the year.

Created New Notes.

In the month of October, last year, the board, on behalf of the company, authorized the creation of £1,200,000 6 per cent. three-year secured notes, conferring on the holders the right of converting the same into ordinary shares of the company at par. When the financial situation is favorable for the purpose, the board propose to issue the notes and apply the proceeds towards paying off the outstanding temporary loans of the company.

In order to provide for the right of conversion given by the notes, the share capital of the company was increased in November, 1913, by the creation of an additional 100,000 shares of $100 each. These shares remain in the treasury of the company.

◆

BRITISH PREFERENCE STAYS WHERE IT IS

In the British House of Commons, Mr. Wedgwood asked the colonial secretary whether he would approach the governments of the self-governing Dominions and suggest that, with a view to helping British trade over the existing exceptional difficulty, the tariffs levied by them should be temporarily reduced to one-half on British manufactured goods in trades suffering most severely from the war.

Mr. Harcourt said he was not prepared to make such a suggestion, particularly at a time when these governments were incurring heavy expenditure on account of the war.

◆

FREICHTERS ARE BUSY NOW

All vessel companies on the Great Lakes handling hulk cargoes to and from the head of the lakes are fairly busy at present and the season has just commenced. Package freight is arriving in large quantities for Western points and local consumption. Storage freight has begun to arrive, and will increase in volume from now on till the close of navigation. Since the first of the present month sixteen cargoes of bituminous coal have arrived, and there is now in store at the head of the lakes, according to official figures, some 1,034,000 tons of coal.

Grain is moving east quite freely. In the past fifteen days twenty-nine vessels have carried cargoes of grain from Fort William, twenty-six of which were in Canadian bottoms.

During the crop year of 1913-1914 it required 1,135 vessel cargoes to move the grain east from here; 788 cargoes were in Canadian vessels and 350 in United States vessels. The total shipments east from Fort William amounted to 191,911,432 bushels of grain.

◆

The man who does not do his business duty is a deserter.

Remember there is a business future and that you want to be there.

Would you rather be doing business in a country other than Canada?

Those who care may warm their business "cold feet" in front of German fire.

Anybody can float with the current, but it takes a real man to swim against the stream.

SEVENTY-SIX MILLIONS INSURANCE PREMIUMS

This Amount Was Paid for Business of All Classes in Canada—Protection of Policyholders

The deposits for the protection of policyholders, held by the Receiver-General in trust for the 182 insurance companies under the supervision of the insurance department, at May 15, 1914, amounted to $75,936,590 in securities, as follows:—

Canadian government securities, $1,717,124; Canadian provincial securities, $8,120,417; British government securities, $867,726; British colonial securities, $1,497,608; United States bonds, $225,000; New York State bonds, $251,000; Massachusetts bonds, $2,020,000; Rhode Island bonds, $100,000; California State bonds, $45,000; Japanese government bonds, $35,071; Belgian government bonds, $164,320; Montreal harbor bonds, $534,000; municipal securities, $48,313,859; bank stock, $20,000; loan companies' debentures, $1,016,266; railway securities, guaranteed, $10,626,983; district of Columbia bonds, $50,000; French rentes, $331,316.

There was also deposited with Canadian trustees, in conformity with the act, $32,382,005, making a total of $108,318,596 for the protection of policyholders, being an increase since last report of $12,875,575.

The distribution of the total sum of $108,318,596 held as above mentioned for the protection of policyholders among the different classes is as follows:—

Life, $79,906,061; fire, $13,709,207; fire and miscellaneous, $10,092,717; accident, guarantee, plate glass, etc., $4,610,611; total, $108,318,596.

Home and Foreign Company's Share.

The total amount of premiums received in Canada during 1913 for all forms of insurance was $76,064,483, of which $36,222,419 was received by Canadian companies and $39,842,064 by British, United States and other companies. The following summary shows the distribution of the premiums to the various classes:—

Fire, $25,745,947; automobile, $503,204; life, $38,658,593; life (assessment), $2,404,200; personal accident, $2,199,885; guarantee, $645,624; plate glass, $224,829; steam boiler, $147,669; burglary, $75,580; sickness (so far as separate return made), $1,135,430; inland transportation, $140,240; employers' liability, $3,516,758; sprinkler leakage, $42,386; title insurance, $351; live stock, $132,438; hail, weather and tornado, $447,682.

Three Divisions Results.

Dividing the premiums according to the nationalities of the companies the results are:—

	Canadian companies.	British and colonial companies.	United States and other companies.
Fire	$ 5,019,298	$13,138,597	$ 7,588,052
Life	24,783,718	1,905,483	11,969,392
Life Assessment	2,404,200	None	None
Accident	1,129,844	594,337	475,704
Guarantee	181,719	177,294	286,611
Plate glass	73,079	50,405	101,345
Steam boiler	94,705	None	52,964
Burglary	46,296	1,264	28,020
Sickness	872,686	110,259	143,485
Inland transportation	4,311	85,938	49,991
Employers' liability	862,854	2,003,356	650,548
Title	351	None	None
Live stock	89,291	43,147	None
Automobile	131,509	88,861	342,834
Sprinkler leakage	None	452	41,934
Hail, weather and tornado	397,398	1,287	48,997
Totals	$36,171,250	$18,200,680	$21,690,877

◆

Buy a barrel of apples made in Canada.

Keep up your spirits if only because it helps credit and credit helps you.

Business in England is taking its medicine without a whimper. Canada should be able to stand the smell of the cork, without fainting.

PROFITABLE INVESTING FORESIGHT

is not reckless speculation based on guess work or imagination, as a means of endeavoring to make profits.

IT IS

the art of carefully weighing past and present world-wide monetary conditions, comparative prices of securities, etc., etc., and of purchasing when supply is greater than the demand, then awaiting future changed conditions.

Many shrewd investors who secured large profits during the panic of 1907, are now in market for present attractive offerings.

We are in communication with several "Bargain Lots" of Conservative Securities, which can be purchased now to excellent advantage.

HOW UNITED STATES WILL RAISE REVENUE

Stamp Taxes Expected to Bring in $31,000,000—Banking and Life Insurance Affected

The rates in the United States war tax proposed legislation are as follows:—

Beer, $1.50 per barrel.

Gasoline, 2 cents per gallon.

Domestic dry wines, 12 cents a gallon.

Domestic sweet wines and all wines containing more than 3 per cent. saccharine, 20 cents per gallon.

Bankers, $2 on each $1,000 of capital and surplus employed; savings banks without capital stock to be exempt.

Stock and bond brokers, $50; pawnbrokers, $20; commercial brokers, $20; custom house brokers, $10.

All theatres in towns of more than 15,000 population, $100; circus proprietors, $100; proprietors of other public exhibitions or shows not specifically mentioned, $10; proprietors of bowling alleys and billiard rooms, $5 for each table or alley.

Tobacco dealers, $4.80 each, regardless of the size of the business done.

The "stamp tax" provisions of the bill are substantially those of the United States Spanish war tax. The taxes and omissions are as follows:—

Bonds, debentures and certificates of indebtedness, five cents on each $100 of face value or fraction thereof.

The tax on bank cheques, drafts and certificates of deposit is omitted.

Bills and agreements of sale, one cent. on each $100 or fraction; promissory notes, two cents on each $100.

Life Insurance Policies to Pay.

Tax on foreign bills of exchange and letters of credit, omitted.

Express and freight receipts, one cent.

Telephone and telegraph messages, one cent.

Indemnity bonds, 50 cents.

Certificates of profit, two cents on each $100; certificates of damage, 25 cents.

Certificates of all descriptions required by law and not otherwise specified, ten cents.

Charter contracts and agreements for the charter of any ship, tax omitted on constitutional grounds.

Brokers' notes or memoranda of sale of any goods or property, ten cents.

Conveyances or deeds, 50 cents if more than $100 and less than $500, and 50 cents on each additional $500 or fraction thereof.

Entry of any goods or merchandise at any custom house, 25 cents to $1, according to value.

Life insurance policies, eight cents per $100; marine and fire insurance, one-half of 1 per cent. on each $1; casualty and fidelity insurance, one-half of 1 per cent. on each $1.

Leases and contracts for the hire, use or rent of any land or tenement, omitted.

Manifests for custom house entry or clearance for a foreign port, omitted.

Mortgage or pledge of land, estate, real and personal property, 25 cents on $1,000 to $1,500 value, and 25 cents additional on each $500 of fraction thereof in excess of $1,500.

To Produce Thirty-One Millions.

Passenger ticket by any vessel from a United States port to a foreign port, $1, if the cost is $30 or less; $3, if the cost is more than $30 and not above $60, and $5, if more than $60.

Powers of attorney and proxies at elections for officers of incorporated companies, 10 cents; powers of attorney to sell real and other property, 25 cents.

On protested paper, 25 cents.

Tax on warehouse receipts, omitted.

On each seat in a parlor or sleeping car, 2 cents. This represents the only increased rate in the bill, the Spanish war tax having been 1 cent.

The taxes enumerated above in Schedule A, known as the stamp tax section, "shall not be effective after the 31st day of December, 1915." All other taxes are to remain in effect until repealed by subsequent legislation. The United States stamp tax section, which will remain in operation slightly more than a year, is depended upon to produce $31,000,000 annually.

Investments should be made with safety the essential factor: a reasonable interest return and negotiability the next considerations.

Canadian Municipal Debentures combine all three features. They are obtainable to yield from

UNITED STATES BUSINESS IN QUEBEC

Consular Report Shows That United States Manufacturers Are Making Gains in Province

Losses and gains in the exports from Quebec can be ascribed in most instances to fluctuations in trade, liable to occur from year to year. Some are due also to changing economic conditions and to changes in tariff and prices. Thus the advance in the exports of cattle and other live stock, of foodstuffs, paper, pulp, etc., were undoubtedly due to the reduction in duty or free admission under the new United States tariff of 1913. The increase in the exports of leather and hides was probably due to the closing of the Quebec shoe factories during the latter part of 1913, making it more profitable to export the stock than to keep it on hand unused. Greater activity in the asbestos region of this province accounts for the gain in asbestos shipments last year. The considerable increase in the volume of returned United States goods seems but natural in view of the larger imports of all classes of United States machinery, some of which is bound to be returned periodically to the United States for repairs, much of it also being returned after having served its purpose here, writes United States Consul G. Willrich, stationed at Quebec, in a report of the commerce of the Province of Quebec, published by the department of trade, Washington.

That the paper exports from Quebec province to the United States should show an increase in 1913 over 1912 was to be expected. The enlargement of existing paper mills and the construction of new ones in this province gave this industry a great impetus, aided as it was by the removal of the United States duty on news print of the quality and weight manufactured in Canada. It was also to be expected that the exports from this province of the several kinds of pulp should show a substantial increase; most of this gain must be credited to northern Quebec, where mills have been much enlarged.

United States Gets Lead.

The imports at the port of Quebec from all countries in 1913 had a value of $16,377,447, against $9,095,850 in 1908, or an increase of 70.5 per cent. in five years. Of the countries sending their goods to this port the United Kingdom has long held first place. Last year, however, Great Britain fell behind and the United States assumed a decided lead as the imports from the former were valued at $6,415,420 and from the latter $6,957,343.

A comparison of the imports from these two principal markets discloses the important fact that British settlers' effects in 1913 had a value of $3,530,412, while United States imports of that character amounted to only $116,864. Deducting both from the respective totals leaves purely commercial exports from Great Britain to this city of less than $3,000,000, and from the United States of $6,840,479, which further emphasizes the great advantage attained by the United States during the last few years—an advantage likely to continue, especially in United States lines already leading in this market, such as buttons, brushes, braces, combs, etc., brass and copper manufactures, drugs, dyes, chemicals and patent medicines, fruits, hides, iron and steel manufactures, leather, boots and shoes, meats, leaf tobacco, lumber and timber, oils, seeds, and tin plate.

After Cotton and Wool Trade.

From evidence at hand it can be assumed that further progress could be made here, especially in the sales of United States cotton fabrics, by furnishing more complete information to local buyers of the kind of goods that can be furnished and their prices; of United States fruit, as facilities increase for bringing it to this market in good condition; of hats and caps, because the hat and cap trade in Quebec offers a fair market, and the excellent United States goods in that line should be able to enter into competition with the manufactures now favored here.

The greatest field, however, for the extension of United States trade in this district undoubtedly is in the direction of manufactures of cotton and wool, the imports of the former in 1912 having reached a value of $702,638, of which Great Britain supplied about 73 per cent., the United States 20.5 per cent., France 1.5 per cent., Germany 2 per cent., Switzerland 1.75 per cent., and Belgium one-half of 1 per cent. In 1913 these imports had a value of $782,204, the percentages furnished by the different countries changing but slightly,

with the exception of Switzerland, which made a substantial gain.

The imports of wool fabrics also remained about the same for 1912 and 1913; that is, a little in excess of $500,000, of which Great Britain furnished about 88 per cent., France, Germany, and the United States supplying the remainder. Both French and United States goods showed a slight increase in 1913 over 1912. From such information as is available, it seems that United States manufacturers in this line also should be able to gain a greater share of the trade of this district.

United States imports in many other lines are not separately enumerated, but are classed with "all other imports." Among these are automobiles and machinery of all kinds, the imports of which show a decided advance, according to information obtained in answer to inquiries made during the year. Some of the older pulp and paper mills procured new equipment, and in at least one new mill United States machinery only was installed. The new grain elevator was furnished largely with the latest United States conveyers, hoists, elevators, etc. Generally speaking, it can be said that United States imports of all kinds into this district during 1913 increased to a gratifying extent.

◆

OUTLOOK IS GOOD

At the Belding-Paul Corticelli Company's factories all departments are working to capacity. The business outlook is bright. From September until Christmas is the busiest season for the company owing to the manufacture of holiday fancywork etc. Therefore, the twelve months which will end November 30th will compare favorably with the previous year.

◆

WILL MAKE BOXES AT VANCOUVER

A new industry that will, when running to full capacity, employ 200 hands, will shortly be established within the confines of Greater Vancouver, according to Mr. J. R. Davison, industrial commissioner for Vancouver. Mr. Davison stated that an United States firm composed of Boston capitalists, manufacturing a patented wooden box, would, in February or March, locate on a site to be selected bordering on the Fraser River.

The company is capitalized at $250,000, fully paid up, and will make from British Columbia timber a new style packing box, three-ply veneer, with varying thickness, air-tight and impervious to moisture, and will do a trade with Ceylon, India, Europe and the United States. British Columbia produces the particular quality of timber required for the cases.

◆

WILL NEW YORK LEND FREELY?

"Heretofore the newer countries of the world were able to obtain financial accommodation in London, Paris, Amsterdam, Berlin, and so on. While the war continues military and naval operations will absorb all the spare capital that Europe possesses; and, therefore, there must be a very serious limitation of financial supplies if some new centre does not take the place which the leading cities of Europe have for the time being to evacuate.

"It will clearly be to the advantage of New York to step into the breach and to lend freely," is the remark of the London Statist. "Not only will the bankers and financial magnates of all kinds throughout the United States see how profitable it will be for themselves to finance the trade operations of their own country, but doubtless they will speedily recognize also that, as the leading European countries are incapacitated from financing the trade of the Central and Southern American countries, there is a splendid opportunity for the great capitalists of the United States to take up the work. The United States will benefit immensely by doing so, for the business thus newly taken up will, in large part at all events, remain with it."

MISCELLANEOUS INSURANCE IN CANADA

Department's Return Shows Results in Thirteen Classes of Underwriting

Accident insurance was transacted by 27 companies viz., 12 Canadian, seven United States and eight British.

Of the 27 accident companies, 22 transacted employers' liability insurance—viz., nine Canadian, eight British and five United States companies.

The total premiums received for this class of risks was $3,516,758 and the losses paid amounted to $1,618,702, with unsettled claims outstanding to the amount of $1,140,656.

All the accident companies transacted personal accident business, the total premiums for which were $2,199,885. The claims paid amounted to the sum of $841,359 and there were outstanding at the close of the year unsettled claims amounting to $204,223.

Guarantee business was transacted by 17 companies, of which eight are Canadian, four British and five United States companies.

The total premiums received were $645,624, guaranteeing an amount of $168,545,343, and the net amount paid for claims was $190,928, with unsettled claims amounting to $123,116 outstanding at the end of the year.

The Guarantee Company of North America and the London and Lancashire Guarantee and Accident Company of Canada transacted business outside of the Dominion, which is not included.

Sickness insurance was carried on by 28 companies—viz., 13 Canadian, eight British and seven United States companies.

Sickness and Accident.

It appears, however, that sickness insurance not in combination or in conjunction with accident risks has been carried on only to a very limited extent, and in some cases returns of the premiums received in respect thereof and losses paid, etc., have not been made to the department of insurance.

In addition to the 28 companies above referred to, five fraternal societies are licensed by the insurance department viz., the Independent Order of Foresters, the Ancient Order of Foresters, the Canadian Order of the Woodmen of the World, the Catholic Mutual Benefit Association and the Royal Guardians, pay sick benefits to such of their members as stipulate therefor in the application for membership. In the case of the Ancient Order of Foresters, these benefits are paid partly through the lodges and partly by the Subsidiary High Court. The premiums received in Canada for sickness and funeral risks by these fraternal societies amounted to $473,421 and the claims paid amounted to $351,120.

Glass Company Made Replacement.

Plate glass insurance was transacted by 18 companies—viz., eight Canadian, five British and five United States companies.

The companies having adopted the system of insurance by replacement, instead of paying the value of the glass broken, and their contracts not stating any amounts as insured thereby, their returns do not show the amount of insurance affected during the year, nor the amount in force at the end thereof. The premiums received during the year in Canada for plate glass insurance were $224,829, and the total losses paid were $132,218, and there were outstanding at the end of the year unsettled claims amounting to $12,371

Burglary insurance, which is transacted to a considerable extent in Great Britain, was introduced into Canada 11 years ago. It is carried on by seven companies, three Canadian, one British and three United States companies. The total premiums received amounted to $75,580, and the losses paid to $24,796, with unsettled claims outstanding at the end of the year amounting to $6,158.

Steam Boiler Insurance.

Steam boiler insurance was carried on by seven companies—two Canadian and five United States companies. The total premiums received amounted to $147,669, and the claims paid to $89,708, with $832 unsettled claims outstanding at the end of the year.

Automobile insurance was carried on by 22 companies—seven Canadian, four British and 11 United States companies.

The premiums received amounted to $563,204, and the losses paid to $207,544, with $50,994 of losses outstanding.

Tornado insurance was carried on by ten United States companies and one British company, the total premiums received being $29,667 with $5,673 losses incurred. Hail insurance was carried on by four Canadian companies and one United States company, the premiums received being $336,572, and losses incurred $206,913. General weather insurance, including hail, was carried on by the Canada Weather Insurance Company, the premiums received amounting to $81,443 and the losses incurred to $82,352.

Small Amount of Title Insurance.

The Title and Trust Company is licensed by the department of insurance to transact the business of "Title insurance" as defined in the company's act of incorporation, that is to say, "guarantee the title to, or the quiet enjoyment of, property either absolutely or subject to qualifications and conditions, and to guarantee any person interested in or about to become interested in, or owning or about to purchase or acquire any real property, against any losses, actions, proceedings, claims or demands by reason of any insufficiency or imperfections or deficiency of title or in respect of encumbrances, burdens or outstanding rights; and to guarantee the due payment of the whole or part of any loan, advance, mortgage or claim, hypothecary or otherwise, or the interest thereon."

Live Stock Insurance.

The total premiums received during the year amounted to $351, and no claims were incurred.

Sprinkler leakage insurance was carried on by six companies—one British and five United States companies. The premiums received during the year amounted to $42,386, and the losses paid to $6,243 with $405 losses outstanding at the end of the year.

Live stock insurance was carried on by one Canadian and one British company. The premiums received during the year amounted to $132,438. The losses incurred were $77,818, and losses paid, $81,073, with unsettled claims at the end of the year amounting to $10,251.

Inland transportation insurance was carried on by ten companies, one Canadian, three British and six United States companies. The premiums received amounted to $140,240 and the losses paid to $48,914, with no losses outstanding at the end of the year.

◆

CANADA SUPPLIES GUNS

Announcing the gift of a large number of guns to the Imperial War Office, Sir Robert Borden says:—

"The great demands upon the British Government in supplying guns and rifles have made it essential that Canada should assist in every possible way.

"Therefore, in addition to the 70 field guns and the machine-guns with which the Canadian expeditionary force is equipped, we are arranging to supply the British Government with the following:—

"(1) Forty-seven 18-pounders of the most modern type, which had been ordered by the Canadian Government in Great Britain before the outbreak of war, are to be handed over to the British Government.

"(2) Fifty-one guns of the same type, which the Department of Militia has on hand. These will be forwarded on the transports.

"(3) Six 60-pounders, which will also be sent forward at the same time.

"(4) About thirty machine guns, ordered by the Canadian Government in England before the outbreak of war. All this is being done by the Canadian Government at the request of the War Office, in order to assist in equipping the great army which is being assembled in the Mother Country. It is also expected that a considerable number of rifles will be supplied from Canada to the War Office.

◆

Easy money does not come unless the individual does his little part.

We would ask Mr. Knox Magee, of Winnipeg, who said that heaven and Col. Sam Hughes alone knew a certain thing; and Mr. F. J. Dixon, M.P.P., Winnipeg, who asked how a loan company made peace with heaven, or words to that effect—we would ask them to be careful of the Kaiser's corns.

BRITISH AND UNITED STATES FIRE COMPANIES

Balances For and Against These Underwriters in Their Canadian Business

The total cash receipts of British fire companies from premiums in Canada were $13,138,507, being an increase of $1,046,472, as compared with the previous year; the payments for losses were $6,939,453, being $620,389 greater than for 1912, while the general expenses amounted to $4,146,973, being $382,061 greater than in 1912, thus showing a balance of $2,052,171 favorable to the companies. In the previous year there was a favorable balance of $2,008,149.

Paid for losses	$ 6,939,453
Paid for general expenses	4,146,973
Total	$11,086,426
Received for premiums	13,138,507
Balance in favor of the companies	$ 2,052,171

The following details give the balance for the different companies:—

Balance in favor.—Alliance, $71,873; Atlas, $93,842; Caledonian, $74,943; Commercial Union, $227,193; Employers' Liability, $60,010; General Accident, $18,428; Guardian, $51,100; Law Union and Rock, $49,265; Liverpool and London and Globe, $190,138; London and Lancashire, $152,064; London Assurance, $54,541; North British and Mercantile, $105,819; Northern, $124,035; Norwich Union, $69,228; Palatine, $45,574; Phœnix of London, $155,405; Royal, $185,898; Royal Exchange, $1 1,417; Scottish Union and National, $65,713; Sun, $51,843; Union Assurance, $76,466; total balance in favor, $2,053,695.

Balance against.—Provincial, $990; Yorkshire, $534; total, $1,524; net balance in favor, $2,052,171.

Did More Business.

For every $100 of premiums received there was spent on the average $52.82 in payment of losses, and $31.56 for general expenses.

In 1912 the loss rate was $52.20, and the general expenses $31.13, for every $100 of premiums received.

For the fire business the rate of premium was $12.102 per $1,000 of risks taken, as against $12.584 in 1912.

Hence these companies have done a larger volume of business than in 1912 at a lower rate of premium, a higher rate of expense, and at a higher rate of fire losses.

Collecting the result for the 39 years from 1875 to 1913 as regards the receipts for premiums and the expenditure of the British companies, we find:—

Paid for losses (1875-1913)	$135,111,160
Paid for general expenses	61,597,326
Total payments	$196,708,486
Received for premiums	217,617,204
Excess of receipts over expenditure	$ 20,908,718

An adverse balance was in existence from the year 1877 till the end of the year 1886, due to the exceptional circumstances of the conflagration at St. John in the first mentioned year, when the losses paid by British companies amounted to almost five millions of dollars; that such adverse balance was reversed at the end of the year 1887, when a favorable balance of $ 41,0 8 was shown, and that this favorable balance increased thereafter from year to year (with the exception of the year 1892) up to the close of 1899, when it amounted to $5,029,98 . In 1900 the loss by the British companies on account of the Ottawa and Hull conflagration amounted to over two and a half million dollars. To this is due the large deficit of that year, $1, 65,476, wiping out the savings of the preceding four years, and reducing the favorable balance at the end of 1900 to $,664,504 which sum had been still further reduced to $,512,636 at the end of 1901. The favorable experience for the years 1902 and 1903 increased this balance to $7,123, 4 at the end of 1903 but it was again reduced by the unfavorable experience of 1904 to $3,969,472. During the past nine years the favorable balance has been largely increased and now amounts to $20,908,718.

The receipts of United States and other fire companies for premiums were $7,5 8,052; the payments for losses, $4,

043,757 and the general expenses, $2,235,516. Hence for every $100 of premiums received there were spent on the average $53.86 in payment of losses, and $29.77 in general expenses.

The following detail gives the balances for the different companies:—

Balances in favor.—Etna, $77,464; American Central, $94,057; American, $21,344; California, $14,302; Connecticut, $23,202; Continental, $15,790; Equitable, $11,622; Fidelity Phœnix, $18,724; Fireman's Fund, $51,218; Firemen's, $27,107; Génerales of Paris, $22,348; German-American, $42,723; Hartford, $205,480; Home, $253,255; Insurance Company of North America, $11,960; Insurance Company of State of Pennsylvania, $26,605; National, $27,609; Niagara, $65,045; Phœnix of Hartford, $97,543; Providence-Washington, $13,588; Queen, of America, $48,600; Springfield, $49,061; St. Paul, $53,629; Westchester, $19,376; total, $1,292,552.

Adverse balance.—American Lloyds, $4,329; Germania, $22,350; Glens Falls, $1,634; Lumber, $6,303; National Union, $1,833; Northwestern National, $25,962; L'Union of Paris, $1,355; total, $63,775; total balance in favor, $1,228,777.

The results of the total business of these companies, from 1875 to 1913 inclusive, are as follows:—

Paid for losses (1875-1913)	$34,714,661
Paid for general expenses	16,877,629
Total payments	$51,592,290
Received for premiums	60,899,871
Excess of receipts over payments ..	$ 9,307,581

◆

CHASING TRADE OPPORTUNITIES

The trade war is being reflected in the activities of consular and other organizations. Canadian manufacturers have in hand a well-defined scheme, not only to obtain a larger share of business at home, but also some of the business which Germany has had abroad. The British Government's commercial intelligence branch is assisting British traders to capture German trade all over the world. In this connection the London Times tells British manufacturers that the United States also is engaged in the same enterprise, and adds: "While the British manufacturers are making preparations to capture the world's trade of her enemies, it should not be forgotten that the Americans are equally alive to the possibilities, and, in some respects, are in a more favorable position. American methods in export trade are even farther away than those of the English from the patient adaptability of the German. On the other hand, the American is quick to seize a new idea and bold in planning enterprises that he believes will be profitable."

The British Trade Commissioner's office at Montreal, in charge of Mr C. Hamilton Wickes, is making a strong effort to enable importers of German goods to duplicate their requirements in the United Kingdom market. Mr. Wickes will be pleased to receive samples of any goods which had been imported by Canada from German or Austrian markets, and will endeavor to secure quotations for articles of a similar nature from the United Kingdom for importers requiring same. In this connection, Mr. Wickes tells *The Monetary Times* that there are many firms holding German and Austrian agencies in Canada who will be obliged to sever their connections, and if they desire to secure British representation to replace the foreign representation at present held, they should make application to him.

Mr. Julius D. Dreher, the United States Consul at Toronto, tells *The Monetary Times* that without expense to the inquirer the American Consulate will place any Canadian importer who finds supplies of goods not manufactured in Canada cut off as the result of the war in communication with manufacturers and exporters of any particular class of commodities desired from the United States

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100 00 invested has produced all the way from $127.00 to $193 00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

"A Remarkable Showing"

A Policyholder writes to The Great-West Life:

> "I beg leave to acknowledge the Company's cheque for $1,617, being the cash value of my Policy which matured on the 28th. This Policy was an Annuity Bond, Ordinary Life, 20 year dividend period, taken 28th March, 1894, for $5,000 00, payable in instalments and calling for a premium of $68.10, which is at the rate of $13.62 per thousand. I paid to the Company in 20 years $1,362.00—had my life insured for that period, and now receive the handsome cheque of $1 617 00. This is a remarkable showing"

The booklet "PROFITS, 1914," gives scores of similarly excellent results. Ask for a copy.

MANITOBA'S MORTGAGE LEGISLATION

Attorney-General Howden Explains, Premier Roblin Supports and Mr. Norris Criticizes

In moving the second reading of the bill in the Manitoba legislature, with respect to real estate obligations, Hon. J. H. Howden, attorney-general, said there would be a considerable amount of ready money from the crop, but the measure in question had been deemed necessary to give protection to persons whose property was liable to be taken away from them on default of payments, at a time when inability to pay was due to conditions outside their control.

Great hardship was being experienced owing to the inability to get new loans to cover payments due on mortgages or agreements of sale. Section [illegible] of the bill provided that no proceedings to put property up for sale for default of payments should be permissable till six months after default. The time at present allowed, 30 days, was too short. It was proposed simply to extend that time to six months.

Principle Already Recognized.

This was really only an extension of a principle already recognized, that there should be a certain time after a default before proceedings could be taken. Section 4 of the bill extended from three to 12 months the time allowed to redeem property after action for foreclosure had been taken.

There were some exceptions, he said, to the general purport of the bill. It did not apply to interest, taxes or insurance. The landlord or the person entitled to receive the payments should be permitted to keep the property free from encumbrance, and it had been thought fair to ask the borrower to keep up the interest payments. Personal property belonging to the debtor was made responsible for these charges, but it had been inadvisable to tie up any more of his realty. Another exception consisted in the fact that the bill would not apply to payments to be made in kind—as, for instance, shares of a crop.

Right of Mortgagee.

Section 5 dealt with the right of the mortgagee or vendor under an agreement of sale getting possession of land for default. In this respect also, no proceedings for possession could be taken till six months after default. To loans of money under mortgage, there was preserved the right of distress for payment of interest by sale of chattels. The only handicap that was placed against the lender was that he was asked to stay his hand so far as this was concerned for six months in case of foreclosure or sale.

Some of the loan companies were in favor of the bill and others were against it, but it was the great class of borrowers that the house should have particularly in mind. In the ordinary course of events, the regular session would come along presently, and if the bill were found to work badly it could be amended or repealed. In addition, the lieutenant-governor was to receive power to repeal the bill at a suitable time by order-in-council.

Criticism of Bill.

Mr. Norris, criticizing the bill, thought that it enabled the man to escape, who should pay. If possible, the bill should be so designed as to apply only where needed. "I do not know," he said, "whether that is possible, but it should be the aim. If we can do that we shall be doing something of practical value for the country. It would not be wise to pass the bill, until we have had representations concerning it, and I suggest a special committee should be appointed for the purpose.

"It is necessary to frame this bill so that not the speculator, but the man in need shall benefit. It should help the man whose home may be taken away from him. Generally speaking, the bill is not in the interests of the province, it will give it a black eye, being an announcement that the government must legislate because people cannot pay their debts.

"There is a class which needs something of this kind, but it is not protected by the bill. I refer to the poor man who rents his home. I am satisfied an amendment could be suggested for the relief of those classes. If something is not done for them, the bill is insufficient."

As further possible amendments to the bill, Mr. Norris suggested that the registrar-general or the courts should be in a position to pass on special cases. It should be possible, he said, for people who so desired to take their cases before the courts, where it might be determined whether or not the provisions of the bill should apply.

Sir Rodmond Roblin, supporting the bill, mentioned the case of poor men, whose saving of years, invested in a home, was now likely to be swept away because he could not meet the payments on his mortgage. It was to benefit men of this class that the bill before the house was intended.

OVER ONE HUNDRED INSURANCE COMPANIES

At the present time there are 182 insurance companies under the supervision of Canada's insurance department. The nature of the business transacted by them is as follows:

Life insurance, 60; life insurance, assessment plan, 4; fire insurance, 82; accident insurance, 30; guarantee insurance, 18; steam boiler insurance, 7; plate-glass insurance, 18; burglary insurance, 7; registered mail, etc., insurance, 10; sickness insurance, 34; title insurance, 1; tornado insurance, 12; live stock, 2; weather and hail insurance, 5; automobile insurance, 21; sprinkler leakage, 7; fly wheel, lightning, explosion, etc., 2.

INCREASE THE WHEAT CROP

"As farmers on the prairie know, it is now too late in the season to attempt to increase the wheat area by breaking new land for the crop of 1915. The only way to get more wheat is to promptly and most carefully handle the stubble land. It is, therefore, urged upon every farmer in Manitoba, Saskatchewan and Alberta in the wheat-growing districts, that he give the matter of fall preparation, of stubble land for wheat, his immediate and careful attention. Let it be the determination of every farmer to make his wheat acres in 1915 yield as never before."—Hon. Martin Burrell, Minister of Agriculture, Ottawa.

CANADIAN COW DOES WELL

The figures of the census of 1911, which have only recently become available, show a total increase in the number of cows in Canada of only 185,502 in ten years, but the total value of dairy products during the same period increased from $66,470,053 to $109,340,024.

The average annual yield of milk per cow has been increased from 2,850 pounds in 1900 to over 4,000 pounds at the present time. This result is partly due to the general improvement in live stock, but the cow-testing work promoted by the Dairy Division has undoubtedly been a potent factor in raising the productiveness of Canadian dairy cows. This improvement has added over $25,000,000 to the annual value of dairy production in Canada, and the end has not yet been reached.

There was a further decrease of about 15,000,000 pounds in the export of cheese for the season of 1913, with some increase in the shipments of cream and milk to the United States.

The exports of dairy products in 1913 amounted to about 15 per cent. of the total production, as against [illegible]4 per cent. in 19[illegible].

The total home consumption of milk and dairy products has increased 75 per cent. during the past ten years, and the per capita consumption during the same period shows an increase of over 30 per cent. It would appear from these figures that home consumption is increasing faster than production.

* * *

In addition to the ordinary label on each of the 1,200,000 one pound tins of British Columbia salmon, the gift of the people of that province to the Motherland, will be a special label, designed by Mr. D. N. McIntyre, deputy commissioner of fisheries, acting under instructions from his chief, the Hon. W. J. Bowser. On the special label, which will encircle the tin, are the words in bold type: "British Columbia's Gift." Below is the provincial coat of arms. On either side is, "To the Imperial Government." To the right hand side of the label are the following words: "When opened this salmon will prove light pink (almost white) in color. Its quality is warranted by the British Columbia Government."

MANITOBA WANTS TWO MILLION DOLLARS

Provincial Treasurer's Report on Expenditure on Public Buildings

When moving Manitoba's bill to borrow $2,000,000, Hon. Hugh Armstrong said:—

"In April, 1913, the legislature authorized the sale of provincial securities to the amount of $3,000,000 for the purpose of erecting new parliament buildings and other public buildings. This borrowing power has been exhausted; we having sold provincial stock early in the year of 1913 to the amount of $2,000,000, and, in December of the same year treasury bills to the amount of $1,050,000.

"Since the beginning of the fiscal year of 1913, we have expended on buildings, altogether, $4,904,271. Of this amount $3,473,977.54 was expended on buildings other than parliament building, and this division is as follows:—Agricultural college, St. Charles, $37,444; agricultural college, St. Vital, $2,334,358; hospital for insane, Selkirk, $128,162; hospital for insane, Brandon, $553,814; deaf and dumb institute, $669; industrial training school, $80,039; court houses and gaols, $2,010; land titles offices, $5,171; old parliament buildings, $2,078; home for incurables, $74,070; Stonewall public buildings, $2,500; normal school, Brandon, $112,652; normal school, Manitou, $2,144; central power house, Winnipeg, $137,066.

Money is Required.

"The remainder, $1,430,294, has been expended on the new parliament buildings. The difference between $3,000,000 and $4,904,271, or nearly two million dollars, was, for the most part, moneys accumulated from ordinary revenue in the consolidated funds of the province.

"The moneys available, therefore, for the purpose of continuing work on the new parliament buildings have been exhausted; and it becomes necessary to have the authorization of parliament to borrow further moneys on our securities; hence, in part, the reason for calling the legislature together at this time; but for the extraordinary conditions occasioned by the war in Europe, we would have been able by means of an overdraft to have continued the work of construction till the next regular meeting of parliament.

Markets are Closed.

"This legislature is aware that it is impossible to borrow any money either in London, in Europe, or in America while war continues on the continent. It is the intention of the government to take advantage of a special enactment by the Dominion parliament which provides, briefly, that on the application by a bank to the Dominion government, the Dominion government may issue to the bank, on their depositing with the Dominion government, or the Royal Trust Company of Canada, or the Bank of England, as the finance minister of Canada may direct, securities that are approved of by the minister of finance of Canada, Dominion notes as against this approved security. It is not proposed to sell, or rather to pledge any greater portion of this issue of securities, of which we are asking for sanction, than sufficient to cover expenditure from time to time on these buildings.

Non Revenue Earning Moneys.

"Doubtless the legislature will be interested in a statement showing moneys owing by the province, which are or have been used or invested in such a way as to be non revenue earning; and the statement is as follows:

Series E, May 1, 1888, for public service	$1,498,033
Series F, December 30, 1893, for public service ..	997,666
Series G, November 1, 1900, for public service ..	500,000
Manitoba government stock April 1, 1913, new parliament and other buildings	1,946,666
Treasury bills, June 1, 1914, new parliament and other buildings	1,022,000
Treasury bills, May 1, 1914, good roads	973,333
Total	$6,938,600

Nearly Nine Millions.

"With the two millions now contemplated the total will be nearly nine million dollars. The second clause to the bill reads as follows:—

"Notwithstanding anything contained in the said provincial loans act, the lieutenant-governor-in-council may mortgage, pledge or hypothecate Manitoba government debentures, stock or treasury bills, to be issued for the loan hereby authorized.

"The necessity for this arises from the fact that, while under the bill, which is in usual form together with the provisions of our provincial loans act, the government will be empowered to sell provincial securities, there is a doubt as to whether it has the authority to pledge or hypothecate these securities pending such time as a successful sale can be made. Hence the necessity for the addition of this second clause to the bill."

◆

YORKSHIRE GUARANTEE CORPORATION

The report of the Yorkshire Guarantee and Securities Corporation for the year ended June 30th, shows that the income, after deducting expenses, declined by £1,500 to $16,000, while, after allowing for debenture interest, the net balance was £11,100, or a decrease of £1,900. With the amount brought forward the sum available to be dealt with is £14,500, or £2,100 less than a year ago. The dividend is the same as that for the previous 12 months—namely 6 per cent., but the appropriation for the reserve is £2,500, as against £4,000, and the carry forward is reduced from £4,000 to £3,500.

With regard to the payment of the dividend, however, the directors ask that the date on which the distribution shall be made be left to their discretion, because the high rate of exchange as a result of the war makes the cost of transmitting the necessary funds from Canada to England prohibitive. The name of the company will be changed to the Yorkshire Guarantee Trust Company and the business will be registered in British Columbia under the new trust companies act of that province.

◆

FIRST IRRIGATION CONGRESS IN CANADA

His Royal Highness the Duke of Connaught will, through the medium of the electric current, press the key at Ottawa and formally open the twenty-first International Irrigation Congress in Calgary. This congress, the first of its kind to be held in Canada, will be attended by delegates representing the agricultural interests of all the provinces of Canada and most of the States of the Union. On account of the war the invitations to foreign countries were witheld, consequently the congress will be practically confined to the North American countries. In its scope the congress deals not alone with matters relating to irrigation, or the artificial watering of crops, but reaches out through the happy medium of soil production under what might be called normal conditions, to the extreme of dry-farming in exceptionally arid districts. The congress has always stood for the opportunity to build new homes, and colonization will be one of the important topics on the programme. In conjunction with the congress there will be held an exhibition, to which probably forty districts in the western provinces besides the provincial governments and the Canadian Pacific Railway Company will send displays of agricultural and horticultural production from every known system of soil cultivation. To stimulate competition in this feature some fine cash prizes are offered.

Sidelights on Money

During the brief rest intervals in the business of dollar hunting, following the war, and trying to do business as usual on this continent, it is interesting to study the position of money in other countries.

According to Mr. Mori, financial commissioner of the Japanese government in London, there is an old-time contempt for money in Japan. Whatever the real motive of the ancient moral code might have been the general impression left and deeply rooted by the teachings of the wise men of old was that it was unworthy of a gentleman to think or talk about money. In Japanese history, drama, novels, very little mention was made of money, and the subject was always curtly dismissed or harshly treated. Gentlemen tried to keep aloof from all money transactions. Mr. Mori referred to the changes that had taken place in this respect, and said in new Japan money had found a much kinder and wiser master. In all personal relations, however, the time-honored contempt for money was still the ruling spirit. Judging by recent events this, we think, is likely to change.

Money is held in great esteem in troublous Mexico. The only way to maintain the army recently was to pay them daily to hold their confidence. *The Monetary Times* recently printed a letter from a Canadian in Mexico who stated that the Mexican government, being on its last financial legs, was "printing bills by the bale" to meet the demands for currency. This was said to be due to the exportation to the United States of coin and paper money with the object of crippling the administration in Mexico. That apparently did not worry Huerta, who set going his printing machines and manufactured as much money as he needed. It is difficult to know exactly, from this distance, how the money situation is being handled in Mexico, but there seems to be as much confusion in that sphere as elsewhere in the republic.

As suggested by America, China's new coinage will have a silver dollar, half, quarter, dime, nickel, two cents, cent, half a cent and one-tenth of a cent, all minted in government mints. This means that very slowly the old system of using provincial coinage of debased value, bullion exchange, private bank notes and so on will pass away.

One of the most remarkable examples of the irregularity of the currency is cited by Mr. John Stuart Thomson, a Canadian who has written several books on China. He refers to the situation at Newchwang in 1912. National taxes are paid in Kuping taels; provincial taxes in Manchurian dollars. Customs duties are paid in the usual Haikwan taels; local octroi in small silver. The national post office will only accept Mexican dollars. The national telegraph office will only accept Manchurian dollars. The national Chinese railway cashiers must receive payment of freight bills in either Peiyang or Kiauchou (German) dollars. The pursers of the national China Merchants' Steamship Company demand payment of fares in either Mexican dollars or Newchwang taels. The Japanese, who run a railway, a concession, public utility works and a hotel here, demand payment of their bills in the Japanese silver yen (dollar).

On their railway lines they demand payment in the Japanese gold yen. The Russian demands payment in his paper ruble note. The Americans and English demand payment respectively in eagles and sovereigns. All of these concerns will discount other moneys at a heavy profit, so that they, and the money changers, in the multiplicity of standards, soon shave the dollar down till its pride and distinction of stamp are humble and thin enough! A tael, the old monetary system, is a Chinese ounce equal to $1\frac{1}{3}$ ounces avoirdupois. The Haikwan tael, the standard of fineness accepted by the Custom House, is rated at 100, in comparison with which are the Tientsin tael at 105; the Hankau and Newchwang at 108, and the Shanghai at 111. When new silver arrived at the old provincial mints, it was refined or adulterated to conform with these grades. The edict of October 5, 1908, suggested that if the standardization of silver was successful, a gold standard might be looked for. Handling money, in these lands, savors of the proverbial Chinese puzzle.

The unexampled progress of most of the South and Central American States during the past quarter of a century has been the wonder of commercial Europe, but it is certain, as the British Export Gazette says, that these States might have enjoyed still greater industrial and commercial development, more fully commensurate with their unparalleled natural resources, had it not been for certain hindrances which have continuously beset their economic advance. It is paradoxical that countries with, it is true, separate administrations, yet the majority of one race and tongue, and with contiguous frontiers, should nevertheless be cursed in regard to interstate commercial relations by so much chaos in money equivalents.

Take the dollar, for instance. Under the sign \$ a value is implied in Uruguay of 4s. 3d. in English currency; in Paraguay, under the name of peso, in silver, it is 4s. 1d., but in paper only $8\frac{1}{2}$d.; in the Argentine the peso or patacon is worth 3s. 11[illegible]d. silver and 1s. 6d. paper; in Venezuela, the venezalona is also valued at 3s. $11\frac{1}{2}$d.; in Ecuador, the same value is attached to the sucre if of silver, but 2s. if in paper; in Colombia the peso is the equivalent in British money of 3s. $11\frac{1}{2}$d. if in silver, but is 1s. $6\frac{1}{2}$d. in paper. In Mexico, San Salvador, Guatemala, and Honduras the dollar is valued at 2s.; in Peru the sol is of the same value; in Costa Rica, the colon is only worth 1s. 10d.; in Bolivia, the boliviano is worth but 1s. 8d.; and in Chili, the peso has a buying value of no more than 1s. 6d. There are, therefore, no fewer than nine different values under the $ sign in the Spanish-speaking countries, and not one of them identical with the dominating coin of the American continent, the dollar of the United States, valued at 4s. 1½d.

◆

The British navy will test the worth of the made-in-Germany ships while we at home can prove the value of made-in-Canada goods.

* * * *

A campaign to sell more Canadian apples in Canada is good, but we fail to understand yet why Canadian apples cannot be sold in Great Britain almost as usual. Wheat is being shipped; why not apples?

CREDIT AND CASH

Those who complain of lack of banking facilities should examine their own position critically. Money can be borrowed only if the prospective borrower has a proper basis of credit. On credit is built business, but credit itself has to have a substantial foundation, otherwise business collapses. In a borrowing country, such as Canada, there must be extensive credit. At the same time, it is just a question as to whether the system has not been carried too far in various quarters. Whenever the subject is tackled, there are always those who are peeved, but self-examination reveals the fact that there is too much love of credit promises and too little of cash settlement. During the present period of readjustment throughout the Dominion, the condition is being emphasized.

The disposition of many merchants to be too lenient in regard to credit was discussed by Mr. H. Adams at a meeting of the Winnipeg Credit Men's Association last week. "There is no doubt in the minds of any of us," he said, "but that we have been too lenient with creditors in the past. We have all known it to be so. We have talked to each other freely about it, and we have all kept on playing the game the same old way. I do not care how good the conditions have been, or will be, extensions of credit to the same extent as we have been accustomed to is not consistent with good business. More care and good judgment should be exercised. But to me the extension of credit to worthy people is as much a vital part of our business as buying our stocks of goods, and will continue to be so."

The war should help the people of Canada to regard cash transactions more favorably.

◆

The placing of an Australian order for rails in the United States while Canadian rail mills are slack, indicates that the "trade-within-the-Empire" scheme is not working quite smoothly yet.

* * * *

Monday, October 12th, Canada's Thanksgiving Day. The Larder of the Empire, doing business as usual, heart and soul with the cause, with fields untrampled by army horses—just one of many reasons for gratitude.

GOVERNMENT FINANCING IN WAR TIME

The first Canadian provincial government to take practical steps to float a loan during war time is Ontario. That province is selling $1,000,000 five-year 5 per cent. bonds in Canada and the loan is expected to have a good reception. Ontario made inquiries with a view to marketing this loan in the United States, but were informed by bankers there that President Wilson's ban on loans being raised in the United States for governments at war would seem to include Canadian provincial governments. The London market also being closed, Ontario will sell its bonds here.

In Saskatchewan, for public works capital account $1,799,950, part of the proceeds of an issue of treasury bills sold in April, was at the disposal of the government. Money to be paid on vouchers which had been sent in for work done before the outbreak of war and the sums required for advancing certain public works in order that the money already spent might not be wasted, would make a total of $1,822,000. An additional sum was therefore needed. For relief work and for patriotic purposes it is necessary to raise a further sum of about $1,500,000 by way of a temporary loan, the sum required for patriotic purposes alone being $750,000. Arrangements for a temporary loan have been made by the provincial government and it is not anticipated that the rate of interest will be in excess of 5½ per cent. The government expect to make the loan a permanent one in the near future.

A bill to provide for the hypothecation of the securities of the province of Saskatchewan, passed at the recent session, gives the government powers which will enable it to raise loans in this manner during the continuance of the war.

Manitoba also has a $2,000,000 loan to market.

Several applications have probably been made for advances from the Dominion Government by the provinces, under the provisions of the emergency measures announced at Ottawa in August. The August return of the banks to the government shows that $750,000 in Dominion notes had been issued on approved securities. It will likely be found that a much larger amount has been issued during September.

As to the Dominion government's next loan, the flotation of which is probably not far distant, there is, as previously forecasted by *The Monetary Times*, the possibility of Canada arranging a loan from the Imperial government, and in view of all that Canada has done since the commencement of the war, we anticipate there will be little difficulty. For such purposes as fresh loans, there is practically only one source from which money would be forthcoming in Great Britain at present, and practically any country, and that is the Imperial government through the medium of the Bank of England.

◆

The Toronto alderman who boasted last week of throwing into the wastepaper basket, unread, the excellent pamphlets of the local bureau of municipal research, gave a good demonstration of aldermanic incapacity.

* * * *

While President Wilson has issued a ban against United States bankers making loans to governments at war, including Canada, United States ships are carrying copper for the Krupp gun works in Germany to be used for the construction of torpedoes. Neutrality has an ever changing complexion.

CIVIC FIRE INSURANCE

The Toronto board of control have recommended the council to consider the advisability of carrying its own fire risks. This proposal one would scarcely expect from a leading city in Canada. One question seems to answer this latest municipal proposal. What would have happened to the civic insurance fund if the city had been carrying its fire risks at the time of the conflagration of 1904, and the flames had taken a slightly different course? No one can guarantee as to when and where fires will begin and stop. A city cannot afford to carry its own fire risk. That risk embraces everything from a small rubbish fire to a conflagration that wipes out the town. A conflagration makes matchwood of these good looking theories.

Another phase of the proposal is for the city to acquire a controlling interest in an existing company by the purchase of stock below par. This is an excellent proposition for ore of several third-rate companies which have stock to sell below par.

MORATORIA AND MORTGAGES

Investors should not become alarmed at the limited moratoria declared by Manitoba and Ontario. They may recall, also, that no other provinces have such legislation in effect; that Sir Richard McBride, premier of British Columbia, has definitely decided that a moratorium will not be made operative in his province; and that there is little likelihood that any such legislation will be enacted by the Dominion government. Investors should not withdraw their funds in consequence of the Manitoba and Ontario legislation. While capital, always nervous, is even more so in times such as the present, *The Monetary Times* feels that the two legislatures concerned will see to it that invested capital is not given an unfair blow.

At the same time, it is to be hoped that no other province will think it necessary to pass moratorium legislation. This journal still feels that it is unnecessary to do so. The action being taken by Ontario appears to be wiser than that of Manitoba. The latter, we think, fairly earned the scathing remarks made by Mr. J. W. Flavelle, as reported in *The Monetary Times*. If the regulation extending the time for foreclosure from six months to one year, remains long in existence, it will inevitably result in mortgagees immediately instituting action when default occurs, because they will see that before foreclosure can be completed there will be at least another year's interest, taxes, etc., added to the mortgage debt.

Then, too, as we read the Manitoba Act, whether the default is in interest or principal nothing can be done as against the land for six months, whereas according to the foreshadowed Ontario law the mortgagee is free, so far as arrears of interest are concerned, to make use of all the remedies heretofore available.

Moratoria laws are fine things in theory, but the postponement of the payment of debts is a dangerous practice.

◆

Buy made-in-Canada goods, because we help to make them and they help to make us.

* * * *

Wise municipalities will take the first reasonable offer made for their bonds, and they will not examine the reasonableness with a microscope.

MORE PRODUCTION AND GOOD CREDIT

These Must Be Canada's Important Considerations, Says Professor Adam Shortt

The three points emphasized in an address by Professor Adam Shortt to the Canadian Club, Toronto, this week, were the necessity for increased production, the need for re-organization and the maintenance of Canadian credit, and the fact that the present reaction in Canada is not due entirely to the war. After dealing with the excessive development in the urban communities of western Canada and distinguishing between "actual produced wealth" and "prospective, imaginary, psychological wealth," Professor Shortt showed how a great quantity of the latter class of wealth vanished at a time like this, due to the falling off in the supply of borrowed capital. "While capital was being imported in such large amounts, the imports of goods were always from two hundred to three hundred million dollars in excess of our exports, and now when the slowing-down comes, we give our production a chance to catch up."

Weeds and Real Estate Stakes.

Dealing with the recent active period of construction, he said that men had been taken from the farms to work in the cities. The wages were better there. While skyscrapers were being built in Vancouver, he had seen much of the rich agricultural soil of the Fraser delta growing nothing but weeds and real estate stakes. Cities could not thrive without agricultural production and men would have to get back to the farm.

Professor Shortt disposed of the popular cry in certain quarters for the banks to come to the rescue just now and provide money to maintain the city and railway construction which had been going on and had been supported by British capital. "That would be perverting the function of the banks," said he, "which was simply the facilitating of exchange. You cannot," he continued, "by adjusting the banking system create one more mouthful of food." The money-lenders abroad must be paid by bills of exchange or counter goods, and not by Dominion notes."

We had in Canada the necessary machinery for production many years ahead of the demand, he continued. It was now necessary to produce more from that machinery. If there were six boot and shoe factories handling the demand with sufficient competition, it was useless to propose four or five more such factories and to ask capital to finance them.

Maintenance of Credit.

It was most important that our financial house be set in order. Canadian credit should be re-organized and every effort made to maintain it at a high standard. When the war was over Canada should be able to place only sound proposals before the British investor, and feel justified in obtaining his confidence and capital This question of credit was most important. When Canadian credit was hurt in the fifties, it took nearly two generations to recover from the bad results.

The war should not be blamed for everything during the present readjustment in Canada. It had aggravated conditions which existed before war was declared. "We all must have realized before the war," continued Professor Shortt, "that Canada had been overdoing speculative investments. There was an overdevelopment of cities and towns in the west which stimulated industries in the east." Immense investments had been made in the country which are incapable of giving immediate returns, and it was inevitable that areas thus affected should remain idle until the Dominion as a whole had a chance to catch up. That condition cannot be blamed on the war."

Getting German Trade.

Professor Shortt had some doubts about the success of capturing German trade. "Certain articles which have been produced in Germany and which have been essential to manufacturing in Britain and other countries would take years to establish by rival peoples. After the war," continued the speaker, "Germany will return to her industries and will be obliged to endure all sorts of self-sacrifice, including lower wages and lower standards of living. We will not be willing to compete with Germany then."

"Business as Usual"

MONEY FOR A YEAR'S WORK

"We are assured of enough money to carry on our work for a year at least. There will be no interruption," says the Toronto Harbor Commission, through its secretary, Mr. Alexander Lewis.

BUY MADE-IN-CANADA GOODS

Addressing the members of the Windsor board of trade, Major J. C. Tolmie, M.P.P., urged local manufacturers to keep their factories running, "even if you only break even."

Mr. E. G. Henderson, president of the Canadian Manufacturers' Association, and head of the Canada Salt Company, declared there was a limit to the capacity of the warehouses and the credit of manufacturers.

"The best way to help in the present crisis is for Canadians to buy goods made in Canada," he added.

LIFE INSURANCE AS USUAL

"We have accomplished what every insurance man in Toronto said was impossible," writes Mr. John A. Tory, supervisor of the Sun Life Assurance Company in western Ontario, "namely, written more new business during August and September than during the same months last year. August you know all about; September, 1913, was a great month, but the force of western Ontario not knowing what defeat means, has accomplished the impossible, and to-day we closed September with $14,000 more new business than September of last year."

WAGES AS USUAL

Those manufacturers who keep their concerns going and their men in employment without reducing wages are entitled to consideration and support. We have heard with regret a story that one very prosperous firm has made an all-round reduction in wages, even going so far as to lower the wages of an elevator man from $7 to $6. If this practice is generally adopted it will become very difficult to appeal to Canadians to support their own manufacturers. If these manufacturers act with timidity and selfishness, people will refuse to show them any special consideration. If they show courage and a spirit of self-sacrifice the appeal on their behalf will be made with enthusiasm and will meet with a generous response. Those firms who have reserves and resources ought to use them up to the utmost limit, in confidence that good times are coming, and that there will be an increasing demand for the product of our factories.—Toronto Star.

THOUSANDS OF DOLLARS FOR HOGS

At the sixth monthly hog market day, a day inaugurated by the Medicine Hat board of trade last spring, to provide a wider market for the district hog raisers and to encourage mixed farming, a large number of hogs were brought in and quickly taken by the buyers who were on hand. While the prices were about a cent lower than a month ago, there was no difficulty in disposing of the hogs, the top price being 7 cents per pound.

Thus far, through these monthly hog market days, the farmers of this district this year have realized approximately $18,000 in cash for their swine, not including what the local butchers have absorbed in between, not an inconsiderable amount in itself. The record is believed to be a creditable one, when it is remembered that this is the first year that shipments of hogs have been made to any extent from this point. Something over 200 hogs were brought in, the Canadian Pacific Railway stockyards, where the city installed special hog weighing scales, being a busy spot throughout the day. It is also known that, learning of the shipments made from here, independent hog buyers have been in the district during the season, picking up what they could secure in this line.

TO BUILD DRYDOCK

President Chamberlin of the Grand Trunk Railway states that the Grand Trunk has decided to build one of the largest drydocks in this country in Prince Rupert, at which a 20,000-ton battleship can be docked. Work will be started January 1st. A complete shipbuilding plant will be in operation shortly after the first of the year.

WAR WITH ONE HAND; BUSINESS, THE OTHER

The following appears in the Halifax press:—"Business Notice.—While Major Thompson and Captain Adams are on military duty with their regiment, Mr. W. A. Affleck is acting as managing director of the company, assisted by the usual complete staff. Consultation with either of the seniors can be arranged by telephoning this office.

"The business is going on as usual and our patrons are solicited to continue to place their orders with the company with the assurance of the usual prompt attention to their interests. Thompson, Adams and Company, Limited, insurance brokers, 166 Hollis Street, Halifax." That is the way to keep things moving.

SIX HUNDRED DOLLARS PER FAMILY

"There is no danger in Canada from the actual operations of war. Therefore there is no reason why business conditions should not be satisfactory. Basic conditions were never better in the western country than they are this year. Instead of a condition of pessimism verging on panic, there is every ground for confidence. This is especially the case in Manitoba and the northern part of the country, which produced, according to the Manitoba Free Press estimates, 320,000,000 bushels, and the grain growers' estimate 353,000,000, average 335,000,000 bushels, which at 60 cents a bushel, a low estimate, would give us roughly $200,000,000. Add to this our root crops, dairy products, livestock, etc., which would easily be another $20,000,000 to $25,000,000. This, divided amongst a population of about one million and a half would give us $150 each for every man, woman and child. Divide them into families of four and you have $600 to the family. Then, take into consideration that a large number of the population live in villages, towns and cities, and you will see that if every one had been engaged in their legitimate business and living within their means instead of speculating and gambling in real estate and other matters we would have money enough and to spare."—Mr. Alex. Macdonald, wholesale merchant, Winnipeg.

Peterboro	1,804,079	.. ..		....

PERSONAL NOTES

Mr. Frank Carrel, of Quebec, has been elected a director of the International Portland Cement Company, of Spokane, Washington, U.S.A. This company, almost entirely controlled by Canadian capital, is operating a modern cement plant having a capacity of about 200,000 barrels per day.

Hon. W. L. Mackenzie King, ex-minister of labor, has been selected by the Rockefeller Foundation to assume charge of its new sphere of work in regard to questions affecting the better relations of labor and capital. He will still retain his Canadian residence and his active connection with Canadian public life.

Hon. Finlay George Macdiarmid, the new minister of public works, Ontario, was born at New Glasgow, Elgin county, in October, 1869. He was educated at a public school and Ridgetown Collegiate Institute. He was a member of his local township council for four years. The new minister, who is a farmer, made his debut in parliamentary honors in 1898.

Mr. Honeyman, of *The Monetary Times'* job print department, won the second prize of $100 in the "best back garden" competition organized by the Dovercourt Land, Building and Savings Company, Limited, Toronto. He is a Scotchman, an enthusiastic horticulturist, and has almost solved the problem as to which came first, the seed or the flower.

Mr. M. J. Kent, manager of the London Loan and Savings Company of Canada, is a man of comparatively few words, but they are always to the point. Discussing with *The Monetary Times* the proposed moratorium legislation in Ontario and Manitoba, he says: "There is only one opinion to give on such a subject—it is rotten legislation." Mr. Kent's company is one of the oldest in Canada, having been incorporated in 1877.

Mr. Martin Nordegg is the German banker after whom a little town in Alberta was named. The Canadian Northern Railway Company recently took over the Stettler-Nordegg Railway in Alberta and will operate it. The road is 123 miles in length, and runs from the main line at Stettler to Nordegg, a colliery town. A story has gone the rounds that the colliery at Nordegg is owned by Kaiser Wilhelm of Germany. This is incorrect, although it is true there has been considerable German money invested in the enterprise, through Mr. Nordegg. This gentleman had his headquarters in Toronto, but some months ago moved them to New York. He is an interesting conversationalist, extremely well informed on business, finance, investments, and the world's doings, and has an attractive personality. Naturally, he has strong German sympathies.

Mr. J. K. McMaster, manager of the editorial and purchasing department of the Canada Life Assurance Company, has issued an unusually attractive number of "Canada Life Echoes," for October. This is the house organ of the company, but deserves a much wider circulation. This particular issue is one for women, and contains photographs and articles dealing with the various activities of the fair sex. Those treating the subject of women and insurance are especially valuable. They contain unanswerable arguments for wives to pass along to husbands who have failed to insure their lives, and for husbands to hand to wives who have objections to a small sum annually going into one of the first necessities—life insurance. Mr. McMaster has raised his company's publication far above the "house organ" class.

Dr. Adam Shortt, M.A., who delivered an interesting address to the Canadian Club, Toronto, this week, is chairman of the civil service commission, Ottawa. His theme was "The Effect of the War on Canadian Trade." Professor Shortt has long enjoyed unusual distinction in the field of Canadian economics. His services to the country on Taxation Commissions, as original arbitrator under the Lemieux Act, in Civil Service Reform, and by contributions on tariff and banking subjects, are well known. He was in Great Britain during the memorable week in which war was declared, and thus had an opportunity of acquiring first hand information on the economic effect of the war, not only on the Mother Country, but also on Canada and other parts of the British Empire. He contributed a valuable article to *The Monetary Times Annual* early this year.

Hon. W. H. Hearst, K.C., Ontario's new premier, is a fine type of citizen. Well built, physically and mentally, an enthusiast in his work, with sufficient political tinge in his character to make him fit well into the political groove, Ontario will find a man of energy and excellent qualifications to lead.

Mr. Hearst is fifty years of age. He was born in Arran township, Bruce county, on February 15th, 1864, and received his education at the local public school and Collingwood Collegiate Institute. His professional career was spent as a lawyer in Sault Ste. Marie. For six years he has sat in the provincial legislature for the riding of Sault Ste. Marie, being first elected in 1908. When the Whitney Government came into office Mr. Hearst was appointed as agent for the province in connection with the guarantee loan of $2,000,000 to the consolidated industries at Sault Ste. Marie, and resigned from that position to enter the political arena. After three years of service he succeeded Hon. Frank Cochrane as minister of lands, forests and mines when Mr. Cochrane was called to Ottawa.

Mr. Hearst has spent most of his life in Northern Ontario, and is well versed in its resources and problems.

Less than two years ago, this was the message given by Mr. Hearst to the people of Canada through the columns of *The Monetary Times Annual*:

HON. W. H. HEARST, K.C.,
Ontario's New Premier

"Feelings of hope and courage stir a Canadian's heart at this time when he seeks to look into his country's future.

"The grounds for these feelings are strong, abundant and sure—a land full to repletion with raw material for the arts and industries and with agricultural possibilities unsurpassed, a land of splendid waterways and majestic rivers furnishing limitless power to light and heat our homes and turn the wheels of commerce; with railway and canal systems which, although only in their infancy, are nevertheless already the admiration of the world; a land half way between Europe and the Orient, compelling trade with both; a northern yet temperate climate, maturing the best qualities of fruit, grain and animals, and developing the highest and best types of mankind; a people seeking quarrel with none and determined on peace, but who nevertheless would shrink from no sacrifice for national weal and national honour; a people whose ideals close in truth, religion and the common good; a people determined to make the northern half of North America the home of a freer, nobler, higher type of civilization than has ever yet flourished. To such a land and such a people destiny can deny little.

"The future, being unknown, is uncertain. Canada has many difficulties to overcome and problems to solve, one of the most important of which is the assimilation of the foreign immigrants, strangers to our tongue, our institutions and our ideals, who are pouring into our country, so that they may bring strength, not weakness, to our national character. But we have happily no problems or difficulties that will not readily yield to a wise, patriotic citizenship and an enlightened statesmanship.

"If there be no faltering on our part, no lowering of standards of thought and action, no debasement of motive, and if we are but worthy of our forefathers and the country in which we live, Canada cannot fail to write her name high up upon the scroll of the nations of the world and to fill the twentieth century with a glory of achievement."

These inspiring words are remarkably appropriate now.

Mr. E. F. Wyman, the well-known land and insurance man of Melfort, has been appointed general auditor of the Canadian Elevator Company, a corporation representing Canadian and United States financial interests in Winnipeg. The people of Melfort tendered Mr. Wyman a farewell dance and several presentations were made by his friends.

Mr. J. B. White, manager of the woods department and sawmills of the Riordon Pulp and Paper Company, has been appointed a member of the Forestry Committee of the American National Wholesale Lumber Dealers' Association for the ensuing year. The other Canadian member appointed to this committee is Mr. John S. Gillies, of the Gillies Lumber Company, of Braeside, Ont.

Mr. Fleetwood H. Ward, vice-president and assistant to the managing director of the Ames-Holden-Macready Company, Limited, was accidentally killed while crossing the railroad track at Strathmore, Que. Mr. Ward was educated in Montreal. He became auditor of the Laurentide Paper Company, and was later employed in New York. In 1906 he returned to Montreal to occupy the position of comptroller of the Canadian Rubber Company, in which company he successively held the positions of treasurer, general manager and vice-president. The deceased was also a director in other Montreal companies.

Mr. Arthur L. Bates, who has been vice-president for twenty years of the Union Mutual Life Insurance Company, of Portland, Maine, has been elected president. Mr. J. Frank Lang, who has been secretary for the same period, has been elected vice-president. The office of second vice-president has been discontinued, and Mr. Sylvan B. Phillips, who has held that position has been elected secretary. Mr. Arthur L. Bates has been in the service of the Union Mutual during his entire business life, covering a period of nearly forty-five years, beginning as a junior clerk. Mr. J. Frank Lang has been in the service of the company for a period nearly equal to that of Mr. Bates, and has filled various positions in the home office, including those of cashier and assistant secretary. The new secretary of the company has been in the service nearly twenty-eight years, and for the greater part of the past twelve years as assistant secretary, his position having been changed during the latter portion of this period to second vice-president, which office, by the new arrangements made, has now been discontinued.

◆

CANADA YEAR BOOK

"A hold was taken of the soil that was not destined to be relaxed." Thus does Dr. A. C. Doughty, C.M G., LL D., deputy minister, Public Archives of Canada, describe the beginnings of Canada, which has now become the British Empire's granary. The Canada Year Book for 1913, to which Dr. Doughty contributes a history of the country, is a notable production. Its six hundred and fifty odd pages contain a vast amount of information regarding Canada's economic development and progress. Issued under the authority of Sir George E. Foster, minister of trade and commerce, it should be on the desk of every Canadian financier, manufacturer and merchant. There will never be dust on the covers, either. It is an excellent text book which might well be placed in the hands of students training in the Motherland as school teachers for Canada.

"Canada Year Book, 1913." $1. King's Printer, Ottawa.

◆

Apple blossom time in Normandy is not as good as apple picking time in Canada.

War orders placed by the British and Canadian governments in Canada include those for horses, saddles, harness, oats, hay, wheat rifles, blankets, sweaters, shirts, soldiers' "housewives," overcoats, socks, shrapnel shell, provisions, wagons, motor trucks, etc., etc.—all of which is circulating money in Canada.

LAPSES DOUBLED IN ASSESSMENT INSURANCE

Terminations in Four Companies' Business Equivalent to 146 Per Cent. of New Policies

The business of insurance on the assessment plan has been carried on by four Canadian associations reporting to the Dominion Department, three of them being fraternal societies, and the other the Commercial Travellers' Mutual Benefit Society.

The total amount of policies taken in Canada during the year 1913 by these four Canadian associations was $15,591,662, which is less than the amount of assessment policies of these associations taken in 1912 by $3,575,719, and the net amount in force at the end of the year was $136,244,519, which is less than the amount in force at the end of the year 1912 by $8,668,868.

The amount of the insurance terminated by death was $1,599,317, and by surrender and lapse, $22,768,463. The total terminations amount to 146.03 per cent. of the amount of new policies.

The total amount paid by members in Canada for membership fees, annual dues, assessments, etc., was $5,292,059.53, and the amount paid for death claims was $4,306,130.67.

The following table shows amounts of life insurance terminated in natural course or by surrender and lapse among assessment life companies in Canada during the year 1913:—

Canadian companies.	Terminated by Death.	Surrender, expiry or lapse.	Total terminated.
Catholic Mutual Benefit Association	$ 428,000	$ 1,294,500	$ 1,722,500
Commercial Travellers' Mutual Benefit Society	39,000	169,000	208 000
Independent Order of Foresters (Canadian business)	995,567	20,009,463	21,005,030
Woodmen of the World..	136,750	1,295,500	1,432,250
Totals, 1913	$1,599,317	$22,768,463	$24,367,780
Totals, 1912	$1,625,293	$11,285,447	$12,910,740

Peterboro	440,821			

◆

Send a practical tribute, money or kind, to the suffering Belgians. Mr. H. Prud'homme. Room 70, 59 St. Peter Street, Montreal, is the secretary of the Belgian relief committee in Canada.

DO NOT LIKE MORATORIUM.

It Does Not Help National Credit—Companies Seldom Foreclose Unless Borrower is Hopelessly Bad

A Winnipeg loan company manager, speaking to *The Monetary Times* of the Manitoba legislation respecting the postponement of real estate payments, said:—"In very few instances bad harsh treatment of borrowers or purchasers under agreements of sale been recorded, and both private individuals and loaning institutions were showing a good spirit in making due allowance for prevailing conditions, and matters would have adjusted themselves in due course without new legislation. I have not yet met a business man who is in favor of the course adopted by our legislature. Many people who could well afford to pay their obligations are taking advantage of the respite. In spite of the fact that the harvest money is already in circulation and that the total returns will be the largest amount on record, collections on mortgages and agreements of sale are not feeling the effect thereof.

"I think the legislation here has undoubtedly done more harm than good. If the loaning institutions are unable to make collections they cannot handle any new business."

Will Not Help Province.

A Toronto loan company manager thinks that the Manitoba legislation "will prove very injurious to that province, causing a cessation of credit and the prevention of trust and loan companies and other investors from making any extensive investments by way of land mortgage in that province.

"This, in my opinion," he adds, "will continue until the moratorium act has been repealed. I know several loan companies that have already ceased lending in that province on this account.

"Regarding the proposed legislation by the Province of Ontario, the terms of which have been given to the press, in my opinion, the proposed act will not very seriously affect mortgagees in that province. It will add to the legal costs and cause delay in the event of a mortgagee taking proceedings to realize upon the security.

"Investors also will hesitate to make advances by way of mortgage during the continuance of the proposed act, and thus cause a reduction in the investment of money used in that connection. It may also prevent loan companies obtaining money in Britain to the extent hitherto enjoyed from that source."

Canada and the War.

The manager of another eastern Canada loan company says the effect of the war in Canada, the British fleet commanding the sea as she does, is not very marked. "In fact, as a whole, I think Canada will not suffer," he adds, and continues, "Her farmers will get as good, and probably a better price for their products than they did before, and their labor should cost them less. This country has gone mad over industry, and a large amount of labor has been employed in industry which did not pay, and the capital invested in it very unproductive, and it is much better for this country, that this labor should go where it is reproductive.

"The instalment payments on the mortgages held by our corporation are as well paid now, as ever. Another company in this district tells me the same thing. In fact, our arrearages are less than they have been for three or four years.

"If anything were done, which would give the right to the borrower to defer his payments, he would be very apt to take advantage of it, and when that right had expired, he would probably be so far in arrears, as to become discouraged and would give up his efforts to pay off his mortgage.

Company Should Have Privilege, Too.

"If the borrower gets the right to defer payment, the company should get the right to defer payment of its debentures and deposits. This would shake the confidence of the public in mortgage companies, and we would not be able to command the money to loan to people who are wanting to borrow on mortgage. The proposed legislation would injure our credit in the old countries, and would interfere with the sale of our debentures, there.

"Our company has not a single mortgage in the process of foreclosure. We never foreclose a mortgage, unless we are fully convinced that the borrower is hopelessly bad, and I think this is the rule with other mortgage corporations in Canada.

"If this sort of legislation is passed by our local legislatures, it will surely damage the credit of this country. A great deal of money is brought into this company by the sale of loan companies' debentures, and it is important that no legislation should be passed interfering with the credit which these debentures possess. The war is no excuse for the proposed legislation. The trouble was there long before the war, and I do not think the war has aggravated the trouble. The gambling spirit was largely the cause of the trouble in Western Canada.

No Place for Moratorium.

"England is a trading country, and London, you may say, the clearing house of the world. Foreign nations were using every means to take gold from England. A moratorium in England was justified, but the government has given notice that it will be abolished on November 4th. This will be about the time when a moratorium will be introduced by some of our western legislatures. The conditions in this country cannot be compared with the conditions in England, at the breaking out of the war."

◆

GETS FISH FROM PRINCE RUPERT

Toronto received this week its first car of fresh fish from Prince Rupert, B.C. This was consigned to Messrs. F. T. James and Company, wholesale fish merchants, Church Street, Toronto. This company has arranged for a regular supply of fish, about twice a week, from Prince Rupert. The contents of the car were valued at $2,500, and consisted principally of halibut.

◆

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of October 2nd, 1913; and October 1st, 1914, with changes:—

	Week ended Oct. 1, '14.	Week ended Oct. 2, '13.		Changes.
Montreal	....	$ 60,906,228		....
Toronto	$ 33,710,665	44,207,589	—	$10,496,924
Winnipeg	31,916,389	39,851,856	—	7,935,467
Vancouver	7,914,469	12,366,611	—	4,452,142
Calgary	3,659,125	5,364,083	—	1,704,958

◆

A business coward has nobody's respect—not even his own.

Use a barrel of Canadian apples and a couple of cases of Canadian optimism.

The British bulldog is not handsome, but he sticks to business and never gets the blues.

Contributing to the Canadian national fund for the wives and families of the men at the front, and to the Belgian relief fund, is not charity. It is the duty of those who cannot go to the fight.

Another thing is that Canada still has its $98 per capita savings, while the German government has invested, without permission, 25 per cent. of its people's savings in the war loan, with more to be taken later.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Moore Township, Ont.—Offers are desired for $17,000 5½ per cent. debentures.

St. Catharines, Ont.—The new assessment is $12,480,185, an increase of $1,568,545.

Burlington, Ont.—The municipality has sold $32,000 debentures to local investors.

London, Ont.—This year's expenditure on civic works in London for storm sewers and other street improvements will be $700,000.

Kingston, Ont.—The city assessor's report shows the assessment is $12,579,974, an increase of $620,000 over last year.

Port Coquitlam, B.C.—An issue of $100,000 local improvement debentures is said to be sold to a United States bond house.

Smiths Falls, Ont.—The by-law for the passing of a loan of $25,000 to the Aluminum Castings Company, of Ottawa has been carried.

Montreal, Que.—The city of Montreal has issued treasury bonds for $1,500,000 to the Bank of Montreal. The money is to be used for necessary public works.

Hamilton, Ont.—The assessment increase for the year is $4,284,330, the total being $85,525,615. The larger part of this increase is due to building operations during the year.

Barton Township, Ont.—Tenders are to be considered to-day, October 9th, for an issue of $61,000 5 per cent. school and sidewalk debentures. A local investor has purchased $2,000.

Toronto, Ont.—The city council has referred to the board of control, Alderman Cameron's motion to have the city issue short-term bonds for small amounts to the citizens of Toronto.

Minitonas R.M., Man.—Tenders are required for an issue of $1,250 6 per cent. 20-year debentures. J. H. Cannon, secretary-treasurer. (Official advertisement appears on another page.)

Brantford, Ont.—The total taxable assessment is $18,361,060, while the exemptions amount to $2,887,250. The increase in taxable property is $541,922, while the income derived therefrom is $29,780.

Swift Current S.D., Sask.—No satisfactory bid has been received for an issue of $60,000 bonds and the board have decided to hold them over until an improved money market brings the opportunity for disposal.

Sault Ste. Marie, Ont.—The 20-year franchise of the Tagona Water and Light Company, which has been the only source of supply in water and electricity energy in the city, has expired. The system has been taken over by the city.

Township of Scarboro, Ont.—At a special session of the council, an issue of debentures for $2,000 was made to cover the additional cost of the Agincourt public school, and a similar amount is to be raised for the laying of sidewalks.

Sault Ste. Marie, Ont.—The city council have decided to issue treasury notes to the amount of $30,000 to raise funds to continue local improvement work. This will be against unsold debentures of denominations of $25, $100 and $500 each.

Montreal, Que.—Making provision for the relief of the labor situation, the Montreal board of control have authorized the issue of $1,500,000 of treasury bonds, the proceeds from which will be used to continue the construction of permanent work throughout the city.

Saskatoon, Sask.—Mayor Harrison has stated that the Bank of Montreal owes the city just $106,000 more than the city owes the bank. The total deposits with the bank at the present time, including sinking fund and interest, amount to $482,000, while the current account borrowings of the city total $[illegible]76,000.

Saskatchewan.—An act passed at the recent session, to validate temporary loans for school purposes gives city councils and school trustees power to borrow in the manner indicated to meet all needs until taxes are collected. Many such advances have been made this year and the act will be effective as from January 1, 1914.

Toronto, Ont.—The city council has decided that the municipal hydro-electric commission may increase its capital by another $1,000,000, to enable it to liquidate its immediate liabilities. Also that a friendly legal action be taken to ascertain whether the commission or the city ought to bear the loss incurred by the unfortunate sale of the hydro debentures at a discount of $443,100.

Lethbridge, Alta.—Borrowing its own sinking fund of $100,000, the construction work will be carried forward as contemplated in the by-laws passed in the spring. The work includes the completion of high-pressure water system, new intake, and the laying of storm sewers. The city of Lethbridge has no payments on debentures to meet until 1937, and bonds will be sold later to replace the sinking fund.

Peterboro, Ont.—City Treasurer Adams was present at a recent council meeting, and suggested a scheme of selling $20,000 worth of the city's debentures, by advancing $20,000 to the city trust fund, and at the end of two months receive that amount for the debentures now in the bank. A statement from the Bank of Montreal showed a debit balance to the city of $70,848, and a credit balance for sewers of $41,800, and for pavements $11,375. Mr. Adams reported that $10,000 had been added to the latter, raising the city's credit to $62,000.

Regina, Sask.—Public works to the value of approximately $350,000 will be proceeded with at Regina. The works to be undertaken include the 5,000,000 gallon reservoir; filtration beds at the sewage disposal works; completion of walls and roof of the isolation hospital; and of proposed water and sewer extensions. In addition, a number of other contracts are already being carried out, including the erection of a power house, and the pavement of the Broad Street subway. It is expected that these works will provide employment for a number of men.

Toronto, Ont.—The proposed concrete highway between Toronto and Hamilton has been financed. The $600,000 securities at 5 per cent. for five years, and secured by the provincial government, have been fully subscribed, and the financing of the undertaking completed. It is understood that a number of financial institutions as well as private individuals, have taken the securities, which can, of course, under recent federal legislation, be used as collateral deposits. The majority of the securities were placed by Messrs. G. H. Gooderham, M.P.P., and M. H. Irish, M.P.P.

Calgary, Alta.—By cablegram from London the city has received another offer, and accepted it, to sell half of the $500,000 bond issue which Aldermen H. W. Riley and J. W. Tregillus took to London, but was turned down by the previous purchasers because of a misunderstanding in the dating of the bonds. The new offer came from the London branch of the Bank of Montreal and was for the purchase of £50,000, or approximately $250,000, of these 20 and 30-year 5 per cent. debentures at 93 net to the city in London. The finance committee voted to accept the offer on condition that the city does not pay the stamp tax or any commission to the bank.

Guelph, Ont.—The returns of the assessor shows that the value of lands and buildings both show gains, the total being near $10,000,000. The land values have increased $28,822 and the buildings $259,810. The total for lands and buildings is $9,949,380. Of this amount $2,155,660 is exempt from taxation, the total taxable real estate showing an increase. The exempt property only shows an increase of $3,190. The assessment for business purposes increase is $96,925, while the taxable income is up to the extent of $9,303. The grand total of lands, buildings, business tax and income tax amounts to $11,023,643, a total increase over last year of $304,860.

Hamilton, Ont.—The Hamilton city council empowered the board of control to wait upon the Toronto-Hamilton roadway commission, and say that Hamilton would contribute $30,000 to the project, providing the commission undertook to build a bridge at Carroll's Point, towards which Hamilton would also make a liberal contribution. Other stipulations are that $10,000 worth of work be given to Hamilton laborers at 25 cents an hour, and that Hamilton shall be liable to its share of maintenance of the roadway for 25 years. The council unanimously agreed to start at once the construction of a sewer in the east end of the city, to cost $100,000, provided the provincial board of health approves.

Prince Rupert, B.C.—The following general debentures have been authorized this year, and are unsold:—Telephone pole line extension, $60,000; light pole line extensions, $45,-

000, waterman extensions, $150,000 ($[illegible] of these sold). All mature January 2nd, 1934, and bear 5 per cent., payable semi-annually. Prince Rupert's population is over 6,000. The city's rate of taxation is 1[illegible].975 mills gross; 8 mills being general, 1 mill, hospital, 1.275 mills school, balance special rates. [illegible] off general and hospital. Real property is assessed for 100 per cent. of market value, the single tax method of taxation being in vogue. The estimated general revenue of the city for 1914, exclusive of special rates, including schools, $219,[illegible]2.05. The borrowing powers are 20 per cent. of assessed valuation.

Hamilton, Ont.—Mr. W. J. Southam has offered to buy $250,000 of the city's debentures. "I offer 90 for the debentures," said Mr. Southam at a board of control meeting. Controller Cooper: "We would not sell you these debentures at 90 if the Germans were here. We will give you an option at 96." At a later meeting Mr. Southam, representing the McKittrick Syndicate, made an amended proposal, which, he said, if accepted would mean the expenditure of about $1,000,000 in Hamilton. The present agreement provides that the syndicate shall pay the whole cost of local improvement works, and he asked that the syndicate should pay 80 per cent., the city to do the work. He also suggested that it be done as relief work, and the minimum wage be reduced to 20 cents. He asked the privilege of buying the bonds that would have to be issued to cover the expense of the work at 94. The board deferred action on Mr. Southam's new offer, but intimated that the terms would have to be modified before they would be acceptable. Mr. Southam intimated that it was his best offer.

Saskatchewan.—Messrs. Bradshaw and Willoughby at the recent session, objected to the amendment which forbids cities to invest sinking funds without first securing the approval of the local government board. Mr. Langley pointed out that the board was not to take the initiative in regard to sinking fund investments. That would still lie with the cities and if they chose wisely, they would be in no danger of being overruled. Mr S. R. Moore, Pinto Creek, said that there could be no doubt that many errors in investment had been made by municipalities in the past. Changes of council had frequently brought changes in policy. To take steps to prevent the cities from going wrong in the investment of sinking funds was therefore a very wise course. Mr. Langley pointed out in answer to further criticism that it will be impossible to raise money as freely for municipal purposes during the next few years as has been the case in the past. Councils would be tempted to raise money at times in ways far from wise. In such cases the restraint which the board could exercise would prove valuable.

◆

BRITISH EMPIRE IS UNANIMOUS

In a cable received by the British Ambassador at Washington, referring to the way in which the overseas Dominions, India and the colonies have come to the side of the Motherland, Sir Edward Grey says: "Never in history has so vast and diverse a community shown a spirit so unanimous and resolute in response to a common appeal. In entering the war we have no ill-will to avenge, or wrongs to gratify. Four weeks ago, I asked my countrymen how we could stand aloof and see the wanton invasion of France and Belgium by hordes who leave behind them a dismal trail of savagery, desolation, and desecration, worthy of the blackest annals of barbarism. Since then we have seen still more clearly written in letters of carnage, the real aim of this long-prepared scheme against the liberties of Europe. We still believe in treaties and the rights of the weak and the duties of the strong, and we look forward at the end of the war to a Europe in which these great and simple truths will be safeguarded against a recrudescence of its era of blood and iron."

◆

Smoke a cigar and take sugar in your coffee. It helps Normal and pays the war tax.

The first advertising contract, for a full page in *The Monetary Times Annual*, for January, 1915, was signed in January, 1914. The company whose announcement will appear on that page next year, is still glad, despite the war, that it got ahead of others who now want the same position. All of which shows that in business the present should always be considered in conjunction with the future.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing Operations, Developments, Extensions, Dividends and Future Plans

Dominion Steel Corporation.—The directors of the Dominion Steel Corporation have declared the regular quarterly dividend of 1½ per cent., payable November 1st next. Mr. J. H. Plummer, president of the corporation, intimated after the meeting that there was little appreciable change in the steel situation, but that the directors were hopeful of the future, and had several important lines out for new business.

Great Northwestern Telegraph Company.—The thirty-third annual meeting of the shareholders of the Great Northwestern Telegraph Company was held at its head office, Toronto. The following directors were elected, namely:—Z. A. Lash, K.C., president; Mr. Adam Brown, vice-president; Messrs. James Hedley, Hon. J. K. Kerr, K.C., Newcomb Carlton, Æmilius Jarvis, F. B. Hayes, E. Y. Gallagher. The other officials are Mr. Geo. D. Perry, general manager; Mr. A. C. McConnell, secretary and auditor, and Mr. D. E. Henry, treasurer.

Smart-Woods, Limited.—The directors of Smart-Woods, Limited, state that the nine months' business ending September 30th was practically equal to last year, apart from earnings in the cotton mill, which was not in operation a year ago. Business for the balance of the year is expected to be considerably above 1913, owing to remunerative orders now on the books, and the fact that the plants are being worked to utmost capacity. Profits for the nine months were sufficient to pay the dividend, but in view of the uncertainty of financial conditions during the war, it was deemed wise to defer the payment, which is cumulative.

Dominion Trust Company.—The Dominion Trust Company's usual quarterly dividend of two per cent., on its shares, due ordinarily on October 1st, will be deferred until the end of the company's half-year, when payment of 4 per cent. will be made.

Prior to the listing of the company's shares on the Montreal Stock Exchange the dividend disbursements were paid half-yearly, but this practice was changed after the listing and quarterly payments were made.

The dividend of the quarter was earned, but owing to the difficulty of collections in the west it has been deemed advisable to conserve the resources of the company. The company's headquarters are in Vancouver, and it has a subscribed capital of $2,000,000.

National Finance Company, Limited.—At an extraordinary general meeting of the shareholders of the National Finance Company, Limited, at the head office, Vancouver, it was unanimously decided, acting on the report and recommendation of the directors, to put the company into voluntary liquidation. There were seventy-seven shareholders present, a number being from Victoria, and some from as far east as Winnipeg. The Yorkshire Guarantee and Securities Corporation, Limited, was appointed liquidator of the company under the direction of a joint committee of shareholders and creditors. The shareholders appointed Messrs. George J. Telfer, T. T. Langlois, and C. Spencer to represent their interests.

Hudson Bay Company.—The farm lands sales show considerable falling off, as compared with last year. For the quarter year ended September 30th, 1914, they amounted approximately to 1,[illegible]0 acres for £3,700, as compared with 7,100 acres for £3[illegible],[illegible]00, and sales of town lots to £150, as compared with £7,7[illegible] for the corresponding period of 1913. Receipts are £40,800, as against £70,300 in 1913. Sales for the six months to September 30th, 1914, are 5,50[illegible] acres for £20,100, and town lots were sold for £[illegible], as compared with sales of farm lands of 17,800 acres for £7[illegible],800, and town lots for £10,500 for the corresponding period of 1913. The total receipts for the six months ended September 30th, 1914, amount to £127,300, as compared with £214,800 for the corresponding six months of last year.

Other investment notes appear on page 50 of this issue of *The Monetary Times*.

JUNIOR CANADA HELPING STATES

John Stuart Thomson Has Some Sharp Things to Say of Neutrality

Mr. John Stuart Thomson, of Jersey City, says some striking things in a letter to *The Monetary Times*, respecting the neutrality of the United States in regard to the European war. Mr. Thomson is the author of several notable books and has been an ardent worker for Anglo-American fraternity. He thinks that 98 per cent. of the American people are opposed to militarism and its destruction of the civilization and commerce of the small countries of Europe. Mr. Thomson was born in Montreal, but later became a citizen of the United States. He has travelled extensively, and particularly in the Orient. Here are extracts from his letter:—

Laws of the Hague.

"We can all safely follow the new Pope. He is as neutral as anyone needs to be, and yet he has spoken like a man and like a bishop. I am not a Catholic, and I am the more impressed with the work of the Catholics for disarmament. Above all, finance should speak and speak quickly. Every mine that is allowed to be sown, every week that is dilly-dallied in inaction, hundreds of thousands of men lose work and capital shrinks. It is like checking a disease weeks too late. The fight on disease should be at the beginning. The fight for The Hague laws of neutrality and demobilization should have been made by the world at the beginning. You should hear what the men out of work in America say about doing nothing to restore commerce and to disarm Attila; what they say about sowing mines; what they say about leaving The Hague to take care of itself. If America had spoken to Germany as the Pope has done; as America spoke to Japan and Mexico, there would have been no war. Yet we all kept silent and allowed the Kaiser for 30 years to train 5 million men and arm them and mobilize them.

What the Workmen Think.

"A fine lot of financiers and neutrals we are, the whole lot of us. That is what the workmen think of us, the workmen of the nations who are now starving. That is what the capitalists think of us, too. And above all, Attila thinks us a lot of dolts, that we allowed him to do it. Germany should be made into three republics of Prussia, Saxony and Bavaria, with a fixed army of small numbers.

"The temper of the barbaric peoples is aggressive, their god is mad Nietzsche, not our Bible. Our Bible, The Hague, Geneva and other laws including those of commerce, are 'scraps of paper.' Nietzsche teaches force and materialism. That is what Germany loves and worships. The rest of the world is founded on more civilized lines

"If we in America raised an army in peace times of even a million, we would be a world-menace. Yet we allowed Germany to raise and arm and mobilize 5 millions of soldiers, and we to date have done and said nothing. We ask baby Belgium; little France; brave England and junior Canada, to defend us and defend our commerce. If it were an ordinary war like the Balkan, I would defend America's neutrality, but it is a world-menace and has destroyed America's commerce and our workmen are complaining. It must be stopped soon. The Germans have a propaganda here, writing to papers here that expose Germany, that they will boycott those papers. The head of the propaganda are the German diplomats; the 'Staats Zeitung,' of New York; the so-called 'German-American Literary and Commerce Committee' of New York; and the heads of the German steamship lines, which did so much to prevent Congress from having an American commercial fleet. Under Article 55 and 56 of the London Naval Conference, America had promised not to take the German ships out of the hands of the defenders of The Hague laws of neutrality. The Germans had a slick plan to sell us a bogus title and involve Britain and the United States in an argument, the Germans running away with the United States money to continue the war.

Will Watch Canada's Contingent.

"I am not against Germans or any man or nation living. Eagerly I want Germans to have a republic or a democracy, or whatever is constitutional and non-conscriptional. I want them to come here, but they must be non-militant. They must not run sedition against the majority of the American people. They must not be destroyers of commerce by arming against the peaceful, unarmed world

"I think the relations of the United States and Canada the finest in the whole world, the best example that the world has of Christianity and common sense and business judgment. It is the envy of the world, and will be the example of the world.

"Canada is doing something heroic in sending 50,000 men to defend The Hague laws. Certainly ninety million Americans watch those 50,000 with a full heart, and they will never fight a battle without our eyes, so to speak, and our hearts, straining along the gun with them in its brave defense of weak countries, the law of non-aggression; the defense of religion, works of art and learning. Americans are proud of that band of 50,000 who are doing as well as speaking; suffering as well as cheering."

◆

BRITISH MORATORIUM EXTENDED

The moratorium for bills of exchange, which was to terminate October 4th, has been extended for fourteen days. This will obviate considerable trouble which would have occurred if back bills became payable immediately.

◆

ONTARIO'S NEW CABINET

The following is the reconstructed Ontario cabinet:—

First Minister and President of Executive Council, and Minister of Lands, Forests and Mines	Hon. W. H. Hearst.
Attorney-General	Hon. J. J. Foy.
Minister of Education	Hon. R. A. Pyne.
Provincial Secretary	Hon. W. J. Hanna.
Minister of Agriculture	Hon. J. S. Duff.
Provincial Treasurer	Hon. I. B. Lucas.
Minister of Public Works	F. G. MacDiarmid.
Minister without portfolio	Hon. R. F. Preston.

◆

COMING DEMAND FOR FARM LANDS

Mr. W. S. Dinnick, president of the Dovercourt Land, Building and Savings Company, Toronto, thinks there is every indication of a western farm land movement. The cry that Canada grows more wheat, and in doing so cultivates a greater area, has turned the attention of the speculator to western farm lands, says Mr. Dinnick, who also asserts that not only will the farmer put a large acreage under crop, but also a back-to-the-farm movement will result in the western cities. "This will give the realty broker ample opportunity to start speculation in western farm lands, and it is my firm belief that in a short time we shall see real estate salesmen come to eastern Canada, offering farm lands as an investment." Mr. Dinnick points out, however, that the movement will not be like the town-lot boom, "which proved so disastrous to many unsuspecting investors, and incidentally made fortunes for unscrupulous land sharks, but a big development in farm lands."

◆

If you do not want to buy a barrel of apples, buy a bushel—you will then buy both.

"May I have an apple?" Let every Canadian housewife be able to say "Yes" this winter.

The chinook of prosperity comes after the snow of trade depression—with the help of the sunshine of more production.

If all those who handle apples between the grower and the consumer will be content with a modest profit, an excellent market will be found in Canada.

The British Government will treat as conditional contraband of war the following: Copper, unwrought; lead (pig, sheet or pipe); glycerine, ferrochrome, hematite iron ore and magnetic iron ore, rubber, hides and skins, raw or rough-tanned (not dressed) leather.

The farmers have grown them, the war has reduced their market abroad, the flavor is good, there are hundreds of ways of preparing them, they are tasty and nourishing, everybody likes them, the government is advertising them, they are cheap—so why not buy a barrel of Canadian apples?

TRADE OF CANADA

Import and Export Figures for August and for the Year —Fairly Good Figures

During August, the first month of the European war, Canadian trade totalled $100,374,000, compared with $97,832,000 in August, 1913. While there was a decline in imports, exports increased. During that month Canada exported $8,780,000 worth of animals and their produce, as against $4,817,000 for August, 1913. For the five months of the present fiscal year ended August 31 last the total exports under this head were $26,063,000, as against $17,901,000 for the corresponding five months of the previous year.

Exports of Manufactures.

There is also an increase in the value of manufactured articles exported. For August last these amounted to $5,049,000, as against $4,911,000 for August, 1913. For the five months the exports of manufactured articles were $26,728,000, compared with $20,963,000 for the corresponding period of 1913.

Coin and bullion imported into Canada during August reached the total of $11,452,000, as against $572,000 for August, 1913. During August $7,425,000 worth of domestic agricultural products were exported, and $10,924,000 worth of foreign agricultural products.

For the 12 months ended July, imports of merchandise which in 1913 advanced more than $100,000,000 worth, show a decline exceeding that amount in the last year of record, and are about ten and a half millions under the total for 1912. Duty collected in 1914 is down about twenty and a half millions.

Exports, however, continue to grow, that side of the sheet exhibiting an advance of almost $66,000,000 worth in the outgo of the country's produce, as compared with a $47,000,000 increase in 1913, and $46,000,000 in 1912, over the preceding year in each case. The decline in aggregate trade is thus correspondingly reduced.

Trade with Germany.

Our imports from Germany in the 12 months ended July 31 amounted in value to $13,557,621 and our exports there to $4,511,153, a trade stopped entirely.

The total trade summary for the last year is:—

Imports—Dutiable goods, $366,858,417; free goods, $106,320,267; total merchandise, $[illegible]178,[illegible]84; coin and bullion, $14,757,[illegible]35; total imports, $575,0[illegible]; duty collected, $97,[illegible]94,410.

Exports—Canadian produce, $4[illegible]1,974,[illegible]; foreign produce, $[illegible]; total merchandise, $4[illegible]1,815,1[illegible]; coin and bullion, $[illegible]14,[illegible]85; total exports, $4[illegible],429,185.

Aggregate trade, $1,061,[illegible]5,5[illegible]4.

◆

DOWNEY GOES TO JAIL

Early in [illegible] *The Monetary Times* drew attention to the activity of Leslie L. Downey in selling stock of the Colonial Life Assurance Company, a fraudulent concern without a charter. After gathering information respecting Mr. Downey's movements and those of a man named Pearce, who escaped to the United States, *The Monetary Times* placed the matter before the government and police authorities. The result was that at Toronto on September 28, Leslie L. Downey was found guilty of false pretences and fraud, and sentenced to three years in the Kingston Penitentiary. As he had been in jail six months awaiting trial, the judge allowed that time to count.

Downey and Pearce obtained subscriptions and money from a number of people for stock in the Colonial Life Assurance Company, supposed to be in process of formation. The company was never formed, the promoters never even applying for a charter.

Messrs. Downey and Pearce were also at the back of another promotion, the United Empire Life Insurance Company, although their names did not appear as provisional directors. This scheme was also exposed by *The Monetary Times*, who placed the facts before the authorities at Ottawa.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 2nd:—

McKinley Darragh Savage Mine, 87,570; Nipissing Mining Company, 86,580; Cobalt Townsite Mine, 87,700; City of Cobalt Mine, 87,730; La Rose Mines, 166,070; Coniagas Mines, Limited, 165,010; total, 680,660 pounds, or 340 tons. The total shipments since January 1st, 1914, are now 28,666,093 pounds, or 14,333 tons.

Week ended October 2nd, 1914:—

New Liskeard Casey Cobalt Mining Company, 40,520 pounds, or 20 tons.

Gold Ore Tough Oakes Gold Mine, 60,560 pounds, or 30 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,196; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 20,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,[illegible]80 tons; in 1912, 21,50[illegible] tons, in 1913, 20,261 tons.

◆

EXTRA TIME FOR CONSTRUCTION

Bills to extend the time for the construction of guaranteed lines of railway of the Canadian Northern Railway system, and of lines and terminals of the Grand Trunk Pacific system, were introduced by Mr. Calder, provincial treasurer of Saskatchewan, at the recent session. The bills provided for the extension to January 1st, 1917, of the period within which lines now under construction must be completed, and within which lines on which work has not yet been undertaken must be begun. The money market during the past year had been in an unsatisfactory state, said Mr. Calder, and since the war broke out it had become hopeless. The Canadian Northern Railway were more than anxious to build, but such a financial condition existed that to carry out their plans was an impossibility. The branch lines, said he, were feeders of the main systems, and the railways were strongly desirous of completing those feeders. The present destruction of property in Europe was enormous, and the effect on the money market must for a considerable period be felt. It was realized, however, that in the course of time the situation would right itself.

◆

This is a good time to plan for the 1915 business programme.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Centreville, N.B.—October 1—Business section. Loss, $30,000. Cause, defective flue.

Loss, contents, $250; building, $50; dwelling of H. Miller, 73 Nassau Street, owned by M. Salsberg. Cause unknown. Loss, contents, $75; building, $5.

◆

CANADIAN PACIFIC STOCK ISSUE

The annual meeting of the Canadian Pacific Railway this week at Montreal ratified an increase of the present authorized capital of the company from $260,000,000 to $335,000,000, in order to make it accord with the amount for which the company has the sanction of the government. No portion of the additional stock will be issued until the sanction of the shareholders has been secured.

Sir Thomas Shaughnessy said, that when the peace of the world had been restored, emigration from Europe to the newer countries, where lands could be obtained on moderate terms would doubtless be on a large scale and Canada should profit very substantially by the incoming of new settlers and the consequent increase in production.

Mr. John K. L. Ross was made a director of the company.

◆

ONTARIO GOVERNMENT MARKETING LOAN

The Ontario Government is placing upon the local market an issue of $1,000,000 five-year 5 per cent. bonds, dated October 1st, 1914. This is a short-term issue, and will assist the Government through the present disturbed financial period. The sale is proceeding satisfactorily. The larger part of the amount is intended for Hydro-Electric expenditures in respect of advances made, being made and to be made in the near future. The realization of the loan will mean that the Government will retire its indebtedness to the banks, due to the decline in revenue on account of the war. The denomination is $1,000. The price is par with accrued interest. Interest and principal are payable in Toronto at the provincial treasurer's office and in Montreal at the Bank of Montreal. The bonds are free of succession duties.

NEW INCORPORATIONS

Six Provinces Represented in the Forty-four Charters Granted

Canada's new companies incorporated this week number 44. The head offices of these companies are located in six provinces. The total capitalization amounts to $4,326,000. The largest company is:—

The Empire Securities Company, Limited, Winnipeg $1,500,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
British Columbia	9	$ 475,000
Manitoba	2	1,525,000
Ontario	10	945,000
Quebec	20	866,000
Prince Edward Island	2	375,000
New Brunswick	1	40,000
	44	$4,326,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Richmond, B.C.—Easterbrook Milling Company, Limited, $30,000.

Longueuil, Que.—Terrapin, Limited, $20,000. J. A. Gariepy, V. Bourdon, A. Jodoin.

Copper Cliff, Ont.—The Bargnesi Company, Limited, $40,000. B. Ernesto, T. Fratini, M. De Bartoli.

St. John, N.B.—The Ross Drug Company, Limited, $40,000. E. W. Mair, G. M. Ross, G. E. Barbour.

Ottawa, Ont.—The A. E. Rea Drug Company, Limited, $50,000. T. F. Carry, L. Brownhill, G. E. Clapin.

Berlin, Ont.—Waterloo County Grand River Park, Limited, $50,000. J. E. Klotz, G. Wegenast, W. Snider.

New Richmond, Que.—Cascapedia Booming Company. $50,000. A. McLean, S. B. Bond, R. L. Montgomery.

Victoria, B.C.—Sidney Island Brick and Tile Company, Limited, $150,000. Elco Tow Boat Company, Limited, $10,000. Kirk and Dunkley, Limited, $15,000.

Dutton, Ont.—Dutton Fruit and Vegetable Growers' Company, Limited, $40,000. F. Campbell, L. Sinclair, F S. Brown.

Prescott, Ont.—Canadian American Graphite Company, Limited, $250,000. C Keeler, G A. Drummond, W. H. Stephenson.

Arnprior, Ont.—The Ottawa Lead and Zinc Mining Company, Limited, $300,000. G. A. Maidens, W. N. Squires, R. J. Slattery.

Saint Marc des Carrieres, Que. La Compagnie Hydraulique de Portneuf, Limited, $145,000 G. Rinfret, T. Pare, L. C. Mayrand.

Saint Gregoire, Que.—La Compagnie d'Eau Minerale de Saint Gregoire, Limited, $20,000. J A. Bergeron, B Rouleau, L. Heon.

Vancouver, B.C.—Cambie, Limited, $50,000. British Columbia Products, Limited, $10,000. Canadian Export and Import Company, Limited, $50,000. Winchester Fuel and Petroleum Company, of Alberta, Limited, $150,000. Steveston Supply Company, Limited, $10,000.

Toronto, Ont. St. Augustine's Seminary of Toronto Rev. Neil McNeil, Rev. T. J. Dowling, Rev. M. J. O'Brien The Comfort Horseshoe Company, Limited, $15,000 J. Walker, E. Markle, M. Moffit. Hermans, Limited, $10,000 E. Lindsey Middleton, G. Keogh, C A Mulvihill Motor Repairs, Limited, $40,000. A. Russell, A Paton Costigan, C. A. Low. The Clifton Sand and Gravel Corporation, Limited, $150,000. H. H. Collier, J. J. [illegible], N I. Nelson First [illegible] Charitable Society I. Katz, H. Lopatar, I. Spiegel.

Montreal, Que. Ocean, Limited, $20,000. N. Schetagne, A. Theoret, J. Theoret. Hotel Quebec, Limited, $20,000 A E. Gingras, J. Ampleman, C. Lemieux. Hotel Lafontaine, Limited, $20,000. J. A. Beauvilliers, A. Lafontaine, J. Robillard. The Past Time Social Club, Incorporated, $5,000. J Doyle, F. Martin, W. Sutherland. F. St. Vincent, Limited, $20,000. F. St. Vincent, W. Latendresse, H. Marcil. Dawson Palace, Incorporated, $20,000. W. Girard, L. Girard, A. Lefebvre. Poirier, Limited, $20,000. F. X. Poirier, H. Belair, L. Poirier. Germaise, Incorporated, $20,000. M. Germaise, H. Weinfield, T. H. Tansey. The Fruits Purveyor Company, Limited, $30,000. Z. Saint-Onge, A. M. Crevier, O. Lalonde. Empress Hotel, Limited, $20,000. A. Gauthier, C. Girard, A. Girard. M. Gagnon, Limited, $20,000. M. Gagnon, E. Leclair, H. Gagnon. Fraser, Brace and Company, Limited, $100,000. M. Alexander, A. H. Elder, H. E. Scott. Knight's Patents, Limited, $16,000. M. Alexander, A. H. Elder, H. E. Scott. Montreal Union Lands Company, Limited, $200,000. L. P. Fortin, F. Vanasse, J. E. Desy. Jacob and Valentin, Limited, $50,000. H. Weinfield, T. M. Tansey, J. Y. Fortier. George H. Carroll and Company, Limited, $50,000. G. H. Carroll, C. P. Johnson, C. Thomas.

Application is being made for leteers patent for the following companies:—

Shediac, N.B.—R. C. Tait, Limited, $99,000. R. C Tait, A. J. Tait, M. L. Tait.

Norton, N.B.—Allaby-Wheaton Company, Limited, $20,000. R. V. Allaby, H. E. Wheaton, W. R. Carson.

Ellerslie, P.E.I.—The Ellerslie Silver Black Foxes, Limited, $80,000. A. England, L. Dystant, L. E. Dystant.

Summerside, P.E.I.—The Canada Auto-Pneumatic Pump and Machinery Company, Limited, $35,000. J. A. VanTilburg, F. A. Johnston, D. A. Pickering.

◆

STEEL COMPANY OF CANADA

The Steel Company of Canada, Hamilton, has decided to defer payment of dividends on preferred stock, due November 1st. The dividends are cumulative.

◆

RAILROAD EARNINGS

The following are the weekly railroad earnings for September:—

Canadian Pacific Railway.

	1914.	1913		Increase or decrease
Sept. 7	$2,110,000	$2,496,000	—	$386,000
Sept. 14	2,496,000	2,462,000	+	34,000
Sept. 21	2,578,000	2,769,000	—	191,000
Sept. 30	3,295,000	4,160,000	—	815,000

Grand Trunk Railway.

	1914.	1913		Increase or decrease
Sept. 7	$1,088,110	$1,099,250	—	$11,140
Sept. 14	1,096,942	1,144,856	—	47,914
Sept. 21	1,134,021	1,082,811	+	51,210
Sept. 30	1,403,695	1,314,885	+	88,810

Canadian Northern Railway.

	1914.	1913		Increase or decrease
Sept. 7	$320,000	$382,400	—	$62,400
Sept. 14	458,700	398,000	+	60,700
Sept. 21	566,700	488,200	+	78,500
Sept. 30	764,500	726,300	+	38,200

The Grand Trunk's August statement shows net revenue as follows: Grand Trunk proper, decrease £25,650; Grand Trunk Western, increase £10,600; Grand Haven, increase £2,300; whole system, decrease £12,750.

Canadian Northern Railway earnings for the last week of February were $764,500, representing the heaviest traffic for any seven-day period this year. For three consecutive weeks now the road reported increases in earnings. The movement of Canadian troops to and from Valcartier, served only by the Canadian Northern Railway, together with the shipment of supplies, undoubtedly helped earnings considerably.

◆

Canada's versatility is shown by the fact that she is busily engaged in getting ready for war and for the celebration of the hundred years of peace at the same time.—Chicago Herald.

LEGAL NOTICE

AMERICAN LAFRANCE FIRE ENGINE COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of June, 1914, incorporating Harry Riley and William Robert Anderson, law clerks; Thomas Stewart Hagan Giles, bookkeeper; Harold Ernest McKitrick, barrister, and John Steuart Duggan, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, import, export and deal in fire engines, fire apparatus, carriages, cars, wagons, trucks, bicycles, automobiles, motor trucks and vehicles of all kinds, however propelled, and all accessories thereto or in connection therewith; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (c) To issue paid-up shares, debentures, debenture stock, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be required by or for any services rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (d) To sell, lease, turn to account, or otherwise dispose of the whole or any branch or part of the business, undertakings, properties, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, debentures or securities of any company having objects similar to those of this company; (e) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (f) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell or otherwise dispose of shares, stocks, debentures, bonds and other obligations of any other company, having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents as the directors may appoint; (g) To enter into partnership or any arrangement for sharing profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined; (j) To distribute in specie or otherwise, as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company; (k) To do all or any of the matters hereby authorized either alone or in conjunction with or as factors, trustees or agents for any other companies or persons, or by or through any factors, trustees or agents; (l) The powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (m) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "American LaFrance Fire Engine Company of Canada, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1914

THOMAS MULVEY,
Under-Secretary of State.

52-2

Moratoria are like ultimata—good things if you can afford them.

We are much more sure of Canadian business than the Kaiser is of his war indemnities.

The act to amend the Saskatchewan insurance act passed the report stage in the provincial legislature. Statutory conditions are revised, the resident agent clause has been slightly changed. It has been provided that certificates of authority will expire on February 15th each year, but may be renewed. Provisions relating to fire insurance contracts have been added, including the new statutory conditions drafted by the superintendents of the four Western provinces. The bill provides that all fraternal societies doing an insurance business must be licensed.

DIVIDEND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 2nd day of November next, to Shareholders of record at the close of business on the 15th day of October.

By order of the Board,
E. F. HEBDEN,
General Manager.

Montreal, 25th September, 1914.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual General Meeting of the shareholders of the Consumers' Gas Company of Toronto, to receive the report of the directors, and for the election of directors for the coming year will be held in the Company's Board Room, No. 17 Toronto Street, on Monday, the 26th day of October, 1914, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

A minimum charge of 50 cents per insertion will be made in each case.

ACCOUNTS AND BOOKS of large or small business concerns audited, systematized, written up weekly or monthly and Trial Balance taken off. Supervising bookkeepers' work a specialty. Financial and annual statements drawn up by experienced Public Accountant. Charges moderate. Address Box 373. *Monetary Times*, Toronto.

WANTED—By experienced Fire Insurance man, position as Inspector and Organizer, or Branch Manager. Have reference from leading English Board Company. Western experience. Eastern Provinces preferred. Total abstainer. Age, thirty-three. Apply Box No. 379, *Monetary Times*, Toronto.

The town of Campbellford, Ont., has placed insurance of $1,000 on the life of each married man who has gone from there with the first Canadian contingent. The city of Toronto is taking similar action.

Sir William Mackenzie in an interview said the Toronto Suburban Railway line, between Toronto and Guelph, was being held back because of some difficulties as to terminals, and he could not say whether the line would be open this year.

1915 - MONETARY TIMES ANNUAL - 1915

The Monetary Times Annual which has now been issued each year for forty-seven years has become recognized not only throughout Canada, but in all countries which have investment and commercial interest in Canada as the most reliable, most complete and comprehensive source of information concerning the financial and commercial possibilities of the Dominion.

In many offices of the principal financial centres of the world the Monetary Times Annual will be found as a work of reference and its value in this connection has been demonstrated over and over again.

While previous Annuals have had wide circulations, our plans for the 1915 Annual insure a wider and more valuable circulation. Editorially, too, it will have new features introduced that will make it more useful and attractive.

In spite of these larger plans for editorial and distribution purposes, the advertising rates will remain the same as in previous years. All advertisements will be placed on right hand pages and opposite reading matter.

In order to insure your securing the best position, it would be well if we were to receive your order as early as possible.

The Monetary Times Annual has been endorsed by the leading business men and financiers and newspapers of Canada and elsewhere. Read what a few of them had to say about the **1914** Annual :—

"It contains much valuable information and should be of great use to investors and those interested in the progress of Canada."—Sir Edmund Osler.

"The Monetary Times Annual is always excellent but this year it is particularly interesting because of the large amount of accurate and useful information it contains about the railroad, industrial and commercial affairs of Canada."—Sir T. J. Shaughnessy.

"Regarding your Annual, I can only say that it is creditable both to you and your organization and to Canada, and I am sure it will be read with great interest in England, and to some extent in the United States. It is more than a Trade Review, it is a Dictionary of reference of the whole country embracing the whole field of financial and trade operations."—Sir Henry M. Pellatt.

"We beg to acknowledge your esteemed favor of the 15th inst. and the receipt of your Annual Review for 1914, and we compliment you upon the attractiveness and completeness of the publication."—E. W. West, Glens Falls Insurance Company.

"A copy of your Annual number has come to hand, and we wish to congratulate you upon it. We think its matter is excellent. We also think our copy well set up."—C. L. Cantley, Nova Scotia Steel & Coal Co.

"We should be very much obliged if you would forward us another copy of the Annual as the first copy has been removed from our files. There is a great deal of valuable information in your Annual, which we find very useful to refer to from time to time."—Osler, Hammond & Nanton.

"The Monetary Times Annual contains a great deal of very valuable information, especially for reference purposes, and I am glad to have it."—Sir Richard McBride.

"The Monetary Times Annual is a work of great value to business men. The book contains nearly three hundred pages, and it is a veritable encyclopedia of financial, commercial and industrial information."—Toronto Star.

"Replete with information of a business and financial nature is the Monetary Times Annual for 1914. In addition to a wide range of special articles prepared by those well qualified to handle the same, the publication contains many interesting tables and charts covering the range of securities prices for 1913. The Annual fills up 292 pages all of it interesting and instructive."—Saturday Night.

"We have received a copy of the 1914 Annual Review of 'The Monetary Times of Canada,' with head offices at 62 Church St., Toronto. The publication consists of 278 pages and is divided into a Banking Section, Bond Section, Editorial Section, Industrial Section, Insurance Section and Investment Section. This number is similar to those issued previously by the 'Times' in that it contains an immense amount of valuable statistical matter, besides numerous interesting articles by well-known authorities."—The Commercial and Financial Chronicle, New York.

"A mighty fine issue was the annual review number of the Monetary Times of Toronto. It had 292 pages brimful of interesting facts about Canada. The Times is one of the great financial papers of the world."—Bonds and Mortgages, Chicago.

"I am much struck by the amount and value of the information contained in the Monetary Times Annual."—Sir William Van Horne.

"Always a publication of the highest merit, the Monetary Times Annual this year is unusually complete."—Toronto News.

"The Monetary Times Annual for 1914, recently issued by the Monetary Times Co. of Toronto, deals comprehensively with all matters of financial interest to Canadians. Articles by leading authorities on the present industrial situation and the outlook for the year make interesting reading and valuable statistics are given on finance and commerce in 1913."—The Gazette, Montreal.

"The Monetary Times Annual is one of the best collections of articles on financial and commercial activities we have seen in many days. It is crammed full of useful information, not the kind to last for a day, but a book of reference useful for the twelve months of the year."—New Glasgow, N.S., News.

"Probably the completest record of Canadian financial and industrial development in 1913 available, is contained within the covers of the Monetary Times Annual. Every department of finance is represented and the articles on the various subjects are all handled by experts."—Toronto Telegram.

"The Monetary Times Annual, an excellent publication, is better than ever and that is saying a good deal. It is more than a mere annual, it constitutes a work of reference which should be carefully preserved for use all through the year."—The Financial Editor Winnipeg Saturday Post.

1915 - MONETARY TIMES ANNUAL - 1915

The transfer books will be closed from the 17th to the 31st October, 1914, both days inclusive.

By order of the Board.

D. R. WILKIE,
General Manager.

Toronto, September, 1914.

LIFE ASSURANCE AND WAR

British Method of Dealing with Combatants—Risks and Rates

BY C. A. HASTINGS.

Out the many different companies actively engaged in business in the Dominion, some have decided to accept war risks with an extra premium, some at normal rates, while others have decided not to underwrite any war risks at all, or again not to underwrite any risks under a certain age and so on, and there is no doubt that whatever course has been adopted by each company, there are good grounds for such action.

There is one course however, which has not yet been adopted, and it is one that has recently been evolved in Great Britain by a well-known and conservative life assurance company. This company recognized that the war premium, seven guineas per cent. per annum, is prohibitive to many men, and that every man now realizes the need of life assurance; few men recognized the necessity of it before war was declared. It remains to be seen if the younger generation will take advantage of this lesson later on in life.

Costs Eighty-four Cents More.

This company is issuing new life policies to combatants of all kinds at a rate of premium which throughout the duration of policy is increased only by about 84 cents a year for each $500 assured. For example, if a man survives to pay premiums on a $1,000 for the maximum period of 25 years, he will pay altogether about $42 extra for the war risk, and that whether his service in the present war lasts for more than one year or not.

These special war conditions apply only to 25 year endowment assurances with profits. In this manner men can escape the heavy extra war premium though they may effect their policy on one day and go on active service the next day. Of course all these special policies contain the usual clause that they are free from all restrictions as to residence, travel or occupation, so should such men unfortunately have to volunteer at some other time for active service they can do so without paying any further extra.

Are Free from Extra Premiums.

Some realized the necessity of life assurance before war was declared, and so they escape paying any extra—that is to say those whose policies contain the clause that they are free from all restrictions as to residence, travel or occupation.

Lack of forethought, procrastination, and an apathetic course when applying for protection often proves expensive in the end, and the lesson that is being brought home to-day should prove useful to those about to insure.

(Mr. Hastings is the author of a useful little book, "Some Insurance Pointers," which has been well received by field men and purchasers of insurance. This can be obtained from *The Monetary Times'* book department, price 50 cents.)

◆

COMPANIES INCREASING CAPITAL

The following company with a Dominion charter has increased its capital stock: Taylor and Arnold, Limited, from $50,000 to $100,000.

The following company in Ontario has increased its capital stock: The Riley-Ramsey Company, Limited, from $40,000 to $200,000.

The following company in Saskatchewan has increased its capital stock: Darwin Rural Telephone Company, Limited, from $250 to $450.

◆

Persistence counts just as much in business as it has done in the battle of the Aisne.

Drooping business heads should remember at least Baden-Powell's slogan, "If we go forward, we die; if we go backward, we die; better go forward and die."

BUSINESS IN WAR-TIME

Seen in Montreal's Financial and Industrial Centres

Monetary Times Office,
Montreal, October 7.

The shipments of United States grain via the Canadian route this year are in advance of anything that has been witnessed in the history of the St. Lawrence route. Since July 1st, 21,660,050 bushels of American wheat, valued at $19,366,114, have been shipped from Chicago to Montreal. In the entire six preceding years, only 10,665,449 bushels, valued at $10,707,104 were brought down by Canadian vessels from Chicago to St. Lawrence ports.

An official of a large Canadian insurance company, with headquarters at Montreal, states that this month's business shows improvement. Following the outbreak of war, business fell off to some degree and a larger percentage of policyholders than usual allowed their policies to lapse. For a time also there was an increase in the demand from policyholders for loans on the security of their policies, but there has been a gradual improvement, principally due to the fact that the panicky feeling which prevailed in Canada during the early weeks of August has now subsided. Their new business this month has distinctly improved and is now approximately normal. There has also been a decrease in the demands for loans and a falling off in the number of policies which have been allowed to lapse.

Financiers and Loans.

A manager of a Montreal trust company which has considerable funds loaned to brokers on call, states that his company has for some weeks been endeavoring to have these loans reduced. He states that as there is no moratorium in Canada any bank or money lender is justified in selling privately any securities held, in cases where the broker is not disposed to make settlement. He admits the difficulty of the situation, particularly in view of the fact that many brokers are inclined to bear with customers who are finding it somewhat difficult to keep their accounts properly margined up. He is inclined to think that the situation will be allowed to drift more or less until the banks get together and decide upon a concerted policy.

Increase in Coal Supply.

Mr. A. Dick, general sales agent of the Dominion Coal Company, in an interview, stated that sales of coal are about normal. Contracts for coal are usually made a long time ahead and the company is now making deliveries to St. Lawrence ports on orders placed some time ago. By the end of the season 2,000,000 tons of coal will have been delivered at Montreal, Quebec and Three Rivers. This is 300,000 tons more than was delivered last year.

Mr. Dick states that while the requirements of the Dominion Iron and Steel Company are now running about 50,000 tons a month lower than last year, the company has made some important sales of bunker coal to the ocean steamship companies. A great many of these boats which in normal times coal up in Great Britain for the round trip, are now obtaining their supplies in Canada. This increase with the steamship companies just about offsets the loss incurred from the diminished wants of the Steel Company.

The Nova Scotia Steel and Coal Company is working on an order for shells, which was placed by the militia department at Ottawa. About the same time the government placed orders for shells with a number of the Canadian steel companies, and some of the iron working machinery iron workers of Canada secured orders.

The Dominion Steel Corporation is not manufacturing shells, as the plant is not equipped for that purpose and the necessary alterations could only be made at considerable cost.

◆

The two important maps are those of the war and business zones.

Stopping business entirely because of the war reminds us of the limping navvy who refused to remove the painful pebble from his shoe, because it was his dinner hour.

HOLDING COMPANIES AND SUBSIDIARIES

Comment Regarding the Deferred Dividend of the Dominion Iron and Steel Company

Monetary Times Office,

Montreal, October 7.

The decision of the directors of the Dominion Iron and Steel Company to defer the payment of the dividend on the preference stock of the company occasioned no surprise in financial circles.

At the time the dividend on the common stock of the Dominion Steel Corporation was first seriously called into question, there began to be talk of the possibility of passing the dividend on the preferred stock of the Iron and Steel Company. It was not then generally thought that it would become necessary to take such action, although there was heavy selling of the stock and prices fell to a lower level than for several years. Now the preferred dividend has been deferred. The Dominion Iron and Steel preferred dividend is cumulative, so that to pass it is only to defer it, inasmuch as it must be paid up in full, if the earnings of the company are ever sufficient for the purpose.

The standing of this stock in relation to other securities of the concern has been commented upon, many are of the opinion that the preference stocks of the Dominion Iron and and Steel and the Dominion Coal companies have precedence over the preference stock of the Dominion Steel Corporation, the latter concern being the holding company. This is not the case. The shareholders of each of the constituent companies a few years ago authorized an issue of $3,500,000 of 6 per cent. income bonds to be exchanged for the preference stock of the Dominion Steel Corporation, making a total of $7,000,000 to be so exchanged. The bonds take precedence over the preferred stocks of the two companies and this means that the interest on the bonds is passed along to meet the 6 per cent. dividends on the preference shares. These shares were issued for the purpose of financing improvements to the plants and properties of the two concerns.

Indications as to Earnings.

While the passing of the preferred dividend of the Dominion Iron and Steel Company only affects the holders of the preferred stock, it indicates that the earning power of the company has been impaired, and that it may be some time before the company will be able to make further contributions to the Dominion Steel Corporation. These contributions would go to the corporation through dividends on Iron and Steel common stock. The common stocks of both the constituent companies are held by the corporation and it is only through the dividends declared by these companies on their common stocks that the corporation receives its revenues. In the past, the corporation was able to meet its liabilities out of this revenue and to declare dividends of 1 per cent. per quarter on its common stock. These dividends, as is already known, were passed some months ago, so that they no longer need to be provided for. In addition to this, however, the corporation has an issue of $1,500,000 of 5 per cent. debentures, the interest upon which would be $75,000 per year. The revenue to meet this interest can only come to the corporation through its holding of the common stocks of the constituent companies.

Dominion Coal Company.

As the Dominion Iron and Steel Company no longer pay dividends on its common stock, the entire burden of meeting this charge must be met out of the dividends received by the corporation from the Dominion Coal Company. Altogether, the corporation holds $15,000,000 of Dominion Coal Company's stock. Should the coal company pay a dividend at the rate of 4 per cent. per annum, the corporation would be in receipt of no less than $600,000 from this source, so that making allowance for all contingencies it would appear that there should be no trouble in meeting the payments.

Another interesting charge is that of the five year notes. These amount to $3,500,000 and bear interest at the rate of 6 per cent. They are secured by a trust deed whereby a specific charge is created upon $3,560,000 of 5 per cent. consolidated mortgage bonds of the Iron and Steel Company and $1,000,000 of the first mortgage bonds of the Cumberland Railway and Coal Company. These together would give $228,000, whereas the charge against the notes is but $210,000.

TORONTO AND WINNIPEG

An interesting point in connection with the payment of the dividend on the preference stock of the Steel Corporation is the fact that the dividend is dependent upon the payment of interest on the income bonds, as stated above. The income bonds, $3,500,000 from each company, at 6 per cent. per annum, would give the total of $420,000 required for the $7,000,000 of 6 per cent. preference stock for which the bonds are exchanged. Being income bonds, however, the interest would not be paid unless earned. Should the Dominion Iron and Steel Company not earn the interest on its share of the income bonds, the question of how to meet the preferred dividend would arise.

◆

TO RAISE MORE LIVE STOCK

Mr. Vere C. Brown, superintendent of western branches of the Canadian Bank of Commerce when addressing a gathering of Calgary business men on the importance of increasing agricultural production in western Canada, urged a better and closer social and commercial relationship between the farmer and the business man. That the banks were willing to do their share towards helping to increase the productivity of the man on the land and would give not only their moral, but their material support to any reasonable scheme for furthering that object, was the message brought by Mr. Brown. Consequent on this assurance it was decided to form a live stock association which would, obtaining funds from the banks, guarantee the repayments within say, two years, of any sums loaned to responsible farmers who wished to borrow for the purchase of additional livestock within a radius of 30 miles of Calgary. Whatever security the farmer could give would, of course, be taken to protect the association against loss. The details of the scheme are to be worked out, the chief difficulty to be overcome being in the question of selecting the risks. This and subsequent overseeing add to the expense borne by the borrower and can easily be made so high as to preclude any business. The promoters hope for a satisfactory outcome.

◆

SASKATCHEWAN CO-OPERATIVE ELEVATORS

In entering upon the grain shipping season of 1914-15, the Saskatchewan Co-operative Elevator Company finds itself in a satisfactory condition not only to cope with the ordinary difficulties of marketing the crop, but also to meet the special circumstances which will be a marked feature of this year's crop movement. The shareholders of the company have reason to congratulate themselves on the foresight shown during the three successful years of operation, when they determined to strengthen the financial position of the organization rather than to disburse the whole of the profits in dividends. As a result they need not fear as to the ability of the company to overcome the difficulties brought about by the outbreak of war, in connection with the financing and sale of grain for export, says a Saskatchewan bulletin.

"Our wheat prices depend almost entirely upon our ability to export, and although the British government has apparently made splendid arrangements, there must nevertheless be a strong element of risk, which is bound to cause wheat prices to fluctuate greatly. These fluctuations will make country buying a much more difficult matter than formerly, as it is almost impossible to say from day to day what the margin should be. Farmers are therefore strongly urged to ship their cars to the commission department of the company, instead of selling to them by the wagon load. Wheat in the car is one step nearer to Fort William; the approximate date of delivery can be guessed, and it should therefore be possible to secure better prices than can possibly be paid for grain sold to country elevators, which may have to remain in storage for weeks before being shipped. Farmers should be careful this season not to ship their grain to any company of poor financial standing or to those engaged in speculative business."

◆

It really matters little who wrote those plays—Shakespeare or Bacon. What does matter is who is growing bacon for 1915, when there will be a rush for food supplies.

INVESTMENT vs. SPECULATION

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

FORETHOUGHT IN COMPANY INVESTMENT

Careful Framing of Investigation of Charter Articles and By-laws Will Eliminate Fraud and Bad Methods

Theft has been a crime since the rights of property were established and theft is still practised. While companies exist, the graver crimes will continue. It is admitted that existing penal legislation against theft by trustees, secret commissions, forgery and improper use of the mails is ample, writes Mr. T. Mulvey, K.C., assistant secretary of state, Ottawa, in the American Economic Review.

Penal provisions in legislation may be effectively assisted by clauses similar to those of the Kansas Blue Sky law which required itinerant vendors of securities to obtain licenses from proper authorities to permit them to carry on their business. These clauses are effective for two reasons. The authority issuing the license may exercise some supervision without incurring any responsibility or offering any undue security to the investor; and the person with fraudulent securities would be deterred from seeking a license; or if he obtained one and it became known that he was offering fraudulent securities, the license could be cancelled.

While the loss to the public through crime and fraud in company management is great, loss through over-sanguine and ill-considered flotations is greater. This kind of loss does not arise from fraud or crime, but from bad business methods. For this reason the check should not be by legislation directed against the methods used. Good business methods cannot be prompted by legislation for the same reason that morality cannot be so enforced.

Publicity and Frank Disclosure.

The check upon bad business methods is publicity, frank disclosure and opportunity for discussion by those interested. The prospectus, minimum subscription and statutory meeting of the English act appear to meet this. It affords the investor who desires to ascertain the true inwardness of a flotation all that a business man may require to judge of the probable success of the enterprise. For those who will not investigate there need be no complaint.

Watered stock may be an evil if secretly and fraudulently brought about. But it seems to be a public business necessity, and if openly dealt with may work no wrong. Modern enterprise demands rewards and is thereby incited. Many well-known enterprises in the foresight and good management of their promoters have proved the value of capitalization on expected profits and economy of management. When the details are published and an investor has an opportunity of judging for himself, no wrong is done, and if the expectations of profits are not realized, no one should be blamed. It is not the "watering of stock" that should be prohibited, but the methods which bring about secret profits which should be condemned.

Losses Through Fraud.

While loss through fraud and other methods referred to are substantial, the loss which the subjected minority may bear in a profitable enterprise is greater, if not to the pocket, to the feelings of that great and often-heard person, the minority shareholder. Some attempts have been made to legislate on his behalf. When he has permitted himself to be a pawn in the game, proxies have been regulated. In many jurisdictions cumulative voting for directors is authorized. The minority shareholder, if he has grounds for complaint, owes them to his own stupidity or unbusinesslike methods. There may be an exception to this statement.

The laws of company organization and management are modern, and the rights of shareholders have not been completely declared by the courts. It may be more profitable and more to the peace of mind of the minority holder to submit to his loss than to assert his rights before the courts. In the evolution of modern company methods no doubt the position of the minority holder may be improved and it is better and surer to await the natural development of the law than to resort to cumbersome and likely ineffective devices of special legislation.

Watch Charter Provisions.

This may appear severe upon the minority holder and require explanation. The law of partnership is well established, and the business man who suffers a loss through the exactions or overbearing methods of a partner receives little sympathy. Why then should the minority holder in a company which may be established with all the safeguards of

partnership be the subject of sympathy? The methods of suppression of the minority holder are varied, but those likely to happen in each may be foreseen and remedied. These methods apply to successful companies. In the losing, his loss is the lesser.

The methods of tiring out the minority holder are various. Their result is the withholding of dividends. It may be accomplished by rolling up a surplus, and, unless regulated, this is in the discretion of the directors. It may be by making a contract with a subsidiary company for the sale of products, the profits being taken by the subsidiary. In small concerns the profits may be absorbed by salaries. A profitable enterprise with larger prospects may be sold out to a new company promoted by the majority. Many other methods could be cited, and there is but one answer.

They may all be controlled by the charter, articles, or by-laws. Salaries may be limited. Dealings with subsidiary companies for the purpose of withholding profits may be regulated. Methods of accounting may be devised whereby dividends may not be withheld. A sale of the undertaking may be prohibited except with unanimous consent. A shareholder has a contract with the company which is made up of the statute, charter and articles or by-laws. These may be framed so that exactions or overbearing methods of the majority may be eliminated.

Use Business Methods.

A person purchasing real estate would not part with his money without a careful scrutiny of the title and a report from his solicitor. He knows full well the difficulties of real property law, and he knows that his rights are well defined. The public has been dealing with real property for such a time that the necessity for care is ever present. Companies and company law are modern. The public has largely been made to believe that the company is the creation of the state and that the state will protect him. The state creates the rights of real property and nevertheless leaves the individual to his rights.

When the public recognizes that business forethought is as much required in company investment as in the purchase of real property, certified securities will be attained. This end may be reached not by superficial and inadequate enactments of the legislature but by publicity and enabling the investor to study his investments and exercise business methods.

◆

COURSES IN BANKING

Good courses in banking and allied subjects are being organized by Queen's University, Kingston, in conjunction with the Canadian Bankers' Association. A circular describing the work says that in outlining the courses an endeavor has been made to cover both banking practice and the general aspects of Canadian industry and finance. Thoroughness will be emphasized. In setting the standard of the examination the amount of work which can reasonably be expected of the younger officers of the chartered banks will be kept in mind. The Shaw Correspondence School, Toronto, is also conducting an associates' course of great value in banking and similar subjects.

The general manager of one of the Canadian banks has written to Mr. G. Y. Chown, B.A., registrar Queen's University, in which he says:—"We are preparing a circular which will be sent to each of our branches stating that we are ready to assist and encourage any of our officials who are desirous of seriously undertaking this curriculum. Our proposal is as follows:—

"To successful candidates in the Associates' Course: A bonus will be given and the bank will refund the tuition fees, provided they do not exceed $40, to those whose salaries do not exceed a certain limit.

"To successful candidates in the Fellows' Course: A bonus will be given; in addition a refund of tuition fees, not to exceed $40, will be allowed to those officers whose salaries are within the limit referred to above, or to any who have paid their own fees for the Associates' Course.

"We are also stating our willingness to advance a portion of the tuition fees to any young men entering upon the Associates' Course whose salaries are within a certain limit."

DRYDOCKS SCHEMES

New Enterprise at Owen Sound—Dock for North Vancouver

A drydock is to be constructed at Owen Sound by the Canadian Shipbuilding and Dry Dock Company, Limited. This corporation has a capital of $2,[illegible],000 and an Ontario charter. The head office is at Owen Sound. The company has authority to manufacture and deal in iron, steel and other metals; to construct and operate drydocks, harbors, elevators, warehouses, terminals, wharves, etc., and to carry on the business of a wrecking company.

The municipality of Owen Sound has decided to grant a subsidy to the company, which amounts to a cash bonus of $10,000 a year for a period of 20 years. This bonus is contingent upon the fulfilment of an agreement whereby the operating company must employ at least 200 men daily for an average of 300 days in each year. The company will be exempt from taxes, except school taxes, for a period of ten years. A site for the dock and plant has been selected on the bay shore of the city. The dock is to be 775 feet long from caisson groove to head peak, 104 feet wide at the top and 21 feet over the sills.

Those interested in the enterprise are Mr. F. F. Wood and Mr. E. D. Pitt, Niagara Falls, Ontario; Mr. F. J. Nelson and Mr. John Roche, Buffalo. Mr. Pitt tells *The Monetary Times* that plans are being filed with the Dominion government and that the company's plant will be the largest and most complete for ship repair and shipbuilding and have the largest drydock on the great lakes.

Drydocks at North Vancouver.

The Dominion government has passed an order-in-council for a subsidy to the Amalgamated Engineering Works, Limited, of British Columbia, amounting to a maximum of $5,500,000, at 4 per cent. interest for a period of 35 years.

The subsidy is for the purpose of erecting at Vancouver modern drydocks to cost over $6,5[illegible],000. The plant of the company is to be located at North Vancouver, and will contain a drydock 1,150 feet long, capable of being divided into two sections of 650 and 500 feet in length, with a width of 100 feet.

Docks at the Soo.

The Lake Superior Dry Dock and Construction Company, Limited, with an authorized capital of approximately $1,000,000, and a bond issue of £157,0[illegible], was recently organized to build a drydock at Sault Ste. Marie, Ont. In November, 1913, the city of Sault Ste. Marie voted a subsidy to the company of $2[illegible],000 per annum for a period of 20 years, subject to the payment by the company of taxes on a fixed assessment, which would return to the city about $10,000 annually. The Dominion government has granted a subsidy of 3 per cent. per annum on $1,38[illegible],528 for a period of 20 years. The bonds are said to have been underwritten in London and Messrs. Hoare and Company, of London, are trustees for the bondholders. Not long ago, the permanent board of directors was elected, the following being the list: Mr. C. G. Bryan, director of the Canada Steamship Lines, Limited, director of the Richelieu and Ontario Navigation Company, director of Palmer's Shipping and Iron Company, Limited, London, England; Mr. Frederick R. D. Bertadano, director of the General Accident Fire and Life Assurance Corporation, London, England; Mr. Rowland Hodge, director of the Northumberland Shipbuilding Company, Limited, of London, England; Mr. Francis Somers [illegible], late general manager of the Earles Shipbuilding and Construction Company, Limited, Hull, England; and Mr. Percival T. Rowland, barrister, Sault Ste. Marie, Ontario. The company's consulting engineers are Sir Douglas Fox and partners, of London, England.

In June, a payment of $[illegible], the price agreed upon for their site, was made to the city of Sault Ste. Marie. Prior to the outbreak of the war, arrangements had been completed by this company, by which their bankers were prepared to advance them a sufficient amount against their underwriting agreements to enable them to commence construction at once. The agent of the contractors, the British Construction Company, and his staff, sailed from England for Canada on July 24th, with the intention of making arrangements to start immediately work on the drydock. The necessary machinery was shipped and is now on the ground. Owing

SECURITY VALUES

now according to some authorities, as in panic period of 1907, have not depreciated to any extent intrinsically, but in cash worth, governed largely by Law of Supply and Demand, and pessimistic sentiment dominated by existing war.

Indications are that, when war is ended, the hoarded millions now in savings banks will immediately seek investment. Undoubtedly this would cause huge increase in values of Canadian Securities, which will possibly enjoy more popularity than ever.

We can offer some "Bargain Lots" which can be purchased to good advantage by Shrewd Investors.

to the conditions brought about by the war, the money which had been arranged for is, *The Monetary Times* understands, not available, and the enterprise will be held in abeyance in the meantime.

Drydock at Prince Rupert.

The construction of the floating drydock and ship repairing plant of the Grand Trunk Pacific Railway Company at Prince Rupert, B.C., is making good progress. The first pontoon was launched August 24th. The second pontoon or section will be launched during September and within the next 60 days a section of the drydock will be available for repairs to craft in that locality.

The Drydock Subsidies Act of 1910 gives encouragement to enterprises of this nature. This act differentiates between first and second-class docks as follows:—

"A first-class dock shall be capable of receiving and repairing ships of at least 25,000 tons; shall cost not more than $4,000,000; and bonds to this amount or less shall be guaranteed for a term of 35 years.

"A second-class dock shall be capable of receiving and repairing ships of 15,000 tons; the cost shall not exceed $2,500,000; and the bonds shall be guaranteed for the term of 15 years."

CALL LOANS AND CERTIFICATES

Monetary Times Office,
Montreal, October 7th.

Local financial circles, after receiving the preliminary announcement that the August bank statement would show a decline in call loans abroad of about $29,000,000, eagerly awaited the receipt of particulars in order to learn in what manner this reduction was made up. When the statement appeared it was found that all the banks which had money out on call abroad at the end of July had withdrawn considerable quantities, the Bank of Montreal alone reporting a reduction of close to $19,000,000.

The following shows the banks and the amounts at the end of July and August, together with the increase or decrease:—

Bank.	July 31.	August 31.	Decrease.
Bank of Montreal	$ 71,586,953	$52,676,588	$18,910,365
Bank of Commerce . ..	22,539,255	19,095,261	3,443,994
Royal Bank	9,430,615	6,957,740	2,472,875
Bank of Nova Scotia ..	5,966,803	4,262,545	1,704,258
Bank of British North America	6,399,848	5,353,331	1,046,517
Dominion Bank	2,654,738	1,724,738	930,000
Merchants Bank	1,761,342	1,154,297	607,045
Union Bank	5,205,733	5,180,963	24,770
Imperial Bank . .	....	90,010	*90,010
Totals	$125,545,287	$96,495,473	$29,049,814

*Increase.

It would be interesting to know in what manner the funds were remitted by New York. The belief is that they came as clearing house certificates which, good as they may be for clearing house purposes in New York, would be of little value in Canada. Should this be the case, it is likely enough that the banks will promptly return the money to the street in New York by the simple means of handing back the certificates as loans. It is known that New York would not part with the gold and it was all the more surprising on the street, therefore, to note the manner in which calls in New York had apparently been met.

ENGLISH MUNICIPAL AUTHORITIES ADVISED

Lloyd-George Tells Them That Nothing Should Be Spent Except to Relieve Distress

Care should be exercised that only municipal works of necessity should be carried on at present. The difficulty, and in some cases impossibility, of selling municipal debentures will curtail many projects. Efforts to reduce municipal extravagances and undertakings that appear to be undesirable should cease. Certain works must go on and civic authorities will find sufficient [illegible] these works. The advice which Mr. Lloyd George gave recently to a deputation of municipal authorities in England applies in its broad principles very well to Canada.

The requests of the deputation were embodied in the form of these two resolutions: (1) That the government be requested to raise in their war loan such an amount as they think necessary, and from the proceeds make advances to the corporations at cost price, in order that the capital for municipal undertakings may be secured upon the best possible terms, with power for the corporations to repay on giving reasonable notice. (2) That the Trustee Act be amended so as to provide that the mortgages of the corporations mentioned in that act shall be trustee securities, and that the stock and mortgages of all corporations whose boroughs have a population of over 20,000 be trustee securities.

It was elicited in the course of subsequent discussion that with regard to the first resolution the deputation was not proposing to ask the government to advance money except for new works put in hand to provide employment during the war.

Competing in Money Market.

In reply to the deputation, Mr. Lloyd George said it was obvious that it was to the interests of the municipalities and of the State that they should not be competing in the same market in what must be difficult borrowing times. He had no hesitation in saying that it was desirable that they should accede to the deputation's first request, that whatever money they borrowed for the purpose of responding to the invitation of the local government board to make provision for distress in their districts should be advanced out of the war loan that the government put on the market. With regard to terms he thought they must be subject to the same obligations as the government, who were quite prepared to lend at the rate of interest they paid themselves, with an allowance for the actual expenses to the State.

Proceeding, Mr. Lloyd George said: "There is only one thing I should like to say in addition to that. We think it is absolutely necessary that the money should be spent for the relief of distress. I do not think this is the time to embark in great municipal enterprises which have no reference to distress. After all, we want every penny we can raise to fight the common enemy, and our first consideration ought to be to win. That is our first consideration. Unless we do that, there will be no country for municipalities or governments to administer. The first thing is that we should come out triumphant in this struggle, and as finance is going to play a very great part we must husband our resources. We must relieve distress. We must see that our people suffer as little as is possible under these terrible conditions, and therefore we are prepared to meet you, but we do not want a penny spent which is not absolutely essential to relieve distress, because, after all, if you go into the market it is the same market we go into.

Only for Insistent Distress.

"I am speaking now for the treasury. The local government board have their business in seeing that you go on spending. Our business is to see that you do not spend too much. Therefore, it is just as well I am putting this to you, purely speaking as the treasury, we will find the money for you if there is distress, but we do not want to find any money for you unless there is really actual insistent distress in the districts. It is very much better that you should get the people to work on things that are essential if you can. Our trade is not going. The seas are ours, and they will remain ours. We shall get not merely our own trade, except that of European countries, but we shall get a good deal of the enemy's trade as well, and of course there is always the business which is necessary in order to keep the war going. So that there will be a great deal of employment in the ordinary course of business, but there will be some districts that will be very hard hit.

The Federal Life
Assurance Co. of Canada

posted up another record year in 1913. One of the most gratifying results was that the Company's earnings showed an increase of over 63% on the earnings of 1912. "Now I do not want municipalities in districts which are not hard hit to spend money, because we want that money for fighting. It is much better used for fighting than in spending it in municipalities that do not need it. You do not mind my talking to you like this. I do not want you to raise money, therefore, for schemes in districts where there is on the whole plenty of work. On the other hand, if there is great distress, as there will be in some districts, then the local government board and you between you will work out the matter in those districts. We must work as partners and work together—all parties, all sections of the people, the government, and municipalities—until we carry the old country through to a triumphant conclusion."

CANADIAN PACIFIC RAILWAY AND AUSTRIA

The Austrian government has confiscated the Canadian Pacific Railway Company's securities and money deposited in Vienna, says a dispatch from that city, as well as the company's observation cars running on Austrian railroads. This has been done, it is said, as a consequence of the refusal of the company to pay the dividends of Austrian shareholders. Sir Thomas Shaughnessy, president of the Canadian Pacific Railway Company, asked regarding the dispatch, said:—"They do not know whether we will pay dividends or not. They may confiscate what they like. I do not know what they are doing over there but we will do our duty."

COMPANIES CHANGING NAMES

The following companies in Ontario have changed their names:—

Grand Union Hotel Company of Toronto, Limited, to Carls-Rite Hotel Company, Limited. Ford City Metal Products Company, Limited, to Ontario Pressed Steel Company, Limited.

The following company with a Dominion charter has changed its name:—

O. B. Shoe Company, Limited, to Drummond Shoe, Limited.

WAR AND REAL ESTATE VALUES

Signs of Slight Decline Visible in Montreal—Storekeepers and Heavy Overhead Charges

Monetary Times Office,
Montreal, October 7th

A point in connection with the present war and resulting conditions which is of great interest to the financial world concerns the price of real estate. The several years boom, towards the end of 1912 carried prices of real estate up to a high level. The claim was made at that time by many that prices were fully 50 per cent too high and that sooner or later they would have to come down. On the other hand, the friends of real estate declared that property in Canada was still considerably lower than in sections of the United States with which Canada might be compared. Towards the end of 1912, the advance in prices ceased and early in 1913 the activity collapsed. Prices, however, for the most part held at the 1912 level, owners not being prepared to sell at a concession. In few cases, however, would buyers relieve them of their burdens save at a considerable decline. This situation continued into the present year.

Money Instead of Land.

The argument in favor of a decline became strong the moment the present war broke out, and there are now indications of a decline in prices. Hundreds of holders of land want the money more than they want the land and are offering to sell at a loss. Up to the present, central real estate in the city of Montreal is holding fairly steady, although it is considered that rents are high and that sooner or later there will have to be a decline. Some of the proprietors of stores on St. Catherine Street—the principal retail street in the city—have made petitions to landlords for a reduction in rent owing to the marked falling off in their business. This applies even to some of the corner stores for which leases were signed up a couple of years ago when business was right at its height. With the steady falling off that has occurred during the past six or eight months, the proprietors maintain that it will be absolutely impossible for them to go on paying the rents that they have and continue in business. So far the landlords seem to have held out against any reduction and are holding their tenants to the terms of their leases.

No Collapse in Value.

In some quarters united action on the part of the storekeepers is likely to be taken during the next few weeks, as some of the stores maintain they must go out of business if forced to continue the high overhead charges they have to meet with the proceeds of the smaller business that is being done.

A trust company which is interested in much real estate tells *The Monetary Times* that there has been no great change in the situation, save that people are no longer buying at former prices and holders are occasionally letting go at a sacrifice in order to get the money. As a whole, however, there is no collapse in values.

IT IS LOPSIDED LEGISLATION

That is the Opinion of Loan Company Managers of Moratoria Laws Here

In reply to inquiries instituted by *The Monetary Times* respecting the limited moratoria to operate in Ontario and Manitoba, Mr. A. A. Campbell, managing director of the Peoples' Loan and Savings Corporation, London, says that, on the whole, the situation does not appear to be so serious that legislation of this kind is necessary. That is the view taken by *The Monetary Times*. Not knowing yet how far-reaching the proposed legislation in Ontario is intended to be, Mr. Campbell hesitates to express any definite opinion. "Assuming, however, that it is the intention to give mortgagors an extension of time for the payment of principal due, or past due, on their mortgages, it would seem," he says, "as far as loan companies' interests are concerned, that loan companies receiving deposits and issuing debentures should be protected to the same extent.

"If loan companies are prevented by special legislation to collect moneys due them, it would be manifestly unfair to compel them to pay moneys due the public for deposits and maturing debentures without any relief.

Lopsided Legislation.

"In the management of a loan company the income is fairly accurately anticipated, and provision is thereby made for the payment of maturing debentures and deposits. If, therefore, any lopsided legislation is introduced it might have a very detrimental effect on loan companies. Persons indebted on principal on mortgages would use the money that should have been applied in payment on their property in other channels."

Mr. M. J. Kent, manager of the London Loan and Savings Company of Canada, London, holds a decidedly adverse opinion of the legislation. It is entirely one-sided, he says, favoring the borrowers against the lenders; and in case of loan companies, if persisted in, might be attended with dire results in preventing their being able to meet the demands of their depositors and debenture holders.

Loan Companies, Too.

"If the borrowers are to be made exempt from meeting their payments, the loan companies, especially those having large sums of borrowed money, should also have the same privilege of deferring their payments; otherwise, they may be called upon to pay their bonds and cannot promptly do so, on account of the legal postponement of payments due them on their loans, causing possible assignments, or a ruinous sacrifice of securities to save themselves from demands by their creditors. Such action on the part of the governments would no doubt soon affect the credit of loan companies and deter investors from buying their debentures."

◆

BANK OF BRITISH NORTH AMERICA

The half-yearly report of the Bank of British North America for the six months ended May 30th, 1914, shows net profits, after the usual deductions, of £95,335. This sum includes the amount of £22,281 brought forward from last year, so the actual profits for the six months work out at £73,054. This is at the rate of £145,108 per annum, or, roughly, $730,540. The net profits during the year ended November, 1913, were $680,745, so the six months result indicates a fair gain for the full year, if the record is maintained in the latter half-year. The following appropriations from the profit and loss account have been made: Officers', widows and orphans fund, £703; life insurance fund, £200, and pension fund, £5,420, these amounts being about the same as last year. The directors have declared an interim dividend of 40s. per share, payable, less income tax, on October 3rd. This leaves £48,821 to be carried forward to the final six months of the year.

CANADA DOES NOT NEED MORATORIUM

Drastic Measures Unnecessary—Liquidation Was Due Anyway

Any action taken by the governments of the various provinces bordering upon a moratorium, or even a partial one, or any variation of a mortgage contract, would make matters worse rather than better, writes Mr. A. J. Jackson, president of the Colonial Investment and Loan Company, in reply to an enquiry of *The Monetary Times*, respecting the legislature proposals in some provinces in regard to limited moratoria.

Mortgage companies generally always extend considerable leniency to their borrowers and endeavor to nurse them along if there is a possible chance of their being able to redeem their mortgages, their aim being to avoid having to take over the borrower's property, but merely to secure their principal money advanced and the interest, the latter being all that can be hoped for in the way of profit.

In the event of continued default where a company is forced to take over a property such property is disposed of just as soon as possible, and in many cases at less than the mortgage claim and interest. Therefore, any extension imposed by the government would result in further losses to companies in interest, taxes, insurance premiums, repairs, etc., as borrowers who allow their payments to fall into arrears invariably likewise allow their property to go to rack and ruin and depreciate in value. Any change, therefore, in the terms of mortgage contracts towards an extension would be very detrimental.

Opportunity not Obstruction.

Mortgage companies must depend upon the payments by the mortgagors of interest and portions of principal to meet not only their debentures, deposits, interest, taxes and many other obligations from time to time without which unless some relief is also enacted by the government would in many cases result in great hardship and no doubt in some cases fatal to their future existence. Such payments are also depended upon for the purpose of making loans to other applicants to assist in the development of farm lands and the progress of business and upbuilding of the country generally in the various districts to which their operations extend, as well as the payment of dividends to thousands of shareholders, many of whom depend upon such dividends as their only means of support.

Canada in no sense requires a moratorium or partial moratorium on mortgages or anything else. This is a producing country and now is one of the golden opportunities to make the Dominion more prosperous than ever before. There is hardly anything of necessity which Canada cannot produce, and with the high prices which are almost sure to prevail during the next few years this country should benefit to a greater extent than almost any country the world over.

Help to Secure Funds.

The Canadian government and legislatures of the provinces should review the services which saving people through mortgage companies are rendering in advancing funds to assist in the building up of various cities, towns and villages, and the development of their various industries and farm lands, and endeavor to devise some means whereby assistance could be rendered to help mortgage companies to secure a larger supply of funds for such purposes rather than retard the progress of business generally, which could not help but be the effect of moratorium or variation of present mortgage contracts, and will further prejudice against the investment of funds in mortgages and in stocks, bonds or deposits in mortgage companies, to say nothing of the companies themselves investing in mortgages in provinces where their securities are afterwards apt to be varied in conditions.

The objection to any action of this sort is that a moratorium should not be adopted except in case of absolute necessity, and Canada is not in any such distress as to require such drastic measures. I venture to question, concludes Mr. Jackson, if it is the honest working people who need such relief. Is it not the unscrupulous real estate speculators who for the last few years have been booming real estate, buying up farms on the outskirts of cities, towns, etc., and dividing them up into subdivisions, with the subsequent areas to supply the demand for the next quarter century at least, who

LEGITIMATE BORROWING FROM BANKS

What is Bad for the Business Man is Bad for the Banker —Bills Receivable

The average business man has three legitimate reasons for borrowing. First, to extend his plant, by purchasing real estate, erecting additional buildings or installing new machinery or fixtures. Second, to increase his stock of goods. If he is a manufacturer, this would mean raw material; if a retailer or wholesaler, ordinary stock. Third, to extend additional credit to customers.

Although there may seem to be other reasons for an ordinary business man borrowing, yet, if they are analyzed, you will find that they come under one of these three heads, suggests the Sterling Bank's little journel, "The Teller."

Money should not be borrowed for extending a plant in six-months' loans. For permanent improvements of this character, additional capital stock should be sold, if possible; or, failing this, bonds or a long-term mortgage issued.

As to the second purpose, a business should have enough capital to carry the necessary minimum of stock all through the year. There are times, however, when a larger stock than usual must be carried. At such times a business man is justified in seeking the necessary loans from the banks.

Discourage Indiscriminate Credit.

The third purpose is the one we are concerned with mostly in this article—that of extending credit to customers.

This is done in two ways—by carrying the customer's account and borrowing money to do so, or by accepting the customer's note and either holding it or discounting it at the bank. From a bank's point of view, these notes are the best and safest form of commercial paper. They are backed by two independent firms or men, each of whom is, presumably, good for the amount of the note.

Bankers, however, must be very careful of the amount of credit extended to one firm on this kind of paper. It is a safe form of loan, providing the borrower is sound financially.

It is a sign of weakness, however, for a firm to have a large amount of "bills receivable" on their books. A bad habit which is unfortunately growing on modern business men is that of extending almost indiscriminate credit to customers. This should be discouraged to a great extent by the banker.

Was Weakest Asset.

If a man's customers are good, their own bank will lend them the money they need. If they are not, he should not be extending them credit. An experienced assignee says that in investigating a great many bankrupt concerns he has found the "bills receivable account" their weakest asset. This does not necessarily mean that it was the cause of their failure, but that it was an important contributing cause.

It stands to reason that what is bad for a man's business is bad for his banker. So the banker should educate the business man to keep down his "bills receivable account"—to insist on thirty-day payments if possible. The result will be a sounder business, and therefore a safer and more profitable banking account.

◆

And in some lines, business is better than usual.

Do not act as a negative influence in national development.

The city of Regina has taken steps to assist the settlers in the drought areas of Saskatchewan. All such settlers who have stock for which they have no feed, have been notified to ship their stock to the Regina municipal stockyards, where they will be properly fattened, and the proceeds, less the cost of feeding, will be returned to the farmer. This assures the farmer of good returns for his stock. A proper agreement which protects both the farmer and the city has been prepared.

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100 00 invested has produced all the way from $127.00 to $193 00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

FIRE INSURANCE OF HOME COMPANIES

Assets of Twenty-nine Companies—Cash Income and Expenditure

The assets of the twenty-nine Canadian insurance companies doing fire business amounted at the end of the year to $17,78[illegible], covering a total amount of insurance of all kinds of $1,145,04[illegible], being at the rate of [illegible] for every $1,000 of insurance in force. They have also subscribed capital not called or not paid up, amounting to $6,545,345, making a total security of [illegible] for every $1,000 insured. The liabilities of the same companies amounted to [illegible],068,699, made up as follows:—Unsettled losses, [illegible]; unearned premiums, $5,980,877; sundry, $1,25[illegible].

The unearned premiums are taken at [illegible] per cent. of the pro rata portions of the gross premiums for the time unexpired in the cases of fire and inland cargo insurance, and 80 per cent. of the whole premiums in the case of a current ocean risk. The surplus of assets over liabilities available for the protection of policyholders, independent of the subscribed capital not called up, amounts to [illegible].

The capital stock of these companies paid up in cash amounts to [illegible],809,8[illegible].

The total net loss in surplus is $45[illegible] as against a gain of $202,951 in 1912. Thirteen companies show an underwriting profit and the remaining fifteen an underwriting loss, the net loss amounting to $1[illegible],244. In 1912 the net underwriting loss was $1[illegible],215. The dividends declared were $478,2[illegible]; which is less than the $[illegible]4,[illegible]7 interest and rents earned upon the investments. The gains from miscellaneous sources were $278,205, consisting chiefly of premiums received upon stock issues, and appreciation in value of real estate and other securities. The losses from miscellaneous sources were $768,8[illegible], consisting largely of depreciation in the market values of securities at the end of the year.

The table at the foot of this page gives the distribution of fire business between Canada and elsewhere, for the fifteen companies transacting business outside of Canada, and shows that the home business was, on the whole, more favorable to the companies than the foreign business.

Including the whole business of the mixed companies, outside as well as within the Dominion, the Canadian companies have received during the year 1913 a total cash income of [illegible], which is made up as follows:—

	1913	1912
Interest and dividends	$ [illegible]53,5[illegible]	$ 5[illegible]8,[illegible]
Premiums	[illegible]	[illegible],644,274
Sundry . . .	1,[illegible]6,559	1[illegible]5,[illegible]
Totals .. .	[illegible]	$1[illegible]98,554

The cash expenditure during 1913 has been $[illegible],045,38[illegible], distributed into:—

	1913	1912
Losses paid	$5,[illegible]	$5,552,[illegible]14
General expenses .	[illegible]	[illegible]
Dividends to stockholders	481,[illegible]	44[illegible]
Totals	$[illegible],045,387	[illegible]

For every $100 of income there has been spent $[illegible].47, namely: for losses, $57.88; for general expenses, $36.77, and for dividends to stockholders, $4.82. Hence, also, for every $100 of premiums received there has been paid out $108.48, namely: $6[illegible].12 for losses, $40.10 for expenses, and $5.26 for dividends to stockholders.

	In Canada.				In Other Countries.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Pacific Burt Company, Limited.—The regular quarterly preferred dividend of 1¾ per cent. has been declared by the directors of the Pacific Burt Company, Limited.

Canadian Consolidated Felt Company.—The Canadian Consolidated Felt Company, Limited, of Montreal has deferred action on the preferred stock dividend. The company, of which Mr. D. Lorne McGibbon is president, is controlled through a stock ownership by the Canadian Consolidated Rubber Company, Limited.

Western Canada Land Company.—In view of the losses suffered in connection with the failure of the Canadian Agency, says a London dispatch, it will cause little surprise that the Western Canada Land Company declares its inability to meet the half-yearly interest on its debentures due on October 1st. The appointment of a receiver and manager has been agreed to. The board, while regretting the present position, assures share and debenture holders that everything will be done to rehabilitate the company's affairs with the least possible delay.

W. A. Rogers, Limited.—The company's preferred dividend has been declared on the usual 7 per cent. basis. The dividend on the common stock of 2½ per cent. was reduced to 1½ per cent. The Wm. A. Rogers, Limited, paid 10 per cent. on the common during 1910 and 1911, and 12 per cent. during 1912 and 1913. The dividend was reduced to 10 per cent. on April 1st of this year. The company has $1,500,000 of common stock and $900,000 of preferred. President S. J. Moore states that the company has a substantial business in the United States, and that the winter outlook is promising.

Dunlop Tire and Rubber Goods Company.—The regular 7 per cent. dividend on the preferred stock of Dunlop Tire and Rubber Goods Company, Limited, has been declared for the three months ending September 30th. The preferred stock was first issued on March 1st, 1899, since when it has continuously paid dividends.

The company manufactures a general line of rubber made goods, including tires for automobile, truck, motor-cycle, bicycle and carriage, belting, packing, hose, mats, heels, horse shoe pads, and general rubber specialties. The company has thirteen branches.

F. N. Burt Company, Limited.—The quarterly dividend on the preferred stock of the company of 1¾ per cent. has been declared. The quarterly common dividend was reduced from the usual 1½ per cent. to 1 per cent. Two dividends of 1½ per cent. have been paid this year, and the 1 per cent. now declared will make 4 per cent. complete. The dividend rate on the F. N. Burt common stock was increased from 4 per cent. to 6 per cent. in January, 1911. The company has $750,000 of common stock and about $2,000,000 of preferred. The reduction of the dividend, Mr. S. J. Moore stated, was a matter of a conservative business policy without prejudice to the future.

Kaministiquia Power Company.—The net earnings for the month of August were $14,762. The following is a statement of operations for the month and also for the 10-months period:—

	August.	10-month period.
Revenue	$27,610.80	$270,740.56
Operating and maintenance charges	5,188.60	41,013.44
	$22,422.20	$220,727.12
Interest	7,660.10	73,022.31
Net	$14,762.10	$156,704.81

An official of the company states that the increased operating expenses are due to the overhauling which is usually done to the plant in the summer.

Smart-Woods, Limited.—Smart-Woods, Limited, have deferred the 1¾ per cent. quarterly dividend on the preferred stock due October 1st. The Smart-Woods passed its common dividend early in the year, the last quarterly payment being made in April. The outstanding preferred stock is $1,500,000, with an equal amount of common. In its last fiscal year the company reported earnings equal to 14.32 per cent. on the preferred. The plants of the company are well employed at the present time in connection with government orders.

Porto Rico Railway Company.—Owing to interference with financing on capital account occasioned by the war, the directors of the Porto Rico Railway have found it necessary (while continuing the dividends on the preferred stock) to devote for the present the company's remaining surplus earnings towards liquidation of expenditure on capital account.

During the spring and early summer the company has passed through business depression, caused partly by the abnormally low price of sugar and partly by the world-wide financial stringency. The directors state that conditions are improving and that the course they have adopted will meet with the approval of the shareholders.

Halifax Power Company, Limited.—The company has applied to the Nova Scotia public utility commissioners for authority to issue $1,500,000 6 per cent. bonds. The bonds are to replace an old issue, of which $100,000 are authorized, and which will be exchanged for the new bonds if the utility commissioners give the required permission to make the issue. It is proposed to make the issue, which will be at 6 per cent. in two series of $175,000 each and the purpose is stated to be to refund old charges, to acquire property and construct facilities and to complete and improve facilities. The company's petition sets out that $39,820 is required to pay for properties in the watershed while $57,000 is needed for power houses and other buildings. Hydraulic work requires $487,500, electric equipment for 19 miles of double circuit line, with steel poles, and telephone lines will need $85,000: roads and transportation facilities, $5,000; engineering, $100,000; interest during construction, $37,458; operating capital, $40,000; sluices, flumes and other facilities for steam driving flushways, $40,000; cost of financing, including brokerage commissions, $107,996—a total of $1,500,000. The company have expended to date $107,840.

FISH CANNERIES MAY INCREASE OUTPUT

Monetary Times Office,
Montreal, October 7th.

Canadian fish packing companies doing export business with Europe, are intending to make special efforts to extend their trade this year. In 1913 Great Britain imported $1,540,000 worth of canned salmon from Canada, France took $76,000, Belgium, $8,700 and the demand from these latter countries will probably be increased. Meanwhile, there is room for Canadian companies to increase their exports to Great Britain, by giving stronger competition to the United States packing concerns.

Owing to the large pack, and the cutting off of Germany and Austria as a market, it is anticipated that packing companies will have a surplus of canned lobster this year. In 1913 Germany took $139,000 worth of our canned lobster out of total exports of $2,000,000. France and Russia also furnished a good market and trade reports from Canadian commissioners abroad state that there may be a falling off, co-incident with increases in imports of cheaper foodstuffs of similar variety.

Officials of the fish packing companies state that they look for a profitable year, although some branches may not show any increase over last year. Owing to higher prices for canned goods, profits will be larger. Exports of salmon are expected to be increased considerably, owing to a cutting off of a portion of the European fish pack.

◆

Only small incomes should make economy the first consideration. Large ones should lighten the load.

Anyone can wax sarcastic about trying to do "business as usual." Workers, not cynics, are wanted now.

The Silver Bullet at Work

THE usefulness of the "silver bullet" to which Mr. Lloyd George referred recently is becoming more pronounced as the war progresses. "The last few hundred millions may win this war," he said, adding that it was not a question of resources of men merely, but of cash, too. "We have won with a silver bullet before." With the exception of the attempt, apparently unfavorable, made in Germany, none of the nations involved has issued a big loan as yet. Great Britain has financed with treasury bills. To September 17th, the Imperial government had borrowed £45,000,000 upon that security for war expenditure. A fourth issue of £15,000,000 is now being made. Referring to the £45,000,000 borrowed to mid-September, the official British Treasury statement says: "This large amount has been obtained within the short period of one month, not only without denuding the market, but apparently without making any appreciable impression upon the available resources of the country, since the tenders for the most recent issue were larger in total amount and the terms offered were more favorable to the government than those of the previous issues. The last issue is £7,500,000 in six months bills and £7,500,000 in 12 months bills. The six months bills were allotted at an average rate of discount of £2 18s 7d per cent. per annum, as compared with £3 13s 1d on 19th August and £3 15s 6d on 26th August. The 12 months bills were allotted at £3 8s 4d per cent., a remarkably low rate for so long a period at a time like the present. The total amounts offered were £42,000,000 on 19th August, £40,000,000 on 26th August, and £47,000,000 on 16th September. The keenness of the competition for the bills is shown by the fact that the separate allotments of the 16th September issue were no less than 281. Notwithstanding these large government borrowings, money continues to be readily obtainable in the London market at 3½ to 3¾ per cent."

Money in Britain is being raised on exceptionally easy terms, the last £15,000,000 of the £45,000,000 being placed, as regards the one-year bills, at under 3½ per cent. This method of raising the necessary funds, therefore, will probably be continued by the Imperial government.

England is not only financing its own vast operations. It has made a loan of £10,000,000 to Belgium, the money being raised in the form of treasury bills, a part of the £45,000,000 noted above. The London market has seen also three other issues of bills in the past few weeks. One was an issue of £2,000,000 India bills, payable in September, 1915. The total amount applied for was £3,188,000. Tenders at £95 15s 6d received about 65 per cent., above in full. The bills were placed on a basis equal to an average rate of discount of £4 1s 0.59d, thus making the average price obtained £95 18s 11.41d per cent.

About £2,000,000 of French sterling treasury bills were also successfully sold in the London market. The bills, which will have a currency of twelve months, were placed on a basis yielding 5 per cent. The proceeds of the issue will not involve any transfer of money from Great Britain, the funds provided being needed to pay for the large numbers of boots and other articles that have been ordered in Great Britain on behalf of the French Government.

An offer was made in London recently of twelve months Norwegian treasury bills for about £600,000. The bills were placed at about 94¼ equal to an average discount rate of 5¼ per cent. About two-thirds of the money raised was needed to pay for material and other stores purchased in Great Britain, the ordinary method of payment having been rendered difficult owing to the present condition of foreign exchanges. The balance of the proceeds is on account of coupon payments due. No remittance of money abroad will result from the issue, the proceeds being retained in the Old Country.

In the comparatively near future *The Monetary Times* expects an announcement of the financing of a Canadian loan by the Imperial government through the Bank of England.

Blue pencil blue talk.

* * *

Why not "Buy a baby bond"?

* * * *

Nothing whatever can be gained by pessimism. Have faith, if only for the benefit of the community.

* * * *

Keep up your spirits; have faith in your breed; fight or pay; be confident in your country's strength; and try to do business as usual.

* * * *

If the politicians at Ottawa force a general election now, they will lose the thousands of votes of the men who do not believe in such tactics.

* * * *

Canada has enough to do in the Empire's fight and the nation's business, without politicians forcing a general election. Business men do not want an election now.

* * * *

Great Britain will place in Canada all the orders it reasonably can. War orders are big and rush orders and many, therefore, must be sent to the United States at this time.

PROBLEMS OF MORE PRODUCTION

The more we realize in Canada the necessity for greater production, the more do we find problems which have been overlooked in the haste of trying to make money quickly by speculation. Despite the numerous cynics who scoff at the idea, one of the solutions to many problems will be the movement back to the land. That movement in turn presents its own problems, but not insoluble. Farm life is not sufficiently attractive to keep youth on the farm or to bring him back to the farm after a taste of the city. Here is a true story, related by the Guelph Herald:

"The local manager of an automobile branch was going to Drayton fair, and when about eight miles from his destination he overtook a young man about 18 years of age, trudging along the roadside, with a small paper parcel in his hand. The lad was dressed—well, as many farm lads are. He asked if he might get a lift, and upon being seated was asked his destination. He replied that he was going to Drayton fair, and, being asked if the distance was not rather great, the lad unburdened himself. He declared he was one of a family of five boys, his other brothers being at home working. His father, he said, owned 400 acres of land, and they all had to work from 6 a.m. to 8 p.m. The lad had never been to Guelph, had for years looked longingly to seeing the Toronto Exhibition, but was disappointed again this year. He then claimed the right to attend the fair at Drayton. 'Well, but why didn't you get the loan of one of your father's horses?' he was asked. 'I was told that if I wanted to get to Drayton I could walk,' he replied, quite naturally, as if such things were a matter of course. 'So you're going to have a good time, eh?' 'Yes, I hope so,' was the bright reply of ever-hopeful youth. 'Got lots of spending money to enjoy yourself?' 'Well,' was the reply, looking at the small parcel he carried, 'I have a dozen eggs here which I'm going to sell at Drayton; that ought to get me through somehow!' "

The Peterborough Review, commenting upon this incident, says: "Farmers like these do not know how to bring up their children." But there is another phase. Probably the boy's father, as a young man, had to clear his farm, with little capital, with little help and with no day off in sight. His boy's lot is a little better. He has his day off and a dozen eggs to exchange for ice cream cones, pop corn and pennants at the fair. But it is not good enough. We cannot expect a lad to be shackled to the pioneer life of his grandfather's time, with all its disadvantages, while the echo of tango music faintly reaches him. Again, while the boy was trudging to the fair the father may have been contemplating bushels of apples, tomatoes and other produce rotting on the ground because we have not learned yet how to bridge the price gap between the grower and the consumer. That gap takes the heart out of one and the hide off the other. In short, farm life is not attractive. The farmer cannot afford to make it attractive to his help because the price gap tends to prevent. We must burnish the attractions of the farm. The rural depopulation will then be lessened and some of the good stock which has drifted to the cities will return to the land.

The fact that the war is costing Britain $55 per second, should make every citizen of the Empire an ardent peace advocate.

CONSTRUCTION AND PRODUCTION

One of the few critics of the message brought to the Canadian Club, Toronto, by Dr. Shortt is the Toronto News. "According to Dr. Shortt," says our contemporary, "Canada's economic difficulties are due not so much to the war as to our activity in building up populous centres instead of going on the land. In his view, the Dominion is greatly over-developed on the constructive side, we have more factories than we need, and we should roof over unfinished plants until the country catches up to them. This is the sense, if not the actual wording, of a rather untimely statement, which, if seriously accepted, would not tend to increase public confidence or to stimulate trade activity at a time of difficulty for all nations. Fortunately few Canadians will agree with Dr. Shortt or be depressed by such arguments."

The applause which greeted Dr. Shortt's statements, which obtained scant treatment in the daily press, indicated that nearly all, if not entirely all, his audience endorsed his views. The criticism, quoted above, does not quite express the position. As *The Monetary Times* views it, and as we understand Dr. Shortt's position, the situation is this: For a number of years, great activity has prevailed throughout Canada in construction. This included the construction of railroads, steam and electric; factories, pulp mills, water power plants, railroad terminals, drydocks, freight boats, legislative and other public buildings, and the building of towns and cities with their hotels, residences, electric light, water, sewerage systems, schools, fire protection, and so on. This has involved the expenditure of vast sums of money, chiefly borrowed from Great Britain.

The nation's just pride is in its future possibilities and development based on the substantial foundation of the past and present. In the extremely optimistic days of a few years ago, we constantly heard the phrase, "building for the future." That is exactly what has been done and Dr. Shortt drew attention only to what all close observers must have concluded, namely, that the machinery of construction—upon the installation of which we have specialized in the past few years—has reached the point at which the country must take up considerably more production. In other words, having got enough plant to cater to the probable demand for some years to come, we must see that the plant is working to full capacity in normal times, before we increase it again. The point was thus illustrated by Dr. Shortt: "If we have six boot and shoe factories with ample plant, catering to the trade, it is useless to ask capital to finance further boot and shoe factories at present."

It is not a question of more production in the factory only, but in every other sphere. The farmer feeds the city. He does it in two ways, by supplying his produce and by purchasing his necessities from the city factory. Without the surrounding agricultural district or a district which produces something, the city cannot live. Were there not a community of Western Canada farmers to buy Massey-Harris implements, there would be correspondingly less output and employment in the Eastern Canada factory.

On the one hand, we have sufficient equipment for some years to come. With it, there must now be produced more agricultural, animal, mining, forest, factory, fishery and other products. Discussing this phase of Canadian development early this year, Sir George Paish said: "If capital were provided freely for the construction of farm buildings, for the purchase of agricultural machinery, and generally for increasing quickly the productive power of the country, the transition from the constructive to the productive period would be greatly facilitated."

EAST AND WEST AND CREDIT

From Western Canada comes a letter to *The Monetary Times* supporting the view that credit here is sometimes abused. A large percentage of the failures of western retail merchants has been attributable, says the writer, to the evil of too much credit. He places the blame for this condition with the shipper and manufacturer in Eastern Canada and not with the Western houses, so far as Western retail trade is concerned. He says: "The Western shipper would like to keep credits on a reasonable basis; that is to say, groceries and similar lines should be sold on not longer than 30-day terms; and dry goods and boots and shoes on not longer than about 60 days, the retailer being encouraged so far as practicable to watch his stocks carefully and buy frequently, and in comparatively small quantities, and not to anticipate his needs unreasonably.

"The Eastern houses competing for Western business on the contrary, make their principal argument on the length of terms they are prepared to give. It is common for Eastern houses to offer Western retailers three months on groceries, and there are instances where much longer terms have been given. Eastern houses will ship fall goods in July and give three or four months' terms dating from October 1st, and in many cases longer terms are given.

"In other words, the policy of the Western wholesaler is to exert constant pressure upon his customers to keep the credit extended on their part to consumers within reasonable limits. The policy of the Eastern houses is to afford too much encouragement to the retailers. This tends to careless methods of doing business both in regard to credits and to the amount of stocks carried."

What have the Eastern houses to say to this?

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Sarnia, Ont.—October 7—Colonial Hotel. Loss small. Cause unknown.

Souris, Man.—October 9—Messrs. Redmond's granary. Loss and cause unknown.

Scarboro' Junction, Ont.—Mr. W. H. Patterson's barn. Loss and cause unknown.

Bladsworth, Sask.—October 11—Mr. R. Gill's barns, etc. Loss, $8,000. Cause unknown.

Victoria, B.C.—October 8—Men's Hat Store, Sayward Building. Loss and cause unknown.

Whitechurch, Ont.—October 7—Mr. Donley's residence. Loss, $1,000. Cause, defective chimney.

London Township, Ont.—October 1[illegible]—Mr. F. N. Talbot's barn. Loss unknown. Cause, sparks from threshing engine.

Amherst, N.S.—October 11—Cash Shoe Stores, Limited, and Mr. E. Savage's store. Loss, $10,000. Cause, crossed wires.

Hamilton, Ont.—October 12—McNeil Cooperage, Beach Road. Loss, $1,000. Cause unknown. Mr. V. Evanoff's store, 776 Burlington Street East. Loss, $200. Cause, overheated stove.

New Brunswick.—October 9—Forest fires on St. Croix Pulp and Paper Company's property, McAdam Junction, at Shogomoc, and on New Brunswick Railway Company's land, Newburg Junction.

Peterborough, Ont.—October 10—Fire Chief Howard's report for the week ended October 10th shows the following loss: Mr. Stratton's garage, [illegible] Park Street. Loss, $5,000. Cause, lightning.

Quebec, Que.—October 1[illegible]—Mr. J. Fortier's store, 12[illegible] Bridge Street. Loss, $1,100. Cause, rats gnawing matches. Mr. E. Morrisette's store, Lalourelle Street. Loss, $1,000, insured. Cause, overheated furnace.

Winnipeg, Man.—October 8—Messrs. Banfield and Company's furniture warehouse. Loss, $40,000. Cause, supposed incendiary. Mr. R. Crawford's garage, 118 Sherbrooke Street. Loss, $8,000; insured. Cause unknown.

Buctouche, N.B.—October 12—Victoria Hotel and barn and sample rooms, Moncton and Buctouche Railway station and freight shed, residence and barn of Mr. W. H. Irving, and warehouse of Messrs. A. and R. Loggie. Loss and cause unknown.

Toronto, Ont.—Fire Chief Thompson's report for the week ended October 7, shows the following losses:—

September 29—Dwelling of H. Miller, 73 Nassau Street, owned by M. Salsberg. Cause unknown. Loss, contents, $75; building, $5.

September 30—Dwelling and store of Frank Felix, 8[illegible] Elizabeth Street, owned by A. Rostein. Cause, lighted candle upset. Loss, contents, $75; building of Geo. Crittenden, rear 161 Euclid Avenue, owned by K. Pollack. Cause unknown. Loss, building, $25; H. G. Hundert, rear 16[illegible] Euclid Avenue. Loss, contents, $50; building, $75.

October 1—Dwelling of Thomas Crow, 144 High Park Avenue. Cause unknown. Loss, contents, $100.

October 2—Stable of C. Rackshaw, rear 601 Dupont Street, owned by S. P. Atkinson. Cause, incendiary. Loss, contents, $400; building, $200; tool house of Geo. Marlen, rear 1472 Dundas Street. Cause unknown. Loss, $4[illegible].

October 3—Store and dwelling of Geo. Zaher, 252 Queen Street, E., owned by R. C. Gavin. Cause unknown. Loss, contents, $50; building, $25; dwelling of R. S. McGregor, 9 Manning Avenue, owned by D. Anderson. Cause, spark from chimney. Loss, contents, $75; building, $250; Mrs. Newsome, 11 Manning Avenue, owned by Mr. Burr. Loss, $50; automobile of V. Heward, 1[illegible] D[illegible] Avenue. Cause, backfiring starter. Loss, $200.

October 4—Building of Benj. Roberts, 15 Seneca Avenue. Cause unknown. Loss, contents, $500; building, $1,000.

October 5—Dwelling of J. Greenwood, 20 Ro[illegible] Avenue, owned by Mrs. Lyons. Cause, overheated furnace. Loss, contents, $[illegible]; building, $500.

October 7—Building of James Sutherland, Cornell Anthracite Manufacturing Company, H. F. Smith, owned by C. H. Henderson. Cause unknown. Loss, contents, $1,1[illegible]; building, $800; stable of J. Patterson, rear 114 O[illegible] Street. Cause unknown. Loss, contents, $25; building, $[illegible].

◆

ALBERTA TO RAISE LOAN

Alberta will raise a loan of $[illegible],000 upon the credit of the general revenue fund of the province for a term of [illegible] years, at about 4½ per cent.

◆

Twenty-three votes were polled on a bylaw to spend $26,000 at Walkerville, Ontario.

The Brown and Wigle Company, of Kingsville, Ont., have received an order from a Montreal firm for 2,000 woollen blankets, 12 pounds per pair, to be ready by December 15.

Mr. W. R. Arnold, managing director of the Dominion Trust Company, Vancouver, met with a fatal shooting accident this week. Mr. C. G. Pennock, formerly manager of the Bank of Vancouver, has been appointed in Mr. Arnold's place.

The Texas Prairie Lands Company, Limited, will default on its bond interest due December 1st. The bondholders have been called for October 22 to make a number of concessions in the trust deed. The company operates under a Canadian charter, but is held by British capital.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Walkerville, Ont.—A by-law to expend $26,000 for purchase of the street lighting system has received authorization.

Vernon, B.C.—A by-law under the local improvement plan to borrow $95,000 for sewers and under-drainage, will shortly be voted upon by the electors.

Regina, Sask.—Arrangements have been made by the city of Regina with the Bank of Montreal for a loan of $320,000, to be used for construction of improvements.

Bridgeburg, Ont.—Tenders are required for $2,500 5 per cent. ten instalment debentures. R. A. Land, clerk. (Official advertisement appears on another page.)

Alberta.—The following school districts have been authorized to borrow:—Lawndale, No. 3099, $1,600. O. M. Olson, Fairacres; Haycroft, No. 3103, $1,500. Geo. Evans, Bow Island.

Lambton County, Ont.—The Lambton county council at a special session has decided that it would spend $10,000 in helping in various ways for Britain to carry on her war against Germany.

Chatham, Ont.—By-laws providing for an expenditure of $90,000 for the installation of the hydro-electric system, and $2,000 for the purchase of a site for the Canadian Concrete Products Company, have been carried.

Enniskillen Township, Ont.—The auditor's report gives the following figures:—Cash on hand in bank, $7,823; collectors roll of 1913 uncollected, $47,881; uncollected taxes on county treasurer's books, $339; advances to drains, $3,256; advances to schools, $167.

Quebec, Que.—The revenue of the city for the six months ended October 1st, is estimated at $35,984 less than the corresponding period last year, by the city treasurer, when it should have been $20,000 in excess. On this total for the six months ended October 1st, $18,645 had to be collected for new sidewalks.

Toronto, Ont.—The civic works committee has been requested to recommend the city council to submit a by-law to the people at the next municipal elections for their consent to the issue of debentures to raise $1,734,465. The money is to be spent on water mains in North Toronto and other parts of the city, sewers and bridges and an asphalt plant for the works department.

Vancouver, B.C.—Stating that Vancouver had secured over a million dollars with which to tide the city over the next two or three months, Mayor Baxter explained that besides the $100,000 on hand from the taxes, it was expected to receive about $300,000 more before the last discount period has expired on December 1. $250,000 had been received from the Greater Vancouver Sewerage Board for work done and an overdraft of $750,000 had been allowed by the bank on the local improvement work closed up for which the bonds had not yet been sold.

Toronto, Ont.—The board of control at a recent meeting discussed the suggestion of Controller McCarthy that a friendly action be entered in the courts to ascertain whether the city or the hydro commission should bear the loss sustained by the untimely sale of the hydro debentures, which had been placed in the civic sinking fund. City Solicitor Johnston declined to express an opinion on the matter offhand, and intimated that the best plan would be to make an examination of the city minutes and other data before arriving at a decision.

Toronto, Ont.—Alderman Cameron's motion to authorize the city treasurer to issue short-term debentures, in amounts of from $10 and up, bearing interest at 5 per cent., redeemable in three years, brought a reassuring statement from Mayor Hocken. "There is no dearth of money. We have all we require," he said. "It will be many months, if at all, before the city feels the pinch. The plan proposed would be a good one if we were in need of the money, but when we have enough to carry out, or even to exceed the plans already laid down, I do not see that it is necessary to adopt this system."

Calgary, Alta.—The recommendation of Calgary's finance committee on a London offer to purchase debentures was:—"That the committee is in receipt of communication from the local manager of the Bank of Montreal, submitting offer from his London, England, branch to sell for the city some £50,000 of the city of Calgary's bonds at present in their hands, and in this connection the committee would recommend that the offer of the bank to sell the said £50,000 bonds on hand, carrying interest from the 1st of July, 1914, at 93 net to the city in London, be accepted, provided there is no deduction for commission or stamp duty, the proceeds of the sale to be paid to the city in London by October 15, 1914."

Victoria, B.C.—The city proposes to issue $350,000 treasury certificates. The issue may be made in notes of the denomination of $100, $500 and $1,000, to be offered at par, the proceeds to be utilized for the purpose of undertaking necessary works. The notes will be sold "over the counter." Among the bond issues now on hand, but unsold, is that for the city's loan for the new hospital, $225,000. Representations have been made to the city council to the effect that the provincial government is ready to advance $75,000 of the grant it agreed to make for the new institution and that, if the city can raise a similar amount, work on the erection of the buildings can be started. It is understood that $1,000,000 worth of treasury certificates which fell due recently have been renewed.

Newmarket, Ont.—A by-law to authorize an agreement made between the hydro-electric power commission of Ontario and the corporation of the town of Newmarket and other municipal corporations, for the construction, equipment and operation of an electric railway under "The Hydro-Electric Railway Act, 1914," will be voted upon October 19th. The total amount of debentures to be issued by the respective municipalities is $4,346,938, divided as follows:—Township of Scarborough, $565,714; township of Markham, $803,939; township of Whitchurch, $488,152. township of Pickering, $578,115; township of Uxbridge, $227,901; township of Whitby, $554,619; township of Reach, $235,722; village of Markham, $48,762; village of Stouffville, $75,281; village of Port Perry, $113,308; Newmarket, $266,986; Uxbridge, $204,665; Whitby, $183,774.

Hamilton, Ont.—The city's expenditure from January 1 to September 30 of the present year amounted to $1,290,657.48. With only a few exceptions, the expenditure was less than appropriation. The appropriation for the works department was $155,000, with expenditure of $267,000. This latter amount will no doubt be reduced when items charged to other departments have been paid for. The appropriation for printing and advertising was exceeded by nearly $2,000. The total expenditure of the civic investigation committee was $1,198. The east end fire station also shows expenditure considerably in excess of appropriation; $5,885 was appropriated, but the expenditure was slightly over $11,000, and the building is not yet ready for service. A balance of $135 from the appropriation for the repairs to high level bridge on hand at the time of the last financial statement was absorbed together with an additional $400. From the appropriation of $29,000 for charity, the sum of $25,000 has been expended, the demand for charity having been much greater than in former years.

Hamilton, Ont.—After much undesirable delay and discussion by board of control and council members for several weeks, Mr. W. T. Southam has withdrawn his offer to purchase $250,000 city debentures, in connection with work on the M'Kittrick survey. This is Mr. Southam's letter:—"In view of the impression endeavored to be created in certain sources that this company is trying to take advantage of the city because of the large amount of unemployment among the laboring people in the city, I have been instructed to withdraw my offer. In actual dollars and cents, what we proposed doing to relieve distress would have entailed a loss to this company of approximately $175,000, and we certainly thought that the city would at least pay a considerable portion of that loss. That loss is made up as follows:—Loss on debentures, at least 6 points, $15,000; interest at 4½ per cent. on $250,000 of debentures for probably five years before a reasonable development could take place, $56,250; past experience would show that this work could be done by the company at least 25 per cent. cheaper than the city, without taking into consideration any loss through employment of inexperienced relief labor, $62,500; the proposed subscription of $40,000 so that the new hotel could be commenced, $40,000; total, $173,750. We cannot afford to bear all this loss to relieve the distress in the city, much as we would like to do so."

Montreal, Que.—Montreal's expenditure from January 1 to September 26, totals nearly $22,000,000, as shown by a statement submitted by the city finance department to Controller Hebert. The statement deals with amounts voted from the loan, and special loan funds, which total $10,748,847.69. The revenue for the present year, totalling $13,500,000 has all been appropriated, though not yet all spent, about $1,500,000 remains in the city's coffers. The total expenditure from loan funds of $8,201,583.96 is as follows:—Expropriations, $3,921,055.15; municipal buildings, $34,038.66; paving, $1,177,866.69; permanent paving, $324,675.99; new macadam, $358,139.16; sewers, $1,006,688.51; miscellaneous, $307,089.65; water service, $579,178.67; pumps, etc., $67,589.84; police department, $54.81; fire department, $90,257.17; health department, $60.80; parks department, $28,545.86. Special loan credits voted during the period totalled $607,211.16, and were:—Underground conduits, administration, etc., $126,193.59; enlargement of the aqueduct and filtration plant, $422,458.62; lighting plant, $58,588.95. The loan funds credits totalling $1,873,840.02 are:—Expropriations, $672,514.77; municipal buildings, $74,503.71; paving, $368,157.12; permanent paving, $171,940.57; new macadam, $245,157; sewers, $225,021.55; water service, $67,434.20; pumps, etc., $13,443.89; police department, $21.26; fire department, $7,282.28; health department, $627.87; parks department, $27,736.30. Special loan credits voted for the month amounted to $102,212.55, were as follows:—Enlargement of the aqueduct and filtration plans, $82,358.21; lighting plant, $19,854.34.

Edmonton, Alta.—Mayor McNamara has received the following letter from Manager Kirkpatrick, of the Imperial Bank, relative to Edmonton's loan: "We have received advice by telegraph that the loan of $3,000,000, for which we were negotiating has been arranged for, and the entries in connection therewith will be made in the course of a few days when we receive confirmation by mail. I might say that the transaction will go through under date of the 28th of September. While there will not be sufficient surplus from proceeds of the loan to provide for new works, there will probably be $500,000 available to pay outstanding liabilities of the city of Edmonton. The treasury bills maturing in February amounting to one hundred and five thousand pounds sterling, which were sold at a 4¾ rate, need not be provided for at the present time, providing sufficient is retained from the taxes when collected to pay the bills at maturity. You are at liberty to advise the council that we have been successful in negotiating the loan, and I would like to know if it is the unanimous wish of the council that the $500,000 above referred to should be made use of to meet liabilities already incurred, which of course would include the necessary amounts to be paid to the sinking funds and to meet the coupons maturing between now and the end of the year as well as salaries and wages, and we would also like to have the assurance that the city would not authorize new expenditures, payment of which have not been provided for." The council has accepted the suggestions made as to the use of the half million dollars.

◆

INCREASED BONDS TO DEVELOP COMPANIES

During the last year the amount of bonds outstanding of the subsidiary companies of the Lake Superior Corporation, had been increased to develop the various properties, which helped to increase interest charges and brought that item up to $1,542,323, suggested Mr. T. Gibson, in reply to shareholders' questions at the annual meeting. The principal reason for the charges amounting to that figure, however, was that in previous years a certain portion of the interest had been charged to capital account against work in course of construction. An item of $62,428 written off as discount on securities sold was in connection with marketing the additional Algoma notes; the secretary stated that a charged-off item of $137,008 for "doubtful debts and losses of previous years," should have been charged off in the fiscal year ended June 30, 1913.

As a result of the operations of the subsidiaries last fiscal year, Secretary Gibson said the sum of $417,880 which the Lake Superior Corporation derived was considered by the directors to be the "utmost it was advisable to hand over to the corporation," as it left a balance of only $25,546 to be carried forward into the new year by the subsidiaries. The directors also considered it inadvisable to pay the interest last year on the $3,000,000 5 per cent. income bonds of the corporation.

IN SOUTHERN ALBERTA

International Irrigation Congress at Calgary—Canadian Pacific Railway Results

(Special Correspondence.)

Calgary, October 12th.

The first session of the International Irrigation Congress to be held outside the United States was called to order in Calgary by President Young, of the Board of Governors, and though for obvious reasons the attendance was smaller than expected when the congress was first mooted for Calgary, the proceedings were instructive and interesting. Among the Canadian speakers were the Hon. Duncan Marshall, Minister of Agriculture; Senator Lougheed, and J. S. Dennis, assistant to the president of the Canadian Pacific Railway and manager of that company's department of Natural Resources. There was also a magnificent exhibit from British Columbia and Alberta, and the Dominion Government's display of the agricultural production of field, garden and orchard. Calgary did the honors to the distinguished delegates with true western hospitality.

Water and How to Use it.

Water and how to use it was the keynote of the technical addresses. Farms and farmers, their relation to the distributing, manufacturing and financial world was, in greater or less degree, the text of those speakers who were not exclusively interested in the problem of artificially applying water to growing crops. California, Colorado, Montana, Washington, Oregon, Texas and Arizona were the principal irrigation States represented. His Honor Lieutenant-Governor Bulyea held an official reception, and the Canadian Pacific Railway Company gave the delegatess a trip to the big dam at Bassano and a view of a section of the company's irrigation works in the western half of the watered block.

In explaining to the Congress the methods of the Canadian Pacific Railway Company regarding colonization on its lands in western Canada, Mr. J. S. Dennis said: "Sometimes our efforts have not been a success, but as a whole the policy is successful. Perhaps we hoped for too much, but I have always believed in optimism—that is what has built western Canada. We are not in any sense prepared to admit that we are going to fail. We have fallen short of the number of people we hoped to get on the land, the number we hoped to keep on the land and the amount of returns we hoped to get, but in the end we think our policy will result in putting a considerable number on the land in western Canada and inducing them to make homes."

Prizes for Irrigated Produce.

It is a noteworthy fact that after so much has been said about the southern Alberta country this year on account of the dry season, that the Southern Alberta Land Company, operating in that district, should win the first prize for its display of field and garden produce grown under irrigation.

Unprecedented, too, was the climatic reception given the delegates who came to talk irrigation, and were met with a rain and soft snowfall measuring a net precipitation of almost two inches in two days of steady downpour. The land is now in fine condition for cultivation, and if the freeze-up does not occur before the average date, a greater area of stubble land will be put into shape for next year. At first the farmers did not respond to the call for special efforts in this direction, but it is believed now that the urging to get ready for a bigger year in 1915 is having the desired effect.

RAILROAD EARNINGS

The following are the railroad earnings for the first week of October:—

Canadian Pacific Railway.

	1914.	1913.	
Oct. 7	$2,273,000	$3,145,000	— $872,000

Grand Trunk Railway.

Oct. 7	1,008,265	1,088,759	— 80,494

Canadian Northern Railway.

Oct. 7	563,900	575,600	— 117,000

"ESTABELLE"

It is a welcome relief to have a book sent here for review such as "Estabelle and Other Verse," by John Stuart Thomson. This little volume contains a selection of attractive poems, which make a refreshing change after reading the war news day after day, digesting financial literature, and trying to do business as usual. The "Vale of Estabelle" is probably the best of the verses, but many of the other poems are excellent and all of them good

"Estabelle, and Other Verse," by John Stuart Thomson; published by the Methodist Book Room, Toronto; price 50 cents.

STANDARD RELIANCE BUYS SUN AND HASTINGS

The Standard Reliance Mortgage Corporation has purchased the assets of the Sun and Hastings Savings and Loan Company of Ontario. Both companies have been doing a large business, chiefly in farm mortgages. The paid-up capital of the Sun and Hastings is $573,989, and the assets are valued at $1,185,877. The Sun and Hastings holders will be paid with shares of equal amount in the Standard Reliance, at par in both cases. The dividend of the latter company is 7 per cent. and thus they will receive 1 per cent. higher than the Sun and Hastings disbursement of 6 per cent. Two of the directors of the company purchased will become members of the Standard Reliance directorate. The deal was concluded on Wednesday and the matter is being discussed with the government.

Mr. W. S. Dinnick has been the moving spirit in the consummation of the purchase. The total assets of the Standard Reliance Mortgage Corporation as a result of the absorption will be increased to $6,296,210 and its paid-up capital to $2,559,093. The combined reserve will be $620,000.

Mr. Dinnick, who is vice-president of the Standard Reliance, with Mr. Herbert Waddington, as managing director, speaking at a directors' meeting, pointed out that the good effects of higher prices for products felt by Canadian farmers were already clearing any clouds away from the farm mortgage business, and things were progressing so well that loan companies were being asked to finance greater acreage for next year's crops. They faced, however, some difficulties in securing this accommodation for the farmers, something that would most be felt by small companies. This experience may have been a turning factor in the conducting of negotiations.

The amalgamation should prove an important and strengthening factor in the Canadian loan and mortgage business.

MUTUALIZATION OF THE PRUDENTIAL

Mutualization of the Prudential Insurance Company of America was advanced another step toward final consummation the other day, when 77 per cent. of the outstanding capital stock was voted favorable to the plan at a special meeting of the stockholders on October 7. In all 30,889 shares were voted out of a total capitalization of 40,000 shares, every share being cast in approval of mutualization. The next step will be to secure similar ratification by the millions of policyholders of the big company, and another special meeting for this purpose will soon be called by President Forrest F. Dryden. In the meantime advertisements notifying the policyholders of the date of the meeting and of its purpose will be placed in the leading newspaper in the capitol city of every state in which the Prudential does business. It is believed this date will be around December 1.

Should the policyholders agree to mutualization, as it is believed they will, then the succeeding move will be to have the chief judicial officer of New Jersey, the chancellor, confirm the voting and place his final and concluding seal of approval on the plan. Inasmuch as he has already affirmed the appraisal of the stock it is thought he will continue his affirmation, providing he is convinced the terms of the act under which mutualization was made possible have been fully complied with.

Alberta will get $15,000,000 from its agricultural products this year, and a larger sum next year.

DOMINION TRUST COMPANY'S DIVIDEND

The amount at the credit of the Dominion Trust Company's profit and loss account for the eight months ended August 31st was approximately $185,158. Of this amount, two quarterly dividends of 2 per cent. each were paid, amounting to $88,900, leaving $96,258.22 available for distribution for the current quarter.

In view of the company's expanding business, necessitating advances to estates, and the generally unsettled financial conditions due to the European war, the directors have deemed it in the best interests of the shareholders to defer for the present the declaration of the present quarter's dividend.

"This decision," wrote Mr. W. R. Arnold, the managing director, to *The Monetary Times* a few days before his tragic death, "has largely been influenced by the special efforts being made to have a moratorium proclaimed in this province. Such legislation would undoubtedly work great hardship on those companies loaning funds on mortgage."

OGILVIE FLOUR MILLS COMPANY

The directorate of the Ogilvie Flour Mills Company, Limited, were able to tell the shareholders, at the recent annual meeting, that with the exception of August, when the war started, conditions in regard to the company were normal, sales in the domestic and export market being up to the average, notwithstanding increased competition. The report was for the year ended August 31st, 1914. There was a substantial margin over dividends and fixed charges as a result of the company's operations for the year. The balance sheet shows the following figures:—

Assets.—Cash on hand and at bank, $54,684; bills receivable, $68,584; open accounts receivable after making full provision for all contingencies, $1,549,829; stocks on hand of wheat, flour oatmeal, coarse grain, bags and barrels, $1,234,379; stables, plant, barges and office equipment, $49,470; investments, $197,050; total current assets, $3,153,998; real estate, water powers and mill plants in Montreal, Winnipeg, Fort William and Medicine Hat; elevators in Manitoba, Alberta and Saskatchewan; property in St. John, N.B., and Ottawa, as at August 31st, 1913, $5,891,407; added during year for additions to mill at Medicine Hat, warehouse at Calgary, interior elevators, etc., $236,202—$6,127,609; investments for officers' pension fund, $25,591; goodwill, $1; total assets, $9,307,200.

Liabilities.—Bank of Montreal, $863,885; accounts payable, $823,367; provision for bond interest and dividends to date, $120,250; total current liabilities, $1,807,503; officers' pension fund, $67,231; first mortgage bonds, $2,350,000; capital account (preferred stock), $2,000,000; capital account (common stock), $2,500,000; profit and loss account, amount at credit, August 31st, 1913, $472,522; net profits for year, $581,943—$1,054,466. Less—Interest on $1,750,000 A and B bonds, $105,000; interest on $600,000 C bonds (9 months), $27,000; dividends on $2,000,000 preferred stock, $140,000; and dividends on $2,500,000 common stock, $200,000; a total of $472,000, leaving $582,466; total liabilities, $9,307,200. Indirect liabilities—Customers' paper under discount, $584,242.

The company's flour mill and elevators at Medicine Hat have been in successful operation during the year, and are proving to be a wise investment both as regards profits and for the protection of the company's western and Pacific business.

The issue of $600,000 6 per cent. first mortgage bonds was made during the year and the proceeds used towards the cost of the Medicine Hat flour mill and elevator.

The report is a gratifying one. The company amply earned its dividends and sufficient remained to carry forward a large sum to surplus. The outlook for the coming year's business is good.

ABITIBI PAPER MILL READY SOON

The 220-ton paper mill of the Abitibi Pulp and Paper Company at Iroquois Falls, New Ontario, will be completed next month. The company's pulp mill is shipping 160 tons of pulp daily to paper-makers in the United States and Canada.

NEW INCORPORATIONS

Natural Resources and Industries Are Attracting Capital—Large Stock Yards Company

Canada's new companies incorporated this week number 55. The head offices of these companies are located in nine provinces. The total capitalization amounts to $8,159,400. The largest company is:—

Edmonton Stock Yards, Limited, Toronto $1,500,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	1	$ 175,000
Alberta	7	2,685,000
Saskatchewan	9	916,000
Manitoba	3	195,000
Ontario	19	3,380,000
Quebec	12	584,400
Prince Edward Island	2	129,000
New Brunswick	1	45,000
Nova Scotia	1	50,000
	55	$8,159,400

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Moose Jaw, Sask.—Andersons, Limited, $20,000.

Kinley, Sask.—The Clare Farms, Limited, $25,000.

Prince Albert, Sask.—Big Beaver Mining Company, Limited, $600,000.

Bechard, Sask.—Farmers' Independent Grain Company, Limited, $20,000.

Vancouver, B.C.—Orford Bay Timber and Logging Company, Limited, $175,000.

Ottawa, Ont.—Calorigene of Ottawa, Limited, $50,000. B. Boutet, A. Belanger, E. Boutet.

Welland, Ont.—H. S. Peters, Limited, $50,000. H. S. Peters, A. M. McFall, A. Bermingham.

Niagara Falls, Ont.—F. H. Leslie, Limited, $40,000. F. H. Leslie, R. M. Gay, E. M. Kennedy.

Restigouche, N.B.—Campbellton Development, Limited, $45,000. G. St. Onge, P. M. Shannon, P. Lambert.

Guelph, Ont.—The Royal City Match Company, Limited, $100,000. A. W. Briggs, A. Beaumont, H. E. Grosch.

Lewiston, N.S.—Lewis Hardwood Company, Limited, $50,000. G. E. M. Lewis, F. I. Lewis, B. J. Lewis.

Windsor, Ont.—Germeric Mining Company, Limited, $65,000. J. P. Delphey, F. E. Hemenway, E. H. Jewett.

Pembroke, Ont.—The Beachburg Milling Company, Limited, $40,000. W. D. Dewar, A. Gould, M. B. Somerville.

Quebec, Que.—J. H. Larochelle and Fils, Limited, $150,500. J. H. Larochelle, M. E. Hermenegilde, J. E. Hermenegilde.

Maisonneuve, Que.—Jas. W. Jamieson and Company, Limited, $49,000. J. W. Jamieson, J. H. Johnston, C. McDougall.

Sudbury, Ont.—Upper Wanapitei River Improvement Company, Limited, $40,000. W. McVittie, W. C. Cochrane, A. H. Skene.

Peterborough, Ont.—The Peterborough Fuel and Transfer Company, Limited, $40,000. S. T. Wedlock, M. Leveque, J. D. Cameron, A. Barbeau.

Saskatoon, Sask.—The International Light Novelty and Specialty Company, Limited, $20,000. The Phœnix Publishing Company, Limited, $100,000.

Sainte Martine, Que.—The Chateauguay Electric and Manufacturing Company, Limited, $145,000. U. Archambault, J. A. Fournier, J. T. R. Gazelle.

Regina, Sask.—The Landed Estate Corporation, Limited, $10,000. Big Six Mining Company, Limited, $21,000. Big Seven Mining Company, Limited, $100,000.

Edmonton, Alta.—The Naidenac Oil and Gas Company, Limited, $1,000,000. The Grant Brook Marble Company, Limited, $50,000. Peace River Co-operative Company, Limited, $200,000.

Calgary, Alta.—Richmond Oil and Gas Company, Limited, $1,000,000. Industrial Motion Picture Company (Canada), Limited, $10,000. Westminster Apartments, Limited, $125,000. Arrowhead Oil Company, Limited, $300,000.

Prince Edward Island. Hazel Grove Black and Silver Fox Company, Limited, $30,000. J. E. Bagnall, A. B. Bagnall, H. Lepthorne. Confederation Silver Black Fox Company, Limited, $99,000. W. F. Williams, J. J. Gillis, F. P. Arsenault.

Winnipeg, Man.—H. L. MacKinnon Company, Limited, $60,000. H. L. MacKinnon, L. I. MacKinnon, J. Leckie. Patch Land Company, Limited, $125,000. B. C. Parker, W. R. Cottingham, G. H. Parker. United Agencies, Limited, $10,000. R. R. Wilson, J. D. Burnham, H. Detchon.

Montreal, Que.—Montreal and Lake Shore Land Company, Limited, $50,000. L. W. Halliday, A. H. Elder, M. Lewis. Dominion Elbow Company, Limited, $20,000. R. T. Heneker, W. S. Johnson, G. A. Coughlan. Bradly, F. Brown, L. Sinclair. Provincial Novelty Company, Limited, $40,000. J. A. Donovan, D.

LAKE OF THE WOODS MILLING COMPANY

Annual Statement shows Company in strong Financial Position.

The statement of profit and loss presented at the annual meeting of the Lake of the Woods Milling Co., held October 7th, 1914, for the year ending August 31st, 1914, was as follows:—

Profits for the year		$507,939
Interest on Bonds	$ 54,000	
Interest Keewatin Flour Mill Bonds	45,000	
Preferred Dividends	105,000	
Common Dividends	168,000	
Written off Property and Good-will	100,000	
		$472,000
Surplus for year		$ 35,939
Surplus, August 31st, 1913		853,135
Surplus, August 31st, 1914		$889,074

For the year ending August 31st, 1913 the profits amounted to $549,677. This was an excess of $41,738 as compared with the profits of the year just closed. The charges for interest and dividends are precisely the same as those for the previous year, save that a year ago a bonus of 2% on the common stock was paid. This amounted to $42,000. No bonus was paid during the past year. On the other hand, however, the company wrote off property and good-will accounts the sum of $100,000 and deducted this from earnings before showing surplus, whereas a year ago a similar write-off was deducted after showing surplus. The net result is that the amount actually deducted from the profits during the past year was $42,000 less than in 1913, this being the amount of bonus on the common stock paid in 1913.

In the statement of assets and liabilities capitalization continues the same as a year ago. Accounts and bills payable amount to $359,724, being a decrease of $153,767 as compared with a year ago.

On the other hand, accounts receivable and bills receivable amount to $740,383 in the year just closed, being an increase of $209,592. The improvement in this respect will be seen when it is remarked that in both years the amounts set down for accounts receivable allowed for all bad and doubtful debts. The company improved its position in this, that inventories amounted to $659,110, this being $359,045 less than a year ago. These inventories included, wheat, flour, bags, barrels, mill supplies and diminution was quite possibly due to the heavy shipments made because of the war. In the matter of cash, the position is considerably improved, the amount on hand at the end of August being $48,943, an increase of $35,818 as compared with a year ago.

The only other marked feature was the addition of $50,000 of stock in the assets, this stock being that of the Medicine Hat Milling Co., Ltd., which was acquired by the company during the past year. The capacity of this plant has recently been doubled and has now restarted.

The officers and directors were elected as follows:—President: Frank S. Meighen; Vice-presidents: Wm. W. Hutchison, Tancrede Bienvenu, R. M. Ballantyne, Abner Kingman, Geo. V. Hastings, Hon. Robert Mackay, J. K. L. Ross, John Carson; F. E. Bray, Secretary; R. Neilson, Ass't Secretary, and T. F. McNally, Treasurer.

McArthur, P. R. Ritchie. Vacuum Freezers, Limited, $50,000. C. M. Preston, W. H. Harding, H. J. Clarke. Carson and Williams Brothers, Limited, $100,000. J. A. Milne, W. H. Ford, W. W. Dunlop.

Application is being made for letters patent for the following companies:—

Darnley, P.E.I.—Colonial Silver Black Foxes, Limited, $300,000. J. S. Cousins, H. T. McLeod, C. E. McNutt.

Albert Mines, N.B.—The Albert Mines Fur Farm Company, Limited, $49,000. J. A. Livingston, B. Vannatter, I. C. Steeves.

Charlottetown, P.E.I.—The Lampson Silver Cross Fox Company, Limited, $42,000. M. Henderson, D. C. McKay, J. S. Wedlock.

◆

THINKS MORATORIUM IS UNNECESSARY

Having had considerable opportunity during the past few weeks of studying the question of a moratorium, Mr. J. D. Macdonald, manager of the British Columbia Permanent Loan Company, Vancouver, has come to the conclusion that it is neither necessary nor desirable. "I consider the situation will be better met by giving to our Judges discretionary power which would enable them to go carefully into each individual case," he writes *The Monetary Times*. "There can be no doubt, I think, but that a general or even partial moratorium would be abused by speculators whose operations do not merit such protection. On the other hand, I should like very much indeed to see the homes of the people protected.

"It may interest you to know that this company is assisting its borrowers by suspending principal and paying taxes and insurance where necessary.

The Canadian Car and Foundry Company has received an order for six passenger coaches for the Intercolonial Railway.

TRADING RESUMED ON TORONTO STOCK EXCHANGE

Trading in certain stocks on a limited basis was resumed on the Toronto Stock Exchange on Thursday. The official statement issued by the stock exchange authorities was as follows:—

"At a meeting of the Toronto Stock Exchange it was decided that trading through the committee in a limited number of securities at minimum prices should be permitted on and after Thursday, subject to the rules and restrictions passed by the managing committee.

"Buying orders must be for cash, and selling orders can only be filled by members covering securities now carried on their books, with the object of strengthening accounts not sufficiently margined.

"Until further notice, only securities common to this market and the New York market will be admitted to trading, at the minimum prices prevailing in New York."

The stock in which trading will be allowed are as follows: Canadian Pacific Railway, Twin City, Mackay common, Mackay preferred, Duluth Superior, Duluth, S.S. and A. common, Duluth, S.S. and A. preferred, Detroit United, and Minn., St. Paul, S.S.M. common.

The following mining stocks may also be traded in, but the above restrictions do not apply: Coniagas, Crown Reserve, Hollinger, La Rose, Nipissing, and Trethewey.

◆

EQUITY FIRE HOLDERS TO ANSWER CALL

At a meeting of the shareholders of the Equity Fire Insurance Company last week it was decided to make a call of 30 per cent. on the shareholders. Those in control of the company state that there are assets which may be realized in full at a later date, but which would have to be sacrificed if sold now. Ultimately the shareholders may get back about half the call now being made on the capital stock. The meeting was a very stormy one and lasted nearly five hours.

The dividend cutting knife must be blunted by now.

THE OGILVIE FLOUR MILLS COMPANY, LIMITED

Thirteenth Annual Report of the Directors of the Ogilvie Flour Mills Company, Limited, for the Year Ended 31st August, 1914.

The Annual General Meeting of the Shareholders of the Ogilvie Flour Mills Company, Limited, was held at the head office of the Company in Montreal on 8th October, 1914, Mr. C. R. Hosmer, President, in the chair.

Among those present were: Mr. C. R. Hosmer, Mr. W. A. Black, Sir Montagu Allan, C.V.O., Mr. H. S. Holt, Mr. A. M. Nanton, Mr. W. R. Baker, Mr. Shirley Ogilvie, Mr. C. R. Black, Mr. George E. Drummond, Mr. W. H. Evans, Mr. Charles Chaput, Mr. G. M. Heath, Mr. W. P. Fogarty, Mr. S. A. McMurtry, Treasurer; Mr. G. A. Morris, Secretary.

The President submitted the following report and moved its adoption:—

A Balance Sheet showing the Assets and Liabilities of the Company, also profits for the year, is submitted.

The Company's accounts have been audited by Messrs. Creak, Cushing and Hodgson, Chartered Accountants, whose report is presented herewith.

The issue of $600,000 six per cent. First Mortgage Bonds, which were known as Series "C," the proceeds of which were used towards the cost of the Medicine Hat flour mill and elevators, were disposed of during the current year.

The Company's flour mill and elevators at Medicine Hat have been in successful operation during the year, and are proving to be a wise investment, both as regards profits and for the protection of the Company's Western and Pacific business.

The Company's four mills, elevators and other properties are in first class condition. Most liberal expenditures are constantly being made to keep them up to the most modern standard of efficiency.

The usual dividends have been paid during the year on the Preferred and Common Stock.

All of which is respectfully submitted.

(Signed), CHAS. R. HOSMER,
President.

October 8th, 1914.

Mr. W. A. Black, Vice-President and Managing Director, in speaking to the report, said:—

If we except the month of August, when the War started, conditions have been normal, sales in the domestic and export markets being quite up to the average, notwithstanding increased competition, and you will note a substantial margin over dividends and fixed charges has resulted.

During the year all our plants have been carefully gone over, and the cost of all renewals and upkeep has been written off as usual against earnings.

Whilst the harvest in our North West has not resulted in as large a crop as the preceding year, the quality in the main is satisfactory, and the total monetary return should equal, if not exceed, that of last year. Some considerable area suffered very severely from drought and heat, but the Dominion Government has taken the matter in hand, and are furnishing Feed where necessary to enable those requiring assistance to prepare the land this Fall and seed for Spring sowing. It is to be hoped that the farmers will make the most of the present opportunity to put under seed the greatest possible area, for owing to the War the demand for grains of all kinds will be very great from this side of the Atlantic, and prices are likely to remain on a high level for at least another crop year. Our recent advices from the West indicate that this policy is being carried out by our farmers, and favorable weather has prevailed for Fall ploughing.

The following gentlemen were elected Directors of the Company for the ensuing year:—

Sir Montagu Allan, C.V.O., Mr. W. A. Black, Mr. Charles Chaput, Mr. George E. Drummond, Mr. C. B. Gordon, Mr. H. S. Holt, Mr C. R. Hosmer, Mr. A. M. Nanton, Mr. Shirley Ogilvie.

And Messrs. Creak, Cushing and Hodgson were appointed Auditors.

At a subsequent meeting of Directors the following officers were appointed:—

Mr C. R. Hosmer, President; Mr. W. A. Black, Vice-President and Managing Director, Mr. S. A. McMurtry, Treasurer; Mr. G. Alfred Morris, Secretary, Mr. J. R. W. Papineau, Assistant-Secretary.

BALANCE STATEMENT, 31st AUGUST, 1914.

The citizen is asked to do his share, to subscribe to half a dozen war funds, to pay war taxes, to meet the increased cost of living. Let the employer help him do it by keeping up wages.

HOW TO GET CHINA'S TRADE

Author and Traveller Tells Readers of The Monetary Times of the Far East Market and Its Possibilities

BY J. STUART THOMSON.

An unexpected opportunity is offered to Canadian manufacturers and exporters to take the place of Germany in the shipping, banking and exports of the populous Far East, where the market is 400,000,000 people and the natural resources in labor [illegible] in the world. Germany, after [illegible] has secured a place only second to Great Britain. [illegible] she will now probably lose by her war [illegible].

The Panama Canal [illegible] the China ports north of Hong Kong [illegible] the eastern part of the American continent. If Canada and the United States do not create and hold that trade, the Panama Canal will be largely an economic failure and waste.

The following points of economic [illegible] action and attitude, suggest themselves for the guidance of manufacturers and exporters, as applying to the China trade, to begin with.

(1) Send illustrated catalogues and illustrated literature for distribution to Chinese compradores by Canadian trade commissioners and British consuls located in China and Japan.

(2) British trade with the Far East has been successful because it has broken bulk as little as possible. The Manchester canal shows the expense which the British shippers have undertaken so as to reach inland factories.

Spy out the Land.

(3) Members of the boards of trade should visit China, to learn the local conditions, interviewing missionaries, compradores, manufacturers' agents, consuls, trade commissioners, native dealers, etc.; not to inform the Chinese what Canada wants, but to inform the Canadian producer what China wants.

(4) Chinese are best reached by illustrated advertising. The native artist on the staff of a Chinese newspaper should prepare the drawing, or the cartoon for the billboard, the lines of which, from our criterion of taste, are of course peculiar.

(5) Never change the picture or trade mark, and do not introduce new brands. Keep everlastingly at the old brands. The Chinese are to be taken pictorially as children. When they get used to a brand, or "chop" as they call it, they ask for none other. "Equally as good" is an adage most repulsive to their sense of judgment, and their well known sense of loyalty. Always use a picture at the head of the advertising matter.

(6) Keep emergency stocks if possible for the Far East trade at Manila in the hands of Canadian agents.

(7) Never employ German, French or Japanese manufacturers' agents in the Far East, as naturally they do not press Canadian goods. Employ Canadian or British agents. British consuls can inform of responsible Canadians there, or in some cases they may recommend Chinese houses. If good Canadian agents are unobtainable, then take British in preference to other Europeans or Japanese.

(8) Two classes of introductory goods may be sent out. First, a cheap and plain article for the Chinese, and second, a more fancy-looking but not too expensive grade for the European trade in the China ports. Remember that the climate is a perpetual [illegible] in [illegible] the ports, and colors, etc., should be [illegible]. Metal goods [illegible] japanned to withstand [illegible].

Credit, Travel and Finance.

(9) Be patient and content to sow bread upon the waters in the hope that it will return after a [illegible] number of days. It would be logical to expect it to return abundantly, as the potential market is 400,000,000 people in China alone, and the Chinese natural wealth is [illegible].

(10) It takes time for the [illegible] agent in the China port to collect from the Chinese traders and compradores, who travel [illegible] be patient regarding credit. China as yet only operates 6,000 miles of railway, or [illegible] of Canada's railway mileage. This is the traffic and trade [illegible] that Canadian traders have to deal with and modernize. Moreover, Chinese fi[illegible] three [illegible] Rocky [illegible] Pacific should go [illegible] Canadian Pacific and other lines out of Vancouver and other Pacific ports and the [illegible] out of [illegible] Canadian ports.

(12) Use [illegible] the British or United States banking [illegible] with Canadian chartered banks.

(13) British India and Malaya are defenders of the Imperial [illegible].

(14) [illegible] Bible, law, language and literature, [illegible] flag, [illegible] personal and [illegible] representation in the new [illegible] republic Orient. With all our sentiment, and all our ideals, [illegible] practical people, it [illegible] to hope to carry [illegible] the [illegible], the trader, the financier and the [illegible] are [illegible] in action.

(15) If Canada needs assistance, the motherland, Great Britain, has an assured influence in the Far East.

◆

COMPANIES INCREASING CAPITAL

The following company with a Dominion charter has increased its capital stock: Boston and Yarmouth Steamship Company, Limited, from $350,000 to $500,000.

The following companies in Ontario have increased their capital stock: The Dominion Mausoleum Company, Limited, from $40,000 to $1,000,000. The Galt Brass Manufacturing Company, Limited, from $40,000 to $1[illegible].

The following company in Manitoba has increased its capital stock: Waldon Company, Limited, from $[illegible] to $250,000.

◆

FARM MORTGAGE BANKERS

The Farm Mortgage Bankers' Association of America, organized early this year by substantial farm mortgage dealers from eighteen of the agricultural states, will hold its first convention shortly. Those who organized the institution think that the farm mortgage business is of sufficient magnitude and importance to demand co-operative association, and add: "Membership in a carefully organized and well-managed central association of qualified farm mortgage dealers should establish a prestige and dignity which would prove no mean asset in the conduct of a farm mortgage business. Our organization should thoroughly represent the farm mortgage banking business of the country, and to be thoroughly representative we must be able to present a strong membership alignment of the reputable farm mortgage dealers of the country.

The headquarters of the association are at 518 Merchants' Loan and Trust Building, Chicago. The officers are as follow: President, F. W. Thompson, the Merchants' Loan and Trust Company, Chicago; first vice-president, Kingman N. Robins, Associated Mortgage Investors, Rochester, N.Y.; second vice-president, O. M. Corwin, Wells and Dickey Company, Minneapolis, Minn.; third vice-president, J. F. Maxwell, Maxwell Investment Company, Kansas City, Mo.; secretary-treasurer, H. M. Hanson, Chicago, Ill.

The association has also the following board of governors: A. Y. Allen, Commonwealth Trust Company, Memphis, Tenn.; P. W. Bonfoey, Bonfoey Loan and Investment Company, Oklahoma City, Okla.; H. W. Johnson, Johnson Brothers Land Company, Sioux City, Iowa; M. M. Sessions, Sessions Loan and Trust Company, Marietta, Ga.; Conner Malott, Spokane and Eastern Trust Company, Spokane, Wash.; Levering Moore, Mortgage Securities Company, New Orleans, La.; George L. Ramsey, the Banking Corporation of Montana, Helena, Mont.; W. L. Williamson, Williamson Mortgage Company, Lisbon, North Dakota; S. H. Warren, Warren Mortgage Company, Emporia, Kansas; J. W. Wheeler, Capital Trust Company, St. Paul, Minn.; Edwin Chamberlain, San Antonio Loan and Trust Company, San Antonio, Texas.

◆

We don't help the enemy by giving [illegible] and need not help them by buying [illegible] products.

It is German army business to destroy cathedrals; it is our business to buy Canadian-made goods.

LONDON PRICES OF CANADIANS

Stock Exchange is Dealing in Trustee Securities—Latest Record

The London stock exchange partially resumed business last month. The dealing is in trustee securities, and the stock exchange committee issued the following instructions in connection with the resumption of this trading:—

"That owing to the exceptional circumstances now prevailing, no member shall do a bargain or negotiate a purchase or sale whether between members or non-members in British, Indian, and Colonial Government securities, County, Corporation, Public Boards, Provincial (British, Indian, and Colonial), Colonial and Provincial Guaranteed, and any 'Trustee' securities at a less price than the lower of the prices quoted in the subjoined list, a copy of which can be obtained at the secretary's office.

"That a dealer who has sold securities shall satisfy brokers' limits or orders before selling such securities off his own book or undoing his bargain with a fellow-dealer.

"That all bargains in securities for which prices have been fixed shall be for cash and no time bargains or options shall be allowed."

The following are the prices which ruled in London at the closing of the exchange, for Canadian securities:—

BRITISH SHOULD BUILD FACTORIES HERE

Regarding the campaign in Great Britain to obtain German trade in Canada, Mr. Reid, the agent general for Ontario in London, has issued the following statement in the Old Country:—

There has always been a preference for British goods in Ontario, and if German merchants have secured a solid position in the markets it is principally due to their enterprise in taking pains to study the particular requirements of those markets. Ontario is the leading manufacturing province of the Dominion, and is responsible for practically half of the manufacturing trade of Canada, yet the province is a big importer, the imports and exports during the fiscal year ended 31st March, 1913, being as follows: Imports, $301,651,328; exports, $1[illegible]. Practically every article manufactured in Canada is manufactured in Ontario. Continual development of the manufacturing industry is due in no small part to the hydro-electric system, brought into force by the present Government under the chairmanship of Sir Adam Beck, and the availability of cheap power has acted as a tremendous stimulus to all kinds of industrial activity. The goods principally imported from Germany are clocks, clock cases, hosiery, laces, drugs and chemicals, fancy goods, cutlery, iron and steel tyres, manufactures of zinc, wrapping paper, shawls, underclothing and cloth fabrics. There is plenty of room in Ontario for the manufacture of clocks, hosiery, laces, cutlery, drugs and chemicals. British manufacturers should bear in mind that the manufacturers of the United States have, during recent years, been making strenuous efforts to capture the Canadian trade. No less than 230 branches of United States industrial concerns were located in Canada last year. The British manufacturer should remember that though there is a decided preference for British-made goods, there is a still greater preference for British goods made in Canada, and it is undoubtedly a point to be taken into careful consideration that in the long run the best plan is to start a branch factory in the province.

◆

One way to help stop the [illegible] is to buy Canadian-made goods.

Lloyd George says Germany is the road hog of Europe. Do business with the Canadian [illegible] and the British [illegible].

German [illegible] paper." When you write the [illegible] use paper made in Canadian mills.

An English schoolboy [illegible] included the following in [illegible]: "We have eight airships and 250 aeroplanes [illegible]. We have the [illegible] got enough."

PRIVATE INQUIRIES FOR STOCKS

Investors Should Wait for Stock Exchange Re-opening—Canadian Pacific is Much Sought

Nobody knows what the future of the stock market will be. With the support that London, New York, Montreal and Toronto will have when the stock exchanges re-open, prices should not slide below those of the panic days. There is no panic now; there is a wholesome confidence in the British cause, in British arms and British finance. This will be reflected in the stock market. Those who are sacrificing stocks, by private sale, therefore, are unwise. We have some respect for the Toronto lady who informed an advertiser in an evening paper—one looking for Canadian Pacific Railway stock bargains—that she would sell him 25 shares for 175, an offer refused. She would have followed a better policy by waiting for the stock exchanges to re-open.

Should be Discouraged.

Canadian Pacific stock has been one of the most sought in such private inquiries, which should be discouraged. Brazilian, Mackay and Twin City are others for which bargain hunters have been looking.

Here is a novel advertisement from the financial page of a Toronto daily:—

"Don't Sell Canadian Pacific Now

"Will loan you $100 on Canadian Pacific, with privilege of repurchase within six months at $125. Will loan on other N. Y. listed stocks in same proportion. Answer in detail Box ...."

Opinion of C.P.R.

A reader of the Wall Street Journal, asked for an opinion on Canadian Pacific as an investment at 157½, as to the effect the war is likely to have on it, and as to whether the dividend is likely to be reduced. The reply was:—

Considering the vast recuperative powers exhibited by Canadian Pacific in the past and the fact that its resources are still far from limited, Canadian Pacific common stock at about the figure mentioned ought to be a good investment purchase. A return of conditions to normal, following the cessation of hostilities in Europe is pretty certain to be accompanied by a return of the stock to the market position it held early in the current year. Financially, and geographically, the company seems to be in a substantially better position to cope with a long period of adversity than many of the roads operating below the border. It is not likely that Canadian Pacific's dividend will be reduced from the present 10 per cent. rate. At least, there are no indications that the possibility of having to cut the dividend, should present conditions be protracted for three or four months more, has been seriously considered: for, in well-informed circles it is believed that as long as Canadian Pacific continues work on its projected programme of extensions and improvements, it may be accepted that the margin for dividends on the common stock is not in danger.

Earnings Affected by War.

The company's planned extension work is reported not to have been stopped to any noticeable degree in consequence of the war. It is not possible to estimate at this time what effect the war will have on the earnings of the company. For the period beginning July 1 and ending September 21 gross revenues amounted to $27,197,972, which, compared with corresponding preceding period, shows a loss of $[illegible]. How much of this loss since the first week of August is ascribable to the war, cannot be determined. Canadian Pacific's gross earnings have shown a rather steady decline for the greater part of the 191[illegible] fiscal year, due to a country-wide trade depression. That the earnings have been [illegible] affected by the war would seem to be certain, [illegible] export freight of the Dominion [illegible] to have fallen off about 25 per cent. and that its imports have shrunk about [illegible] per cent.

◆

The [illegible] keep her husband on the [illegible] by buying goods made in Canada.

[illegible] the percentage of [illegible] stuff will be more [illegible] in future.

PRACTICAL GUIDES TO TRADE OPPORTUNITIES

Pitprops Wanted Urgently in Great Britain—Openings in Australia

The demand for pitprops in Great Britain is daily becoming more urgent, and the scarcity is a serious hindrance to the continuity of employment in all the coal-mining centres of Great Britain, reports Canadian trade commissioner J. E. Ray, at Birmingham. Canadian firms able to supply these should address the department of trade, Ottawa, at once.

Enquiries have been received by Canadian trade commissioner Dane, at Glasgow, regarding goods which could be secured from Canada to take the place of those formerly obtained from sources of supply now cut off. The opportunity is presented to Canadian manufacturers to supply at least a proportion of these goods, and thereby open up the way for a large and increased business. Amongst the articles enquired for the following list may be of interest to Canadians:—

Gimlet-pointed coach screws; iron screws (flat); iron screws (round heads); brass screws (flat heads); brass screws (round heads); cut tacks; bolts and nuts (cup, square, square); bolts and nuts (square, round, square); spout bolts and nuts; crucible cast steel files (flat, half-round, round, square); mill saw (one or two square edges); horse rasps; wood files and rasps; air guns; augers; axes, bits, braces; brackets; carpet sweepers; sash cord; chisels; choppers; clippers; clothes pegs; manure forks; potato forks; hack saws; hammers; handles (hammer); hatchets; lawn mowers; padlock hasps and staples; pliers; scissors; saws; stones (hones and slips); tin openers; vises; wrenches.

Opportunity for Canadian Manufacturers.

At a time when Europe is involved in war, reports Canadian trade commissioner D. H. Ross, at Melbourne, and Australian trade must necessarily be diverted from European sources of supply, Canadian manufacturers are urged to make every possible effort to enlarge the volume of their exports by taking a more active and intelligent interest in oversea trade while the disturbed situation continues in countries which, until quite recently, exported large quantities of goods (as outlined in subsequent schedules) to the Commonwealth.

The advantages to be derived from this transfer of trade into new channels has already been recognized by the Australian representatives of manufacturers in neutral countries, and orders are not only being diligently sought for, but are also being obtained in considerable volume.

How far Canada will benefit by the present dislocation will depend upon the enterprise of her manufacturers, the shipping facilities available, and last but not least, the practical co-operation of banking institutions in meeting the altered conditions of exchange.

In any case, the disposition will be strengthened to trade within the Empire and, therefore, exporters may see the wisdom of not attempting to secure inordinate profits while the crisis lasts, but rather to effect oversea commercial connections which will last far beyond the termination of the war.

Better Banking Facilities Required.

While the position may have materially improved before these comments appear in print, the successful exploitation of Canadian trade with Australia suffers a serious drawback in the fact that shippers have (by cable) insisted that all orders must be accompanied by a bank letter of credit. This means the cessation of business on heavy hardware lines upon the usual c.i.f., etc., basis and, in the case of ordinary goods drawing drafts upon Australian wholesale importers of recognized financial standing at 30 or 60 days' sight. There would be no occasion to take exception to the drastic terms submitted by Canadian exporters, were all Australian orders placed in North America subject to the same shipping basis. After making careful inquiries, it is found that the Australian representatives of New York exporters have in no way altered their selling terms, and are continuing their quotations (without a credit being demanded) on a c.i.f., etc., basis for heavy hardware, and for general merchandise drafts are being drawn, as heretofore, at 30 or 60 days' sight as may be arranged.

The cause of this alteration in Canadian terms can be attributed to (1) fluctuating freight rates and (2) the curtailment by Canadian banks of the usual banking facilities extended to shipping houses. Admitting that caution is now necessary in developing overseas trade, it is an anomaly that United States manufacturers are to-day placed in a much better position to secure Australian business than are their Canadian competitors. Regular importers of Canadian goods are at a loss to understand why their usual trading facilities have been withdrawn, and especially so when there has been no alteration at all in the terms of payment for importations from the United States.

◆

TO OWNERS OF IRON ORE

A request was recently made to the Dominion government for the granting of some measure of assistance toward the development of iron ore mining in Canada. In accordance with the statement of Hon. W. T. White, minister of finance, in his budget speech during the 1913-14 session of Parliament, that the iron mining industry would be investigated, a committee has been appointed to enquire into the situation and to report the facts to the government.

Every owner or operator of an iron ore property in Canada should be interested in facilitating this enquiry, and should communicate with the deputy minister of mines at Ottawa, or the secretary of the committee, who will furnish a schedule of questions covering the information required by the committee.

The committee is as follows: Messrs. O. E. Leroy, G. C. Mackenzie, E. Lindeman, and J. McLeish, secretary.

◆

LIFE MEN HAVE A PAPER

As the official organ of the Life Underwriters' Association of Canada, the first issue of The Life Underwriters' News was published last week. It is a twelve-page pamphlet, containing much of interest to the field men of the Dominion. Says the editorial announcement: "The desire of the Association to have an independent journal of their own has now found expression in this first issue of The Life Underwriters' News. At the present time, the intention is simply to launch this official publication without announcing any form of policy which it may pursue, beyond what is expressed in the Constitution of the Association, namely, that the Association is formed 'for the purpose of advancing the best interests of true life insurance throughout the country.' The conduct of the paper is at present in the hands of the Executive Committee, and at its next meeting arrangements will be made for its permanent management and editing. In the meantime, however, it may be positively stated that the News has come to stay, and its financial backing is sufficient to ensure its success. We are confident that it will meet with the approval and support of every Association member, and the life insurance agents throughout Canada will undoubtedly welcome the advent of a journal of their own."

The Monetary Times wishes the new venture every success, coupled with the hope that it may keep free of the pitfalls and troubles which running a journal usually bring. *The Monetary Times* will be glad further to assist the aims of the Association and its organ.

◆

Don't wave the Union Jack and buy German-made socks.

Canadian buyers must boycott German and Austrian factories.

It's a long way to Tipperary, but no further than to German factories, where millions of our dollars have gone in the past.

Let Canadians, as Britishers, be Canadian and British from the lace collar to the stud, from the necktie to the coat, from the socks to the shoes.

Another offering of £15,000,000 British treasury bills is being made in London. A ready acceptance of the issue is expected. It will again be in six and twelve months' bills, and will be the fourth instalment of the British government's temporary war financing, the previous instalments in each case having been for a like amount, £15,000,000. The third instalment, brought out three weeks ago, was over-subscribed more than three times. Subscriptions for the six months' bills totalled £24,561,000, and for the twelve months' bills £22,487,000, the average rate at which the former was placed being 2 15-16 and for the latter 3 13-32 per cent.

SECURING FARMERS AS POLICYHOLDERS

Character Analysis of Prospects—Need for Insurance

If your territory is already organized, if your local agent has already been selected for you, then this part would become easy, but we will take it for granted that you are coming to town as a total stranger. The first thing to do would be to find a man who is well and favorably known to the farmers. If you can get the banker to go with you, so much the better; if not, go to the local physician, tell him that you are going to spend some time in his community and will make him some money if he can find you the right sort of man to introduce you to the farmers.

Great care should be exercised in the selection of this man, as this is the most important part of all, suggests E. A. Grotenfend, in the Excelsior Banner.

The farmer is of a suspicious nature; as soon as he sees a stranger drive into his yard, he becomes suspicious, and makes up his mind "here comes some one who is going to try to get the best of me." It is up to you to overcome this suspicion, and therefore you must select a man to go with you in whom the farmer has absolute confidence.

Before starting out with my local agent, I put him through a course of instructions. Do not allow your agent to say:—"Mr. Smith, this is Mr. Jones, who wants to talk to you a little about life insurance." That would spoil it all. In fact, do not allow him to mention your business in his introduction. Let him simply say, "Mr. Smith, I want you to meet a friend of mine, Mr. Jones, from Saskatoon."

How is Family Housed, etc.

Now is the time to make use of character analysis. You must form a rapid opinion of the prospect's character before you talk life insurance to him. You must make up your mind whether your prospect loves himself only or whether he also loves his family. When you come to a place with a beautiful large barn, and a dirty shanty for the family to live in, then don't waste your time talking life insurance; that man does not care for his family. It would be much easier to sell that man a registered bull or a good horse.

The most common objection, however, is:—"I have to consult my wife." Don't let him get by with that. Tell him that you will go right with him to his wife and talk the matter over. If he consents, of course you write him.

Present Time is Acceptable.

If he says that his wife is not at home, I tell him that it is not fair to leave that decision to his wife. I tell him that women are of a self sacrificing nature and never would tell him to buy that insurance for her protection, no matter how badly she would want it. Tell him, "It is not fair for you to go to your wife and ask her, 'Shall I do my duty?' The buying of life insurance is a token of your love and duty toward your family, and should be done without first asking permission to do so."

A common excuse to get rid of the agent is to say, "Yes, I think I ought to have some insurance and I like your company and your proposition. I am busy just now, but the first time I come to town I am going to your local agent at the bank, and take out a couple of thousand."

I simply tell him that I know that he really intends to do so, but life insurance is never bought over the counter, and as soon as I am gone he will forget all about my proposition, as his head is full of other things, and that as long as he admits that my proposition is a good one, we will fix it up right now, and I at once fill in the application.

◆

Keep business on an even keel.

See that the goods you buy have a close acquaintance with the maple leaf.

Germany has done little for Canada except to sell stuff which we should have bought in Canada.

A moratorium postpones the payment of debts. We can pay our German debt by buying only Canadian and British goods.

If you think Canadian prices and values are not right, discuss it with the manufacturer. He wants to do business with you and you should with him.

MONETARY TIMES
1915 ANNUAL 1915

¶ We are now receiving orders for advertising space in the Monetary Times Annual.

¶ All advertisements will be on right hand pages opposite reading.

¶ Orders for copies already received indicate that the circulation of the 1915 Annual will be larger than previous issues.

¶ Editorially, too, it will excel all previous issues.

¶ An excellent advertising medium, reaching as it does thousands of people potentially interested in the investment and manufacturing possibilities of Canada.

Particulars as to rates, positions available, &c., gladly given to those interested.

LIFE UNDERWRITERS WROTE A BILLION

Results of Companies' Operations in Canada—Some Changes in List of Companies

The business of life insurance was transacted in Canada by 45 active companies, of which 27 are Canadian, seven British, one Colonial and ten American. This list differs from that of the previous year by the addition of one Canadian company, the Alberta-Saskatchewan Life Insurance Company and the retirement of one Canadian company, the Union Life Assurance Company, whose business was taken over by the Metropolitan Life Insurance Company of New York. The Home Life Association of Canada has since the end of the year retired from business, and its policy contracts have been reinsured by the Sun Life Assurance Company of Canada.

U.S. Companies Increased Total.

The total amount of policies in Canada taken during the year 1913 was $231,608,546, which is greater than the amount taken in 1912 by $12,403,443, according to the complete returns of the superintendent of insurance. The Canadian companies show a decrease in 1913 of $9,774,014, whilst in 1912 they had an increase of $31,190,143; the British companies have a decrease of $369,257, whilst in 1912 they had an increase of $1,728,120; and the United States companies have an increase of $22,546,714, whilst in 1912 they had an increase of $9,419,861, the total increase in 1913 being $12,403,443, as above stated.

The respective amounts effected are:—

Canadian companies	$131,403,582
British and colonial companies	6,950,695
United States companies	93,164,269

So that the amount taken by the Canadian companies exceeds that taken by the British, colonial and United States companies together by over $31,000,000. The amount taken by the United States companies includes the business of the Union Life taken over by the Metropolitan Life.

Nearly Hundred Million Increase.

The total amount of insurance in force in Canada at the date of the statements was $1,168,590,027, which shows the large increase of $98,281,358 over that of the previous year, being distributed as follows:—

	Amount in force.	Increase.
Canadian companies	$ 750,637,902	$43,981,785
British and colonial companies .	58,176,795	3,639,070
United States companies	359,775,330	50,660,503
Totals	$1,168,590,027	$98,281,358

CONNECT LIVE WIRES WITH OPPORTUNITY

This Was Suggestion Conveyed by Sir G. E. Foster in a Recent Business Sermon

Canada holds a position on the safest of the world's trade routes, and is within the shortest distance of her ultimate export markets of any country in the world. The North Atlantic trade route to Europe is the safest and shortest on the high seas at the present time.

"How are we going to make these new trade connections? That is the question to decide," said Sir George E. Foster, minister of trade and commerce, addressing the Toronto board of trade. After thinking over that problem and investigating it, the Canadian business man must seek the lines of least resistance. These were close to his own door, within ear-shot of the sound of his own factories. "Instead of sending representatives to South America, Australia or Japan, Canadian manufacturers first should capture their own field." He told of the too great proportions of stocks in Canada bearing the manufacturing marks of other countries, and made a strong plea to the producers and consumers in Canada to come closer to each other.

Let us make Canadian fashions. If you have a preference for some imported style from Paris or Germany, eliminate it, advised Sir George.

Trade Within the Empire.

The next line of least resistance in trade was in the British Empire market. "Cultivate the British Empire market. There is a preferential entrance into all the overseas Dominions, excepting Australia, and $35,000,000 worth of German exports to the British overseas Dominions outside of Canada have been cut off since war was declared. Canada should be able to take from one-half to three-quarters of that trade under the present preferential arrangements." Sir George then advised a close study of conditions in South America before attempting to get new business in that section.

Keep Wheels Moving.

The people of Canada should exercise their native-born courage, to organize for commercial conquests, to co-operate in the fields of labor, capital and production, to show business patriotism in purchasing wherever and whenever possible Canadian-made goods, to stop waste and extravagance of all kinds, and to boost production. "In the impetus towards construction during recent years, we have gone a little too far in depending upon building activity and perhaps forgotten that within the temple the gods must live. All we have to do now is to keep the wheels going." Sir George invited the banks "to co-operate and go as far as possible in retaining and maintaining every well-based, decent industry in the country, from farming up."

◆

ROAD BUILDING IN SASKATCHEWAN

Good progress is being made on road construction in Saskatchewan, according to an announcement made by F. J. Robinson, chairman of the Highway Commission in Regina. He stated that more than 1,500 men and 1,000 teams were now at work on road construction. It is expected that the number of men employed on this class of work will be greatly increased within the course of another week. Of a total sum of $1,200,000, voted by the Saskatchewan government for highways improvements, $1,002,685.84 was spent on the roads during the year ended April 30, 1914, according to the annual report of the Saskatchewan Highways Commission tabled in the house a few days ago. Of this sum $507,517.02 was spent on road improvement direct and $417,065.69 was spent by municipalities under commission regulations. For steel bridges and concrete abutments there was a vote of $300,000, the total sum spent on this class of construction being $337,483.18.

◆

The British government has prohibited the exportation of wool entirely for the time being.

Buy a barrel of made-in-Canada apples from the farmer, who will stick to the Canada brand when he does his own buying.

THE DOMINION BANK

Sir Edmund B. Osler, M.P., President. W. D. Matthews, Vice-President

C. A. BOGERT, Gen. Manager.

Trust Funds Should be Deposited

in a Savings Account in The Dominion Bank. Such funds are safely protected, and earn interest at highest current rates.

When payments are made, particulars of each transaction may be noted on the cheque issued, which in turn becomes a receipt or voucher when cancelled by the bank.

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

CALGARY'S MUNICIPAL ACCOUNTING

Improvements Noted and Suggestions Made by Civic Auditors

Calgary's civic auditors report that they [illegible] matters in nearly every department in much better condition than was the case last year. Messrs. Macintosh and Hyde, who act in this capacity, state:—

"The cash on hand in the treasury department and the various bank accounts were certified as at June 30, and found to be correct.

"The expenditures have been thoroughly vouched, and we find that vouchers are now kept in much better order, and we have been able to get satisfactory explanation of all entries.

"Items of sundry revenue have been checked in detail, and we have satisfied ourselves that the moneys so received have been satisfactorily accounted for to the city treasurer. These include market and pound, license department, building and wiring permits, police court fines, health department receipts, and cemetery receipts. The latter have been verified with the exception of nine relatively small items, which we have reason to think are in order, and remain to be finally verified at our next visit.

"We have attended at the office of the stockyards company, and have checked over with them the sums which have been paid over by the stockyards company to the city, and we are satisfied that the amounts handed over to the city were in accordance with the requirements of the contract between the city and the stockyards.

"The new accounts payable register which is now being kept in the office of the comptroller, has not been kept as we desire, and we have, in consequence, been obliged to spend a fair amount of time in straightening out the balancing of the ledger accounts connected therewith. This has probably arisen from an insufficient understanding of what was required.

Debenture Interest Coupons.

"For some time past we have been far from satisfied as to the city's position regarding the records concerning debenture interest and the coupons by which this interest is paid. Attention has been given to this subject, and new accounts have been opened which will show what the city's liability for debenture interest is, and will distinguish between the interest which is payable at the Bank of Montreal and at The Molsons Bank.

"The number of coupons which are now paid half-yearly is great, and steps will need to be taken by the city treasury department for the handling of these. We have discussed the points involved in detail with the city treasurer, and we understand him to be in agreement with the new method proposed.

"In the future it will be possible to detect the presence of improper debenture coupons immediately they are received by the treasury department. In connection with this matter a debenture interest coupon register has been designed which will record every coupon paid, and will also contain valuable information which will give the life history and all circumstances attending each individual bond of the city and its utilities.

New Registers to be Designed.

"In addition to the ordinary audit work, we are at present engaged on an examination into the city's methods of handling all contracts, and we are about to design a real estate register and a rental register, which are intended to give important and necessary information without the lengthy inquiries which are at present necessary.

"The audits of the accounts of all the city's utilities are also completed to June 30 last.

"The new registers for electric light and waterworks collections in the office of the city treasurer have been written up in their new form during the current year, and they now furnish for the first time in their history reliable means for arriving at the correct total of revenue which is collectable for these two departments.

"We have recently made a special examination of the accounts at the office of the street railway department, and have to report that we found matters in a very satisfactory condition."

HOW INSURANCE COMPANIES SPEND INCOME

Sources of Life Underwriting Returns—What the Policyholder Received

Canadian companies received an income of $49,994,701, drawn from the following sources:—

Premiums and annuity sales	$37,538,853
Interest and dividends	12,219,117
Sundry	237,932
Total	$49,995,902

And they expended $27,721,218 under the following items:

Paid to policyholders and annuitants	$16,601,436
General expenses (including investment expenses)	10,120,678
Taxes	418,559
Dividends to stockholders	583,683
Total	$27,724,356

Hence out of every $100 of income they have expended in payment to policyholders, $33.21; in general expenses, $20.24; in taxes, 84 cents; and in dividends to stockholders, $1.17, leaving $44.54 to be carried to reserve.

Assets of Canadian Life Companies.

The total assets at December 31, 1913, of the Canadian life companies other than assessment and fraternal companies (including $10,823,860, outstanding and deferred premiums, and interest and rents due and accrued which have not yet gone into income) amount to $233,244,495, an increase over the corresponding amount at the end of the year 1912 of $21,611,620.

The amount of risks in force has increased during the year from $881,797,353 to $945,358,906, a gain of $63,561,553, and the reserves have increased from $179,244,051 in 1912 to $196,776,439 in 1913, an increase of $17,532,388.

Paid to Policyholders.

The total amount paid to policyholders during 1913, according to the return of Canada's superintendent of insurance, including the business done outside of Canada by the Canadian companies, and the Canadian business of the British, Colonial and United States companies, was as follows:

Death claims (including bonus additions)	$10,978,183
Matured endowments (including bonus additions)	4,898,145
Annuitants	1,036,977
Paid for surrendered policies	4,955,033
Dividends to policyholders	3,418,844
Total	$25,287,203

◆

INCREASE IN TORONTO ASSESSMENT

Sir Henry Pellatt's appeals against the assessments on his property were all withdrawn at the Revision Court, Toronto. The figures, as they stand now and a year before, are as follows:—

	1913.	1914.
Land on which castle stands, fixed assessment	$ 14,400	$140,060
Castle	100,000	100,000
Gardens and nurseries, Walmer Road, fixed assessment	7,600	69,030
Wells Hill avenue lot, fixed assessment	100	330
Walmer Road, Nos. 332, 334, 336, and eight lots, fixed assessment on land	4,800	44,370
Buildings	28,300	44,000
Totals	$155,200	$307,790

◆

INVESTMENT vs. SPECULATION

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums

TRADE CONTRACTION AND CANADIAN PACIFIC RAILWAY

Sir Thomas Shaughnessy Sees Incoming Settlers and Increased Production After War is Concluded

Monetary Times Office,
Montreal, October 14th.

At the annual meeting of the Canadian Pacific Railway, Sir Thomas Shaughnessy was in the chair and all the directors were present, with three exceptions, Hon. James Dunsmuir, Sir Sandford Fleming and Sir Thomas Skinner, Bart. Seated at the table with the president were vice-presidents McNicoll and Ogden, Secretary Baker, and Mr. E. W. Beatty, general counsel.

Sir Thomas Shaughnessy said that the contraction in the volume of trade and travel during the last half of the fiscal year under review had had a pronounced effect on the revenue of every branch of the service. He would not attempt to forecast the business situation in the immediate future, because the outbreak of the European war had created a condition of affairs unique in the history of the company. When the peace of the world had been assured, emigration from Europe to the newer countries would doubtless be on a large scale and Canada would profit substantially by the incoming of new settlers.

No New Large Expenditures.

No new expenditure of consequence would be required for some time to come. The only big Canadian Pacific Railway works now on hand are the tunnel in the Selkirk Mountains, the passenger and freight terminals at Quebec that are to be used jointly by the Canadian Pacific Railway and National Transcontinental Railway and the station at North Toronto.

The crops recently harvested in western Canada, although probably 15 to 20 per cent. less in volume than they were a year ago, owing to an insufficient rainfall in some sections, will yield the producers a larger gross return because of the high prices that prevail in the markets, and the purchasing power of the producers will be improved accordingly.

Conditions Cannot be Estimated.

This should have the effect of stimulating west-bound traffic, with a favorable influence on your earnings, but to what extent this influence may be counteracted by the unsatisfactory business conditions that prevail generally, cannot be estimated with any degree of accuracy at this time, suggested Sir Thomas.

After making feeling reference to the loss of life in the Empress of Ireland disaster, Sir Thomas made the statement that the monetary loss was not a matter of any special moment.

◆

CANADA WILL HAVE FIRST CALL

Cables received in London from Canada show the impression is abroad in Canada that the British naval and military authorities are placing extensive orders in America for requirements. Enquiries by the Canadian Associated Press show this impression unwarranted. The High Commissioner has had interviews with colonial secretary Harcourt and others on the subject, and finds the authorities most anxious that supplies from Canada should be utilized to the fullest extent. The mistaken impression is perhaps due to the fact that certain sub-contractors are fulfilling obligations with American assistance, but even of this there is no direct evidence.

◆

We may doubt the Kaiser's sanity, but he will doubt ours if we do not patronize our own factories.

A proposal that the British and Canadian governments should co-operate in buying grain direct from the farmers at the base price of $1 per bushel for wheat and 35 cents per bushel for oats is set forth in a memorial presented to the trade and commerce department, Ottawa, by Fred Green, secretary of the Saskatchewan Grain Growers. The grain would be delivered to the interior storage elevators of the government.

ONTARIO'S POLICY UNDER MR. HEARST

Hon. W. H. Hearst, Ontario's new premier, has issued a public statement dealing with the problems confronting the government. He says that the aim of the government will be to carry out the splendid conditions bequeathed by the late premier, and to maintain unsullied and unimpeached the high standard of clean, honest administration of public affairs bequeathed by him. The government will not hesitate to break new ground when the needs of the province demand. The policy of hydro-electric development "carried to such a triumphant success with unexampled energy, zeal and devotion by Sir Adam Beck" will be carried on with unabated vigor.

An active campaign for the greater production of foodstuffs will be pressed, and the development of New Ontario will proceed with added zeal and energy. Education is to receive the same careful attention as in the past.

Regarding the finances and resources of the province, the statement says:—

"Stock is now being taken of the value of our natural resources, particularly of timber, from which a very substantial proportion of our revenue has been derived in the past, and it is expected at an early date we will have as complete information as possible with regard to the natural resources of the province, so that we may be the better able to determine the value of these resources from a revenue producing standpoint for the future, and the best means of conserving and dealing with them so as to secure the most beneficial results for ourselves as well as those who come after us."

The statement concludes with the assurance that the Motherland will be aided in the present crisis and the government's best efforts will be directed to stimulate trade.

◆

TALKING IN LONDON OF PROVINCIAL MORATORIA

There is much discussion in London's financial circles regarding the meagrely reported legislation, the Manitoba land mortgage moratorium, which some Canadian messages anticipate Ontario and other provinces may imitate, says a Windermere cable.

Some authorities say that unless the greatest care is taken Canadian credit may sustain irreparable damage with ordinary investors, who only judge by effects.

Some bank managers decline to discuss the situation. Mr. F. W. Ashe, Union Bank manager, said he assumed the moratorium only referred to city and town property, for western farmers will assuredly benefit by the war, owing to the enhanced prices for foodstuffs.

Mr. W. M. Botsford, Royal Bank manager, said the moratorium apparently was made to protect the small investor householder. It was impossible to help it being abused by land speculators. He did not think the effect would be damaging to Canadian credit in existing circumstances.

Mr. A. Paterson, of Palmer and Davies, who do a large business in Manitoba, said many English clients depended on the interest on mortgages for a livelihood. The Manitoba government made a mistake if it really means to establish a moratorium in the payment of mortgage interest. Any legislation of this sort made it increasingly difficult to obtain English money for mortgage investment. Why not arrange for deferring the payment of principal without interfering with the payment of interest. The Manitoba legislature cannot wish to make the war an excuse for the extension of payments which the present position of Canadian land speculators would easily explain.

On the other hand, a leading Canadian insurance manager here denies the Manitoba legislation will have a harmful effect. He says the moratorium will not hurt any legitimate lender. It will indeed save Manitoba from possible trouble if many mortgages were foreclosed. This naturally will be to the advantage of British holders generally.

◆

The Nova Scotia Underwear Company at Eureka, are in receipt of an order that will keep their mill running night and day for a long term, and which will materially help business in that community. The order is for heavy underwear for the military forces and will run into a large sum of money.

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

"Business as Usual"

SOME REASONS FOR CONFIDENCE

War Orders Are Numerous—General Position is Strong

"From London, in which market we have obtained many hundreds of millions sterling, comes the intimation that what is most needed in Canada just now is confidence. We can well afford," said *The Monetary Times*, in an interview with The Toronto News, "to accept that counsel from our chief money lender. Those who have the strongest possible faith in Canada, its energy, resources, possibilities, development and its future, two years ago, surely cannot write down that faith as a bad debt now on account of the war. There is a mental attitude of depression in Canada due to the fact that the British Empire is fighting for its existence. No citizen of the Empire, however, has any doubt as to the ultimate result. As the weeks pass we will have to make up our minds to accept the war as a part of the inconvenient inevitable, and to put it in its proper place in the common round and daily task.

Due for Depression.

"We were due, and had entered, a trade depression anyway, before the war came. This was the result of the highly speculative times a few years back, the end of an extraordinarily active period of construction, and the beginning of the transition period from the constructive to the productive era. An analysis of the facts tends to show that in many spheres the situation is better as a result of the war than it would have been without the war. This is seen in the distribution of large orders by the Canadian and Imperial governments to firms in Canada for all kinds of commodities and products. These include wheat, hay, saddles, harness, woolen and textile goods, such as shirts, sweaters, towels and socks for the troops; boots, shrapnel shell, rifles, wagons, automobiles and the gifts of the Federal and provincial governments to the Motherland, which include flour, horses, oats, coal and canned salmon.

Record Crops Next Year.

"Such orders stimulate trade and circulate money. While they constitute abnormal business, they will help to carry the country through the winter on towards the next crop season. If the farmers are benefiting from all the counsel given them as to growing more wheat and producing more generally (and they are doing so), there should be record crops next year—weather permitting—with excellent prices ruling for them.

"The stock and bond business is hard hit by present conditions, but there is surely a future for that business, immediately after the close of the war, if not before. During the past two years, enormous funds have accumulated in the money markets and there were signs that these were about to be invested to some extent just before the war broke out. This tendency was checked and the funds are still accumulating. Artillery is destroying much capital, but British investors, even after having financed the war and helped with many national war loans, besides their own, should have a fairly good surplus for everyday investments of a sound character.

General Position is Strong.

"We may try hard to figure how the pessimist figures, but in face of the numerous favorable facts it is impossible to be pessimistic with any good reason.

"The general position in Canada is sound. Our country is not being ravaged by contending armies. Business is proceeding as usual in many lines, and is better than usual in other lines. Naturally, we are suffering in some directions, but a part of the burden must be borne by Canada. It is doubtful whether there is a business or financial man in Canada to-day who would swap his citizenship and his business address for a citizenship and an address in any other country in the world."

"The highest form of patriotism in Canada is being expressed by people who are trying to keep every dollar working full time to keep every worker working full time."

BUSINESS IMPROVING AT ST. JOHN

Business at St. John is returning to its normal condition. The lumber and textile industries are improving. Many trade enquiries are being received from Great Britain to supply lines of manufactures that were formerly procured in Germany and Austria. Hardware manufacturers are reaching out after this new business.

It is probable that the urgent demand for pit props that is coming from British collieries will be largely supplied through the port of St. John. The trade and commerce department at Ottawa has asked lumbermen to send them quotations on this class of material.

The British bull dog takes its medicine when he has to, but no one hears much about it.

POINTS ON ECONOMIES

May I, as one of the great business community, make a few suggestions to them—unnecessary, I hope, but nevertheless, salutary, writes a correspondent of the London Daily Mirror.

Don't inaugurate your economies by discharging your employees or reducing their salaries until absolutely compelled. If you cannot actively serve your country, remember the next highest form of patriotism is to save distress to your fellow countrymen, and the pocket test is one of the severest.

Don't bewail the loss of profits. Be grateful if you make no losses, and if you make losses be thankful that they are puny in comparison to those of our Allies.

The Monetary Times Annual for 1915—to be published next January—will be the best record of the most eventful year in business and finance.

REDCLIFF BOOT FACTORY BUSY

The Redcliff, Alberta, shoe factory has orders for $40,000 worth of goods for spring delivery, and the travellers are still sending in orders. Besides these the smaller repeat orders are weekly growing.

If Colonel Sam Hughes can afford to put doggerel in his address to the troops, you can afford to put ginger into your business.

WOOL AND TEXTILE PLANTS

Another impetus to the business of Canadian woolen and textile manufacturers is likely to be given shortly by the placing of important orders for winter clothing for the troops, by the British and French governments. Prices have been quoted by Canadian mills for considerable quantities of blankets, underwear, knitted goods, etc.

You may not be able to do business as usual, but trying to do it, gets something accomplished and helps the general situation.

CANADA IN BEST POSITION

"Of all the countries in the world to-day Canada is in the best position to face the effects of this world conflict."—Sir George Foster.

If Kitchener and Jellicoe were as faint-hearted as some business men, Canada would now be preparing to receive German cavalry.

TWENTY PER CENT. MORE WHEAT

The Ontario department of agriculture after inquiry has ascertained that the fall wheat crop in Ontario will be 20 per cent. heavier this year than last. The total acreage sown in 1913 was 646,533, yielding a crop of 15,945,771 bushels. The acreage was smaller last year by 113,000 acres than in the year previous and this year 123,000 acres at least will be added to the acreages of a year ago. An effort will be made to have the acreage of spring wheat greatly increased in the spring from what it was during the present year.

British Columbia

Contains 252,800,000 acres of rich farm and fruit lands, timber, mineral and coal lands, which railroads now building will open up to settlers and investors.

We specialize on British Columbia Investments, and can tell you about opportunities to GET IN AT THE BEGINNING in town lots, townsite subdivisions or farm, timber, mineral, coal lands and water powers, wholesale or retail.

GRANT LEGITIMATE FIRE INSURANCE ONLY

Thus Will the Incendiary, the Commission Seeker and Much Fire Waste Be Eliminated

Thousands of dollars have been expended by the states in running down the incendiary, and in the endeavor to improve conditions and induce the erection of fire resistive buildings, and many more thousands have been expended in the purchase of motor equipped and improved fire-fighting apparatus, for increase in the number of fire companies and men, special high-pressure water mains and pumping stations, for the establishment of fire zones, all with a view to reducing the fire waste. Yet it continues to increase to an alarming extent, said Mr. J. L. Baldwin, state fire marshal of Pennsylvania. Governors of states have issued proclamations calling for clean-up days and weeks. Fire protective and fire preventive associations abound throughout the country, lecturing and addressing literature to the public, endeavoring to arouse civic pride among the residents of communities, all pounding on the subject of prevention and protection against fire.

Compels Application Form.

This does not affect the rates of insurance premiums. They continue to increase and will probably continue to do so until the states enact laws compelling a form of application to be filed when application is made for insurance and establishing a National Bureau of Record where the name and description of all persons who have had suspicious fires can be recorded and from there sent to all companies doing business in the various states. The method of application is in vogue in Europe, and you are all probably familiar with this, and also with the difference in the per capita loss in the old country with that in the United States. Does it not speak for itself? Does it not explain why the companies of Europe come to this country engaging all sorts of agents, taking all kinds of risks, which they positively could not assume under their own country's laws?

If you will but stop and think, you will readily agree with me that in localities where the rates of insurance are prohibitive, the fire loss is exceedingly small and an incendiary fire rare. To bear this out, the annual report of the chief engineer of Atlantic City, N.J., states that the property valuation is $90,?00,000 and the total fire loss for the past year $15,848. Of this loss fire insurance companies paid $10,159, leaving a net loss to the city of $5,478. The value of the buildings involved in the fires amounted to $2,842,850, and contents $1,185,060. In this case the majority of the buildings are of wooden construction and the rate is so high as to be almost absolutely prohibitive, showing conclusively that the obtaining of insurance is not a prevention of fire.

Certified Applications.

We must concede that fire insurance is necessary to the conduct of business, it being the basis of commercial credit and security back of all bonds and mortgages. This being so, it should be so surrounded by such safeguards as to absolutely prohibit its use for other than legitimate purposes, and prevent it from being the means of livelihood of the incendiary, who bands himself with others for the sole purpose of carrying on his nefarious trade, he not only defrauding the insurance companies, but taking from every policyholder through increased premium rates necessary to pay for these illegitimate losses.

I believe and advocate the reducing of incendiarism and fire waste, which also means the reduction of premium rates; that there be enacted in every state laws making it obligatory upon insurance companies to require applications to be certified by agents as to the value of property, character and standing of applicant, and that all agents, brokers and adjusters be licensed. Such laws should be of such restrictive nature as to positively prohibit the obtaining of insurance for the sole purpose of obtaining commissions and the position of adjuster should be made of such a public character that both the insured and the company would receive fair and honest treatment. Severe penalties should be provided for failure of either agent, broker or adjuster to comply with the law, and the insurance commissioner or the state fire marshal should be empowered to cancel policies in suspicious cases, or where the insurance is above the actual value of property insured. He should also be empowered to revoke licenses of dishonest agents, brokers or adjusters;

McGILL HAS ACCOUNTING COURSE

A special course of lectures on higher accountancy is being given in the Arts Building, McGill University, Montreal.

Some of the subjects to be included in the lectures will be:—

Amalgamations, mergers, flotations, financing, reconstructions and reorganizations, holding companies, subsidiary companies, treasury stock, bonus stock, over capitalization, watered stock, promotions, underwriting, working capital, net worth, cost accounting, unit cost, operation cost, department cost, general organization, accounting organization, system, control returns and statements, comparative statistics, consolidated balance sheets, consolidated profit and loss accounts, understanding a balance sheet, capital stock issues, premiums on stock issued, bond issues, sinking funds, bond premiums or discounts, capital expenditures, replacements, renewals, depreciation, general reserves, secret reserves, contingent reserves, other reserves, revaluations of capital or fixed assets, difference between book and revaluation figures, going values, manufacturing accounts, financial company accounts, syndicate accounts, consignment accounts, merchants' accounts, municipal accounts, public utility accounts, suspense accounts, deferred charges, accruals and apportionments, terminology, goodwill, inventorying, credits, etc.

The lecturer is Mr. David S. Kerr, C.A., member Association of Accountants in Montreal, member Dominion Association of Chartered Accountants, member Institute of Accountants and Actuaries in Glasgow (Scot.), Fellow American Association of Public Accountants.

◆

LONDON MUTUAL LITIGATION

Policyholders in the London Mutual Insurance Company, a Canadian company, and the London and Midland, an English company, are involved in litigation at Toronto, as to the respective interests of policyholders and shareholders in the $250,000 surplus of the London Mutual.

Mr. W. N. Tilley, for the policyholders, alleges that the shareholders are trying to crowd his clients out, and he is applying to Mr. Justice Kelly for an injunction. Examinations comprising a couple of thousand questions are filed in connection with the application.

Mr. A. C. McMaster, for the London and Midland, denies that his company has any sinister intent upon the assets of the other company. Mr. W. H. Hunter appears for the Canadian company.

In February, 1912, the Midland and Textile Insurance Company, Limited, of London, England, acquired the issued share capital of the London Mutual Fire Insurance Company of Canada. The London Mutual was first incorporated as a purely mutual under the old act of the province of Canada. In 1878 this old company went to Parliament and obtained a new act of incorporation changing its name, leaving the company still purely mutual. In 1899 the company secured an amendment to this act authorizing the creation of a stock capital not exceeding $500,000, of which the company offered for subscription, $100,000, which was taken up and now stands at 17½ per cent. paid in. The original authorization provided that each shareholder should be a member of the company having one vote for each $100 of stock; the status of the remaining members—namely, the mutual policyholders, was not disturbed. Thereafter the members consisted of mutual policyholders and the shareholders. The company was still to be governed by a board of nine directors, one-third retiring annually. The old qualification for director was retained—namely, that the director must be a member holding a mutual policy, but a new requirement was introduced—namely, that six of these directors should possess the additional qualification of being a shareholder. In 1901 there was a further amendment striking out the requirement that no shareholder could hold more than 30 shares.

LAKE OF THE WOODS COMPANY

Profits for the Year—Accounts Show Improvements—Medicine Hat Milling Company is Busy

That attention has been paid by the executives of the Lake of the Woods Milling Company towards the conservation of the company's finances, is evident from its annual statement. The company's profits for the year, while lower than in the year previous, are above those shown for 1912, and have only been surpassed three times in the last nine or ten years.

The net profits for the year amounted to $507,939, a decrease of $41,738 compared with the previous year, but $50,929 higher than the year of 1912. From the net profits has been deducted interest on bonds, $54,000, interest on Keewatin Flour Mill bonds $45,000, preferred dividend $105,000, common dividend $168,000, written off property and goodwill $100,000, leaving a surplus for the year of $35,939. Adding to this the surplus at the end of August 31st, 1913, the total surplus of that date of this year amounts to $889,[illegible]74.

Increase in Accounts Receivable.

The company paid the regular 8 per cent. dividend on the common stock this year, but did not allow the 2 per cent. bonus allowed the year before.

A feature of the general statement of assets and liabilities is the decrease in bills payable and the increase in bills and accounts receivable. The accounts payable amounted to $[illegible],724, a decrease of $153,767 as compared with the previous year, while the accounts receivable reached the total of $[illegible],40[illegible],383, an increase of $209,592. In both years the amounts set down for accounts receivable allowed for all bad and doubtful debts.

Medicine Hat Milling Stock.

The statement shows an addition of $50,000 of stock in the assets, which represents the acquirement, during the year, of a holding in the Medicine Hat Milling Company, the capacity of which plant has been doubled with the mill now running at full capacity.

The statement also shows an improvement in cash on hand, this amounting to $48,[illegible], an increase of $35,818, as compared with a year ago.

The officers and directors of the company were re-elected, the list reading as follows:—Messrs. F. S. Meighen, president; W. H Hutchison, vice-president; Tancrede Bienvenu, R. M. Ballantyne, A. Kingman, G. V. Hastings, Hon. Robert Mackay, J. K. L. Ross, John Carson, F. E. Bray, secretary; R. Neilson, assistant secretary; and T. F. McNally, treasurer.

◆

GRAND TRUNK IS WATCHING EVENTS

Monetary Times Office,
Montreal, October 14th

Mr. E. J. Chamberlin, president of the Grand Trunk and Grand Trunk Pacific Railways, has returned after a tour of inspection of the companies' lines. His trip extended as far as Prince Rupert, the terminal of the Grand Trunk Pacific in British Columbia.

"I found," says Mr. Chamberlin, "conditions in the west satisfactory. While the crop generally will fall considerably below that of 1913, yet the quality is fairly good and the increased prices will do much to help in the shortage of yield. People are optimistic and preparing for a large acreage next season. The crop has been harvested at least three weeks earlier than usual, so that a large amount of fall ploughing has been done and this will benefit the crop of 1915. Under favorable conditions the 1915 crop will be in excess of anything they have ever had in the northwest, as the acreage will probably be increased about 25 per cent."

According to vice-president Howard G. Kelley, the Grand Trunk is only waiting for the money market to improve in order that it may undertake many extensions and betterments over the system. A number of new stations throughout Quebec and Ontario are contemplated and the question of a new station and terminals at Montreal, together with the elevation of the tracks will be taken up as soon as conditions are favorable.

PERSONAL NOTES

Sir Thomas Shaughnessy was 61 on October 6th.

Mr. A. W. Hilborn has been appointed secretary-treasurer of the North Dumfries and South Waterloo Fire Insurance Company.

Mr. R. H. Court, London manager of the Dominion Trust Company, is a sergeant in the Yorkshire Hussars, and is with his regiment at Rillington. The regiment will go abroad shortly.

Mr. F. G. Osler, president of the Toronto Stock Exchange, discussing the enforced idleness of the stockbrokers, was asked why the brokers did not transform the exchange floor into a handsome billiard room. "We wouldn't have enough to pay the marker," was the reply.

Mr. W. Fitzgerald, late Dominion superintendent of insurance, has been presented by the Hon. Mr. W. T. White, minister of finance, with an engraved piece of silver plate on behalf of the staff of the department of insurance and of the department of finance, with which Mr. Fitzgerald was for many years associated.

Mr. G. C. Hart has succeeded the late Mr. J. P. Knight, as manager of the Montreal Clearing House. Mr. Hart has had an extensive experience in banking and general financial business. His early experience in banking was gained in the Maritime Provinces. Since the outbreak of war, Mr. Hart has assisted the government as one of the censors at the Canso cable office.

Mr. Daniel Guggenheim, the mining magnate, was in England recently, and on his return to the United States, told a Press representative that while in England he ran out of funds, and could get no accommodation except through cabling home. He received a remittance by return cable, after this message, however, from his son:—"Now you know how it feels to be broke!"

Sir Edgar Speyer has temporarily severed his connection with the banking firm of Speyer and Company, which was originally founded in Frankfort, Germany, and still maintains German connections. The firm notified the London Stock Exchange, that in view of the proclamation of King George forbidding British subjects to give aid to Germany, financial or otherwise, Sir Edward Speyer, their London partner, had taken the action noted. Sir Edgar is a British subject and has visited Canada several times.

Mr. F. Nation, one of the first shareholders and policyholders of the Great-West Life Assurance Company, joined the directorate of that company in February, 1910. Mr. Nation was born in Kent County, Ontario. Though by no means advanced in years, he is an "old timer" from the western standpoint, going west in 1882. For many years he was engaged in business in Brandon, the "wheat city" of Manitoba. There he built up the large establishment now operating under the firm name of Nation and Shewan, Limited. Mr. Nation retired from the concern some three years ago, and has since resided at the Pacific coast. In Brandon, Mr. Nation took interest in civic affairs, and was a member of the municipal council and president of the board of trade.

Mr. John Stuart Thomson, a contribution from whose pen appears elsewhere in this issue, was born and educated in Montreal and became a citizen of the United States and an official of United States concerns in the Far East. His father was born in Dunfermline, Scotland, so the son, as he says himself, "belongs to all three nations—the three best essential democracies on earth, whose example and commercial interchange is the envy of all powers cursed by war and oligarchies." Mr. Thomson tells *The Monetary Times* the story of an order he received from a Chinaman at Edmonton for two of his interesting books on that country. The order read: "Stuart-Thomson, I am very glad I wants your books China Revolutionized and The Chinese, for China, Canada and America good friends. Send me that books when my moneys you catchee in post office. This three countrees onlee, Canadas, China and Americas, not in fight, in busy-ness, and I want look-see good talk, I hear. Yoor troo, ——."

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100 00 invested has produced all the way from $127.00 to $193 00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Gold Mines.—A comparison of Hollinger operations during the past two 28-day periods is as follows:—

	Sept. 9.	Aug. 12.
Gross profits	$ 152,821	$171,975
Current assets	555,099	514,221
Gold assets	190,425	209,297
Surplus	1,043,957	981,135
Working cost	76,659	68,578
Working cost per ton milled	3,866	4,167
Running time of possible	96%	96%
Average value	12.41	15.46
Approximate extract	93.1%	94.04%
Ore treated, tons	19,828	16,456

Lake Superior Corporation.—At the annual meeting of the stockholders of the Lake Superior Corporation in Camden, N.J., Secretary Gibson said that, as a result of negotiations now pending, there is reason to believe that the Lake Superior Corporation will not lose a dollar through the failure of the Canadian Agency in London.

Mr. J. Frater Taylor, the president, said:—"As those shareholders who have followed the reports of the company know, the aim of the management since 1909 has been to concentrate the resources of the Lake Superior Corporation in the building up of its largest earner, Algoma Steel Corporation, Limited, all of whose issued share capital, $10,000,000 preferred and $15,000,000 common stock, is owned by the corporation, and to dispose of all other industries and assets which were in an incomplete state or would be a drain on its resources, unless such industries were so closely allied with the operations of the steel company as to make them essential.

"In pursuance of this policy, all outside assets, with certain exceptions have been sold, and the proceeds applied partly in improvements in the steel plant and partly in payment of the Lake Superior Corporation first mortgage bonds, which have been reduced from $10,000,000, at which they stood on June 1, 1910, to $5,708,000, the present amount."

Earnings, with comparisons, are as follows:—

	Total net earnings.	Fixed and other charges.
1908	$ 950,132.70	$ 495,438.74
1909	1,057,114.94	506,449.71
1910	950,707.78	475,860.87
1911	497,957.72	566,691.77
1912	963,518.17	1,042,938.90
1913	1,900,305.32	1,091,783.28
1914	1,934,965.90	1,238,814.48

The directors and other officials were re-elected.

Kerr Lake Mining Company.—The Kerr Lake Mining Company operated at a profit of $620,786 during its fiscal year ended August 31st. The previous year's profit amounted to $769,176.

The silver yield totalled 1,829,424 ounces, as against 1,855,495 ounces in the previous year.

The average cost of production was 24.86 cents an ounce, comparing with 18.30 cents in the preceding year.

Manager Robert Livermore placed ore reserves at 5,698,000, against his estimate of 6,660,000 tons at the end of the 1913 period. The estimate has been kept low because of the difficulty in getting accurate results in the variable ground which furnishes mill rock. It is safe to say, he adds, that the present estimate will be exceeded.

Operating and profit and loss account of Kerr Lake:—

	1914.	1913.
Sale of ore	$1,306,052	$1,028,343
Net proceeds	952,144	1,034,881
Interest	23,743	9,536
Charges	355,101	272,242
Profit	620,786	769,176

Ogilvie Flour Mills Company, Limited.—An increase of $5,209 in net profits for the year ended August 31 last is shown in the financial statement of the Ogilvie Flour Mills Company, Limited. Profits for the year were $581,943, against $576,734 the previous year, and $521,471 in 1911-12; in fact, the showing in this respect was the best made by the

The actual results of THE DOMINION LIFE are unexcelled
A TYPICAL CASE.—The holder of Policy No. 21 was assured on the Ordinary Life, reduction of premium plan. His premium was reduced by 13% in each of the years 6-10, by 28% in each of the years 11-15, by 40% in each of the years 16-20, and a reduction of 50% in the years 21-22. In the 22nd year we found that there was sufficient surplus to the credit of the policy to cancel all premiums. The assured was notified and at his request a paid-up policy, but STILL PARTICIPATING, was delivered to him.

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

The Sovereign Life Assurance Co. of Winnipeg

company since the record-breaking year of 1908-9. Fixed charges rose some $27,000 as a result of the sale of bonds against capital expenditure on the new Medicine Hat plant, and this left the balance available for dividends $21,791 less than the previous year. Earnings of $449,943 after fixed charges were equal to 22.49 per cent. on the preferred stock, against 23.59 per cent. the previous year, and the balance of $309,943 after preferred dividends was equal to 12.39 per cent. on the common, against 13.27 in 1912-13.

After all payments the company had $109,943 to carry forward out of the year's profits, increasing the balance at credit to $582,466.

The sale of $600,000 bonds against expenditures at Medicine Hat added to working capital. Bank loans were reduced approximately to $863,885, and the surplus of current assets over current liabilities rose from $895,215 in 1912-13 to $1,346,495 in the year just closed. Inventories figure in current assets for $1,234,379, about $46,000 less than a year ago; accounts and bills receivable increased from $1,474,541 to $1,618,413. Against this there was a rise in accounts payable from $535,013 to $823,367 In all current assets footed up $3,153,998, against liabilities of $1,807,503.

◆

PULP AND PAPER TRADE IS NORMAL

Monetary Times Office,
Montreal, October 14th.

Owing to the uncertainty of exports of pulp from Scandinavian countries following the declaration of war, the pulp and paper situation in this country assumed an unusual status. Conditions have become more normal now owing to the fact that the manufacturers have enlarged their production and the British control of the seas has made the resumption of exports from Scandinavian countries possible. While the Baltic Sea is still closed, Britain has been able to import supplies continuously and it is stated that shipments from Newfoundland have been increased as far as possible. Forest operations have been interrupted throughout Europe, and from all appearances it is expected that prices will increase rather than decrease. The situation on this side of the Atlantic is determined to a great extent by that of the trade in Europe just now.

◆

FOOD PRODUCTS WILL BE IN DEMAND

"Remember it is the products that you can produce which will be in greatest demand—grain, roots, bacon, pork and beans and apples. No man occupies a more important place in the present crisis than the farmer. The food supplies available will probably enter into the final success more than any other condition," suggested Nova Scotia's Premier, Hon. G. H. Murray, to the farmers of that province. "The farmer, therefore, who means to produce all the food supplies that he can on the farm during the next year is just as useful a patriot as the farmer who shoulders his gun and goes to the war.

"You should devote this autumn to the task of preparing your farms for the largest crop that it is possible to raise. In so doing you can be of inestimable assistance to the Motherland while developing the agricultural resources of this province and materially adding to your own incomes. Nova Scotia, owing to its comparative nearness to Europe, is a natural base of supply for the products that will be most sorely needed. Agricultural experts who have looked over this province have always been impressed with the great possibility for increased food production on our farms. There are hundreds of acres of land that have been either down to hay for a great many years or have been in pasture, that can be plowed up, sown to oats, wheat or barley and seeded down to clover and timothy to the benefit of the farmer even in times of peace. But now that the present crisis demands that every effort should be made to increase the food supply, I would urge you to make preparations for 1915, plow up those lands and produce all the food products which you can."

The Peerless Glass Company, organized in the spring, is at present working with only one of the plants which were projected. The company took over the Atlas Glass Company, in liquidation, and is erecting a plant at Blue Bonnets. This plant is practically completed and is expected to be in operation in November.

Of the "Made-In-Germany" Joke

YEARS ago, "Made in Germany" was the subject in England of every day jokes. The possessor of trashy articles "made to sell" was asked if they had been made in Germany. The joke ran through the newspapers, the magazines and the vaudeville houses and through the national vein of humor generally. To-day, "Made in Germany" is the challenge to a commercial war. Great Britain, Canada and the countries of the Empire generally are responding to that challenge. We are realizing now that the German-made article was not a joke. It was commercial ammunition destroying, or warehousing indefinitely, goods which should have been made and others which were made in the British Empire and which could have been purchased in the British Empire.

Work which can be done by the Canadian operative has been going to the German factory, because of keen German business methods and because of the spirit which has prompted us to buy a lamp or a bolt or a pair of socks without knowing or caring where they were made. Since the beginning of August, these conditions have changed. While the Canadian contingent is doing its part at the front and the Canadian business man is doing his part at home, it remains for the Canadian citizen also to do his part. It is patriotic and it is good business to buy goods, first that are made in our own town, second in our own country, and third, in our own British Empire.

The two outstanding facts in the growth of modern Germany are the rapid increase in population and the growing dependence of the population upon industrial and mercantile pursuits. In the census of occupation taken in that country in 1907, while 17,681,000 people were engaged in agriculture and forestry, 26,386,000 were engaged in industry and 8,278,000 in trade and transport. Industry and trade, therefore, maintained 34½ millions of German people, or more than half the entire population of the German Empire.

The effects of this position in the Fatherland have been felt in every part of the world where goods are bought. The German salesman has been met everywhere, selling everything from pencils to steel pipe. He has been assisted by well-planned advertising campaigns, subsidized telegraph agencies and a national desire and effort to push German goods in all quarters of the globe. At the same time, Germans at home were buying articles produced in their own factories and workshops. In the world's market, their competitors have sworn at German methods but the business was obtained. Nothing was too daring in the German tricks of the trade. A German house printing picture post cards, for instance, issued a a card showing the British bull-dog standing guard over the Union Jack. These were sold in England. The profits have helped to buy German shells to fight the English purchasers of the cards.

Now that we realize these things more clearly, it should not be difficult to use a little discrimination in our every-day purchases. What has been done unconsciously in the past to assist German militarism is reflected in a typical instance. A Toronto family had been discussing for some time the purchase of a clock. One day they decided to buy, and went to the jeweller's to select it. It was a modern "grandfather" upon which the choice fell, a handsome clock, chiming the quarters and the hours. It was made in Germany and it was bought in Toronto for $60. Later, the boy in the family had a birthday. Someone gave him a box of bricks. They were cut in hardwood squares and cones, arches and columns, and some of them were colored—an excellent toy for fifty cents, but made in Germany. The box contained a sheet of designs with German titles. The baby in the house wanted socks. They were bought at the store for twenty-five cents. On the heel, stamped in white letters, was the word "Germany." Now we must buy goods made in Canada and the British Empire.

The British bull dog hangs on to business and never repines.

* * *

It takes a real finance minister to get money in war times. That is what Hon. W. T. White has done.

WHERE TO BUY FIRE INSURANCE

The Monetary Times is thoroughly in sympathy with the movement, initiated by the Canadian Manufacturers' Association, to stimulate the buying of goods manufactured in Canada. But the Canadian manufacturers must reciprocate. Many of them are placing their fire insurance with companies unlicensed in Canada, companies that do not report to the insurance department at Ottawa, companies that do business here without giving a rap for Canadian laws or the Canadian insurance department. If the manufacturer will buy his fire insurance from a company that does business as a Canadian citizen should do, many such Canadian citizens, interested in the fire insurance business, will have greater sympathy with the "Made-in-Canada" movement. "You buy the stuff we make in Canada," say some of our manufacturers to the underwriter, "and we will buy our fire insurance in unlicensed companies elsewhere." That is not reciprocity.

BABY BONDS.

The Ontario government is said to have sold about one-half of its attractive bond issue of $1,000,000. The second half will be the more difficult portion to sell. A drawback to the issue—one at par, maturing in five years only, and bearing interest of five per cent.—is that the lowest denomination is $1,000. Lower denominations, say of $100 or even of $500, would bring the bonds to the financial reach of many people looking for such a sound and remunerative investment. France is issuing treasury bonds in denominations of 100, 200 and 1,000 francs.

◆

Who knows of a sane business man, untrammelled by politics, who wants a general election now?

* * * *

The Monetary Times understands that the arrangements made respecting the negotiation of the Canadian loan in London, noted elsewhere in these pages, are most favorable.

WHAT IS NEUTRALITY?

President Wilson says that United States houses may ship anything they like to belligerent powers. They may sell guns and food, copper and shells, goods contraband and otherwise, but the shippers must take all the responsibility and risk. In short, if a cargo of ammunition shipped by the United States to Germany is sunk by a British cruiser, it will not be the subject of diplomatic correspondence, but a matter for the shipper who took a chance and failed. At the same time, President Wilson has intimated his disapproval of United States bankers making loans to belligerent governments. This ban includes not only the Dominion government but also the Canadian provincial governments. What is the difference, from the neutrality point of view, between a shipment of rifles by the United States to Germany and of a shipment of money from the United States to Canada?

◆

The famous question of Mr. W. F. Maclean, M.P., "Where can the hired man wash his feet?" is superseded by his slogan "Force the banks to change their beat."

MONTREAL'S MIRTHFUL MAYOR

Mayor Mederic Martin, of Montreal, has been talking again. He told reporters in New York this week that he is 45 years old; is a cigar manufacturer; still pays his dues to the cigarmakers' union; that he interviewed President Wilson; was elected mayor of Montreal at a cost of $884 against his opponent's expenses of $250,000; and that he had defeated all the political machines of Montreal, practically unaided. He added: "The mayor of New York is the chief executive of the largest city in the United States and I am the mayor of the largest city in Canada, so I want to pose for a photograph with him."

Civic life in Canada would be mighty dull without the services of such a clown. Those who failed to work and to vote at the last municipal elections at Montreal must not complain now. How the mayor talks and how the city is run is none of their business.

TOYS FOR THE CHILDREN.

For some time the waste from Pacific coast plants where cans are made was dumped in heaps and left to rust. In recent years, German houses have had these tin strips baled and shipped to Germany to make toys. Children all over the world have played with toys made in Germany. With the necessary labor, economical buying of materials and aggressive marketing, Germany has built up a wonderful toy industry. Nuremberg has for many years maintained its place as the centre of the toy trade of the world. Its toy factories employ about 12,000 workers, half of whom are women and girls, and the annual output is valued at about $5,000,000. For seven years past the toy exports to the United States have exceeded $1,000,000, as follows: 1905, $1,137,157; 1906, $1,478,060; 1907, $2,309,805; 1908, $1,607,494; 1909, $1,904,377; 1910, $2,257,330; 1911, $2,275,000.

One of the Nuremberg toy factories is said to be the largest plant of this kind in the world, and employs about 1,500 workmen. There are many other very large concerns, and hundreds of very small factories. Many toys are also the product of "house industry"; that is, are manufactured in the homes, with only the family participating in the work. This class of industry is, however, not so usual in Nuremberg as it is in the villages of the Erz Mountains, where mostly wooden toys are made, or of the Thuringian Forest, where most German dolls are produced.

Nuremberg toys are of infinite variety, but the principal products are metal and mechanical toys—tin and lead soldiers, swimming and diving toys, toy flying machines, toy engines, railways and boats, magic lanterns, musical toys, walking birds and beasts, swords, rattles, and to some extent celluloid toys and wooden and pasteboard toys, blocks, puzzles, etc. The Nuremberg output is about one-fifth of the entire German toy product, which is about $25,000,000 per year. Of this total about $20,000,000 is exported, going to every country of the globe.

British firms are making an effort to obtain some of the toy trade in the United Kingdom, which has been bombarded with German toys for years past. British manufacturers will make British toys for British children. Only a few toys are made in Canada, but there is no practical reason why there should not be a good sale here for Canadian and British-made toys. The better they are made the more they will sell. German-made toys were sold at low prices and they did not last long.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Walkerville, Ont.—The town has three blocks of debentures placed with its bank until an opportunity arises for their disposal.

Beverley, Alta.—An issue of $75,000 6 per cent. 20-instalment debentures are being offered for sale. (Official advertisement appears on another page.)

Calgary, Alta.—Calgary public school board have decided that debentures shall be prepared to cover capital expenditure incurred and same submitted to the ratepayers by the end of December, 1914.

Ontario.—The money to build the Toronto Hamilton highway will be secured by an issue of the commission's bonds backed by the provincial guarantee. It had been suggested that short term treasury notes would be issued.

Regina, Sask.—Mayor Martin and Commissioner Pool, of Regina, have succeeded in securing over $5[illegible], as a result of a visit to Montreal recently, for improvement construction purposes. Various improvements are being proceeded with, and are expected to be completed before winter sets in.

Winnipeg, Man.—Mayor Deacon announces that as a result of a trip to Ottawa and Montreal, $[illegible] will be available to spend next year in construction work on the Shoal Lake aqueduct in connection with the Greater Winnipeg water district scheme. This will make four millions expended by the end of next year.

Victoria, B.C.—Messrs. Jones and Rant, contractors, have offered to take the city's treasury notes in lieu of cash for any work which they may be given by the city, the company to pay its workmen engaged on the work in cash. The offer will be discussed in due course. The city proposes to issue $25[illegible] treasury notes to the local public.

Hamilton, Ont.—Mayor Allan, referring to the city's finances this week, said:—"I think we will keep within appropriations in almost every department. This has been an exceptional year, and even if we do have an overdraft, it will be no cause for alarm. It is possible that we will ask the government to allow us to issue debentures covering all special appropriations, such as the patriotic fund, local relief, public work, etc., which in all will probably reach $90,000 or $100,000."

Ontario.—The [illegible] by-laws submitted this week in interested municipalities call for the issuance of approximately $4,[illegible] in debentures to be deposited with the commission. They were carried in [illegible] out of [illegible] municipalities. The voting, for, against and majority, respectively, was as follows:—Towns: Newmarket, 275, [illegible]; Uxbridge, 274, 31, 243; Whitby, 226, 104, 122. Townships—Markham, [illegible]; S[illegible], 314, 185, 129; Whitchurch, 310, 72, 238; Uxbridge, 141, 170, 35 [illegible]; Reach, [illegible]; Pickering, 252; Whitby, 124. Villages—Markham, 139, 14, 122; Stouffville, 163, 35, 128; Port Perry, 255, 7, 248.

Stratford, Ont.—The city council have passed by-laws for $20,000 [illegible] 30-year debentures and $10,000 20-years, to recoup the water commission for money expended on new mains and extensions. The finance committee was authorized, on the advice of the city solicitors, to execute a quit claim deed releasing the head of the W. I. Kemp Manure Spreader Company from further debenture payments to the city, the latter to take over the factory and equipment, but to release the city's claim on the Kemp patent rights. The company's bonds were guaranteed some years ago by the city, but the payments were not met, hence the action to foreclose the mortgage.

Lethbridge, Alta.—Messrs. Wood, Gundy and Company, Toronto, who are holders of a large block of this city's bonds, wrote the city in part as follows:—"Our country is now passing through a financial test more rigorous than we have ever before experienced, and the numerous lending countries upon whom we must rely for our development are naturally watching very closely the course of financial affairs here. If you learn of any municipality that is likely to have difficulty, we trust you will do anything in your power to give them assistance, and if you would care to let us know of the circumstances, we would be glad to do what we can to the same end." Canadian municipal debentures have always been recognized as among the choicest investments obtainable, and this excellent credit is due to the fact that practically without exception Canadian municipal debentures have been paid promptly on the date due. Messrs. Wood, Gundy and Company believe that by continuing this policy of meeting all coupons and obligations promptly, depends the future credit of Canada generally.

Mr. D. D. Lesperance, of the Quebec brokerage firm of that name, is retiring from business on October 31st. Mr. Lesperance is one of the oldest Quebec French Canadian brokers.

FINANCING OF LAKE SUPERIOR CORPORATION

Reducing the Load—Improvement of the Algoma Steel Plant

Some interesting details were given to the shareholders by Mr. J. Frater Taylor, president of the Lake Superior Corporation, at the recent annual meeting. He explained that the aim of the management since 1909 has been to concentrate the resources of the Lake Superior Corporation in the building up of its largest earner, Algoma Steel Corporation, Limited, all of whose issued share capital, $10,000,000 preferred, and $15,000,000 common stock is owned by the corporation, and to dispose of all other industries and assets which were in an incomplete state or would be a drain on its resources, unless such industries were so closely allied with the operations of the steel company as to make them essential. In pursuance of this policy, all outside assets, with certain exceptions have been sold and the proceeds applied partly in improvements in the steel plant and partly in payment of the Lake Superior Corporation first mortgage bonds, which have been reduced from $10,000,000, at which they stood on June 1st, 1910 to $5,708,000, the present amount.

The exceptions referred to are: Algoma Central and Hudson Bay Railway, Algoma Central Terminals, Limited, Algoma Eastern Railway, Algoma Eastern Terminals, Limited, International Transit Company, Trans. St. Mary's Traction Company and the Tagona Water and Light Company.

City Buys Plants.

The Tagona Water and Light Company has, under the terms of its concession, just been acquired by the city of Sault Ste. Marie, and the company will receive a net sum of about $450,000 for same. Of this sum, $160,000 must be applied in repayment of first mortgage bonds of the Tagona company. The revenue heretofore received from this source—last year $94,667—will naturally cease.

Negotiations are in hand for an extension of the street railway franchise in the Canadian Soo and also for the disposal of the assets of the two street railway companies.

The corporation's interest in the railways is as follows:—

		Issued.	Owned by Lake Superior Corporation.
Algoma Central & Hudson Bay Railway ..	Preferred	5,000,000	
	Common	5,000,000	5,000,000
Algoma Eastern Railway	Preferred	800,000	800,000
	Common	2,000,000	1,000,000
Algoma Central Terminals	Preferred	....	All owned by Algoma, Central and Hudson Bay Railway
	Common	100,000	
Algoma Eastern Terminals	Preferred	......	
	Common	100,000	

The bonds of the railway are guaranteed by the corporation. The Algoma Central is not yet fully in operation, but under present conditions neither railway can show the earnings expected.

About the Algoma Steel Corporation.

As set forth in the prospectus of the Lake Superior Corporation 5 per cent. first mortgage and collateral trust bonds issued in 1909, the steel plant and allied industries, now consolidated into Algoma Steel Corporation, Limited, formed the main asset of the Lake Superior Corporation.

The plants of the steel corporation were at that time most incomplete and far from modern in design and construction. Nothing but rails were made—not even spikes, bolts or tie plates to complete the various railroad companies' orders. The steel company controlled but little of the raw materials required in the manufacture of its product. The net earnings, exclusive of bounties, had never exceeded $400,000.

Steel and Power Plant.

To-day the steel company owns a steel plant equipped with every modern appliance, comprising 110 coke ovens, 3 blast furnaces, Bessemer plant (mixer and 2 four-ton converters), an open hearth plant, consisting of seven 40-ton furnaces with a 250-ton mixer, representing a steel making capacity of 500,000 tons, rolling mills with a capacity of 400,000 tons of rails, and merchant mills with a capacity of 80,000 tons of steel products per annum.

The geographical position of the plant places it in a commanding situation to supply the great and increasing market in the Canadian west, whilst the quality of the steel rails produced has an excellent reputation in Canada and the United States.

The Steel company also possesses a complete gas engine power plant, consisting of four gas engines and blowers, and five gas engines and electric generators, developing 19,800 horsepower, and two turbo-electric sets and four Mesta steam blowing engines developing 8,000 horsepower. The Steel company also owns the hydro-electric power station and plant at Sault Ste. Marie, developing at present about 15,000 horsepower, all of which is under contract for sale to the town of Sault Ste. Marie and local industries. In addition, a hydro-electric plant of 2,000 horsepower has been constructed to supply power to the ore mines. The total development, therefore, amounts to 44,800 horsepower.

The company's balance sheet appears elsewhere in this issue.

◆

WANT NEW COMPENSATION ACT

Mr. Robert Campbell, member for Rocky Mountain in the Alberta legislature, has given notice of a resolution calling on the provincial government to appoint a commission to investigate the workmen's compensation act with a view to its amendment or repeal at a later session. Mr. Campbell contends that the act passed some years ago is not working satisfactorily, either to the employees or the employers.

◆

PROTESTS OF QUEBEC PROVINCE LIFE MEN

At a meeting of the Life Underwriters' Association of Quebec Province, held in Montreal, a protest was made against the employment of alien insurance agents of German or Austrian birth during the present war. The matter will be brought to the attention of the Dominion Life Underwriters' Association.

Mr. A. J. Meiklejohn, president of the Dominion association, spoke of the necessity for field men becoming members of underwriters' associations. The public must be taught the benefits of life insurance by advertising along definite lines in the press and by instituting lectures on insurance in schools and colleges. That such lectures might be instituted, the suggestion was offered that for every $1,000 of business written, managers should subscribe five cents towards a fund to be administered by the Dominion association.

Mr. Homer A. Vipond, Montreal manager of the New York Life Insurance Company, called attention to the fact that a law recently passed by the Ontario Legislature made it impossible for any agent not resident in the province to obtain a license for soliciting insurance in Ontario. He thought this was unfair to insurance men living in other provinces and doing some business in Ontario. A motion of protest against the law was proposed by Mr. Vipond and carried.

◆

Hon. Pierre Edouard Blondin, appointed minister of inland revenue in the Dominion cabinet this week, was born in Yamaska county, Quebec, December 14th, 1874. He is a graduate of Laval. He has been clerk of the circuit court of Champlain county, and an alderman for the town of Grand Mere. He was elected to the House in 1908. He has been deputy Speaker since 1911.

Hon. T. Chase Casgrain, K.C., LL.D., appointed postmaster-general in the Dominion cabinet this week, is the second American-born member of the cabinet, Hon. G. H. Perley being the other. He was born in Detroit, Mich., July 28th, 1852, but was educated in the Quebec seminary and at Laval University. He is a distinguished member of the Bar; was member of the Quebec Legislature 1886-96; was Attorney-General, 1891-96, and was a member of the House of Commons, 1896-1904. He has been chairman of the Canadian section of the International Waterways Commission. Hon. Mr. Casgrain was called to the Quebec Bar in 1877, and was junior counsel for the Crown at the trial of Louis Riel for high treason at Regina in 1885, and in 1894 was chairman of the Royal Commission to revise and amend the code of civil procedure. In 1907 he was prominently identified with the Anti-Alcoholic League of Montreal.

CREDIT AND SACKING OF LONDON

It Would Have Immediate Effect on the Prosperity of the Guilty Nation

Since the German army has occupied most cities in Belgium, Great Britain, and London particularly, have discussed more earnestly their invasion. But as Moltke once said, he knew of several ways of getting into England, but he did not know any way to get out again. The position, however, recalls the interesting statement that the sacking of London would have an instantaneous effect on the credit and prosperity of any nation guilty of it. So said Mr. Norman Angell, the famous peace advocate, in addressing a gathering of bankers in London two years ago. To-day Germany is making an attempt to do the sacking. Mr. Angell discussed the effect of banking on international relations and pointed out that banking was affecting them not so much through the personal power that it was possible for individual financiers to exercise directly on governments—such power, despite quite recent events which seemed to indicate the contrary, could only be exercised within very narrow limits—but mainly because the immense development of banking during the last 20 or 30 years had brought into life forces which cut athwart political frontiers, and tended more and more to escape from political control.

The cardinal defect of the classic treatment of statecraft was that such treatment regarded the elements of international relations as unchanging in character. It would have one believe that what Machiavelli had written in the 15th century was a reliable guide to statecraft for the 19th, whereas conditions had quite recently changed radically. Olaf the Viking, Ghengis Khan and even Bismarck were all able to disregard the damage they might cause enemies, in the sense that they would not—or their states would not—immediately suffer from such damage. That was no longer the case today.

What is the Answer?

The sacking of London would have an instantaneous effect on the credit and prosperity of any nation guilty of it. No one could deny the change that had taken place; it was only a question of how far it had gone, and in what direction. Had the development of the new factors brought about the economic futility of military force, as he claimed?

He showed that the interdependence of nations had not necessarily greatly affected international policy, until there had grown up what he termed organic sensibility—the capacity of one part of the social organism to feel immediately damage to any other part and to have such realization affect its policy. Policy is determined, not necessarily by our interests, but just so much of our interests as are pushed insistently into notice. That is why he attached such great importance to this sensibility, which had not existed until our day. He illustrated the point by sketching the relations of Spain and South America.

For nearly three centuries Spain exploited South America simply and purely in the interests of the mother country, and, although in the long run this policy was bad for Spain, she still persisted in it, because at the time there was nothing to show clearly how that policy reacted on the interests of the mother country. In an attempt to extort bullion, Spain would ruin a South American province but the ruin would not affect Spanish interests for perhaps a generation, and by that time, other factors being introduced to complicate the question, there was no simple direct guide for Spanish policy.

Nerves of Economic Organism.

But if we can imagine a modern Spain applying just such regulations to a modern, industrially developed South America as Spain of the 17th century applied to the South America of the day, the disturbance of great interests would be such that Spanish statesmen would be quickly pulled up in their policy by its effects through the Stock Exchange and credit upon all sorts of interests affecting them in their country. And the effect, thanks to the mechanism of a banking system allied to the telegraph, would be apparent, not in 20 or 30 years, but instantaneously. The economic organism has acquired nerves, and those nerves are the creation of our time.

Mr. Angell justified his general conclusions by an appeal to recent history. Bismarck in 1870 did his best to bleed France white. Had he succeeded as completely as he desired he would have done no immediate damage to German industry, because that industry was not then organized on a basis of credit, and not dependent, directly or indirectly, upon French money. But the threat of such thing 40 years later did react immediately on German interests, and such reaction did, in fact, bring about some modification of German policy. That is to say, the dependence of Germany on foreign capital had its effect on German commercial circles, which in turn affected the government; the government of no great highly organized industrial state can in the long run flout the interests of those from whom it derives its general authority, means and general capacity to act with freedom.

French and English Money.

Commercial Germany thoroughly understood that but for French and English money furnished either directly or furnished to countries like South America and Russia for their internal development, which has afforded outlets for the German trade, the German industrial development of the last 20 years would have been impossible.

Mr. Angell showed how the economic forces of the last generation had completely upset the best-laid plans of both French and German statesmen. Bismarck's avowed policy was to sweep France from the map economically. Had he succeeded in doing so German development, especially in Russia and South America, would have been impossible. French statesmanship had aimed at developing Russia by French money to offset the power of Germany, with the result that Germany has found in the Russian development so produced one of the main outlets for her trade.

Financial Strength of France.

Not only had banking made the results of this situation felt, and had furnished the economic organism of Europe with sensory nerves, which guided its policy, as we saw during the Anglo-German crisis of 1911, but it had also found means of utilixing a division of labor which made Germany dependent upon her weaker rival. Because Germany was a country of expanding population, and Germans were perpetually needing capital for starting a million fresh existences in the world every year, while France was a country of small families and stagnating population, not needing to use its capital in this way, and thus having much of it free for investment abroad, France had become the bank of the world. So that the very inferiority of France had helped to make it impossible for her larger rival to damage her seriously without damage to herself—to ruin her own bank, as it were.

Mr. Angell showed that the interdependence of nations was due to the division of labor; that such division of labor was in reality a very modern thing. England was not in any vital sense dependent upon foreign food and raw material until well into the 19th century, and no nation in the world, outside England, was dependent upon foreign food and raw material until the last quarter of the 19th century.

Intangible Wealth.

So greatly had conditions changed within the last generation that Bismarck was nearer being able to put into execution the statecraft of Ghengis Khan than the modern German statesman is to being able to put into execution the policy of Bismarck. He showed how intangible is the greater part of the wealth of the modern world—to what a great extent it depends upon the unhampered activities of the mass of the population, and the very attempt to place a population in an unfavoured position, so as to hamper this ordinary activity, would cause a large proportion of the wealth, which is the object at which control by force aims, to disappear.

He dealt briefly with the criticism that the money motive was an unworthy one, showing that the development of social trade implied the development of all those activities which rendered the general condition of the people better; that the [illegible] and not [illegible] motive of good statesmanship, [illegible] to bring into relief the interdependence, not merely of [illegible] but [illegible] banking, the modern organization of finance, was doing, was to [illegible] based upon a more enlightened conception of self-interest. This did not make for the debasement, but for the [illegible] of human society.

* * *

The Ontario [illegible]. The bonds are for five years and bear interest at 5 per cent. The price is par with accrued interest. Allotments are being made for blocks of them to reliable financial houses and to the Ontario provincial treasurer direct.

TURNING OUT MONEY TO ORDER

Dr. Adam Shortt, of Ottawa, Tells Why Government Machines and Banks Cannot Do It

The policy and functions of the Canadian banks were discussed by Dr. Adam Shortt, in his recent address to the Canadian Club, Toronto. "Someone says," he remarked, "'If it is true that borrowings from Britain are falling, and we cannot keep up all our industries, cities, and so on in Canada, what is the matter with our own banks? Cannot they lend the cash, as they applied for the necessary power to suspend specie payments? There is nothing to prevent the banks from advancing moneys, and handing out Dominion notes to the extent of hundreds of millions to take the place of this borrowed money from Britain, and so let ourselves down very easily.'

"But what would be the effect of this?" asked Dr. Shortt. "Let me first give you figures of the reaction that had taken place up to the outbreak of the war in the month of July. For the month of July, our imports declined $16,000,000, and for the year ended with July, $123,000,000. The revenues of Canada declined $3,000,000 in July, and in the year ended with July, $20,500,000. Our exports increased in July $8,000,000, and during the year, $66,250,000. When there comes a stoppage, a crisis,—while not a very severe crisis, but a slowing down,—while we cannot pay out lavishly to carry out our enterprises, we give our production in the cities a chance to catch up on us. We have not the money to bring in imports as we did before. We have not the money to pay for the consumption here in Canada of all we produce. So our imports are cut down, and our exports are increased. This is a spontaneous adjusting of our affairs, and if that goes on, we shall get to a stage when we shall not be running our heads, at any rate, any more into debt, but preparing to get out of it.

Of the Trade Balance.

"You say, 'What about the banks? Cannot they hand the stuff out?' Let me first point out this. If the banks could come to the rescue of the situation, and could maintain production and all that city building, railroad building, and all that expenditure of capital, and by this means we would maintain the situation produced by our borrowing hundreds of millions in England, and keep our importation at the enormous difference of three or four hundred million dollars above our exportation, do you expect that the people of Britain are going to take Canadian bank notes or Dominion Treasury notes for that? No, indeed! They want the interest and payment for their lendings, and unless you can furnish it in bills of exchange or coin they are not going to take it.

"It is foolish, therefore, for us to attempt to keep things going in that way. But beyond that, what is the sense in perverting the function of the banks? What is the function of the banks? To facilitate exchange. There have been bankers in this country who did not know the difference between a mortgage and a note? In other words, they invested their money where they could not get it easily, in mortgages. They had not invested it where the people could get it. If the banks could not collect, they would not lend.

Might be a Bank Run.

"Take an ordinary bank sheet; you find a million or two of capital subscribed, and paid in, and another million or two of rest fund. Beyond that a bank has nothing but what is paid into it and what is paid out; that is, its deposits and discounts. Now it is perfectly sound banking for banks not to guarantee anybody, because they have to protect every depositor. If they did not, there would be a run on the bank. But the notes will come back on them, and they have to pay discount. Just such a thing was experienced in the Southern States. During the war, it is said, a man took his money to the bank in his pocket, and brought back notes for it in a wheelbarrow. But at the close of the war the thing was reversed, he took his notes back in a wheelbarrow, and brought back his money in his pockets.

Cannot Work Paper Machines.

"You cannot by manipulation of the banking system create one more mouthful of food. One real function of the banks is to move the crops, to enable a man to purchase a large amount of grain in the West, ship it to Winnipeg or Fort William, there to sell it, either loading it into cars or placing it in storage, send it to the Old Country, where the bank pays for it, and he can start all over again. The Dominion Government is simply there to facilitate that by doing the same thing. The Dominion Government cannot pay its debts out of its paper machines. Simply as it facilitates exchange and furnishes a convenient medium of finance to help while adjusting things, does it perform its function. It is utterly nonsense to criticize the Government for not handing out more money by setting its paper machines to making hundreds of millions in notes. The majority of managers of banks have kept to dealing in notes, not mortgages; but some did not keep to that, and have come down. The history of banking is strewn, indeed, with wrecks of that kind—trying to carry manufacturers because the manufacturers could not pay their debts. All this nonsense, therefore, that is sometimes talked in the papers, is sapping the vitals of Canada and our sound finance."

AID FOR THE WOUNDED

Have you done your best for those who are doing their best for you?

Money is the first and most urgent need of the Canadian Red Cross Society. It can at any moment be converted into the most necessary supplies and can be easily sent to any place.

The Red Cross Society is organized to collect money and goods for the relief of the sick and wounded in war. Its head office and receiving warehouse is located at 77 King Street East, Toronto. Fight or pay.

NOW IS THE TIME FOR LIFE INSURANCE

We have never known a time when the outlook of the life insurance business was so encouraging as at the present time. This is a candid talk between intimates, so we need not shut our eyes to the fact that cash is scarce just now and mighty cautious. But that very caution is a good thing for life insurance. Squandering-time is over, caution-time is here and here to stay. And life insurance is caution signed and sealed! A life policy is the corner-stone of all caution. This is part of a recent message of the Great West Life Assurance Company to its men in the field.

Men who once pooh-poohed at life insurance are now dipping around to see "what it will cost to take a little—not wanted now of course, too hard-up—but what about it anyway?" We wish you could see the scores of enquiries we have by mail from men who obviously have never stayed around when the life agent came along. If you could see how men who can't raise a dollar elsewhere are creeping out of holes through their policy loans, getting cash and a heartier respect for life insurance than they have ever had before. If you could hear the way men talk who do carry life insurance and would be fretting themselves grey just now if they didn't. And if you could read the letters that we read from beneficiaries and others.

The fact is, that life men and the farmers are facing the chance of their lives. The farmers know it and are ploughing "like demons possessed." Not a single man of them will get a solitary grain from the field till next spring, but what of that? They will get it and work early and late, cheerful in the prospect. Some of you are in the same boat. You won't get your crop till later—but will you ever get it if you don't work like demons possessed in ploughing up the ground?

When the tide will completely turn is not our business. What we do know is that the attitude of mind towards life insurance has already turned. Men have always needed life insurance. Now they want it. It will not be long before they realize that if they can somehow pay for bread and butter they can pay for life insurance.

◆

While reading the war news, which almost monopolizes attention now, you are missing much of financial and business interest. You can catch up by getting *The Monetary Times Annual* at the end of the year—the best record of the most eventful year in finance, business and commerce.

Mr. C. Schnell, of Paterson, N.J., has visited Kingston, Ont., on business connected with the establishing of a feldspar plant there. He is a German-American, and understands the reduction of potash from feldspar, of which there is a large amount close to Kingston.

(12%) per annum upon the paid-up Capital stock of this institution has been declared for the three months ending 31st October, 1914, and that the same will be payable at the head office and branches on and after Monday, the 2nd day of November next.

The transfer books will be closed from the 17th to the 31st October, 1914, both days inclusive.

By order of the Board.

D. R. WILKIE,
General Manager.

Toronto, September, 1914.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing Operations, Developments, Extensions, Dividends and Future Plans

Standfield's, Limited.—This company of underwear manufacturers, of Truro, N.S., has passed the dividend on its common stock.

Duluth Superior Traction Company.—The gross passenger earnings of the Duluth Superior Traction Company for the second week of October were $24,261, a decrease of $127 from the earnings for the corresponding period last year. Earnings for the year to date are $1,018,689, against $979,880 last year.

Timiskaming Mining Company.—The Timiskaming Mining Company's quarterly report for the period ended September 30 shows cash balance on hand of $59,782, less wages and accounts payable $3,328; available balance, $56,454. Owing to labor troubles the mine at Cobalt was shut down on August 1. Work was resumed October 1. The main shaft is down 768 feet, with a station cut at 750 feet. Good milling ore is available at the property, but high grade is scarce. Application has been made for a winding-up order against the North Dome Mining Company.

Twin City Rapid Transit Company.—This company's September statement shows the following gains:—

	1914.	1913.	Increase or decrease.
First week	$ 185,293	$ 218,422	— $ 33,128
Second week	200,402	170,362	+ 30,040
Third week	181,489	170,276	+ 11,213
Remainder of month ..	228,615	222,048	+ 6,566
Month	795,800	781,109	+ 14,690
Year	6,870,005	6,506,116	+ 363,888

Southern Alberta Land Company.—In order that this company's works may be preserved until next spring, the Dominion government has made a further advance of $100,000 to the Southern Alberta Land Company, under the provisions of the order-in-council passed last spring.

The government, when such orders were passed, agreed to refund the company $380,573 subject to certain conditions. This amount represented part of the purchase price paid the government by the company for the lands when secured, under the Irrigation act.

At the outset $50,000 was advanced and in August a further amount of $90,000. In making an additional advance of $100,000, the order-in-council states that owing to the present political situation in England, it is altogether unlikely that the company will be able to raise the necessary funds to complete the undertaking, but to discharge liabilities to date and preserve the works till spring, the $100,000 is voted.

The Brazilian Traction, Light and Power Company.—The company's August statement in Brazilian currency, showed an increase in net as follows:—

	August, 1914.	Increase or decrease.
Gross earnings	$ 6,166,083	— $ 85,053
Operating expenses	2,500,104	— 165,230
Net earnings	3,566,979	+ 79,277
Aggregate gross	48,950,281	+ 1,154,674
Aggregate net	28,081,727	+ 2,484,525

The results from the operations of the company for the month of August resulted in an increase in net earnings of [illegible] milreis, which, computed at the rate of exchange of 14 pence, gives an increase of $22,506 in Canadian currency. Through its coffee transactions the company has been getting its funds into New York on the basis of about 14½d. per milreis.

The regular quarterly dividend of 1½ per cent. on the shares of the Brazilian Traction, Light and Power Company has been declared.

British Canadian Trust Company—After paying interest and expenses on borrowed money, expenses on investment and management and income tax, the balance at the credit of revenue account, including £1,448 11s 10d brought forward is £22,960 19s 2d, from which interim dividends paid on April 1st were deducted, leaving a balance of £17,369 10s 11d, this the directors disposed of as follows:—In paying final dividends for the year, £6,157 9s; reserve fund, £2,500; to contingent fund, £6,500, leaving £2,212 1s 11d to be carried forward, subject to directors' and auditors' fees.

With the above additions the reserve fund amounts to £15,000, and the contingent fund, including £635 of profits on securities realized during the year, £10,925.

The company's investments show a net increase during the year of £21,365, and now amount to a total of £521,666. Of this amount £400,007 is in mortgage loans in the western provinces of Canada and in the United States, and £121,659 in bonds, stocks and shares mainly of American and Canadian railroad and industrial companies. At the present unprecedented time of war in Europe, prices are so uncertain that it is impossible to give a reliable valuation; but the two funds set aside are much more than ample to provide for any reasonable contingency of ultimate loss. Several of these investments have been obliged to defer payment of their interest meantime, and no credit has been taken therefor in the accounts. The interest on the mortgages, both in Canada and the United States, has been well met.

Western Canada Flour Mills Company.—The annual report of the Western Canada Flour Mills shows profits of $315,246 for the year ended August 31, which compares with $283,293 in the previous year. The company's common stock issue was increased from $1,500,000 to $2,214,700 and during the year outside investments increased from $15,880 to $649,769, the new capital being used for this purpose.

The statement for the year ended August 31 compares with the previous year as follows:—

	Year ended August 31.	
Assets.	1914.	1913.
Properties	$2,692,375	$2,642,994
Patents, etc.	182,850	182,800
Investments	649,769	15,880
Capital assets	$3,524,995	$2,841,674
Accounts receivable	922,061	532,966
Stock in trade	807,826	609,469
Inventory, etc.	343,075	290,034
Cash	76,839	53,021
Current assets	$2,149,802	$1,485,491
Total assets	$5,674,798	$4,327,166
Liabilities.	1914.	1913.
Common stock	$2,214,700	$1,500,000
Bonds	1,653,593	1,704,741
Interest and dividend	$ 92,144	$ 81,170
Bank loans	1,067,249	453,791
Bills payable	234,850	142,493
Current liabilities	$1,394,242	$ 677,455
Balance from 1913	$ 444,969	$ *415,719
Year's profits	315,246	283,293
Profit and loss	$ 760,215	$ 699,012
Balance August 31	$ 502,262	$ 444,969
Total liabilities	$5,674,798	$4,327,166

---

*Balance from 1912

PERSONAL NOTES

Mr. J. C. Stredder, superintendent of the Metropolitan, at Moncton, N.B., has been appointed manager of the Halifax office of the same company.

Mr. C. A. McGaw, formerly eastern manager at Toronto, of the Western Canada Flour Mills, died at the residence of his father, Mr. S. A. McGaw, Winnipeg.

Mr. A. McEachern is resigning his position as teller of the Hamilton Provident and Loan Society. Mr. McEachern has been associated with the society since 1871.

Mr. G. Denholm Burns, secretary of the Central Ontario branch of the Canada Life Assurance Company, has moved to Toronto where he will act as special agent of the company.

Mr. J. L. Englehart, president of the Crown Savings and Loan Company, recently expressed himself as being pleased with the progress of the company under the new management.

Mr. D. C. Edwards and Mr. W. J. Balfe, who are both well known in fire insurance spheres, are now working on fire adjustments, under the firm name of Messrs. Edwards and Balfe, Toronto.

Mr. Homer J. Hale, formerly with the New York Life Insurance Company, of Cleveland, Ohio, has been appointed manager of the Central Ontario branch of the Canada Life Assurance Company.

Mr. F. R. MacKelcan, barrister, of Toronto, has joined the staff of the National Trust Company, Limited, as a trust officer. Mr. J. M. Macdonnell, the other trust officer of the company, who is a lieutenant in the Toronto Field Battery, accompanied the battery to the front as part of the first Canadian contingent.

Mr. George C. Sharp, chartered accountant, has opened offices under the style of G. C. Sharp and Company, at 609 Confederation Life Building, Winnipeg, for the purpose of practising as auditor, accountant, assignee, liquidator, systematizer, investigator, etc. Mr. Sharp is well known in the West and has a thorough grasp of his business.

Mr. J. K. L. Ross, who was in Halifax about the time of his appointment to the Canadian Pacific Railway board, is quoted by the Halifax Chronicle as stating:—"Nothing could have given me greater satisfaction than my election to the directorate of the Canadian Pacific Railway. I have always been deeply interested in railway work and there is no position I would sooner have than this."

Mr. J. C. Keith, a well-known business man and financier of Vancouver, is dead. He went to Victoria in 1876 and a few years later moved to Vancouver. He was the first manager of the Vancouver branch of the Bank of British Columbia, before that institution was taken over by the Canadian Bank of Commerce. Mr. Keith was born in Scotland in 1852, and was well liked on the Pacific coast.

Mr. Henry Lye, the well-known fire insurance adjuster, of Vancouver, celebrated his 80th birthday this week. He has contributed from time to time to the columns of *The Monetary Times* for many years past, and is writing a story, in his own attractive style, for the forthcoming *Monetary Times Annual*. Many men may well wish that at 80 they will be as active and as well preserved as Mr. Lye.

Lieutenant-Colonel J. H. Burland, who died last week in London, England, was associated for many years with his father in business in connection with the British America Bank Note Company. At the time of his death he was president of that company, president of the Consolidated Lithographing and Manufacturing Company, a director of the Mount Royal Spinning Company and other concerns, and was an ex-president of the Montreal board of trade.

Mr. C. Simpson Garland and Mr. Thomas McCallum have been elected members of the Montreal Stock Exchange, Major Victor Buchanan transferring his seat to the former and Lieutenant-Colonel Arthur Hamilton to Mr. McCallum. Both transfers followed the offering by the holders of their services to the Empire. Mr. Garland was a member for many years but retired from the floor when his partner took over the duties of floor member. Mr. McCallum has been connected with the brokerage firm of Hamilton and Son for many years.

Mr. John Stuart Thomson, several contributions from whose pen have appeared in recent issues of *The Monetary Times*, was born in Montreal and later became a citizen of the United States. He was one of those "boys" who started out with his friends Duncan Campbell Scott and Archie Lampman, though he was a good deal younger than they, to write poems. When he felt he had done his part in writing poems, he went out into the international field, studied commerce and finance, travelled nearly the whole world, lived four years in the Orient; and was manager of the largest trans-Pacific Steamship line at Hong-Kong and south China (the Pacific Mail, Toyo Kisen Kaisha and Occidental and Oriental). Then he wrote on international affairs and made the acquaintance and friendship of the statesmen interested. He handled the "Recognition of China" matter and other such movements, and lectured at the United States universities. His chief work now is "Anglo-American fraternity in world work." He is slightly over 40; has endured about all there is to be endured of hardship in travel and tropical campaigns; has studied his subjects in Cuba, Mexico, Europe, Egypt, Indo-China, Malaya, Japan, China and Ceylon, and has tried to get a sane, liberal, working judgment, that is warmed by Christian feeling and generosity, yet one which is practical.

Dr. Adam Shortt, of Ottawa, who delivered an interesting address recently before the Canadian Club, Toronto, told a good story to illustrate the speculative days of 1912 in Toronto. "I have read of a set of very clever Hindu jugglers," he said, "who are reputed to have a way of sitting down in an open square amidst a circle of bystanders, taking a little plant and setting it down in the ground, and by some means hypnotizing the onlookers, so that they see the plant as it grows and grows and grows up above their heads, and presently the juggler produces a little monkey, which climbs up that plant, and when it gets to the top it pulls the whole thing up with it and vanishes! Now that is a wonderful gift, of course, but in any of my researches on these subjects I have never been able to discover that that juggler was clever enough to sell that plant to the bystanders before it had vanished. Yet that is what our speculators have been able to do! Any of you who have been taken out in an automobile in various cities have had the real estate agent explain to you its possibilities. You see nothing to start with but bare land, but around that he pictures growing up most wonderful developments, hundreds of millions in value growing up before your eyes. You are given a chance to get in early. That is the juggler plus the capacity to sell it to someone else. That has been going on to an enormous extent. Some of our single tax friends say the community gives this real estate value; but they cannot have listened to these agents. They are so greedy that they sell, and resell, and sell again and the last man they sell to is the last man sold."

◆

TIMBER MUST BE NEAR WATER

A despatch from Ottawa says that the British Commission which has been inquiring into the possibility of obtaining a supply of pit props or mining timber in Canada has returned from Newfoundland, to which it paid a visit. It will shortly leave for British Columbia to investigate the situation there. From what members of the commission state it is probable that the greater part of the required supply will be obtained in Newfoundland, which is naturally advantageously situated, while a considerable quantity is expected to be secured in British Columbia, from whence it will be shipped to England via the Panama Canal.

Hundreds of inquiries have been received by the trade and commerce department from Canadian lumbermen as to the prospects of supplying pit prop timber. It is pointed out that only such timber as is near salt water will have an opportunity of capturing the market.

◆

Wondrous is the strength of cheerfulness, past all calculation in its power of endurance—a spirit of sunshine.—Carlyle.

Many gilt-edged securities, particularly Colonial government bonds, are quoted in London fully ¼ per cent. above the minimum prices fixed by the Stock Exchange committee, and there is also a demand for new securities.

FARMERS AND BUSINESS MEN

Alberta's Co-operative Farmers' Company—Review of the Past Year's Operations

Four hundred farmer delegates, representing several thousand stockholders of the Alberta Farmers' Co-operative Elevator Company, were told at the company's annual meeting the other day that nearly 4,000,000 bushels of grain had been handled by the various elevator companies controlled by the organization, that the spread in the price of grain had been materially reduced, that the price had been steadied by the operation of the elevators, and that the operations showed a substantial profit.

President Tregillus stated that after the annual meeting a year ago, the construction of the 42 elevators was pushed with vigor, but it was impossible from different causes to get them all completed in time to catch the whole of last season's grain, but all were finished as early as possible and were operated with the 10 purchased elevators, making a total of 52 points.

"We handled through these elevators up to June 30th, 3,774,381 bushels of grain. Had we been able to complete all the elevators in good time we estimated 5,000,000 bushels of grain would have been handled," he added.

Company's Financial Agents.

"The government has assisted us in building our houses, and has shown a sympathetic and helpful interest in the development of the company. We are largely indebted to the Grain Growers' Grain Company for their help in financing; they have been, and are, our selling and financial agents, and have at all times been ready to help us, putting their experience, as well as their great organization, at our disposal.

"For this season's work 26 new elevators have been added at an average cost of $8,265, one house being of 50,000 bushels capacity; the others are 35,000 bushel houses, although they will probably care for 40,000, as have some of those built last year when required to do so.

Work of Co-operation.

"The establishment and work of this company has given a great impetus to our parent organization, the United Farmers of Alberta, which is stronger to-day than ever before. This is a matter of great satisfaction, for we need that organization more than ever; it has done a great work in educating and moulding the farmers of this province, and securing for us those reforms so necessary for the true development of this great country, and I trust that none of us will consider the work of the older organization is done, because it has brought this company into existence. Let us support it and give it every opportunity of doing greater and nobler work in the future than it has ever been able to accomplish in the past.

"We have demonstrated the power of co-operation. At points where no co-operative elevators were operating, we have been shown what treatment the Alberta farmers would have received had our company not been in existence. We have farmers who have drawn their grain 20 to 30 miles to our elevator rather than sell to those close at home."

Company Handles Commodities.

The business of the company's live stock department has increased rapidly, and will be in future in charge of Mr. G. W. Johnson, of Provost. This department has also handled the operation of the co-operative purchasing department. It buys and sells commodities and supplies, selling to the farmers at prices slightly above cost. Flour, fencing material, lumber and supplies of a like nature have been handled by the department during the past year on an extensive scale, and the transactions are growing so rapidly that it is almost impossible for the live stock department to handle it and do justice to the business.

◆

Put into business some of the energy lost in Kaiseric vituperation.

The transfer by Mr. Osias Lamoureux to Mr. Henry Pierre Pelletier of Lot 331 St. Lawrence Ward, Montreal, with the buildings thereon known as Nos. 478 to 496 St. Lawrence Boulevard, lying between St. Catherine and Ontario Streets; also Nos. 371 to 385 Clark Street, involving $200,000, has been registered.

WORLD'S BIGGEST BUYERS

Where the United States Sells—Canada is One of Its Best Customers

Four countries other than the United States offer each a market for over a billion dollars worth of foreign products —the United Kingdom, Germany, France, and the Netherlands. Great Britain buys 3 billion dollars' worth, about 20 per cent. of which is from this country; Germany 2½ billion, with 15 per cent. from the United States; France 1⅓ billion, of which 11 per cent. is from the United States, and the Netherlands, an important centre for the transhipment of foreign goods, nearly 1½ billion, in which United States goods figure to the extent of about 10 per cent.

Belgium's annual purchases fall just short of 1 billion in value, United States products supplying about 8 per cent.; while Austria-Hungary, Italy, Canada, Russia, India, Australia, Argentina and Japan are next in order with imports ranging from 722 million to about 300 million. These countries vary greatly, however, in the proportion of their purchases from the United States, Canada taking 65 per cent. and India 3 per cent., according to the official figures in the volume, Commercial Relations of the United States, issued by the United States Bureau of foreign and domestic commerce. As a market for United States products India is only one-third as important as Brazil, Austria-Hungary is equal to Cuba, Japan is about 15 per cent. as large as Canada, and China is only half as large as Argentina.

The introductory chapter shows the character of goods exported by Europe and the classes of goods imported by those countries which have heretofore looked chiefly to Europe for their requirements of foreign merchandise. Manufactures form 80 per cent. of the exports from the United Kingdom, 76 per cent. of the exports from Switzerland, 65 per cent. of the exports from Germany, 58 per cent. of the exports from France, and 47 per cent. of the exports from Austria-Hungary; while Canada, Central and South America, Australia, New Zealand, and South Africa—all of them important markets for manufactures—send large quantities of foodstuffs and raw materials to Europe in exchange for products of manufacture.

From the list of countries discussed in this volume, Austria-Hungary may be taken as typical of countries competing for the world trade in manufactures and Brazil as representing the great agricultural communities, in which manufactures are chiefly sold. Austria-Hungary sold in 1912 40 million dollars worth of textiles, 19 million of clothing, 21 million of metal goods, 16 million of woodenware, 16 million of glassware, 10 million of leather goods, 9 million of machinery and paper goods, wines, chemicals, chinaware, vehicles and numerous other articles in considerable amounts. The United Kingdom, Germany, Switzerland and Belgium are of even greater importance in their sales of manufactures, the details of which are also given. Brazil's imports exceed 308 million dollars' value, only 15 per cent. of which were from the United States, which takes 40 per cent. of the Brazilian exports. Automobiles, railway cars, iron and steel, cotton goods, machinery and other leading classes of manufactures are classified in the book so as to show the relative contributions of leading countries.

◆

MORE WAR CONTRACTS HERE

Contracts for the supply of 50,000 military saddles for Canada, Great Britain, France and Russia have been placed with Canadian saddlery firms from the Atlantic to the Pacific, according to a statement made by Hon. Robert Rogers. These contracts will cover an order for 15,000 saddles from France, one for 10,000 from Britain, one for 20,000 from Russia, and the requirements for Canadian uses, aggregating from five to six thousand saddles.

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

DOMINION LINENS COMPANY ORGANIZED

New Concern Tells of Advantages It Enjoys—Strong Directorate

One of the few new companies to make a bow in Canada during war time is the Dominion Linens, Limited. Prevailing conditions have been to some advantage to the company, and the mills are being pushed forward to full capacity. *The Monetary Times* is informed that the goods manufactured by the company have been well received by the retail drygoods trade in Canada. The company has orders at present for more than it can fill by the end of the year. The mills are at Guelph and Tillsonburg. The capitalization of the company is as follows:—

Stock.	Authorized.	To be issued.
7% cumulative preferred	$175,000	$125,000
Common	125,000	125,000
Total	$300,000	$250,000
Reserved for treasury purposes:—		
Preferred stock	......	$ 50,000

The cumulative preference participating shares have a par value of $100. Of the common stock issued, $20,000 will be deposited with a trustee as fully-paid and non-assessable, to be sold with the preferred treasury shares.

Assets and Liabilities.

A statement prepared by Messrs. Price, Waterhouse and Company as of August 18th, 1914, shows the following assets and liabilities:—

Assets.

	Guelph.	Tillsonburg.	Together.
Real estate	$10,000.00	$ 2,000.00	$ 12,000.00
Buildings:	54,078.37	16,708.49	70,786.86
Buildings, additions	710.60	366.65	1,077.25
Machinery and equipment .	90,085.19	21,767.38	111,852.57

			$267,683.89

Liabilities.

Accounts payable	$ 3,545.39
	$264,138.50
Total capital stock issued	250,000.00
Surplus over all liabilities	$ 14,138.50

Company has Many Advantages.

The company's prospectus gives a full history of the enterprise and details the advantages which the manufacturers of linens in Canada have over imported goods. These advantages number nine, of which not the least important are the facts that fabrics produced by Dominion Linens, Limited, have the same protection as cotton goods manufactured in Canada, the duty ranging from 17½ per cent. on towellings, hollands and crashes to 30 and 35 per cent. on the better qualities of linen goods, and that all the raw material used in the manufacture of linens comes into Canada free of duty.

The sale of the company's securities will be handled by Messrs. Ferguson and Sanson, the well-known investment bankers and brokers, Toronto.

List of Directors.

The directors of the company are as follows:—Messrs. [illegible] Forbes, Hespeler, president R. Forbes Company, Limited, manufacturers of worsted goods, etc.; R. Dodds, Guelph, Ont., president and managing director of Guelph Carpet Mills, Limited, Guelph Cotton Mills Company, Limited and Guelph Worsted Company; G. D. Perry, Toronto, vice-president the Toronto Carpet Manufacturing Company and manager Great Northwest Telegraph Company, Toronto; W. H. Bennett, M.D., Tillsonburg, Ont., president Tillsonburg Electric Car Company; D. M. Sanson, Toronto, vice-president William Neilson, Limited, member firm, Ferguson and Sanson, investment bankers; Alex. Simmers, Guelph, Ont., president board of trade, Guelph, and president and managing director Stewart Sheaf Loader Company; and J. B. Ferguson, Toronto, Ont., president Western Canada Securities Company, Limited.

◆

FARM MORTGAGE ASSOCIATION OF AMERICA

The Farm Mortgage Bankers' Association of America held a successful meeting at Chicago the other day. Many of the members were present and also a number of visitors, including Mr. C. W. Rowley, manager of the Canadian Bank of Commerce at Winnipeg, and Mr. W. Sanford Evans, of Winnipeg.

Mr. Kingman Nott Robins, treasurer of the Associated Mortgage Investors and vice-president of the Farm Mortgage Bankers' Association, writing to *The Monetary Times*, says that these gentlemen expressed themselves as in agreement with Mr. Robins, that it would be to the advantage of Canadian mortgage companies, and other lenders on farm mortgage, to get in touch with the association and determine by a careful study of their aims and personnel whether or not it would be to the advantage of these companies to become members.

Not the least interesting address at the convention was that of Mr. George E. Roberts, director of the United States Mint. He emphasized many points regarding the handling of capital to the advantage of the entire community and many economic truths that have been lost sight of in our time. Mr. Roberts addressed the New York State Bankers' Association in Ottawa last year.

Another interesting feature of the sessions was an address by Dr. John Lee Coulter, secretary of the United States Commission on rural credits, which was the basis for an informal discussion by several of the delegates. The entire problem of government supervision and assistance in the matter of rural credits is a prominent one in the United States at this time, and is securing more attention in Canada. It seems imperative that those who are familiar with this business should have all the facts in hand so that they can be given to the public in such a way as to influence public opinion along sound lines, so that legislation may not be effected which is prejudicial to the interests of the country.

The compilation of these facts is one of the chief objects of the Farm Mortgage Association of America.

◆

COMPANIES INCREASING CAPITAL

The following company in Alberta has increased its capital stock:—

White Ash Collieries, Limited, from $25,000 to $300,000.

The following company in Ontario has increased its capital stock:—

Moose Mountain, Limited, from $2,500,000 to $3,000,000.

The following companies in Prince Edward Island have increased their capital stock:—

GERMANS HUSTLED FOR TRADE

How They Did It in Jamaica—Where Canadian Business is Lacking

Leading merchants in Jamaica think that a large measure of German success in securing business is due to the long credit which they offer. This is reported by Mr. Watson Griffin, special trade commissioner, visiting the West Indies in the interests of Canadian trade. Where an English or United States house would demand cash or 30 days the German will give six months. They are often ready to give credit to merchants from whom other firms demand cash. This must not be taken to mean that they give credit indiscriminately, as it is highly probable that inquiry is first made and the amount of credit granted is determined by the result of that inquiry. But it is undoubtedly true that the Germans have offered longer terms of credit than houses of other countries.

Better Banking Facilities Required.

According to a prominent business man in Jamaica the Germans have been able to offer better terms because their banking system especially favors foreign trade. He suggests that the Canadian banks co-operate and endeavor to adopt some system whereby foreign trade could be encouraged to a greater extent than is the case at present. The Canadian export business could thereby be placed on a more certain basis and manufacturers who are at present reluctant to venture into outside trade because they know little about the financial standing of overseas houses would become more enterprising. Banks are in a better position to secure accurate information regarding the standing of merchants in British colonies or foreign countries than are individual Canadian manufacturers or merchants.

A bank authority in Kingston makes the following useful suggestions with regard to securing trade in Jamaica:—

The Canadian manufacturers and wholesale houses should ask their bankers in Canada to write their correspondents or branches in Jamaica for names of reliable wholesale or retail dealers, commission merchants, etc.; when these names are furnished merchants could then send prices, samples, etc., and at the same time ask their bankers for reports on the Jamaica firms. In this way, the reports and orders, if any, would reach Canada at the same time, and shippers could forward goods or not according to the reports. Under these present conditions it is impossible to say what the position of any firm here may be in the next three months. No shipment should be made especially where documents are to be delivered on acceptance of drafts, without first inquiring into the responsibility of the consignees.

The Merchants Exchange, Kingston, Jamaica, should be furnished with manufactnrers' catalogues and every effort should be made to advertise Canadian goods.

The Question of Invoices.

Another factor that enters into the success obtained by German firms in securing a large share of the trade with Jamaica is the care taken in making up invoices, in a form that will meet the legal requirements of the colony as well as the commercial needs of their clients. The collector of customs at Kingston states that Canadian exporters cause a great deal of unnecessary trouble and inconvenience to importers as well as to the customs department by the careless way in which they make out invoices. The Jamaican requirements with regard to invoices are as follows:—

The invoice for goods subject to duty according to value must distinctly and clearly be set forth and describe the marks and numbers of each package containing the goods detailed in such invoice; the contents of each package must also be shown and the value of each item forming the contents of the package and such values shall not be subject to any deduction on account of freight or other charges. It is also provided in cases where no separate charges are made for the outside and inside packages or receptacles containing goods liable to duty according to value, the fact that the cost of the coverings or receptacles is included in the cost of the goods shall be stated in the invoice, failing which the value of such package will be appraised and duty charged thereon according to such appraisement.

CONTRACTS FOR MANITOBA FLOUR

Contracts for supplying the 50,000 bags of flour which Manitoba is sending as a war gift to the Motherland were awarded as follows: Western Canada Flour Mills, Winnipeg and Brandon; Ogilvie Flour Mills, Winnipeg; Lake of the Woods Milling Company, Winnipeg; G. McCulloch and Sons, Limited, Souris; Leitch Brothers, Oak Lake; Hodgson and Gardner, Swan Lake; Melita Roller Mills, Melita; Deloraine Milling Company, Deloraine.

The prices in the various tenders received varied considerably, some being too high to receive favorable consideration. The highest tender received was $3.20 per bag of 98 pounds, and the highest accepted was $2.90.

The awards were made by the provincial government through a committee consisting of the prime minister, Sir Rodmond Roblin, and the minister of public works, Hon. Dr. Montague. The policy of the government was to distribute the order amongst the various mills in the province.

◆

COMMERCIAL ATMOSPHERE IS CLEARER

The Canadian Credit Men's Association has pointed out to its members that in the past two years the commercial atmosphere has been cleared, and we were never in a better position to take advantage of our great possibilities. It emphasizes four points of improvement in the general situation in Canada since 1912:—

1. Our farmers owe less money.
2. Our retail merchants owe less money.
3. Our wholesalers owe less money.
4. Retail stocks of merchandise on hand were never less.

"We have now the opportunity," says the association, "of demonstrating to the world that this country is the granary of the Empire." Canada will be called upon to supply a very largely increased amount of farm produce, and the urgent need to-day is to prepare a larger acreage for the 1915 harvest.

◆

MUNICIPAL FINANCING IN BRITISH COLUMBIA

According to the report of Mr. Robert Baird, inspector of municipalities, who has made a visit to many points in British Columbia, every endeavor is being made in the various municipalities to keep the pay-roll intact, despite the fact that rigid economy is being practised in all departments of expenditure.

Mr. Baird visited Merritt, Kamloops, Salmon Arm, and Revelstoke, thence proceeding through the Okanagan and Boundary country, inspecting 24 municipalities.

During the past six months there has been a good clearing up of unsold debenture issues in the province, in some cases of bonds which had been held two years or longer.

Mr. Baird found in these municipalities a total of $198,000 of unsold debentures, of which $110,000 was issued in one city, and $88,000 distributed amongst five others, leaving eighteen out of the twenty-four municipalities which were visited clear in this respect. These debentures mentioned are all new issues, except an amount of $17,000, and the sale of the greater part of them has been practically concluded.

A peculiar circumstance was noted in connection with the sale of a small amount, $10,000, by one municipality, a sale which was negotiated before the commencement of war. After the outbreak of hostilities, the purchasers, an United States firm, advised that on account of the statements made by President Wilson on the subject, they did not consider that they would be permitted to purchase Canadian municipal bonds, and, further, that the possibility of a moratorium being declared in British Columbia made it appear that these bonds would not be a reliable investment. They followed this advice by a telegram offering to take the securities at a price five points lower.

◆

Stick to business and renew the faith you once had.

Much of the business is still here, only it needs an extra amount of prying.

Since the declaration of war the Louis Gauthier Shoe Company, of Quebec, has turned out 32,000 pairs of shoes, and has another order on hand for 15,000 pairs.

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

GOOD REASONS FOR MUNICIPAL BOND BUYING

Why Cities Issue Them—Some of the Advantages Secured by an Investment in These Securities

The municipalities of Canada disposed of $109,600,936 debentures to investors throughout the world during the year 1913. From various sources the question often comes, "But what is a municipal debenture?" The investment house of Messrs. A. E. Ames and Company, Toronto, has issued a folder which answers this question as below:—

"A municipal debenture is an absolute promise of a county, city, town or township to pay a definite amount on a specified date, and also to pay, periodically throughout the term, interest at a stated rate.

"In form, it is self-contained. It states the exact amount that the municipality will pay the holder, and the exact date when it will be paid. When it matures, usually from one to thirty years from date of issue, it is only necessary to deposit it in the bank for collection, or present it to the issuing municipality for payment.

"Attached to each debenture are coupons representing the exact amount of the interest due at the time. Each year or half year, when an instalment of interest falls due, a coupon is cut off and either presented for payment to the municipality or it may be deposited in the bank. There is no delay or inconvenience in the collection of interest.

Investor's Rights Safeguarded.

"The contract is simple. It resembles, somewhat, a promissory note, but is much more formal and binding, in that, in addition to bearing the signatures of the officials of the municipality and the seal of the corporation, certain formal procedures are required to be taken which absolutely ensure its validity. The investor's rights, therefore, are thoroughly safeguarded.

"Debentures are issued by cities, towns, etc., to raise money for such useful and essential purposes as schools, sewers, parks, water systems, roads, fire departments, etc. They are, therefore, issued for the betterment of the municipality.

"They are secured by the credit of the issuing city or town, etc., and its right and power to levy taxes on all of its taxable property, such taxes being a first charge on all the property in the municipality. Their safety is evidenced by the fact that instances of default are practically unknown.

Are Readily Converted.

"So highly are they regarded that in normal times they can be readily converted into cash in case ready money is desired, or loans can be secured on them from banking or loaning institutions.

"Owing to their safety and the good rate of interest which they yield, municipal debentures are chiefly invested in by life assurance companies, banks, loan companies, trust corporations, trustees and executors for estates, private individuals, etc.

"Investments can usually be made in them in amounts ranging from $200 upwards and, consequently, they are available for people of even moderate means for safeguarding their carefully accumulated savings.

"It can be stated," says this company, "that from the standpoints of security, good interest return, convenience, prompt payment of principal and interest, resale and collateral for loans, there is no investment for the wealthy individual, for the person of moderate means, or for estates, etc., so satisfactory as municipal debentures."

◆

Do your part to make Normal look respectable.

As a result of the hostilities in Europe large orders for barbed wire have been placed on this continent by both England and France, several thousand tons having been contracted for in the United States for immediate delivery. It is not known whether any orders have been placed in Canada for this wire, but Canadian manufacturers have received large orders for other steel and iron products. The British government is distributing its orders to manufacturers in the Empire, as far as possible, but it has been found necessary in a number of instances to let large contracts across the border, owing to the necessity of urgent deliveries for war supplies.

BRANDON LIFE UNDERWRITERS MEET

At the monthly meeting of the Brandon Life Underwriters Association, the principal feature of the evening was a report given by Mr. H. B. Andrews, of Winnipeg, western vice-president of the Underwriters' Association. This report dealt with the Dominion convention at Halifax.

Addresses were also delivered by Messrs. C. M. Twiss and D. J. Johnston, of Winnipeg.

◆

OUTLOOK FOR GRAIN TRADE

Monetary Times Office,
Montreal, October 14th.

The opinion has been expressed by a grain authority that the grain export business will be quiet this fall, the reason for this being that England and France are said to be pretty well stocked with wheat, Russia is an exporter and Germany and Austria are closed to the Canadian trade. In former years Rotterdam was a big market for Canadian wheat, and this year, prior to the war, grain shipments to that port were unprecedentedly heavy, Germany evidently making preparations for the struggle.

◆

BUY AT CANADA'S STORE

Thousands of people in Canada are out of work. If the men and women of this country would buy Canadian-made goods exclusively, Canada would be millions of dollars richer, and all workmen would be back at work. Charity begins at home, and this is not only charity but good business.

In Toronto there are 500,000 people, representing, roughly, 100,000 families. The head of every one of these families and many of the individual members are buyers of scores of different kinds of manufactured products.

Let every citizen—man and woman—show true patriotism by promptly resolving to make Canada strong and prosperous by providing work for her sons and daughters.

This can be done, in large part, by the development of every possible Canadian resource, and particularly by demanding Canadian-made products and Canadian-made goods in the course of our daily life, states a booklet, "Wake up Canada," issued by the Toronto board of trade, which suggests that buyers all over Canada can do much to check the incoming flood of foreign-made goods. Now is the time to remember that every dollar saved to Canada is a dollar earned for Canada.

Every manufacturer and merchant should lay down this policy for his purchasing department to-day. This is his first duty in the matter.

Architects, builders and contractors can, if they will, keep thousands of Canadian workmen employed by specifying Canadian-made materials in their building specifications.

Other professional men can add to their own incomes by ensuring the prosperity of their clients through purchase of home products.

Government and municipal authorities all over Canada have it in their hands to divert a tremendous volume of business to Canadian factories, and surely it is wise as well as patriotic to give our own workmen the employment so that they will not become in any way a charge upon the community.

The demand to-morrow all over Canada for Canadian-made goods would change, as if by magic, the present depression into immediate prosperity.

◆

After-the-war sounds good and it will be good.

Nineteen-fourteen has nearly gone and some business plans for 1915 are not prepared.

Said a staunch Conservative to *The Monetary Times*:—"If a general election is forced now, it will be an outrage."

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

SPECIAL BEQUESTS IN YOUR WILL

Few wills direct the distribution of an estate in exactly the same way as the statutes in the absence of such a will. If you desire to make special bequests appoint a Trust Company your executor, thereby assuring the carrying out of the provisions of your will. Write us for booklets on "Wills."

ST. JOHN'S FINANCES SHOW SURPLUS

Real Estate, Assets and Liabilities—Average Interest Paid is Four and One-third

The city of St. John, N.B., owns in real estate, including fire stations valued at $84,107; wharves valued at $1,889,802, harbor $3,340,368, a water plant rated at $2,131,961, and a sewerage plant valued at $544,007, together with other property, $7,711,882. Against this sum it has a debt of $5,137,448, making its assets $2,574,434 greater than its liabilities.

The funded debt of the city at the end of the year 1913 was $5,060,795. Of this amount $691,500 bears interest at 3½ per cent.; $3,145,645 are 4 per cent. debentures; $679,750 bear 6 per cent., and the balance 4 to 5 per cent. interest. It will pay in interest this year $217,555 an average of a little more than 4⅓ per cent. on $5,058,195, the difference of $2,600 having matured but not presented for payment. Out of the total debt, $4,388,422, including water and market debentures, with their sinking funds, are paid out of the earnings of the several departments as it becomes due; $11,387 are paid in yearly rents from land, which leaves only an actual debt of $660,985 to be paid out of general taxation.

Valuation was Thirty-Three Millions.

In 1913 the city's taxable real estate was valued at $18,334,300; personal property $9,967,700; and incomes $4,895,300, making the total valuation $33,197,300. The tax rate for 1913 was $1.91 per $100, which made the income on the general assessment with full and special taxes, $695,063.

The city closed the year 1913 with a balance of $104,963 to its credit. This amount is made up of unexpended balances, increased revenue and the collection of back taxes.

The value of real estate, personal property and incomes has increased from year to year. The total valuation in 1913 was nearly $7,500,000 higher than in 1903. In that year the rate of taxation was $1.62, increasing to $1.98 in 1909 and 1910, since which period it has declined, and for this year the rate is $1.92.

Income has Increased.

The income from the general assessment has in the past ten years increased over $250,000 and is a little over $26,000 greater than in 1911. At the same time the number of taxpayers has increased from 11,878 in 1903 to 14,103 in 1913.

The surplus in 1913 was $104,963 as against $52,029 of the year before, and $23,383 for 1911. Of the surplus for 1913, the sum of $50,933 was carried forward to reduce the tax assessment of 1914; $25,000 to pay the Carleton water scrip debentures due in 1914, and $18,066 was placed to the credit of the water reserve fund.

BRANTFORD UNDERWRITERS OFFICERS

At the annual meeting of the Brantford Life Underwriters' Association, Mr. F. J. Reid was elected president, Mr. Donald Thorburn vice-president, Mr. L. C. Schmitt secretary, Mr. L. W. Wood treasurer, Messrs. C. H. Emmerson and F. H. Dutton advertising committee, and Messrs. W. H. Hammond, J. Burbank and L. E. Percy executive committee. It was agreed that a dinner be given at the next meeting, when Mr. Thomas Hendry, vice-president of the Dominion Association, and Mr. John Burbank, of the Dominion executive, would each give an address.

◆

Go after business and, after the war, it may reciprocate.

It's a tough job, but the ultimate result is sure and business will be better than ever in future years.

"Telephone Systems" is the title of a publication issued under the direction of Mr. F. Dagger, electrical and telephone expert of the Ontario Railway and Municipal Board. It contains copies of the Ontario telephone act and amendments to date, and extracts from the board's report for 1913.

Large orders for war material and military supplies are being placed in Canada by both the British and the French governments. An officer of the Ontario government reports that the British Admiralty is expending $500,000 through the Ontario government for a supply of evaporated apples for the use of the fleet.

DO NOT STOP WHEELS OF PROGRESS

"Stocks throughout the country are not heavy, and in the smaller places throughout Canada business really ought to be good," said Mr. B. Tooke, of Tooke Brothers, Montreal, in an interview. "The farmers never got better prices for their hay, horses, grain, etc. This money ought to circulate, and if we would all have a little more confidence, and not try to hoard money, general conditions would improve.

"Extravagance at any time is a mistake, saving money to a certain extent is most desirable, but to go to any extreme in this direction naturally stops the business wheels of progress."

MUST BE QUALITY TO GOODS

The department of trade, Ottawa, is in receipt of a communication from a leading firm of wholesale grocers, who refer to the desire of the minister of trade and commerce to urge the use of goods "made in Canada" instead of imported goods. They express a desire to deal in Canadian packed goods, but find an objection to their doing so, on the ground of irregular quality. As an instance, they cite the case of a grocer, who stated he always bought Oregon apples in preference to Canadian, as he could always depend on every box in a large shipment turning out as represented. This could not be depended upon in the case of Canadian apples. Much the same is said to apply in regard to Canadian canned fruit, when contrasted with the standard fruit of Belgian, French or United States canning—the regular quality demanded by modern customers cannot be depended upon. Against these instances they contrast the case of a sugar manufacturer, who built up a reputation by always insisting on every detail being attended to that goes to make quality. Greater attention to such details on the part of Canadian packers and canners would materially assist the department in its efforts to encourage the use of Canadian goods.

BRITISH COLUMBIA MINERAL PRODUCERS

(Staff Correspondence.)

Vancouver, October 19th.

A small stampede took place at Hope consequent on the announcement of a find a short distance from that place. Since then development has been maintained on the discovery with satisfactory results. In normal times there would be little difficulty in interesting capital in the proposition. Since it could not be sold, the locator, though of limited means started, and now has ore for shipping. Hope will now have a small mine close to its doors.

The decision of the Canadian Mining and Smelting Company at Trail to handle custom ores will be a material help. There are many small mines, and some of fairly large proportions, in the interior, which send their ores to Trail, and if the smelter did not handle them the properties would have to shut down temporarily. As it is, the aggregate production is considerable. The company is not able to continue its advances of so much on the value of the ore, but as this will be guaranteed by the Dominion government, the result will be the same.

A number of locations have been made at Kaslo during the past summer, indicating that the success of the operated properties in that part of the province is imbuing residents and miners with a feeling of confidence.

The Britannia company is making regular shipments of concentrated ore to the smelter at Tacoma.

◆

While no satisfactory explanation can be given for the strength of the grain market, it is thought in some quarters that the Imperial government is again in the market for large supplies. The consumption of wheat and flour in Europe since the outbreak of hostilities is unprecedented, and the opinion is expressed that stocks in Great Britain were not so large as was generally supposed. A member of the Montreal board of trade thinks that the British government is buying wheat for the same reason that it bought sugar—viz., to control the selling prices in the United Kingdom to the consumer.

An Individual as Executor

AN individual as executor is mortal. No matter how great his fidelity, his ability, and his experience, he is sure to die some day. In appointing a personal executor, therefore, you should not overlook the possibility that he may die before all your estate is distributed as your will directs.

A trust company is not subject to removal by death before its duties as executor are complete.

National Trust Company Limited

18-22 KING STREET EAST, TORONTO

Montreal Winnipeg Edmonton Saskatoon Regina

The Lake Superior Corporation

INCOME ACCOUNT

	June 30, 1914.	June 30, 1913.
Income derived from Subsidiary Companies	$437,880	$793,148
Other Income	10,174	12,513
	$448,054	$805,661
Interest and General Expenses (including Interest on the First Mortgage Bonds)	424,644	386,482

As will be seen from the above comparison, the income derived from Subsidiary Companies, etc., amounts to $448,054, against $805,661, whilst the Interest and General Expenses for the year ended June last amounted to $424,644, as against $386,482, an increase of $38,162. It must be understood, however, that in considering the income account of the Lake Superior Corporation it is necessary to turn to the results of the operations of the Subsidiary Companies to get at the true state of matters. In this respect we find that the income for the year ended June 30th, 1914, amounts to $2,511,345, as against $2,514,221, a satisfactory result, keeping in mind the state of trade generally for the period in question.

It is in the disposition of this income that we find an explanation of the decreased revenue handed over to the Lake Superior Corporation, and the following comparison will be of interest:—

	June 30, 1914.	June 30, 1913.
Interest on Bonds of the Subsidiary Companies and on Bank and other advances	$1,542,323	$1,101,825
Sinking Fund Payments	154,725	102,511
Discount and Expenses of Securities sold	$62,428	Nil.
Doubtful Debts and Losses of previous years	137,008	Nil.
Reserves for Depreciation and Renewals	360,902	Nil.
Paid to the Lake Superior Corporation	437,880	$793,148
Carried Forward	25,546	516,735

It will be seen at a glance that interest charges have increased by $440,498, whilst on the other hand, taking into account the fact that the balance of undistributed profits for the year 1913 has been carried entirely to reserves, there is an increase in the amount reserved under all categories for the year ending 30th June last of $121,363. The sums set aside in respect of Discount and Expenses of Securities sold, Sinking Fund Payments, Reserves, etc., for the year under review amount to no less than $740,609. From this it is evident that a conservative policy, and a policy looking to the future is being pursued.

THE LAKE SUPERIOR CORPORATION—BALANCE SHEET.

as at 30th June, 1914.

NEW INCORPORATIONS

Fewer Companies Receive Charter—Large Wood Fibre Company—Two Co-operative Concerns in Toronto

Canada's new companies incorporated this week number 21. The head offices of these companies are located in three provinces. The total capitalization amounts to $3,260,000. The largest company is:—

The Beaver Wood Fibre Company, Limited, Thorold, Ont.	$1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	3	$1,200,000
Ontario	10	1,900,000
Quebec	8	160,000
	21	$3,260,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

London, Ont.—The Signry, Limited, $10,000. C. E. Marley, G. M. P. Weekes, H. C. Quick.

Bridgeburg, Ont.—Central Casket Company, Limited, $40,000. M. Kimball, H. R. Morwood, C. A. Hamlin.

Brantford, Ont.—Brant Patriotic and War Relief Association. W. T. Henderson, J. H. Spence, L. Harris.

Pembroke, Ont.—The Pembroke Curling Club, Limited, $20,000. E. Behan, A. E. Cockburn, F. W. Cockburn.

Thorold, Ont.—The Beaver Wood Fibre Company, Limited, $1,000,000. H. E. McKitrick, G. R. Kappele, H. Riley.

Vancouver, B.C.—Standard Holding Company, Limited, $100,000. United Bakeries, Limited, $800,000. Gageweigh Scale Truck Company, Limited, $300,000.

Port Arthur, Ont.—James Horrigan Company, Limited, $100,000. J. Horrigan, W. T. McEachern, A. J. McComber. Newaygo Company, Limited, $200,000. W. H. Russell, H. Keefer, N. E. Towers.

Toronto, Ont.—Householders' Co-operative Stores, Limited, $400,000. F. Watts, N. H. Treadwell, D. E. Dean. Campbell's Whitewear Company, Limited, $40,000. F. Brown, F. Campbell, L. Sinclair. Copeland Medicine Company, Limited, $80,000. A. C. Thompson, H. W. Fielden, W. H. Jackson. The First Russian Congregation of Rodfesolium Ansekiev. M. Bossin, I. Mosten, H. Cohen. Toronto British Co-operative Society, Limited, $10,000. A. E. Crate, R. Cassels, A. B. Law.

Montreal, Que.—Lachaine, Limited, $20,000. A. Lachaine, W. Matthews, A. Decarie. Decarie, Limited, $20,000. A. Decarie, J. Gregoire, O. Lavoie. Bonsecours Hotel, Limited, $20,000. J. Coupal, N. Gauthier, J. David. Micks Hotel, Limited, $20,000. D. Leroux, S. Moquin, M. Patenaude. Union Cafe, Limited, $20,000. A. Decarie, V. Leveillee, A. Berthelette. Cafe Themis, Limited, $20,000. A. Thouin, J. B. Fafard, G. Thouin. Hotel Frontenac, Limited, $20,000. J. A. Faust, A. Poupart, A. Laurendeau. C. Vidricaire, Limited, $20,000. J. C. Vidricaire, E. C. Vidricaire, F. Dufort.

Application is being made for letters patent for the following companies:—

Tryon, P.E.I.—The Garden Island Silver Foxes and Furs, Limited, $48,000. A. B. Reid, W. T. Wellner, L. T. Lea.

O'Leary, P.E.I.—Niagara Prince Edward Silver Black Fox Company, Limited, $90,000. J. S. Bell, L. Stetson, H. Aibing.

Coleman, P.E.I.—The Empress Silver Black Fox Company, Limited, $144,000. L. G. Dalton, M. A. Oulton, J. E. Dalton.

Summerside, P.E.I.—The Canada Auto-Pneumatic Pump and Machinery Company, Limited, $35,000. J. A. Van-Tilburg, F. A. Johnston, D. A. Pickering.

FIRE INSURANCE IN BRITISH COLUMBIA

One Hundred and Eleven Companies Registered to do Business in Pacific Province

At the end of 1913 there were 111 companies licensed to transact the business of fire insurance in British Columbia under the provisions of the "British Columbia Fire Insurance Act," seventy-seven being Dominion licensees and 34 provincial licensees, according to the report of Superintendent of Insurance Gunther.

The following companies ceased to do business in British Columbia during 1913: Sovereign Fire Insurance Company of Canada, with Dominion license, and these provincial licensees on the dates given and for the reasons appended: American Union Fire Insurance Company, March 27th, 1913; dissolved, decree of Court of Dauphin County, Pennsylvania. Note.—June, 1914. The unearned premiums payable to British Columbia policyholders have been collected from the Maryland Casualty Company under bond of that company filed by the American Union Fire Insurance Company in lieu of deposit. Franklin Insurance Company, August 27th, 1913; British Columbia business reinsured in Globe and Rutgers Fire Insurance Company. Greenwich Insurance Company, October 21st, 1913; merged with Pacific Fire Insurance Company. Imperial Underwriters' Corporation; business acquired by Imperial Underwriters' Corporation of Canada. Los Angeles Fire Insurance Company, October 3rd, 1913; British Columbia business reinsured in Home Insurance Company. National General Insurance Company, Limited, March 31st, 1913; British Columbia business replaced with other companies; company now in liquidation. Teutonia Insurance Company, May 24th, 1913; British Columbia business reinsured in Hartford Fire Insurance Company. Western Empire Fire Insurance Company, December 31st, 1912; British Columbia business reinsured in Los Angeles Fire Insurance Company. Western Union Fire Insurance Company, June, 1913; British Columbia business reinsured with Pacific States Fire Insurance Company.

New Companies During the Year.

The following companies commenced business in the province during 1913: With Dominion license— British Colonial Fire Insurance Company, Germania Fire Insurance Company, Imperial Underwriters' Corporation of Canada, Mount Royal Assurance Company.

With Provincial license—Austin Fire Insurance Company, Boston Insurance Company, British Crown Assurance Corporation, Limited, British Dominion General Insurance Company, Citizens' Fire Insurance Company (Charlestown, W. Va.), Commonwealth Fire Insurance Company, Mechanics and Traders Insurance Company, National Benefit Life and Property Assurance Company, Limited, Nord Deutsche Insurance Company, Northwestern Insurance Company, Limited, Pacific States Fire Insurance Company, Vulcan Fire Insurance Company (Oakland, Cal.)

And the temporary license issued to the Canadian Phœnix Insurance Company has been continued. During the year the Equitable Fire and Marine Insurance Company, which commenced business in British Columbia in 1912, obtained a Dominion license.

Premiums and Losses.

Net premiums amounted in 1913 to $3,790,094 and net losses paid $1,043,254. The gross amount of policies, new and renewed, of thirty-three companies with provincial licenses was $36,791,650; gross premiums written, $675,847; net amount at risk December 31st, 1913, $26,097,135; net losses incurred during 1913, $112,032; net losses paid, $91,775; premiums written less return premiums, $557,852; paid for reinsurance, $125,437; net premiums, $432,415.

◆

Mr. E. M. Saunders, treasurer of the Canada Life Assurance Company, has been elected a director of the National Trust Company, to take the place on the board made vacant by the death of the late Mr. E. W. Cox.

Mr. John M. McIntyre, of Montreal, has been elected a member of the Quebec Bank directorate, replacing the late Mr. W. A. Marsh, of Quebec. Mr. McIntyre is a director of a number of Montreal companies, including Montreal Tramways and the Windsor Hotel.

ST. JOHN IS THE OUTLET

Development of New Brunswick's Natural Resources Make It an Important Port

The resources of New Brunswick are discussed in an interesting article in an attractive volume issued by the city council of St. John. The book deals with the finances, commerce, business and industries of the city and gives some important facts and figures respecting the province also. Mr. James H. Frink is mayor of the city, while Mr. R. E. Armstrong is the secretary of the board of trade. Largely under his supervision the useful volume was prepared.

One of the greatest industrial resources of the province is lumber. Out of the 10,000 square miles of forest owned by the government, only 6,500,000 acres are under license. The wood consists largely of spruce, although beech, ash, butternut and other hard wood varieties are plentiful, with the exception of oak, which is only found in a few localities and very limited. The existence of the large spruce forests, and the profits they offered, has been one of the chief causes of the backward state of agriculture in the past, and the present low price of farm land. The farmer, instead of developing the land, would spend the winter and part of the spring and fall in the woods working in the big lumber camps, and while earning money there the farm was necessarily neglected. Of the lumber cut, some 400,000,000 feet is exported largely to Europe, West Indies and South America—Great Britain being the principal market.

Fisheries and Mines.

The New Brunswick fisheries are noted. The Bay of Fundy cod is equal to any taken in American waters, and the salmon in the rivers flowing into the Bay of Chaleur is famed for its superior flavor. The other fish, like haddock, shad, mackerel, herring, pollock, striped bass and gaspereaux, besides oysters, are plentiful. Nearly 20,500 persons are employed in the industry, the output of which is some $5,000,000 yearly.

The mineral resources of the province have scarcely been touched. Besides the deposits of nickel, antimony, copper, manganese, iron and other ores, it has large areas of coal-bearing rock, granite quarries and natural gas fields. At Grand Lake more than 50,000 tons of coal are mined yearly, and the product is of high quality. Other fields are being discovered, and it will be only a question of time when the large area connecting the coal fields of Nova Scotia with those once occupying the basin of the St. Lawrence Gulf, will be thoroughly tested to determine the size of the coal deposits.

Granite, Gas and Oil.

The supply of granite is inexhaustible. It exists in different colors, and is of a high quality. The gray granite of Spoon Island is used extensively for paving and building purposes, while the granite of St. George, when polished compares favorably with the famous red granite of Aberdeen, Scotland. The Bay of Fundy and North Shores are rich in deposits of freestone from which grind and scythe stones are made. Limestone has been quarried near St. John since the days of Champlain. The situation of the quarries is such that the manufacture of the lime, which is of the highest character, is comparatively cheap. There are also large undeveloped areas of limestone in Carleton and Kings County, recent analysis having proved it to be of very light quality.

Westmorland and Albert counties have productive natural gas and petroleum fields. Gas is found at a depth of 800 to 2,000 feet, and the present output is more than 50,000,000 cubic feet of gas and 40 gallons of oil daily. The gas is already used for fuel and power in the city of Moncton and surrounding towns, and the near future will see it used in St. John if the supply is as great as is claimed for it.

Growing of Potatoes.

To the agriculturist the province offers great possibilities. The land along the rivers is extremely fertile. No better potatoes can be raised anywhere. In fact New Brunswick potatoes are in especial demand for seed in New England and Ontario. The yield in the St. John valley has been as high as 400 bushels per acre, and the average of the yield for the province has been a little over 170 bushels to the acre, which is exceptionally good. The wheat yield per acre was a little over 20 bushels and oats about 30 bushels, which, when compared with the average grain yields of Canada and the United States, is high.

On account of the climatic conditions, the dairy products are of the highest quality. Dairy farms have proved paying investments in the past, and with the demand for New Brunswick butter and cheese increasing it should be more profitable in the future; and that the demand is increasing is borne out by the fact that the products of creameries have increased from $197,524.01 in 1905 to $245,401.16 in 1912. Horses, cattle, swine and poultry can be raised to great advantage. New Brunswick is importing more horses than it sells. The cattle, swine and sheep killed, do not nearly supply the home demand; and the latter, especially, can be reared advantageously on land unfit for cultivation.

Outlet for Development.

To all this development the city of St. John is the natural outlet, by reason of its location at the mouth of the St. John River, its constantly increasing railroad terminal facilities, and its position as the winter port of Canada. St. John as the one important city in the province at the head of deep water navigation and the most populous, with all the rich country at the back of it and to which it is the natural outlet, to say nothing of its export relations to the other parts of the Dominion, is bound to remain its leading commercial, financial and shipping centre, and must in time become one of the largest cities on the Atlantic coast.

◆

CONTROLS PACIFIC COAST NEWS-PRINT

(Staff Correspondence.)

Vancouver, October 19th.

Vancouver's exports for September show that the Powell River Company is shipping large quantities of paper, mostly news-print. Nearly all the newspaper trade along the coast as far south as Los Angeles is controlled by this company, which has its plant at Powell River going day and night.

The British Columbia Sulphite Fibre Company, which has a large plant at the head of Howe Sound, ships chemical wood pulp in a dry state. This is sent to the Orient and to the United States, and last month an item of 500 tons was shipped to Buenos Ayres. The activity of the pulp and paper plants on this coast may mean increased production along this line. There is fine pulp wood to be found all the way from Burrard Inlet to Prince Rupert, as well as on Vancouver Island.

When the British Columbia government lifted the embargo on the export of timber, protest was made by loggers because of the export tax, which, they declared, practically nullified the order. Further concession has now been made by the government with a view to assisting the loggers to dispose of surplus product in the United States. Logs scaled in the coast district in September amounted to 66,500,000 feet, an increase of five million feet over the amount for August. This does not indicate an increase in logging because of the export being allowed, since only logs cut previous to the granting of the order can be shipped out of the country. It is expected that the output of logs will not be as large in the present month.

The plant of the Canadian Western Lumber Company on the Fraser River will be running two-thirds capacity at least most of the winter. In addition to orders on hand, it has secured part of the business for the government harbor works at Toronto. The government demand for Canadian timber has meant good business for mills in this province, particularly on Vancouver Island.

THE BOND BUYER

The Authority on Municipal Bonds
25 West Broadway, New York, N.Y.

ALBERTA'S LOAN

The raising of a $3,000,000 loan by Alberta will be upon the credit of the general revenue fund of the province for a term of 50 years, the rate of interest not to exceed 4½ per cent. The estimates provide for the appropriation of two of the three millions, the odd million being to cover any emergency that may arise during the course of the year. In the terms of the resolution the $3,000,000 is for "the covering of any debt of the province, for paying any floating indebtedness of the province, for the carrying on of public works authorized by the legislature, and for the satisfaction or discharge of any obligation of the province."

◆

MILLING COMPANIES' RESULTS

Monetary Times Office,
Montreal, October 21.

Comparing the net profits of the two milling companies, which have issued their reports for the year ended August 31st, 1914, in the case of the Lake of the Woods Milling Company, a decline of $41,738 is shown. In the case of the Ogilvie Company, an increase of $5,209 is shown. The following comparisons between the profit and loss statements of the two companies for the year recently completed are of interest:—

	Ogilvie.	Woods.
Net profits	$581,944	$507,939
Bond interest	132,000	99,000
After fixed charges	$449,944	$408,939
Preferred dividend	140,000	105,000
Left for common	$309,944	$303,939
Common dividend	200,000	168,000
Balance	$109,944	$135,939
Written off	......	100,000
Surplus for year	$109,944	$ 35,939
Profit and loss surplus, August 1, 1913	472,523	853,135
Profit and loss surplus, August 31, 1914	$582,467	$889,074

The capitalization of each company continues the same, the Ogilvie Company having $2,000,000 of 7 per cent. preferred stock and $2,500,000 of common upon which 8 per cent. is being paid.

The capital of the Lake of the Woods Company is somewhat lower, being $1,500,000 7 per cent. preferred and $2,100,000 of common, upon which 8 per cent. is being paid.

It was generally thought that the mills would make a better showing than was demonstrated in the annual statement, because the price of wheat and flour showed a sharp advance in the last month of the fiscal year. War broke out at the beginning of August, and for the next four weeks the mills had more orders on hand than they could possibly deliver. In all instances the price showed a sharp advance on previous quotations. The mills, however, had a small stock of wheat on hand, to take advantage of the higher price for wheat. Certain it is that stock on hand in the case of both mills at the end of the month showed a considerable decrease as compared with the previous year, the Ogilvie inventory being reduced by $46,000 and the Lake of the Woods by $359,000. It is generally assumed that the business of the year up to the beginning of the war was behind that of a year ago and that the month of August was barely sufficient to bring the Ogilvie profits ahead of last year's and insufficient in the case of the Lake of the Woods. Both companies, however, amply earned their dividends and sufficient remained to carry forward large sums to surplus.

◆

South Africa and Australia appear to present the best overseas markets for our goods just now. The head of a large Montreal concern states that South America would in all probability prove a profitable market for Canadian goods were conditions normal, but at the moment the financial position of the Latin-American republics is such that manufacturers would encounter great difficulty in receiving payment for any orders which they accepted.

STUDYING THE BUSINESS MAP

The sentimental mercury in the business barometer is rising. Canada is realizing that while the adverse facts must be faced and problems solved, there is business to be done now and business campaigns to be planned for "after the war." It is realized, too, that the Dominion, with its immense productive powers and possibilities, is in a comparatively fortunate position during the great struggle in which the British Empire is engaged. The business map is being studied as well as the war map. *The Monetary Times* is printing the best war story every week from the financial and business view points. *The Monetary Times* has a reputation for enterprise, reliability and optimism in the right place, a reputation built upon forty-seven years of publication.

◆

INFORMATIVE BOOK FOR EXPORTERS

Ocean Traffic and Trade is at this time a prominent topic in Canada's commercial realms. Together with the preparations proceeding for the development of natural resources and increased production, routes, rates and transportation methods are being analyzed in the attempt to secure Canada's share of Germany's lost trade. Mr. B. Olney Hough, editor of the American Exporter, has written a comprehensive and timely volume on this subject. Among the chapters are those dealing with Getting Export Trade, Developing Export Trade, Foreign Credits and Collections, Foreign Trade Opportunities, Marine Insurance, and Merchant's Marine.

Stress is laid on the matter of handling foreign freight, explaining complexities that arise in connection with the handling of world traffic.

A number of photographs and actual forms are included in the volume, together with an insert map of trade routes. Important and practical facts relative to the conduct of foreign business, which are little known, such as exporting in bond, securing the benefit of the draw-back, etc., are practically handled.

Ocean Traffic and Trade. B. Olney Hough. $3, postpaid. La Salle Extension University, Chicago.

◆

GRAIN GOING TO GERMANY

Monetary Times Office,
Montreal, October 21.

According to a well-informed grain man, the view is generally held in grain circles that Germany is importing wheat and other foodstuffs through Norway, Sweden and Denmark. He says:—

"A great many people imagine that Holland is the only country through which grain has been shipped into Germany and that as a result of the vigorous action of the British government, German imports of foodstuffs have been entirely cut off. It is my belief, however, that a considerable part of the grain shipped from the United States of late and destined for Norway, Sweden and Denmark, has been delivered in Germany."

So far as the export business from Montreal is concerned, local grain men report that the situation is practically unchanged, notwithstanding the fact that the problems of exchange and insurance on regular liners are pretty well cleared up. It is now claimed that the main difficulty is regarding space, the shipping companies only selling this on condition that their liners are not requisitioned by the government. While there are a good many tramp vessels available, the insurance rates on these are almost prohibitive. On a cargo in a good-sized tramp the insurance is about $3,000, while insurance on the larger boats runs as high as $5,000.

There is plenty of room in the elevators at this port owing to the confusion which exists in the export business.

BUYING CANADIAN SUGAR BEETS

A receiving station for sugar beets has been established at Petrolia by the Michigan Sugar Company, of Cosswell, Michigan. One car a day is being despatched to the company.

CONIAGAS MINE CUTS BONUS

The Coniagas Mines, Limited, has declared the regular dividend of 6 per cent. on the capital stock of the company, payable November 2. The company has been paying 6 per cent. and a bonus of 3 per cent. a quarter for some time now, but the bonus is omitted. Last year in November it paid the regular 6 per cent., a bonus of 3 per cent. and a bonus of 5 per cent. In November, 1912, the payment was the regular 6 per cent., a bonus of 3 per cent., and another bonus of 3 per cent., a total of 12 per cent. With those two exceptions every other dividend since May, 1912, has been the regular 6 per cent. and bonus of 3 per cent., or 9 per cent. in all.

STOCK EXCHANGES' LIMITED TRADING

No details of transactions in securities are being given by the committee of the Toronto Stock Exchange. Only a limited amount of business is being done.

The following official circular has been sent out by the governing committee of the Montreal Stock Exchange:—

"Members of the exchange desiring to buy securities for cash may send a list of the same to the committee, two members of which will be in the committee room daily (Saturdays excepted) from 11 to 12 noon.

"No offers to buy out at less than closing prices will be considered.

"Members of the exchange desiring to sell securities, but only in order to relieve the necessities of themselves or their clients, may send a list of same to the committee. No prices less than specified will be considered."

The minimum prices set down by the committee are mostly those prevailing at the closing of the market on July 28. To inter-listed stocks, that is, stocks dealt in on the New York and London markets, the minimum prices established outside will be applied.

WHAT THE BANKS ARE DOING

That no person is unable to secure credit from the banks for legitimate business purposes, was the statement made by Mr. J. McEachern, of Winnipeg, superintendent of branches for the Bank of British North America, in an interview with the Saskatoon Phœnix. There was not a business man or a farmer in western Canada who requires money for a proper business purpose who cannot secure it from the banks, he added.

"Not a single bank, to the best of my knowledge," he continued, "anywhere in western Canada has reduced the lines of credit extended to firms at the beginning of the year, and I do not think that business men will find any trouble in renewing their credit at the beginning of another year.

"The men who are finding fault with the banks at the present time are the men who want to get money to pay on real estate or for some other purpose of that kind," he continued "The banks will not loan them money for such purposes. That is not the function of banks. Banks exist for the carrying on and development of the industries of a country, and it would not be fair for men who are doing legitimate business for the banks to allow their money to be tied up in real estate at the present time.

"The shipments of grain so far this year are away ahead of the shipments to this date last year," he stated, "and it is the banks that are supplying the money which makes this possible. No one needs to be afraid of suffering any real hardship through inability to secure his usual credit from the banks."

Nineteen fifteen is the year that somebody will buy all we can grow.

Gananoque industries have booked large war orders and are making use of night and day shifts.

COMPANIES LICENSED

The following companies have been licensed to do business in Ontario:—

Crystal Oil Company, Limited, of Alberta, capital, $40,000. Foley Brothers, of Minnesota, U.S.A., capital, $40,000. The Port Arthur (Ontario) Buildings, Limited, of Great Britain, capital, £50,000.

FORGET BUYS CANADA POWER

A Montreal dispatch says that Sir Rodolphe Forget is the real purchaser of the plant of the Eastern Canada Power and Pulp Company, and that Mr. A. E. Bradbury, of Ottawa, was acting for him in buying the plant recently for $200,000, after the company had been in liquidation for some time. Bradbury Brothers are the Ottawa correspondents of Forget and Company, and Sir Rodolphe was formerly president of the Eastern Canada Power and Pulp Company. Charles Donoghue, of the Donoghue Construction Company, is a close associate of Sir Rodolphe's, and it is thought that the plant will probably be operated by this company.

COMPANIES REGISTERED

The following companies have been registered to do business in Alberta:—

Insurance and General Agency, Limited, of Winnipeg. Haynes-Lengenberg Manufacturing Company of St. Louis. Mordo Oil Company, Limited, of Spokane. Morleyville Oil and Gas Company, Limited, of Spokane. Hamblin and Brereton, Limited, of Winnipeg. The Lanarkshire Albertan Company, Limited, of Edinburgh, Scotland.

The following companies have been registered to do business in Saskatchewan:—

Tuckett, Limited. The Railway Centre Park Company, Limited. The Famous Players Film Service, Limited. Pioneer Grain Company, Limited.

The following companies have been registered to do business in British Columbia:—

Stewart-Warner Speedometer Corporation, of New York. Lamont, Corliss and Company, of New York.

The following company has been authorized to do business in Quebec:

The Independent Pneumatic Tool Company.

REGINA'S STOCK YARDS

The Regina municipal stock yards are proving a success, the farmers throughout the province having readily taken to the stock yards to market their live stock. Only two stock days have yet been held, but both were successful. It is worthy of note that the number of live stock for sale on the second market day was considerably in advance of those for sale on the first day, and the indications are that still greater demands will be made on the stock yards. Buyers are always on hand and exceptionally good prices have been realized on live stock marketed up to the present. No matter how large the shipments of live stock, the Regina stock yards will be well able to take care of them. The large, warm stock barns at the exhibition grounds will be used for housing purposes. The horsemen in Saskatchewan are finding a ready sale for their horses, as the provincial government are buying a large number to be given to the British Government for use in the war. Buyers are scouring the province for suitable animals, and about 22 high-class horses have been shipped to Regina prior to being sent abroad.

A general election now would be as welcome as a small dog biting the heels of a soldier in action.

The proverbial biscuit this week goes to a United States bond house which made an offer for a Canadian municipal issue, turned it down when the war broke out, because of President Wilson's ban on loans to belligerents, of possible "international complications," and of the rumor that British Columbia might declare a moratorium; and a few days later made an offer for the bonds at five points lower.

ALBERTA'S NINETEEN-FIFTEEN ESTIMATES

Alberta's estimates for 1915, and supplementary estimates of nearly half a million dollars for 1914, to provide for war contingencies, such as gifts to the British government and the Belgian relief fund, have been tabled by provincial treasurer Mitchell. The principal estimates for 1915 provide a revenue of 8,952,062, including a balance from 1914 estimate at $1,323,299. The expenditures will total $7,775,095, including $725,000 public debt.

MONEY IN CHINA

Paper money first appeared in China in the Tang dynasty, in the year 806 A.D. This fact is pointed out by Wen Pin Wei, Ph.D., of Columbia University, in a monograph, "The Currency Problem in China." Mr. Wen also writes about a great many equally curious facts. The country's metal currency had fallen into so bad a state that in some parts of the kingdom it consisted of nothing but iron. The government began to issue paper certificates of deposit in exchange for coins. After a time this paper money was suppressed, because it was driving the metallic money out of circulation. But not long afterward it came in again, and at intervals ever since China has had paper money in various forms. Chinese greenbacks made their debut in 1032 A.D., when the government began to issue currency notes on its own account. For a time these were well secured by specie, but in the war with the Tartars the government yielded to the temptation to make large issues as a means of raising revenue, and the currency became heavily depreciated. China, in fact, has been through every experience of inflation and resumption, and suffers even now from a depreciated paper currency.

◆

HOW THE GOLD POOL IS WORKING

The committee having the matter in charge has issued the first general call for 25 per cent. of the banks' subscription to the $100,000,000 gold fund, recently organized in the United States. The various clearing house centres throughout the country will now see to it that this instalment is forwarded to New York. The New York banks have already furnished approximately their quota of this 25 per cent., in the $10,000,000 of gold shipped by the committee to Canada a few days ago, says the Wall Street Journal.

The initial shipment of $10,000,000 gold was more or less in the nature of an experiment, to see how the plan would work. For that reason only the New York banks were asked to contribute at first. The fact that a general call has now been sent out for the first instalment, indicates that the committee is satisfied with the effectiveness of the operation. Presumably exchange has been sold against all the $10,000,000 already shipped.

It must be admitted that so far the offering of exchange from this source has not had the effect of "breaking" the exchange market, for sterling continues to rule comparatively high. But it must be remembered that $10,000,000 worth of exchange is not a very great factor in face of the present shortage in the supply and until exchange is being made in larger quantities from commercial sources, any spectacular break in the market is not to be looked for. Moreover, the movement of gold through the operations of a pool is designed for just such an object—namely, not to demoralize the exchange market, but to furnish an orderly and restricted offering of exchange.

After October 18 the partial lifting of the English moratorium should have some appreciable effect on exchange, since it is the demand for remittance in this connection that is partly responsible for the prevailing strength of the market.

◆

A Vancouver man, after examining the August bank statement, concludes that $533,000,000 of Canadian money is "tied up in the favored business of stock trading." He also concludes that bank loans of $400,000,000 have been made to stock brokers in Canada! This information he sent to a local paper, which actually printed it. If the Vancouver man could see Montreal and Toronto stockbrokers scratching for lunch, he would probably knock off a few figures and get down to facts.

HOW SERIOUS IT IS

If there is a profit on the right side of your ledger you should buy life insurance—if on the wrong side—you must.

Your love should provide your widow with the same comforts as your wife. Insure to-day.

Insurance is a serious matter, so are all the other great things in life that are worth while, but it is never so tremendously serious as when, through sickness or disability, you are physically unable to get it.

Life insurance seems to be more and more a question of duty. As a means of protection it is equal to a government bond. "It does not die and cannot default."—Montana Life News.

◆

HOW GERMANY DOES IT

From a trade paper in South America, published in Spanish, comes a clipping of comparatively recent date, showing rules for German consumers to follow to help the Fatherland in commerce. It is of especial interest in view of the made-in-Canada campaign. The rules, translated into English follow:—

German consumer, remember always that your duties enjoin upon you the observance of the following:

First—In your purchases, no matter how small, do not lose sight of the interests of your countrymen and the Fatherland.

Second—Do not forget that when you purchase a foreign product, even though you spend only a penny, you diminish in so much the fortune (prosperity) of your Fatherland.

Third—Your money should benefit only German merchants and German workmen.

Fourth—Do not profane the German land, the German house, the German workshop or factory with the presence or use of foreign machinery or tools.

Fifth—Do not permit the use on your table of foreign meats or greases (condiments) that might cause a prejudice against German cattle or its products; or which, moreover, might put your health in jeopardy, not having been examined by the German sanitary police.

Sixth—Write on German paper, with a German pen, and dry your German ink with a German blotting paper.

Seventh—In your dress goods use nothing but German cloths and buy German hats only.

Eighth—The German flour, the German fruits, and the German beer are the only ones that produce German strength.

Ninth—If you do not like German malt coffee, drink only coffee harvested in German colonies, and if you prefer chocolate or cocoa for your children, see that this chocolate and this cocoa are exclusively German articles.

Tenth—See to it that foreign propaganda do not interfere with the strict observance of these wise precepts. Let it be with you a firm and earnest conviction, that, no matter what may be said, the best products—the only ones worthy of a citizen of great Germany—are the German products.

The trade paper referred to explains that this decalogue was published by a chamber of commerce in Berlin and that millions of circulars printed as above are being distributed.

Buy a barrel of apples.

Slide over the war names pronunciation and get down to business.

Little information regarding the orders for military clothing and accoutrements placed by the Canadian government is obtainable, but it is understood that some large orders went to Montreal. The Mark Workman Company is said to have received an order for military clothing amounting to a large sum, and the Semi-Ready Company received orders for 8,000 pairs of trousers, of which 4,000 have already been delivered, and all the uniforms for the medical corps and for the artillery officers.

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

CANADA'S WHEAT AND GRAIN CROPS

Wheat Will Total 158,000,000 Bushels—Root Crops Were Good

A bulletin issued by the census and statistics office, Ottawa, gives provisional estimates of the yield and quality of the principal Canadian grain crops, and also the condition of root and fodder crops, as compiled from reports of correspondents made on September 30th.

In general, the reports confirm the statement issued last month, the average yields per acre being about the same as then estimated for wheat, but being somewhat less for oats, barley and flax.

The total yields for Canada of the principal grain crops in bushels are as follows: Wheat 158,223,000, oats 311,426,000, barley 34,491,000, rye 2,258,000, peas 3,537,000, beans 823,400, buckwheat 9,159,000, flaxseed 7,533,000, mixed grains 16,458,000, and corn for husking 14,732,000.

Percentage Condition.

The average quality of the grain crops at harvest time, measured upon a percentage basis—100 representing grain well headed, well filled, well saved and unaffected to any appreciable extent by frost, rust, smut, etc.—is for the whole of Canada as follows: Wheat 78, oats 79, barley 76, rye 82, peas 75, beans 82, buckwheat 81, mixed grains 90, flax 64 and corn for husking 80. For wheat, barley and oats the figures are considerably below the excellent record of last year, the averages this year being reduced by the prolonged drought in the Northwest provinces. In these provinces the points for the quality of wheat, oats and barley range from 48 for barley in Saskatchewan to 78 for spring wheat in Alberta.

In the Maritime provinces both the yield and quality of the grain crops are excellent.

Root Crops Were Good.

The condition of root crops at September 30th is for all Canada about equal to last year, being 75 per cent. of a standard or full crop for potatoes, 78 per cent. for turnips, 80 per cent. for mangolds, carrots, etc., 89 per cent. for sugar beets, 90 per cent. for fodder corn and 76 per cent. for alfalfa. In Manitoba and Saskatchewan the condition of the root crops is low owing to the drought. In Northern Alberta, where the season was of more normal character, these crops make a fair showing.

During September conditions were generally favorable for harvesting and threshing, and in the Northwest provinces a great deal of threshing was completed by October 1st. There are indications that the amount of fall ploughing this year will be greater than usual.

◆

NO INSURANCE FOR AN ENEMY

Amendments to the two Royal proclamations issued respecting trade with the enemy have been issued by the British government. They relate chiefly to the making of insurance or re-insurance contracts with the enemy for his benefit.

It is forbidden to make or to enter into any new marine, life or other policy or contract of insurance or re-insurance with or for the benefit of an enemy; to accept from or give effect to any insurance of any risk arising under any policy entered into for the benefit of the enemy before the outbreak of war; and in particular as regards contracts or re-insurance current at the outbreak of war in which an enemy is interested, to cede to or accept from him any risk arising from the policy of insurance entered into after the outbreak of war.

When an enemy has a branch locally situated in British, allied or neutral territory carrying on an insurance or re-insurance business transactions with such branch will be considered transactions with the enemy.

MUST NOT IMPAIR CREDIT

Vancouver Board of Trade Makes Suggestion as to Legislation that is Required

"Canada has borrowed where she could get a dollar, and the best thing she has to-day is her credit, and it was the duty of everyone to see that this credit was not impaired," was a remark at a recent meeting of the Vancouver board of trade.

The following recommendation was discussed: "That it would be a grave mistake to interfere with the legal responsibilities of parties to mortgages and sale agreements beyond what is considered absolutely necessary under existing war conditions, to prevent undue advantage being taken of worthy mortgagors and purchasers. It is recognized that large sums are invested here on behalf of British and European investors, and that their interests, as well as those to whom advances have been made, must be regarded.

Loan Companies Are Fair.

"After enquiry the board of trade committee is satisfied that there is a general disposition on the part of loan companies to deal considerately with mortgagors who are paying interest and making bona fide efforts to meet their obligations, but cases have been reported where mortgagees and vendors have been inclined to take advantage of their position to the injury of worthy mortgagors and purchasers.

"The committee, therefore, recommends that there should be no general moratorium in respect of mortgage or real estate agreement obligations; that legislation should be passed to provide that foreclosure or sale powers shall not be exercised during the period of twelve months next ensuing, where interest, taxes and insurance have been paid;

Order of Court First.

"That where interest, taxes and insurance, or any of them, have not been paid, foreclosure proceedings may be instituted, but power of sale shall not be exercised without an order of court having been first obtained;

"That discretion shall be given to the court in proceedings for foreclosure and exercise of power of sale to extend the period allowed for redemption and payment upon reasonable grounds being shown."

◆

INTERESTING DECISION AT SASKATOON

The well-known and progressive financial house of J. S. Carmichael, of Saskatoon, has been fortunate enough to secure a decision which must be of more than ordinary interest to investors in the West. The following paragraph taken from the Saskatoon Phœnix gives the particulars:—

"The Northern Trust Company as assignee on an insolvent estate were obliged to give some attention to lots in plan E. R. sold prior to assignment for taxes. So soon as the attention of Mr. Carmichael had been drawn to the circumstances he intimated to Mr. Jordan and others interested that it was the intention of the assignee to exercise its power of redemption on the ground that the transfer had not been confirmed by the judge, or in other words that the status quo so far as the registration of the lots under reference was concerned, was to be maintained. That option was duly availed of and there the matter could not fail to take end, so far as the city or any other provincial or conditional intermediary was concerned. If there be anything unusual, it is simply in the conditions which prevail the wide world over and to which Saskatoon or no other western city is any exception. It is not a question of specific time, but the simple absence of confirmation of proceedings, and until that important point had emerged the chances were all in favor of the title holder."

CANADIAN NICKEL USED AGAINST BRITISH

Sixty Per Cent. of Canada's Output Went to Germany, Says T. H. Wardleworth

The development of the chemical industry in Canada was discussed by Mr. T. H. Wardleworth at a meeting of the Canadian section of the Society of Chemical Industries at Montreal last week. This subject has come into special prominence owing to the large business which Germany has hitherto done in the export of chemicals. Mr. Wardleworth said that owing to the war Canada had been compelled to look largely to the United States and England for her chemical supplies, formerly brought from Germany, and that the time was opportune to consider whether such supplies could not be produced in the Dominion, so that no future war could interfere with her chemical industry. To this end he said it might be necessary to ask Government to aid the chemical industry.

Germany Captured Trade.

He pointed out how, by the active aid of the Government, the co-operation of men of science and industrial concerns, the German people had been able to capture a large proportion of the chemical trade of the world. It was especially necessary, he said, that in Canada there should be closer co-ordination between men of science and industrial concerns. The trouble had hitherto been that in prosperous times manufacturers thought they did not need scientific assistance, while in bad times they considered they could not afford it, but in Germany this collaboration had been going on for a century with splendid results. This was shown by the fact that since 1907 Germany had produced chemical goods to the amount of £750,000,000 sterling, equal to the British national debt, while 200,000 persons were employed, most of them skilled operatives at high wages.

Our Nickel to Germany.

Mr. Wardleworth showed how, owing to government apathy, such industries as the analine dye business had been taken from Great Britain by the Germans. In the same way, although Canada produced most of the nickel in the world, 60 per cent. of her nickel products had gone to Germany to be refined, and this to-day was being used in armor plate and projectiles for use against Great Britain. There were many other valuable mineral products in Canada which were being sent abroad for treatment, and Mr. Wardleworth asked why these were not being finished in Canada, so as to build up industries here. This might be aided by the government in many ways, especially by allowing free denatured alcohol for industrial purposes, and for the use here of fusil oil, which was now exported, and came back as "banana oil."

◆

WHEN THE SILVER BULLET IS SPENT

Paul Leroy-Beaulieu, the French economist, estimates that each of the greater belligerents is spending an average equivalent to $200,000,000 monthly.

In presenting these figures to the Academy of Moral and Political Science at Paris, he said that he considered it probable that the war would continue for seven months from August 1. Accordingly, the five greater powers engaged were committed to an expenditure of $7,000,000,000. Each of the smaller states, including Japan, will have expenses of from $600,000,000 to $800,000,000 to meet. The war will cost the fighting powers roughly from $9,000,000,000 to $10,000,000,000.

◆

Not an uninsured man can truly say, "I do not need life insurance."

Twenty-three cars made up the special freight train which is carrying the shipment of British Columbia's gift of canned salmon to Montreal on the way to Great Britain. The cars contained 23,305 cases of the salmon. Each car had banners announcing that the contents represented British Columbia's gift to the United Kingdom, and that it was one of the leading products of Canada's Pacific coast. Each can bore a special label bearing the arms of the province of British Columbia, and stating concisely what its contents were, as well as tables showing the food values of the salmon prepared by canning as compared with other foods.

CANADA'S LOANS THROUGH BANK OF ENGLAND

Arrangement is Made by Dominion Government—The Monetary Times' Forecast Proves Correct

To complete the financial arrangement of the Dominion for the current fiscal year, the Dominion government has made arrangements to obtain from the Bank of England advances required from time to time for naval and military purposes. Later, when market conditions permit, a Canadian permanent funding war loan will be issued and the temporary indebtedness liquidated. The Canadian permanent loan will be made at such time as will not conflict with any issue or issues of the Imperial Government. This can be made the subject of an understanding between the Chancellor of the Exchequer and the Canadian Minister of Finance.

The negotiations between the Minister of Finance and the Bank of England have been carried out through Hon. Gorge H. Perley as the representative of the Dominion Government in London.

Will Help Exchange.

For purposes other than war expenditure the London market remains closed to permanent issues.

Hon. W. T. White, minister of finance, says that the completion of the financing of the war expenditure for the present fiscal year was not only most gratifying in itself, but as having a direct bearing upon the important question of exchange between Canada and Great Britain. If Canada were obliged to raise, by domestic issues, any substantial part of our war expenditure, the funds now available through our banks for the credit needs of Canada would to that extent be diminished to the serious detriment of the entire community. The cash condition of the Dominion treasury continues strong, large credit balances being maintained both in Canada and in London.

Highly Beneficial Effect.

Discussing the arrangement, Mr. Frederick Williams-Taylor, general manager of the Bank of Montreal, said:—

"The highly disadvantageous financial feature of the war, so far as Canada is concerned, has been the sudden deprivation of British capital to which we had become accustomed.

"The announcement by the Government that they have been offered opportunities of financing their extraordinary requirements will obviously have an offsetting and highly beneficial effect on the whole Canadian situation."

By Way of Loans.

It is a matter of interest that *The Monetary Times* is the only paper, financial or otherwise, in either America or Great Britain, to forecast the loan noted above. The arrangement was predicted in the columns of *The Monetary Times* of September 25th.

Of the $50,000,000 war appropriation, $35,000,000 at least is expected to be expended by March 31st, 1915. The special war taxes will bring an extra revenue, estimated at $7,200,000. The new legislation regarding Dominion notes will give the government $15,000,000. As the remainder of the sum is to be raised by way of loans, apparently $27,800,000 will be obtained as occasion arises, through the Bank of England—that is, if the total of $30,000,000 is expended.

◆

FIVE ISSUES OVERSUBSCRIBED

The Bank of England on Wednesday received tenders for treasury bills amounting to $75,000,000. This was the fifth loan of a similar nature and amount. All have been oversubscribed.

◆

If Germany's war loans could have better success, it might help the Kaiser. We suggest the following commission of financial experts well known in Canada:—Messrs. H. Pollman Evans, J. W. Moyes, Laurence Rosewald, J. F. Spence, F. H. Malcolm and Allan Haynes.

BRITISH GOVERNMENT AND SUGAR

Imperial Authorities Obtained Temporary Control of the Cane Sugar Market

Mail advices dated October 9th, quoting a London authority, and printed by Financial America, of New York, show that the British government was an important factor in the war-time sugar market. "By contracting for 900,000 tons of raw cane sugar at an average price of about £20 per ton, representing a sum of £18,000,000," says a letter, "the British government has obtained control of the cane sugar market for a sufficiently long period to ensure that consumers in Great Britain will be able to fill their requirements on favorable terms until the conclusion of the war is within sight, this being the object aimed at by the authorities. The transaction is without parallel in the history of the trade, and the British government has shown its ability not only to grasp the points of the unprecedented conditions which now prevail in the sugar market, but also to deal with them in a business-like manner.

Holding the Scales.

"In effect, the authorities are merely holding the scales even between the producing interests, the refiners and the consumers; that is to say, while the government has incurred liabilities to the extent mentioned, ministers are also sure of an immediate sale of the refined article whenever they are ready to put it on the market. They could charge almost any price they liked if their object were to make a profit, but this, needless to say, is not the case, and, subject to refining and other charges, consumers will derive the whole of the benefits arising out of an operation which is designed to prevent the retail price of sugar from rising to a level beyond the means of the humbler classes.

"The opinion is unanimous that the transaction is calculated to materially benefit the West Indies, where sugar-growing was at one time the principal industry, while it is still produced there in large quantities. Mauritius should also benefit from the stimulus which has been given to the production of the canes, while Cuba and the Dutch East Indies will also assist in meeting the sudden restoration to popular favor of tropical sugar. It is for us to remember, however, that in maintaining moderate prices for sugar the government has not only conferred a great boon upon the less well-to-do classes of this country, but has also achieved an excellent stroke of business on behalf of some of the various portions of the Empire. We learn on high authority that Germany is proposing to organize a powerful combination with the object of excluding this country hereafter from the beet sugar market, but this infantile policy will probably cause little apprehension in the United Kingdom, seeing that there is not likely to be much difficulty in obtaining all we require from other sources."

How Prices Rose.

Discussing the unique action by the British government, the London Financier says: "Germany and Austria, on whom this country had been dependent for about two-thirds of all the sugar consumed, became suddenly closed as sources of supply. If speculators had been allowed a free hand they could have forced prices up to a prohibitive level. As it was they managed to raise the price of granulated sugar from 15s. per cwt. to 42s. in London and 59s. 6d. in Scotland. In a week the average wholesale prices were trebled, with the result that the consumer was threatened with having to pay 6d. per pound or more for sugar which he had been accustomed to get for 2d. per pound. The Government acted promptly and decisively. They stopped speculation by approaching the leading refiners and arranging with them that the whole body of refiners should stand aside from the market for raw sugars, leaving it free for the operations of the Government. The latter became the sole source of supply at a fixed price, which involved the sale of refined products to dealers also at a fixed price, the difference between the two prices being no more than sufficient to allow a fair profit on manufacture. The stocks of sugar now at the disposal of the Commission have been mainly obtained from Java, Mauritius, Cuba and British Guiana at about double the prices ruling before the war."

The British government has prohibited persons in the United Kingdom and the British dominions to import sugar made by an enemy or in an enemy country.

PAISH MAY VISIT OTTAWA

Noted Authority, for British Treasury, is in America to Help Solve Problems

Sir George Paish, who recently resigned as editor of the London Statist to assist the British Treasury, has been invited by the minister of finance, Hon. W. T. White, to visit Ottawa before he returns to England from the United States. His advice and assistance are sought in connection with Canadian financial relations with the British Treasury and the London money market.

Cotton Crop and Exchange.

Sir George is accompanied by Mr. Basil B. Blackett, a high official of the British Treasury. This week they are conferring with United States treasury department officials at Washington and bankers and financiers in New York and elsewhere in regard to establishing a basis of exchange between the United States and England. Sir George said that he was in America at the invitation of the Secretary of the Treasury.

"While I am in America," said Sir George in an interview, "I expect to investigate the situation here, so far as the handling of the cotton crop and its financing is concerned, as well as the exchange situation. England is vitally interested in the cotton situation here.

"We shall discuss the whole financial situation with Treasury officials at Washington and New York financiers and clearing house officials. I am not aware of any plan for the establishment of a gold clearing house in America; in fact, we have no specific plan, but we hope to arrive at some definite conclusion after our conferences."

Sir George and Mr. Blackett said that they thought the British moratorium would expire, as arranged, on November 4th, but some plan might be devised whereby the London Stock Exchange might be reopened.

London is Normal.

"Financial conditions in London are now practically normal," Sir George said. "I consider that we are ready to weather any storm, and we do not expect any trouble when the moratorium expires. There is much gold in London at the present time, and the Government will protect those who are unable to pay their debts which are due on November 4th."

While it is expected that the London Stock Exchange will reopen in November, the committee will probably insist upon an absolutely cash minimum price list method of trading. The majority of the Stock Exchange members do not expect or wish to re-enter the house until the end of the war is in sight, and a resumption of business on the usual basis is held to be impossible until that time.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 16th:—

Trethewey Silver Company Mine, 58,360; Peterson Lake Silver Company Mine, 61,360; Casey Cobalt Silver Company Mine, 39,780; City of Cobalt Mining Company, 85,920; McKinley-Darragh-Savage Mine, 85,240; Cobalt Townsite Mine, 69,430; Dominion Reduction Company, 84,000; Penn-Canadian Mine, 96,950; total, 581,040 pounds, or 290 tons. The total shipments since January 1st, 1914, are now 29,958,663 pounds, or 14,979 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

FINANCING THE WAR

How the Nations Are Doing It—What Will Be the Cost?

The money markets are being kept so busy financing the war that there is little room for everyday issues. By spring, Canadians under arms will probably total 100,000. The daily cost of maintaining such an army will be about $250,000, not counting the cost of equipment, etc. The war may cost Canada during the next 12 months, should it last so long, at least $100,000,000. Canadian financing, however, is being achieved with great success.

French "Baby" Bonds.

French papers state that the government is to issue a war loan embracing Treasury bonds in denominations as low as 100, 200 and 1,000 francs. "These bonds," writes the London Economist's Paris correspondent, "are sure to be readily taken up. Hundred-franc notes can hardly be quoted; in a few days they will probably pass into currency as 100-franc notes, a more convenient and portable form of wealth than the assets which many people had hidden in their houses at the time when a siege was feared."

The war, one English financial critic notes, has lasted 66 days, and the government has borrowed for short terms altogether £75,000,000. There remains, therefore, of the vote on account £25,000,000. He adds:—"In other words, before Christmas time the government will have to apply to Parliament for a fresh vote. The probability is that the cost will increase rather than diminish, because we have already an army of about a million of men, and probably, before the spring, will have increased to a million and a half."

Cost of the War.

On the basis of the French and English official data regarding the daily average costs of the war to those governments to date, a minimum estimate was given recently, of $30,000,000 expenditure per day, by all the combatants combined. The London Economist, using another basis of estimate, reckons the daily outlay at $50,000,000. It says:—

"According to a Swiss computation, there were in Europe at the end of August about 20,400,000 men actually under arms. At the beginning of October Germany (on the same authority) had under arms 27 army corps of her regular troops and an equal number of reserves, making a total of 54 army corps—say, 2,160,000 men. Of these, 24 army corps were in France, six in Belgium and Alsace, 13 in East Prussia, and 11 between Thorn and Cracow. There are, in addition, assumed to be 1,500,000 Landsturm and volunteers serving in the interior, while 600,000 fresh recruits are reported to be in training sufficiently advanced for them to be ready for service in November.

Even the Neutral States.

"Even the neutral States it was estimated, had mobilized more than 2,000,000 soldiers on a war footing. For each soldier, including initial and consequent expenses, ten shillings per day is usually counted in an estimate. This gives a total daily war expense in Europe of over ten millions sterling. Of this Germany would provide for some £2,200,000 per day, Austria, for £1,600,000; Russia, for £2,100,000; and France, for £1,600,000. Even Switzerland was then spending some £60,000, and Holland probably £100,000."

The Economist's estimate brings the assumed daily average close to the highest European estimate published before the war, which was $54,000,000, but with Italy also assumed to be at war.

Oct. 14	493,900	593,700	— 98,800

◆

HAS BERLIN MARKETED C.P.R. SHARES?

A letter from Amsterdam published in the New York Evening Post, gives some rather interesting details of how Berlin has succeeded in marketing Canadian Pacific Railway shares in London and New York, notwithstanding the stringent regulations which have been put into force to prevent German selling at the expense of London. The letter in part says:—

"Arbitrage business is not quite as dead in this country as one might suppose; only instead of being carried on between Amsterdam and New York it is being done between Berlin and London, and works out as follows:—Our firms here went short of stock in London, borrowing the stock there for immediate delivery. They subsequently bought the same stock in Berlin, this stock being shipped from Berlin to Amsterdam, and then from Amsterdam to London; where it was used for returning the borrowed stock and obtaining the proceeds of the previous sale. The proceeds were then transferred from London to New York and used there for German purchases of American goods. Some of these transactions have been done with such margins as to leave a profit of more than 2 per cent. for the Dutch middleman. The transactions have probably totalled £600,000. I understand several New York firms have done the same transaction. These transactions were handicapped through the restrictions imposed upon trading in London. They were done principally in Canadian Pacific shares, and resulted in a decline of several points and in a sympathetic decline of the whole American market. The London Stock Exchange authorities got so alarmed that they have now put up the closing prices of July 30 as minimum prices. But although these transactions are thereby greatly hampered in stocks, they are merrily going on in bonds where they are carried in Dutch and especially in New York names."

◆

The grouch in Canada is a cynic, maybe out of a job, and certainly out of his element.

England is struck by the manly, confident bearing of the Canadian troops, none of the business funks being in line.

The Great West Saddlery Company, Winnipeg, has secured a large contract from the government for the supply of army saddles.

ALGOMA STEEL CORPORATION

Pig Iron Production Well Maintained — Net Earnings — List of Securities

The output of the Algoma Steel Corporation, Limited, the principal subsidiary of the Lake Superior Corporation, was as follows for the fiscal year ended June 30th, 1914, compared with the previous year:—

	1912-13. Tons.	1913-14. Tons.
Pig iron	326,073	311,904
Steel rails	280,343	325,080
Merchant mill material	26,295	15,576

Pig iron production was well maintained, and the rail mill output exceeded that of any previous year. On account of the smaller demand for merchant mill material, the output from the merchant mills was less than for the previous year.

The water power department continues to show good results. It was intimated in the previous report that the directors had in view the enlargement of the power canal, and now that the International Joint Commission has given its decision on the respective water power rights of Canada and the United States, it is expected that outstanding questions as to the rights of the company will be speedily settled, so as to enable progress with the development in question to be made.

Ore of Good Grade.

The company's mines in the Michipicoten district are operating to full capacity, and are producing ore of a satisfactory grade, part of which is being used in the blast furnaces, the remainder being sold in the open market. As anticipated in the last report, Magpie Mine commenced shipments of ore in May.

Throughout the year, capital expenditure has been curtailed as far as possible. Unforeseen expenditure occurred through the collapse of part of the ore dock at the Sault and the consequent loss of an ore bridge, last winter. The existing battery of open hearth furnaces is being added to by the construction of two additional furnaces, bringing the capacity of this plant up to 20,000 tons of steel ingots per month. The outlook is somewhat uncertain, the demand for steel products has fallen off, and money stringency, owing to the European situation, is operating as an adverse factor. In view of this and of the continuing necessity for outlay upon the older plants and properties, the directors have not on this occasion paid anything to the Lake Superior Corporation by way of dividend on the preference stock.

Net Earnings Were Good.

The net earnings from operations totalled $1,762,110 and the dividends and interest on investments $172,856, making total net earnings of $1,934,965. The following deductions were made from this sum: (1) on purchase money mortgage 5 per cent. bonds, $290,000; (2) on first and refunding mortgage 5 per cent. bonds, $700,000; (3) on three-year 6 per cent. notes, $48,650; (4) on debentures of city of Sault Ste. Marie, $9,800.72; (5) on bank and other advances, $190,363.76. The surplus for the year was therefore $696,151. This was divided as follows:—Appropriated for reserves, depreciation, renewals etc., $480,552.91; doubtful debts and losses of previous years, etc., $136,086.36; amount written off in respect of discount and expenses of securities sold, $62,428.26. This left a balance carried forward of $17,083.80.

The company did very well considering the prevailing conditions. New lines of manufacture will probably be made in the near future.

Securities and Directorate.

The securities of the Algoma Steel Corporation appear in the balance sheet as follow:—

Capital stocks		$25,000,000
Common stock	$15,000,000	
Preference 7% cumulative	10,000,000	
	$25,000,000	
Bond issues		$22,232,500
Purchase money 5% bonds		$ 5,800,000
First and refunding mortgage 5% bonds: Authorized issue	$30,000,000	
Amount outstanding	$20,148,000	
Less: Pledged as security for repayment of three-year notes and temporary loans	6,148,000	
		14,000,000
Three-year 6% gold notes		2,432,500
		$22,232,500

The directorate is composed of the following gentlemen:—Messrs. J. Frater Taylor, Sault Ste. Marie, Ont., president; W. K. Whigham, London, England, vice-president; W. C. Franz, Sault Ste. Marie, Ont., vice-president; Herbert Coppell, New York, N.Y., vice-president; W. E. Stavert, Sault Ste. Marie, Ont.; Thomas Gibson, Toronto, and D. C. Newton, Montreal, Que.

◆

DEATH OF MR. J. BICKNELL

Mr. James Bicknell, K.C., a prominent Canadian solicitor, senior partner of Bicknell, Bain, Macdonell and Gordon, barristers, died at his home at Toronto. The late Mr. Bicknell was born in London, England, in 1862, and came to Canada ten years later. He was educated at Hamilton Collegiate Institute, and practised in that city from 1884 to 1894. Since then Mr. Bicknell has been in Toronto, and in 1902 he was made a K.C. Mr. Bicknell was elected a Bencher of the Ontario Law Society in 1906, and re-elected 1911; he was a member of the Senate of the University of Toronto. He was joint author, Bicknell and Seager's "Division Court Act" and Bicknell and Kappele's "Practical Statutes."

◆

POWER DEVELOPMENT ON PACIFIC COAST

(Staff Correspondence.)

Vancouver, October 19th.

Civic officials and aldermen were the guests of the British Columbia Electric Railway Company, when an inspection was made of the power plant on the north arm of the inlet. Much work has been done, but, being removed from ordinary routes of travel, people are not generally aware of the extent of the development. Figures of the Lake Buntzen plant are: Total capacity, 85,500 horse-power; length of No. 1 power-house, 300 feet; length of No. 2, 200 feet; transformer equipment designed for 60,000 volts; area of Lake Buntzen, from which comes the water to drive the plant, 500 acres; area of Lake Coquitlam, 3,075 acres, this being connected with Lake Buntzen by a tunnel, 12,775 feet long; Coquitlam dam, 655 feet wide, 100 feet high, 1,200 feet long; storage capacity equal to 57,000,000 kilowatt-hours.

The motorship Jutlandia, of the Danish East Asiatic Company, has been substituted for the Tongking to follow the motorship Malakka, now about a month out of Copenhagen. This line of boats will make their way via the Panama Canal, and regular calls will be made at Victoria. In the homeward service the boats will return via the Canal. Another big liner to go by the direct route to Europe is the Dean of Airlie of the Royal Mail service, which is now on her second trip to this coast.

◆

Mr. F. W. Stobart, purchasing agent for the Imperial Government, recently in Ottawa, has instructions to place orders with Canadian firms for sweaters, shirts, socks, gloves and other miscellaneous articles, and to ascertain further what articles in addition may be economically supplied by Canada. As a result of war contracts which will be placed in Canada from the other side of the Atlantic many important industries throughout the Dominion will be in a position to keep their men in steady employment during the coming winter. The value of such contracts is estimated at $30,000,000.

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100.00 invested has produced all the way from $127.00 to $193.00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

FIRE AGENT CRITICIZED

Insurance agents who try to persuade their clients to over-insure for the sake of extra commission were criticized by Mr. Rodolphe Latulippe, fire commissioner of Montreal, during a hearing of evidence regarding the fire which, on October 12th, burned out the flat occupied by William Lee, also known as William Hickey, at 450 Ninth Avenue, Rosemount. According to the evidence of Lee and his wife, an agent of the Stanstead and Sherbrooke Mutual Fire Insurance Company had persuaded Lee to insure his personal property for $400, though both witnesses admitted that the value of what they had insured did not exceed $300.

"I have no doubt that the witness was genuine in his statement," said Mr. Latulippe, after hearing Lee's evidence. "In such cases the insurance agent is generally to blame, and we must hear what this agent has got to say."

Mrs. Lee, who was first examined, said that she and her husband had gone to a theatre on the evening the fire occurred, and that on their return they had found their flat burned out. The value of the furniture was about $80, but the total value of the goods lost was about $300, Mrs. Lee said.

Lee told how the insurance agent had persuaded him to over-insure his property by saying that it was not worth while to take a policy for less than $400. The agent had added, Lee said, that he would probably not be burned out for two or three years and that he might have more property then.

After Mr. Latulippe had commented on the methods employed by the insurance agent, witnesses were called to give evidence regarding the fire which had destroyed the house of Mr. Marcel Tremblay, 11th Avenue, Rosemount, on October 13th. The evidence of the different witnesses was corroborated and showed that the three families who occupied the house, all of them being related, had gone out to visit a brother of Mr. Tremblay's on the night of the fire. Two stoves had been left lighted. The value of the property destroyed, according to figures given by the witnesses, greatly exceeded the amount of insurance.

---

*Including loans to municipalities.

The above were the principal changes during September in the statement of the chartered banks. A close analysis of the figures reveals a continuance of the stability of the Canadian banking position. It reflects naturally a period of comparatively dull business, a result of the trade depression—which was well under way before the war—and of the war itself. Taken as a whole, however, the statement is very satisfactory, and shows that there need be no apprehension as to Canada's banking situation.

The most notable features of the statement are the maintenance of a large sum of savings on deposit; an increase of $9,000,000 in demand deposits, and a decrease of $10,000,000 in current loans in Canada, which is reduced to about a loss of $5,000,000 by a corresponding gain during the month in loans to municipalities. In addition, foreign loans, both current and call, have been reduced considerably, the former by 12.6 per cent. and the latter by 7.2 per cent. The call loans abroad, chiefly in New York, have been reduced from $125,000,000 in July to $89,000,000 at the end of September, a reduction of $36,000,000 in two months. This is an effective reply to the recent statement of Mr. W. F. Maclean, M.P., that Canadian call loans abroad could not be brought back to Canada in a time of crisis.

Call loans in Canada were increased by nearly $1,000,000, probably in connection with the resumption of limited trading on the Canadian stock exchanges. Circulation made a gain of approximately $6,000,000 or 5 per cent., reflecting the financing of the crop movement. Deposits by the Canadian banks in the central gold reserve against excess note circulation amounted to $10,950,000 in September, a new high record.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1913—September	$[illegible]	$[illegible]
October	[illegible]	71,118,255
November	[illegible]	[illegible]
December	[illegible]548	72,[illegible]
1914—January	[illegible]	71,248,242
February	[illegible]	[illegible]
March	[illegible]	[illegible]
April	[illegible]	[illegible]
May	[illegible]	[illegible]
June	[illegible]	[illegible]
July	[illegible]	[illegible]
August	[illegible]	[illegible]
September	[illegible].404	[illegible]

Current loans in Canada, when municipal loans are included, show a decline during September of about $5,000,000. Deducting municipal loans the current loans in August were $837,000,000, and in September $827,000,000, giving a decline during September of $10,000,000 in that account. These loans are still higher than they were in any month between last November and April, although they are about $33,000,000 less than a year ago. Considering the sharp readjustment in economic conditions generally during the past year, the current loan account has suffered comparatively little. Domestic call loans were higher in September than in any month since February. This would seem to indicate that the banks are lending their assistance to a limited degree in straightening matters in stock exchange circles, both among brokers and their clients.

(Continued on page 8.)

T. C. BOVILLE

Deputy Minister of Finance.

SEPTEMBER BANK STATEMENT IS GOOD

(Continued from page 5.)

The following table shows the expansion of loans at home and abroad, during the past four years:—

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1910	$668,976,522	$40,190,240	$62,428,576	$103,534,884
1911	749,007,607	35,587,127	67,717,991	93,517,076
1912	859,341,193	39,440,472	75,205,261	112,767,036
1913	903,717,013	46,402,913	70,047,291	86,639,411
1914	870,853,494	41,347,231	70,063,414	89,521,589

While current loans here are considerably less than a year ago, they are $9,000,000 in excess of those in September, 1912, the year of remarkable activity, and they are no less than $200,000,000 greater than they were four years ago, in September, 1910. Current loans abroad have fluctuated only about $7,000,000 in the past five Septembers. Call loans in Canada are slightly higher than a year ago, but $5,000,000 less than in 1912. Call loans abroad have, as stated above, been reduced sharply in the past two months, and will probably be below the 1913 figures in a few weeks' time.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1913—September	$381,737,513	$621,249,585
October	389,856,507	621,511,207
November	384,486,046	625,803,150
December	381,375,509	624,692,320
1914—January	339,811,339	635,135,955
February	337,516,505	640,927,130
March	345,590,642	646,143,604
April	350,515,903	653,679,223
May	340,748,488	663,945,753
June	355,006,229	663,650,230
July	346,854,051	671,214,125
August	338,984,418	659,399,151
September	348,284,206	658,401,501

Those few who anticipated a run on deposits, in order to finance during strenuous times, have proved poor prophets. Demand deposits increased in September $9,000,000 or 2.7 per cent. Only twice since December last has this account been at a higher mark than in last September, and on those two occasions, but slightly higher. The after notice deposits, generally regarded as savings, showed no tendency in September to continue the reduction commenced in that account during August. The decline in the account was less than a million dollars during the month.

The deposits record for the past five years for the month of September is given in the following table compiled by *The Monetary Times*:—

September.	On demand.	After notice.	Total.
1910	$273,520,461	$545,630,667	$ 819,160,128
1911	313,584,893	577,591,045	891,175,938
1912	374,368,917	640,536,652	1,014,905,569
1913	381,737,513	621,249,585	1,002,987,098
1914	348,284,206	658,401,501	1,006,685,707

Despite trade depression and war times, total deposits still exceed $1,000,000,000. Besides, last month they were $3,000,000 greater than a year ago and only $9,000,000 less than in September, 1912, the year when making deposits was a pretty general habit. The total deposits are considerably greater than they were in either 1910 or 1911. Both the demand and after notice deposits make good records.

Loans to municipalities were increased in September by $5,000,000 or 11.7 per cent. These loans are $7,000,000 greater than a year ago, this being an increase of 18.3 per cent. The following table shows the course of this account during the past year:—

Month.	Bank loans to municipalities.
July—1913	$43,121,384
August	41,310,281
September	37,465,383
October	37,846,369
November	35,173,817
December	30,518,573
January—1914	29,301,620
February	30,372,854
March	31,890,843
April	30,168,812
May	33,689,577
June	37,260,571
July	36,372,334
August	39,664,534
September	44,338,873

Loans to provincial governments were increased to $6,042,854, a gain of about $4,000,000. Municipal and provincial government securities are probably being deposited by the banks at Ottawa in connection with the recent special banking legislation. This, it will be recalled, permitted the Dominion government to issue Dominion notes to such an amount as was necessary against securities deposited by the bank and approved by the minister of finance.

Deposits in the central gold reserve against excess note circulation were increased by nearly $7,000,000, the total being $10,950,000. This is the highest amount on record since the reserve was established in July, 1913. Nine banks had deposits to their credit in September, the figures comparing with those of the two preceding months as follows:—

	September.	August.	July.
Montreal	$ 1,500,000	....	....
Nova Scotia	1,500,000	$1,000,000	$ 800,000
Royal	3,250,000	2,250,000	1,750,000
Standard	200,000	....	....
Ottawa	300,000	....	....
Hamilton	200,000	....	....
Union	2,100,000	....	300,000
Merchants	1,000,000	....	....
Nationale	900,000	900,000	800,000
Dominion	....	....	500,000
Provincial	....	....	250,000
Totals	$10,950,000	$4,150,000	$4,400,000

Several of the banks apparently prefer to issue notes above the paid-up capital limit, by the central gold reserve method.

The circulation of the banks' own notes rose to $120,000,000 in September, an increase of about $5,000,000 during the month, and of $25,000,000 in August and September. The banks' holdings of specie, which increased sharply in August, declined less than a million dollars in September and were $23,000,000 higher than at the end of July. The financial measures approved by the government in August, providing for an increase of about $15,000,000 in the amount of Dominion notes which may be issued on the general credit of the government, and for advances of Dominion notes on approved securities, apparently account for the largely increased amount of these notes held by the banks.

Altogether, the September bank statement is a document which sounds the keynote of confidence in Canada, its institutions, its resources and its people.

FEDERAL AND PROVINCIAL INCORPORATION

The Privy Council, in a decision announced this week, upholds the power of the Dominion government to incorporate companies which may operate throughout the country. This denies the right of the provincial governments to restrict the operations, in the various provinces, of a company which has a Dominion charter. That is a commonsense decision. When a company obtains a Dominion charter, it should be allowed to do business throughout the Dominion without having to run the gauntlet of nine sets of provincial regulations. A certain loss of revenue may be sustained by the provinces, but the gain which should come as a result of the decision, in the facilitation of business, should more than offset the pecuniary loss. While the provincial and federal governments have been discussing their respective rights as to company incorporation, they have clogged the business wheels and have made it difficult for companies to do business in Canada.

The Monetary Times has every respect for provincial rights, but thinks that the present company laws of Canada are unsatisfactory. It would be far better to have one company law for the whole of the Dominion. The Privy Council decision may bring that about. And it is time, anyway, for provincial governments to look for new sources of revenue instead of working the old ones to a shadow.

◆

What would happen if a prospectus, say of an asbestos company bond offering, should pop up its head just now?

One day governments will appoint editors for their blue books. Any publishing house that issued valuable volumes in such hodge-podge style would be bankrupt within a month.

MORE ABOUT THE FARM PROBLEM

Discussing the contention of *The Monetary Times* that farm life has not been made sufficiently attractive, the Peterborough Review quotes from our article as follows—

"In short, farm life is not attractive. The farmer cannot afford to make it attractive to his help, because the price gap tends to prevent. We must burnish the attractions of the farm. The rural depopulation will then be lessened and some of the good stock which has drifted to the cities will return to the land."

Our contemporary adds: "By price gap is meant the distance between the grower and the consumer that the goods of the former must traverse. It is true that this transition of goods might be improved a great deal, but a reference to actual farm production seems to us to show plainly that the farmer can afford to make it attractive. It is not a case of money or production, of selling or marketing, so much as management and attitude of mind. The actual production of one hundred acres of land, the prevailing acreage of farms, is capable of producing an income sufficient for quite comfortable living. The trouble is few farmers understand financing as business men in cities do who conduct concerns of a similar investment. We have seen one farmer put up a fine house where another farmer was to all intents and purposes a failure. That is common in all lines, however, but a general survey of the farms shows that they are capable of providing an attractive living. It is not the farm, nor the market, so much as the desire to get something out of life besides dollars, that will regenerate farm life. With flowers, fresh air, good houses, rural mail, automobiles, labor-saving machinery, economies of production, rural education, and such things, farm life should be as attractive as any other. It is a matter of training and culture."

That is quite true. Farm life should be attractive, and *The Monetary Times* still maintains that when the consumer is placed nearer to the producer, in the matter of price, it will become a little more attractive as a natural result.

"In Welland county," says the Welland Telegraph, "it is different. Here the country youth, wanting to go to the country fair, would say, as the breakfast was over:

"'Dad, I'm going to Welland to-day. Let me have fifteen bucks and tell the hired man to bring the six-cylinder round on the driveway.'"

In Welland, they must have bridged the price gap, otherwise the boy might be feeding wasting tomatoes, apples and musk melons to the pigs and chickens—the produce that is fetching high prices in adjacent cities.

◆

The fact that the Kaiser did not invest in Canada is only a further proof of his poor foresight.

The only drawback to trade with South America seems to be that they will buy the goods but cannot pay for them.

Is it not about time that President Wilson gave Ambassador Count von Bernsdorff, at Washington, a bun, a glass of milk and a railroad ticket?

HOW THE PEACE RIVER DISTRICT LOOKS

Views of a Traveller and an Optimist — Interesting Account of a Long Trek

Editor, *The Monetary Times*:

Sir,—I have just returned from an extended tour through the Peace River country, and, feeling that everyone of your readers will be interested to learn something about this virgin country, I am sending a short account of my very instructive journey. This part of British North America is so brimful of wonderful resources that it should not fail to influence the wave of settlement bound to follow the terrible European conflict.

During the past two and a half months I have been through a most remarkable country, full of opportunities awaiting both capital and labor. Eleven years prospecting around the mining camps of Alaska and the Yukon left me with an everlasting impression of the wonderful possibilities offered to those ready to come and settle in the great north-western section of the American Continent but what I saw in those days will not stand comparison with the country which I have just returned from.

Natural Resources Abundant.

The Peace River country abounds in nature's wonders. Millions of acres of arable land, intersected with rivers, lakes and streams, which make irrigation totally unnecessary, await settlement. A greater part of this area is practically open and ready for the plough. Peavine, vetches, red-top and a variety of other natural grasses grow in the wildest profusion, and the few settlers who have gone in ahead of the railroad, speak of the whole country through which I have passed as being particularly adaptable for stock-raising, while, when it is properly farmed, the land will grow anything that can be raised outside a tropical climate.

One thing which should be particularly advantageous and inducive to rapid settlement is the unlimited supply of game, fish and wild fruits, which can be taken with the greatest possible ease.

Throughout the timbered portions of the whole country moose, deer, bear and antelope roam the woods, and are so numerous and almost tame in certain places that it will not tax the marksmanship of anyone who has learned to handle a rifle to provide all the meat required for the table, while the country has almost become overrun with rabbit of a very delicious flavor.

The streams abound in wild duck and geese of different varieties, and at frequent intervals I ran into covers of grouse and prairie chicken.

Fish and Fur.

Fishing is another form of supply for the necessities of life. Whitefish, pike and pickerel of the finest quality, averaging five pounds in weight, can be secured in almost any quantity by using a net in the lakes, while salmon trout, speckled trout, greyling and numerous other varieties of game fish can easily be taken in any of the streams with the use of either fly or bait.

Another very valuable asset is the remarkable quantity of fur-bearing animals which appear to be rapidly increasing instead of decreasing, as anyone would imagine, for many settlers and the native Indians have relied on these as a means of livelihood for many years past. This appreciable increase is no doubt largely due to the Government regulations, which provide for a close season. I was, indeed, very much surprised to find such a large number of valuable foxes roving the woods. There were black, silver grey and red specimens.

In the Pouce Coupe district a fox farm has already been established on a profit-earning basis. Minx, martin, otter and beaver are also plentiful, and from these trappers also find a most useful source of income.

Coal, Gas and Oil.

In addition to all these splendid resources awaiting the coming of the settler, capitalists will soon realize that hundreds of profit-earning investments are calling for capital, not only to develop the agricultural possibilities, but to open up the tremendous mineral wealth. Coal, gas, and oil are known to exist. The whole country is underlaid with coal seams, and at various points along the banks of the rivers coal does not even have to be mined, settlers being able to collect large blocks of coal afloat, and all they have to do is to haul it to their cabins for fuel purposes, thus entailing less labor than wood-splitting.

During the journey I took samples of some of the best anthracite, and also good samples of peacock coal lying in the foothills of the Rockies, while bituminous and lignite coal underlie millions of acres of the easterly portion of the country.

After leaving the Albertan oil fields I spent seven weeks on foot and raft in the vicinity north-west of Edmonton, covering a distance of about fifteen hundred miles, going in via Grand Prairie by way of Edson through Pouce Coupe, Nose Mountain, Pine River Pass, on to Fort St. John and Peace River Landing, down to Grouard, at the head of Lesser Slave Lake, thence into Edmonton.

As to Transportation.

Like in many other parts awaiting settlement, the chief thing lacking is transportation, but this is practically an assured fact. The lines of no fewer than four companies coming from the East have already been surveyed and partly constructed, while communication with British Columbia is promised as soon as details have been completed in connection with the line which will eventually run from Bella Coola through Pine River Pass to the heart of the Peace River country and out to Hudson Bay.

Government surveyors who have reported on the district are agreed that this route will afford the shortest way with the lowest grade for all the great north-west products, which in a few years will have to find an outlet to the markets of the world via a Pacific Coast port.

This being practically a virgin country, a traveller naturally has many obstacles to overcome. The Government wagon-road between Edson and Grand Prairie, a distance of, roughly, 240 miles, is fairly good in places, but has suffered from exceptionally heavy freighting between those points, but the settlers, despite those obstacles, are all highly pleased with the prospects. Sparsely timbered, none of the land off the main wagon-road presents any difficulties, so far as clearing goes; in fact, the timber will be an advantage to those going in to build up their future homes, much of the lumber being suitable for fencing and building, while the remainder will provide fuel for many years to come.

This stretch offers exceptional opportunities to the stockman. Settlers at present are chiefly confining their efforts to cattle-raising. Oats, wheat and several varieties of natural hay grow most prolifically. Horse and cattle are able to forage for themselves until early in January, and the farmer has no difficulty in getting all the winter feed for the eight, or at the most ten weeks, during which it is necessary to give the stock feed and protection. It is a curious fact that the favorable temperature at this latitude is due to the low passes in the Rocky Mountains, which offer little, if any, resistance to the Chinook winds arising from the Japanese current striking the Pacific Coast due west at this point.

At Pouce Coupe.

While at Pouce Coupe I met one of the old timers coming in with over two hundred head of cattle, rolling in fat and in the pink of condition, as far as health is concerned. Natural grasses alone had been responsible for the feeding of these animals, and one could not wish to taste anything more delicious or nutritious than the steak this hardy old pioneer prepared especially for my edification.

Leaving Pouce Coupe, I continued my journey through the Nose Mountain country across the Cut Bank River over the foothills into Pine Pass through the Rockies, to within a few miles of a point I had reached last summer when making a trip from Bella Coola over the proposed route of the Hudson Bay and Pacific Railroad. Excellent as the agricultural and mineral possibilities are from the coast inland to this point, I believe the further one goes into the Peace River country the indications become more encouraging. In addition to the farming prospects, mineral, oil, coal and gas are found in commercial quantities. Along all the streams and river banks outcroppings of lignite and bituminous coal are in evidence, while in the foothills good anthracite has been found and only awaits development. To this end limited coal areas have already been secured by the Canadian Pacific Railway and Canadian Northern Railway and other railroad companies operating in the district, and I am told that financiers from the States, who have received very encouraging reports, intend sending a good deal of capital in early next spring.

The general conditions for all are favorable in this section of the country. From geological government reports it will be seen that the underlying strata is not so broken

DIVIDEND No. 97

Notice is hereby given that a Dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital stock of this institution has been declared for the three months ending 31st October, 1914, and that the same will be payable at the head office and branches on and after Monday, the 2nd day of November next.

The transfer books will be closed from the 17th to the 31st October, 1914, both days inclusive.

By order of the Board.

D. R. WILKIE,
General Manager.

Toronto, September, 1914.

as it is in parts further south, the contention being that at the time of the upheaval of the Rockies the disturbance at this point was not so violent, and consequently the stratum running east of the Rockies are thrown into undulations suitable for the accumulation of oil.

At very little expense the sandbars on the Peace River can be removed and make the waterway open for steamboat traffic, while even to-day boats of light draught can easily be taken down stream.

Some of the Towns.

Stopping at Dunvegan, I was disappointed to find that the much-talked-of town is practically at a standstill. None of the settlers nor railroad men there have much confidence of this point developing into an important business centre. They claim that there has been far too large an area subdivided, the outlying districts being many miles from the line of the projected railroad.

My next important stop was at Peace River Landing, where a lively little city is springing up with great activity. Here the ranks of the pioneers have recently been swelled by the coming of hundreds of new settlers in advance of the railroad, which is now being constructed with all possible speed along the banks of Lesser Slave Lake to this point. As a strategic and commercial centre this town has great possibilities, being surrounded by an extensive territory naturally adaptable for stock-raising and agricultural pursuits and noted for coal, gas, oil and mineral wealth.

From here, going directly south over eighty miles of splendid agricultural country, I came to Grouard, a little town at the head of navigation on the Lesser Slave Lake, which, considering it is several mines off the railroad now being constructed by Klondyke J. D. McArthur, of Winnipeg, has made tremendous strides since last summer, and the settlers there are confident that before long a second railroad will tap this section of the country and bring the present town of Grouard into direct communication with Edmonton, thereby giving the town access to all the markets of the Dominion and the States.

Yours, etc., Martin J. Ravey.

TORONTO INSURANCE INSTITUTE

An address by Mr. W. H. Hall, president of the Insurance Institute of Toronto, inaugurated the proceedings of the 16th session of the institute this week. Archdeacon Cody also spoke on "The Anglo-German problem, or the real issues of the present war."

The officers of the institute are as follow:—Honorary president, Alfred Wright, London and Lancashire Fire; president, W. H. Hall, Canadian Surety; vice-president, G. B. Woods, Continental Life; librarian, V. R. Smith, Confederation Life; secretary and treasurer, Clifford Elvins, Imperial Life.

The institute has arranged through its educational committee a series of insurance study classes at the Toronto Central Y.M.C.A. These classes afford an exceptional opportunity for student members to prepare themselves for writing on the institute examinations.

An excellent programme for the winter meetings of the institute has been arranged as follows:—November 20th, 1914, "Live Saving as a Function of Life Insurance," Eugene L. Fisk, M.D., Life Extension Institute, New York. December 18th, 1914, "Only a Scrap of Paper" (Illustrated), J. Grove Smith, B.A., B.Sc., Canadian Fire Underwriters' Association. January 22nd, 1915, "Some Notes on Municipal Debentures," Thomas Bradshaw, F.I.A., Messrs. A. E. Ames and Company. February 19th, 1915 (1), "The Insurance Man's Collateral Reading." M. P. Langstaff, A.I.A., F.A.S., Dominion Life Assurance Company, Waterloo; (2), "Plate Glass Insurance." J. H. Ewart, Phœnix Assurance Company. March 19th, 1915 (1), "Hazardous Occupations," W. A. P. Wood, B.A., A.I.A., F.A.S., Canada Life Assurance Company; (2), "Some Remarks on Fire Insurance Policy Wordings," R. Leopold Jones, Canadian Fire Underwriters' Association. May, 1915, annual meeting; (1), result of annual examination; (2), election of officers.

◆

Some interesting war statistics are contained in a convenient leather-bound diary sent out by Mr. G. Wilson, manager of the Union Bank of Canada, Toronto.

KAISER STORY GETS QUIETUS

German Banker Writes to The Monetary Times About It —Wilhelm Keeps His Money at Home

A German banker, with interests in Canada, writes *The Monetary Times* as to the reported investments of the Kaiser in the Dominion. Our correspondent's name is withheld at his request. He says:—

"I can assure you that the Kaiser has never invested one cent in Canada, directly or indirectly. As far as I know, the Kaiser has never invested a penny outside of Germany or its colonies.

"The rumors of his investments in Canada were started some years ago by an interested party who hoped to induce others to go into real estate. I commented on the rumor, and an official denial was issued at once.

"The close of the article (reprinted below), is also erroneous. The Canadian Pacific Railway have no property whatsoever in Germany. They have some observation cars running in Austria, and I hear that these have been seized by the Austrian government, because the Canadian Pacific Railway withholds their dividend to the Austrian shareholders."

What the London Story Said.

The article to which reference is made above, was dated from London and is as follows:—

"Emperor William is popularly supposed to have large investments in the timber and mineral lands of British Columbia, and it has been rumored in London that the British government was considering the confiscation of the emperor's property in Canada.

"It can be stated on the authority of a high official in the foreign office that the government has not thought of confiscating the property of alien enemies located within the confines of the British Empire.

"Through Alva Von Alvensleben, of Vancouver, B.C., a number of prominent Germans are said to have bought large tracts of British Columbia lands, particularly mineral and timber lands. The German Emperor is supposed to be heavily interested with Mr. Von Alvensleben in western Canadian properties. However, the British government has not even made an investigation of the titles of the property in question, and disclaims any curiosity as to the Emperor's reported investment.

Government's Attitude on Property.

"Even after the reports that the German government had taken over property of the Canadian Pacific Railway in Germany, and that cigarette factories in Dresden, Batschan and Baden-Baden were seized by the German government because a majority of the stock of the companies controlling the factories belonged to Englishmen, there was no disposition on the part of the British government to change its attitude towards property in English territory owned by Germans."

The Monetary Times had previously denied the investment of funds in Canada by the German Emperor.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 23rd:—

Cobalt Townsite Mine, 86,940; Dominion Reduction Company, 50,000; La Rose Mines, Limited, 102,890; the Mining Corporation of Canada Cobalt Lake Mine), 61,650; the Mining Corporation of Canada (Townsite City Mine), 86,520; O'Brien Mine, 70,280; McKinley-Darragh-Savage Mine, 149,000; total, 607,280 pounds or 303 tons. The total shipments since January 1st 1914, are now 30,565,943 pounds, or 15,282 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

SINKING FUNDS FOR BOND REDEMPTION

Should They Be Charged Against Profit and Loss?—Views of David S. Kerr, C.A.

In the published annual reports of large corporations there frequently appears as a charge against profit and loss account an item for sinking fund payable to the trustee under the bond issue.

Bearing in mind that the sinking fund is an amount payable at stipulated periods under the terms of the trust deed securing the bond issue, and that the fund is to be used by the trustee in the redemption of the bonds, it is plain that the amount thus allocated is for the purpose of reducing the liability on the bond issue, writes Mr. D. S. Kerr, C.A., in the Canadian Chartered Accountant. The mere payment of a liability is not, of itself, sufficient grounds for a charge against profit and loss account. A company loaning five thousand dollars merely substitutes a debtor for a cash item for that amount. Similarly a sum of money received by a company on loan is credited to the lender and charged to cash; when it is repaid it is simply a credit to cash and a debit to the borrower. Nor does it make any difference if the loan be secured by collateral of any kind. A bond issue is nothing more nor less than a secured loan. When the cash for the bonds is received, cash is charged and bond issue credited. When the bonds are redeemed, the bond issue is debited and cash credited. The fact that the bond issue is paid off by instalments will not alter the treatment of the various payments.

The question of premiums or discounts on the bonds redeemed through the operations of the sinking fund will not be taken into account in these remarks.

Why is there the practice of charging against profit and loss and crediting a so-called "sinking fund reserve account" with the amount of the periodical allocation? This entry, of course, is in addition to the entry crediting cash and debiting the sinking fund trustee.

Treatment of Sinking Fund.

These are the most frequently used arguments: (1) The cash is to be supplied out of the profits of the concern; (2) the available balance of the profit and loss account is reduced, and therefore, dividends are not paid to the same extent as otherwise they would be.

Sinking fund payments are payable as a rule whether a company is making profits or running at a loss. As to the dividend question, the balance at the credit of the profit and loss account or surplus account does not necessarily indicate whether or not a dividend should be paid, as the amount of cash available for the payment of the dividend must surely guide the directors of a company. A cursory glance at the published balance sheets of large corporations discloses large balances being accumulated at the credit of the surplus account, which is, of course, only right. It is likely to be suicidal on the part of a company to divide up all of its profits. Another point is that it often happens in practice that companies require to borrow from their bankers sufficient cash to make the sinking fund payments.

Another viewpoint is this. Suppose a company charges the profit and loss account with the sinking fund, and borrows the necessary cash from the bank. Cash is required in due course to repay the bank. No one would ever think of passing any entry in connection therewith through the profit and loss account. Yet the cash has to be provided. If, then, there be any argument in favor of the view that an entry should appear through the profit and loss account for the sinking fund, it would also be necessary to take a similar view in connection with the repayment of a bank loan or any other indebtedness, such as short-term notes, etc. The manner in which the money was used at the time of its being secured has nothing whatever to do with profit and loss transactions. There is some inclination to discuss this treatment of the sinking fund upon the basis that the money was used for investment in the fixed assets.

Bond Issue Secured by Fixed Assets.

Some corporations charge to the profit and loss account an amount equal to the sinking fund payment, but do not set up the usual depreciation reserve, as they consider the sinking fund offsets the depreciation. Other corporations will set aside the usual depreciation and in addition charge the sinking fund to profit and loss. Still other companies charge the sinking fund and a smaller depreciation reserve, as they consider the aggregate amount sufficient to offset the depreciation.

There is no relation whatever between the sinking fund and the necessary depreciation allowance. A company may have several bond issues outstanding for various periods, such as ten, twenty, thirty or forty years. As a rule, the depreciation reserve is not based upon such a varying number of years. The depreciation reserve is usually based upon only certain of the fixed assets, while the bond issue is usually secured by all of the fixed assets. For instance, land is not a depreciable asset, nor is a perpetual franchise. Yet these form good security for bond issues. Further, bond issues are seldom over seventy per cent. of the value of the assets mortgaged.

It seems to be bad practice to show in an account a charge against profit and loss under the heading "sinking fund," and then to explain that this charge is "in lieu of depreciation," or is supplementary to the depreciation specifically shown. If the sinking fund be "in lieu of" all or part of the depreciation, the corresponding credit should not be to a sinking fund reserve, but to a depreciation reserve, as it is to offset a reduction in the value of the fixed assets. If the amount in such instances be left at the credit of a sinking fund reserve, then the accounts do not disclose the real situation, as the net value of the fixed assets (cost less depreciation) is overstated to the extent of the sinking fund reserve. Again, if instead of crediting the sinking fund reserve, these items be credited to a general reserve, the same erroneous impression is conveyed.

Must Not Overlook Stockholders.

The position of the stockholders must not be overlooked. Suppose a bond issue of $1,000,000 for twenty years. At the end of the nineteenth year there has been accumulated a sinking fund of $950,000, and the balance of the profit and loss account is $100,000. After the lapse of the bond issue the balance sheet will be changed to show either a balance at the credit of profit and loss account of, say, $1,100,000, or $100,000 and a credit at a reserve account (previously sinking fund reserve) of $1,000,000, eliminating the last year's earnings, except the $50,000 sinking fund. Ordinarily, stockholders do not understand the effect of this method of dealing with the sinking fund. It is most desirable to have all statements relate, as plainly as possible, the real situation. If a reserve has been accumulated it ought to be distinctly shown as such and not confused with depreciation.

Another point in connection with the charging to the profit and loss account of the sinking fund, in lieu of depreciation, is that it may sometimes cause confusion in dealing with insurance companies in the event of it being necessary to arrive at the net book value of assets.

Take the case of a company with a bond issue outstanding, but no provision for periodical sinking fund payments to the trustee, the bonds being payable at maturity. A comparison between the accounts of such a company and a similarly situated concern which treats its sinking fund in the method discussed would not be of any avail.

After Deducting Instalments.

In the event of a company treating its sinking fund in the manner discussed, it would be well to note in parenthesis after the surplus account, a memo to the effect that the surplus has been arrived at after deducting the sinking fund instalments paid to the trustee, aggregating so much. This is on the assumption that the sinking fund payments were not thus treated in lieu of depreciation.

It is unfortunate that the word "fund" is so frequently used in designating an account with a credit balance. The term "fund" always conveys an idea of something in hand.

◆

Have patience and courage, work hard, fight or pay.

The facts are often better than the sentiment. Analyse them carefully.

Mayor Hocken, of Toronto, has revived his plan for the rearrangement of the duties of the city treasurer and the appointment of a finance commissioner. The mayor thinks that the statutory duties of the city treasurer are sufficiently arduous without the added responsibilities of the bond business. "The new commissioner, if appointed, would sell bonds, look after the sinking funds, advise as to sources of revenue, and generally supervise the accounting system." No definite action was taken by the controllers regarding the suggestion.

ONE WAY TO SAVE MONEY

Farmer Should Take Greater Care of His Implements, Says Conservation Commission

Recent investigations by the Conservation Commission at Ottawa reveal some very interesting facts regarding the effect of care, or neglect, as the case may be, upon the life of machinery on the farm. Between 90 and 95 farms, divided into three districts, were visited in each of the provinces of Manitoba, Saskatchewan and Alberta.

In Saskatchewan, out of 94 farmers visited by the commission's representative, 76 leave all of their implements out of doors. On 73 of the farms, there were no implement sheds of any description. On 21 of the farms, sheds large enough to cover a part of the implements were found, in most cases this being only a buggy or a democrat, but not on one single farm was the machinery all housed. Not one farmer was found who painted his implements to protect them from the weather.

Lax in Manitoba.

In Manitoba only 14 out of 94 keep their machinery under cover during winter, while 44 claim to keep a part of it inside. On 34 of the Manitoba farms no provision whatever is made for protecting implements, and only four claim to have done any painting.

In the three districts visited in Alberta, mixed farming is carried on quite extensively, making more barn room available, so that implements are more likely to be protected, but even here, 37 out of the 92 visited, leave all machinery out of doors.

In one district in Ontario where 40 farmers vere visited, every man housed his implements during winter, although none of these men do any painting.

Life is Lengthened.

In the Ontario district visited where the implements are housed, the average life of the binder was found to be between 16 and 17 years. Many binders were seen which were in good running order after cutting 20 seasons' crops.

In Saskatchewan and Manitoba, where so much of the machinery is left out of doors, the average life of the binder is given by the farmers as about seven years, which is less than half that of the binder protected from the weather. Many binders do not last as long as seven years. One farmer near Moosomin, Sask., who, after 12 years, was retiring from the farm, held an auction sale. His binder after cutting 12 crops sold for $80, or 50 per cent. of the original cost, and his other machinery at proportionately high prices. It had all been well housed and the necessary painting and repairing had been done to keep it in good order. On a neighboring farm a binder which had cut only three crops, but which had been neglected and stood out of doors, was relegated to the scrap heap and a new one was being purchased.

Cannot Afford to Delay.

An implement shed costs money, but if its use will double or treble the length of time the machinery will last, it is a good investment. Farmers often say that they can not afford to build a shed. The truth is, they really can not afford to be without one. Apart from the additional power necessary for operation, the depreciation on unhoused machinery on the average sized farm is so great as to amount to much more than the cost and upkeep of an implement shed. The binder works for only a short time during the year, while machinery in a shop works the whole year through and lasts proportionately many times longer. It is simply a matter of care. The life of a machine extends in direct ratio to the care it receives, and abuse and neglect will shorten the life of any mechanism. The manufacturer is not responsible for the care of the machinery after it is sold. This rests entirely with the farmer, and as a common-sense business proposition he should look after his own interests sufficiently to house his implements and thus save the thousands of dollars wasted annually in unnecessary depreciation.

◆

Two months ago you thought that food prices would go so high that you would have to live in the cellar on peanuts, apples and contemplation. Most of your other fears are as foolish.

BANK, LAND AND TRUST SCHEME

Some Edmonton Folks Are Talking About It—Coming East for Money and Charter

According to a letter issued by Mr. Hall, the publicity commissioner of Edmonton, to various correspondents, some of the people of that city have in hand an ambitious scheme for the formation of a bank, a trust company, a land company, and a colonization company.

The letter says:—"Briefly, the plan will include the establishment of a bank with all the privileges of such an institution under the Dominion act; to form a loan and trust company; and to form a colonization and farm development company. The plan includes the securing of a large amount of land; placing people on this land; loaning them money for buying stock, and so forth, and strict supervision of the business by men delegated to do this in the several parts of the western provinces.

Help from Industrial Bureaus.

"It is part of the plan to have the several industrial bureaus of the west do what they can toward the working out of the general scheme. Mr. Miller, of Calgary, and myself have agreed to do our share of the work and Mr. J. L. Tucker, who is at the head of the project has asked me to write to you to see if you can suggest the names of two or three live Saskatoon men who will take part in the work. It will not be necessary for them to invest any large amount of money—perhaps none at all—but it is required that they be real business men—sound, solid and substantial.

To Get the Charter.

"Mr. Tucker is now on his way to the east to raise the necessary capital to take over the charter of a bank which has been organized as far as securing the charter. It is probable that one or two of your Saskatoon men would be asked to act as directors for this bank. Mr. Tucker is confident that he can raise the bulk of the capital in eastern Canada and the United States, but wished to get men of thoroughly good standing in western Canada so that the whole business of this large project shall rest upon a substantial basis and shall be thoroughly well managed in every respect."

HOW TORONTO HAS GROWN

A lengthy report on the growth of the city of Toronto has been made by United States Consul Julius D. Dreher, at that point to his government at Washington. It appears in the daily consular and trade reports, issued by the bureau of foreign and domestic commerce of the United States department of commerce, dated October 24th. In part the report says:—

"In spite of financial stringency and general business depression, the foreign trade of Toronto is likely to continue to be large, for the city is the distributing centre for the province of Ontario, and also to a considerable extent for the provinces to the west. Mercantile business has felt the depression to a serious extent There have been many more failures in Canada this year than in the corresponding period in 1913, but the proportion of failures is less in Ontario than in other provinces, and there have been no failures of importance in Toronto.

"The city is also a great manufacturing centre. The number of factories is estimated at 1,200, of which nearly 100 are American or branches of American companies. According to the census of 1911, the capital invested in the city in manufacturing was $145,799,281 and the value of the output was $154,304,048. As the invested capital increased 180 per cent. and the value of the product 164 per cent. from 1901 to 1911, it may be taken for granted that there have been large gains in both in the last three years, especially as during that period cheap hydro-electric power from Niagara Falls has been available. Most of the manufacturing establishments have had to curtail their output, but there have been scarcely any failures. Among the chief products are agricultural implements, cast-iron work of every description, machinery, bridge works, ships, steel and cast iron [illegible] boilers, building materials, automobiles, paints, oils and [illegible], hardware, furniture, organs, pianos, carpets, [illegible]. There are also large meat-packing establishments."

A SAFE INVESTMENT

The safest and most profitable investment you can make is to purchase a copy of

MURRAY'S INTEREST TABLES

at a cost of $10.00

By means of it you can see the interest due on your investments.

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

MANUFACTURERS WILL USE OPPORTUNITIES

Eliminate Germany's Share of Trade—Preference in British Guiana

Mr. W. J. Egan, Canadian trade commissioner at Cape Town, gives the following informative data as to opportunities for trade in South Africa.

The Canadian trade with South Africa in brushware amounted to $9,500 less in 1913 than in the previous year. This took place in spite of the fact that there have been over 66 trade inquiries during the past 12 months for Canadian brushware. The combined trade of Germany and Austria-Hungary for 1913 amounted to about $54,000. Immediate efforts should be made to secure a large proportion of this trade; with this in hand and orders filled without substitution and delivered promptly as per terms of order, Canada would command in a very few years, a trade in this article worth $100,000 a year.

Under the heading of cotton manufactures, for a number of years, Germany had made considerable advances in a line of heavy indigo print, very similar to a special make made by one of the Canadian mills. In this and other lines, if efforts were made, a share of the trade would be secured for Canadians; the German and Austria-Hungary exports to South Africa under this heading totalled in 1913 in round figures $760,000.

Electrical machinery, electric cable and wire, iron and steel, steel rails, furniture, school furniture, canned vegetables, gloves and mittens, fencing wire and standards, are among the lines which might prove to be attractive openings for Canadian manufacturers.

British Guiana Trade Grows.

During the seven months of last year in which the preference was in operation, the quantity of goods imported by British Guiana from Canada was valued at $427,256, as compared with $278,996 for the corresponding months of the preceding year. This increase was probably altogether due to the effect of the preference tariff, as the total imports into the colony showed a decline, reports Mr. E. H. S. Flood, Canadian trade commissioner. There was also an improvement in the trade with Newfoundland in regard to imports, as also was the case with Great Britain. The decline which took place was nearly altogether due to a falling off of about $200,000 in the imports from the United States. The following are the principal items imported from Canada during 1913, totalling $692,028:—Biscuits, bread and cakes, $1,286; butter, $967; cheese, $8,158; cordage and twine, $2,205; fish, tinned, $1,533; fish, smoked or dried, $69,103; fish, mackerel and salmon, pickled, $9,920; fish, all other sorts, pickled, $10,382; flour and grain, $420,161; hay and chaff, $2,416; oil, $1,483; paints, $1,183; paper, other than printing, $2,023; spirits and strong waters, $782; vegetables, fresh, $55,175; wood and timber, $45,594; unenumerated, $50,558.

An Enquiry from London.

Mr. Harrison Watson, the Canadian trade commissioner at London, has forwarded to the department of trade and commerce, specifications of box shooks, furnished by a leading lumber broker in London. This broker stated that, although considerable advances have taken place in the prices of Scandinavian box shooks, recent Canadian quotations had not up to the time of writing been exceeded. He was anxious to receive quotations from the Canadian mills, as it was uncertain as to whether Scandinavian box shooks would for long be available at the present rates. It would be desirable for Canadian shippers to quote their lowest c.i.f. price to the ports of delivery, inclusive of marine insurance, but exclusive of war risk insurance. For commission and del credere, 5 per cent. of the f.o.b. value of the goods should be included in the prices quoted.

◆

Canadian business cannot afford to shiver or its teeth will rattle next. Have faith in yourself, your country and [illegible] Empire.

Business in Canada in many lines is better than usual; in others, as good as usual; in some, poor. That is better than in Germany, where business is on its back and not likely to get up for some years.

ANALYZING THE FIRE WASTE

Carelessness Has Caused 75 Per Cent. of the Fires in British Columbia, Says Insurance Superintendent

"Fully 75 per cent of the fires reported was due to carelessness in the construction of buildings or in the installation of lighting, heating and power appliances, and in the use of such appliances and of combustibles," writes Colonel E. F. Gunther, superintendent of insurance for British Columbia, in his annual report. It contains a comprehensive analysis of the provincial fire waste.

"The inculcation of carefulness," he says, "is necessarily a slow process. Accumulation of rubbish and defective stoves, furnaces and heating apparatus and lack of proper provision for ashes and fire-breeding waste are responsible for many fires. As a commencement in the direction of public education, municipalities and fire wardens may well be urged to arrange for 'clean-up days' in their several jurisdictions before the cold weather sets in. On the day appointed rubbish would be removed from cellars and attics and yards, and there would be a general overhauling of heating and lighting appliances, and proper and safe provision would be made for the disposal of ashes and rubbish during the winter months.

Sufficient Evidence to Convict.

"The British Columbia Fire Insurance Act, in addition to providing for the investigation of fires, as well for purposes of ascertaining fire-creating conditions as of detecting crime, empowers chiefs of fire departments to order the removal of combustibles and the remedying of dangerous conditions. Inspection by qualified members of fire departments is to be recommended, care being taken that the fire-fighting force is not impaired. To be effective, inspection should be systematic and thorough, and followed up by enforcement of by-laws and the enactment of new by-laws if shown to be necessary. There is no doubt that where this practice is carried out it brings about improvement in conditions and promotes carefulness. Twenty-one fires alleged to have been due to suspicious circumstances were investigated by the department during the year. In one case reported to the department the local authorities had sufficient evidence to convict three persons."

How Fires Start.

Details of the entire fire waste of British Columbia are not available, but the following particulars are from points which have reported. They show a loss of $710,860 in 303 fires during the period, July 1st to December 31st, 1913. The information gives the causes, the number of fires and the money losses attributable to each cause:—

Adjoining fires, 21, $110,608; ashes against wood, 3, $220; automobile lamps, 1, $400; boiler insufficiently protected, 2, $250; burning rubbish in heater, 1, $10; broken feed pipe, 1, $100; candle carelessness, 2, $840; carelessness (not defined), 1, $50; cigar or cigarette carelessness, 7, $14,375; chimney foul, 1, $25; clothes too near stove or pipes, 4, $518; curtain from stove, 1, $405.

Defective chimney, 17, $8,016; defective fireplace, 10, $1,50[illegible]; defective furnace, 1, $5; defective oil furnace, 1, $50; defective oven, 2, $[illegible]; defective stove, 1, $250; defective stove pipe, 7, $2,668; defective wiring, 9, $73,789; electrical appliance, 11, $18,758; electric motor, 3, $140; electric wire broken, 1, $5; fire-crackers, 1, $5; fire-pot carelessness, 1, $240; floor wax boiling over on stove, 1, $118; fumigation, 1, $4[illegible]; furnace overheated, 1, $98; furnace flue overheated or defective, 3, $1,252.

Gas main leaking, 1, $[illegible]; gasoline carelessness, 3, $1,505; gasoline explosion, 6, $[illegible],915; grease boiling over on stove, [illegible], $2[illegible]; grease in hood of range, 4, $1,382; hot iron against wood, 1, $[illegible]; incendiary, 10, $36,165; lamps, carelessness or explosion, 5, $2,065; lighting stove with oil, 1, $15[illegible]; [illegible], 1, $[illegible].

Matches, carelessness, 10, $4,284; matches, children with, [illegible], $1[illegible]; melting pot insufficiently protected, 1, $5; oil stove upset, 1, $[illegible]5; oil stove explosion, 1, $290.

Shell explosion, 1, $150; smoking in bed, 4, $566; spark from burning stumps or rubbish, 2, $2,300; spark from bush fire, 1, $[illegible]; spark from carburettor, 2, $300; spark from chimney, [illegible], $[illegible]; spark from grate, 2, $7,050; spark from forge, 1, $[illegible]; spark from fuse block, 1, $30; spark from furnace, 1, $1[illegible]; spark from open pipe hole, 1, $40; spark from [illegible] heater, 1, $1[illegible]; spark from smoke stack, 3,

BANKERS IN GREAT BRITAIN—The London Joint Stock Bank, Limited

TORONTO BRANCH—A. B. PATTERSON, Manager

$4[illegible] spark from steam shovel, 1, $10; spark from stove, 6, $6,50[illegible]; spontaneous combustion, 7, $25,103; steam pipes, 1, $50; stove insufficiently protected, 15, $6,074; stove pipe insufficiently protected, 9, $1[illegible],623; stove, papers blown against, 1, $1,050; stove, papers hanging behind, 1, $60; unknown, 50, $35[illegible].

The following classification shows the property burned with the individual cause and the number of fires from each cause, together with the loss involved:—

Buildings are Classified.

Four apartment houses, defective fireplace, $90; defective oil furnace, $5[illegible]; spark from chimney hole, $40; spontaneous combustion, $27.

Eight automobiles, fire-crackers, $5; gasoline explosion, [illegible], $45; lamps (automobile), $400; short circuit, $10; spark from carburettor, 2, $300; unknown ——.

One bakery, defective oven, $15.

Four barns, electric wire broken, falling on roof, $5; unknown, [illegible], $1,950.

Seven boats, gasoline explosion, 3, $900; lighting stove with oil, $15; smoking in bed, $215; unknown, $8,000; woodwork from boiler, $250;.

Three churches, unknown, 3, $14,500.

One department store, cigar carelessness, $9,650.

One hundred and fifty-four dwellings, adjoining fires, 11, $4,020; ashes against wood, $200; candle carelessness, $745; carelessness (not defined), $50; chimney foul, $25; cigarette carelessness, 3, $3,550; clothes too near stove or pipes, 3, $283; defective chimney, 10, $6,045; defective fireplace, 8, $1,463; defective furnace, $5; defective stove, $250; defective stove pipe, 4, $2,558; defective wiring, 3, $2,298; electrical appliances, 6, $1,745; fumigation, $400; furnace overheated, $98; furnace flues overheated, 2, $1,232; gasoline carelessness, 2, $1,500; grease boiling over on stove, $15 incendiary, 3, $1,600; lime slaking, $6; lamps, carelessness or explosion, 4, $1,840; match carelessness, 6, $3,807; matches, children with, 2, $25; shellac explosion, $350; smoking in bed, 2, $16; spark from bush fire, $5; spark from chimney, 18, $768; spark from furnace, $150; spark from grate, 2, $7,050; spark from steam shovel, $10; spark from smoke stack, $10; spark from stove, 5, $2,610; steam pipes, $50; stove insufficiently protected, 10, $4,070; stove pipe insufficiently protected, 6, $1,615; stove, papers blown against, $1,050; stove, papers hanging behind, $60; unknown, 26, $34,177.

Two dyers and cleaners, electrical appliances, 2, $32.

One fair building, unknown, $25.

One factory, unknown, $17,500.

Three garages, incendiary, $65; unknown, 2, $930.

One greenhouse, unknown, $13,400.

Eight hotels, defective chimney, $175; grease in hood of range, $500; incendiary, $34,000; smoking in bed, $335; stove or range unprotected, 3, $1,304; unknown, $10.

One institution (home for aged), candle carelessness, $95.

One iron works, hot iron against wood, $300.

Two laundries, electrical appliance, $11,500; clothes too near stove, $235.

One livery stable, unknown, $3,650.

One locomotive cab, spontaneous combustion, $20.

One motor cycle, broken feed pipe, $100.

Four offices, ashes against wood, $15; defective chimney, $1,275; defective hot air flue, $20; stove insufficiently protected, $50.

Three pool rooms, defective chimney, $145; match carelessness, $400; spontaneous, $607.

One printing office, burning rubbish in heater, $10.

One railway station, spark from burning rubbish, $2,000.

Ten restaurants, defective chimney, $15; defective hood over range, $858; grease boiling over on range, 2, $242; grease in hood of range, 2, $24[illegible]; stove pipe insufficiently protected, $500; unknown, [illegible], $[illegible]777.

Two rooming houses, adjoining fires, cigar carelessness, $175.

Two sawmills, unknown, $150; woodwork from boilers, [illegible].

Six sheds, gas main leaking, $[illegible]0; incendiary, $1[illegible]; matches, children with, $150; spark from smoke stack, $15; [illegible] pile, $[illegible]; unknown, $75.

Two shingle mills, spark from smoke stack, $4,0[illegible]0; defective wiring, $1,000.

One school (industrial), spontaneous combustion, $2,600.

Four stables, match carelessness, $20; spark from forge, $[illegible]; spontaneous combustion, $1[illegible]; unknown, $350.

One [illegible] melting pot insufficiently protected, $[illegible].

Forty-four stores, adjoining fires, [illegible] $550; ashes against wood, $5; [illegible]; cigar or cigarette carelessness, [illegible]; [illegible] from stove, $4[illegible]5; defective chimney, [illegible]; [illegible], $40; defective wiring, 2, $217; electrical [illegible], $6,451; electric motor, $75; fire pot [illegible]; [illegible] or wax boiling over on stove, $110; gasoline explosion, $5; incendiary, 4, $4[illegible]0; lamp, $225; [illegible], $5; oil stove, 2, $315; spark from stove, [illegible]; spontaneous combustion, $5; stove insufficiently protected, [illegible]; stove pipe insufficiently protected, $[illegible]; unknown, [illegible], $1,[illegible].

One street car, electric motor, $2[illegible].

One tent, stove [illegible] overheated, $1[illegible].

One theatre, spark from burner, $1[illegible].

Fourteen warehouses, adjoining fires, 7, $105,438; defective wiring, $[illegible]; electric appliance, $45; spontaneous combustion, $2[illegible]; unknown, 4, $[illegible]41,557.

◆

TRAMWAYS FRANCHISE AGAIN

Monetary Times Office,
Montreal, October 28th.

The question of the renewal of the franchise of the Montreal Tramways Company was introduced in the City Council once more during the past few days. This question has come up repeatedly for many years, but nothing practical results. The ostensible cause for introducing it now is the desire to lessen the amount of unemployment in the city. It is claimed that the tramways company is prepared to immediately employ a large number of men and to keep them employed during the winter, providing it succeeds in obtaining a forty-year franchise, and the company would place orders for a large number of cars, and that this also would provide work.

It is predicted that the question of the renewal of the franchise will be brought up in a serious way before the council shortly.

◆

FOX INDUSTRY IN PRINCE EDWARD ISLAND

The provincial government has nearly completed a census of the fox industry in Prince Edward Island. This enumeration is taken for the purpose of ascertaining the number and value of the young foxes born and reared to maturity this year on which a tax of 1 per cent. is payable to the government. The results show that there are 312 fox ranches in operation as against 277 last year. The number of young foxes of this year is 2,082, of which 1,230 are silver foxes, 565 cross foxes, 276 red foxes, and 2 blue foxes. The sworn value of young silver foxes of this year is $6,056,190 and of all the less valuable kinds $521,396, making a total value for the fox crop of this year of $6,577,586. The sworn valuation for purposes of taxation is under the actual selling price.

The annual meetings of fox companies at which dividends are declared and paid are mostly held in October and November. Few of these meetings have yet been held, but a dozen or more of the companies have declared interim dividends of 10 per cent. to 50 per cent., with intimation of further dividends later.

◆

Confidence costs nothing and is worth much.

What is the outlook for 1915? Every phase will be discussed in the forthcoming *Monetary Times Annual*.

For the first time since the Central Vermont Railroad and the Grand Trunk Railway of Canada entered into an operating agreement the Grand Trunk last year was obliged to make up a Central Vermont deficit of $250,257, according to the report presented at the annual meeting of the Central Vermont stockholders. Mr. W. H. Biggar, of Montreal, and Mr. H. S. [illegible], of New York, were elected to the directorate in succession to Mr. F. H. Baker and Mr. E. L. [illegible]. At the conclusion of the stockholders' meeting the [illegible] re-elected chairman Chamberlin, president Smith, [illegible] Witters, auditor [illegible] and treasurer [illegible].

Orders for copies of the 1915 Monetary Times Annual [illegible] received—Price 50 cents per copy

Collections made in all parts of the Dominion, and returns promptly remitted at lowest rates of exchange. Commercial letters of Credit and Travellers' Circular Letters issued available in all parts of the world.

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

TO INCREASE FOOD PRODUCTION

Regina Board of Trade Suggest a "Closer Settlement Movement"—Government-endorsed Bonds Proposed

A closer settlement movement is being advocated by the Regina Board of Trade. "Our idea," says a memorandum on the subject, sent by the board to *The Monetary Times*, "to bring a large proportion of this land rapidly under cultivation is to establish community settlements throughout the country by means of an organization into which the management of the land shall be given. That groups of families shall be organized, that each family shall receive an allotment of one hundred and sixty (160) acres of land; that they shall settle in small villages and that they shall be located in such a way that while living closely together they will still be near their farms. This will mean organization on the part of the group for the purpose of both buying and selling; one of their number shall be selected by them for the purpose of doing such business and receiving such instructions as will enable the group to carry on the operations with the greatest efficiency and economy.

Long Terms of Payment.

"In the estimation of this executive the land will have to be bought on long terms of payment, carrying a moderate rate of interest and on the amortization plan so that it will be able to work itself out without the settler having to mortgage the land at a high rate of interest.

"This plan will not only be of great benefit to the community but it will work out to the advantage of the land owner who will also be carrying out his duty to the Empire in almost as great a measure as though he had gone to the front; and it is also his duty to humanity, because it is almost certain that during the next few years there will not be food enough produced in the world to properly feed its population.

"The credit of the whole group shall be back of every individual contract as, in our estimation, this is the only way in which the necessary amount of funds can be made available for the purpose. Experience of Europe has shown that groups such as these can be given a reasonable amount of credit suitable for their needs with absolute safety.

Bonds to the Owner.

"When the lands in the hands of the committee is sold, a bond will be given to the owner for the value of the land as agreed upon between the trustees and the owner on the terms of the sale as soon as the title is made clear. In the estimation of this executive these bonds will have a permanent market value and would be looked upon with the same favor as an investment as bonds of a municipality or province, at least during normal conditions.

"It may be necessary in the strenuous and uncertain conditions that prevail now that there might have to be some endorsement by a government to give them immediate value, until investors realized their value as they are recognized in Europe.

Credit Must be Extended.

"It is absolutely necessary that before permanent settlement can be obtained that some amount of credit shall be extended to the groups to enable them to procure at least, at the lowest possible price, the necessary equipment to carry on their operations. Credit should be available for this purpose if not for any other. Our very existence as a prosperous community depends upon how completely we can bring the uncultivated lands of the country under cultivation.

"This executive has made an estimate of what will be required for this purpose, and it believes, after consulting with many people on the subject, that a community of farmers with their families, starting under such auspices have a good chance to carry out their obligations, and will become permanent and happy settlers. The credit could be financed by an arrangement between the Dominion government and the banks. There surely can be no better security than that created by capable men who are occupying, under favorable conditions, the fertile soil of this country.

"It is estimated by those who have given study to this matter that there are 50 thousand heads of families, who are trained farmers, available in Canada at the present time for settlement. One hundred and sixty acres of land to each of these would mean that there would be 8,000,000 acres of land immediately [illegible] and brought very quickly under cultivation.

"A great many of the farm implements and facilities would be used by the group in common, one of the advantages of this system being that it would not be necessary for each individual to have a large amount of idle implements and equipment which would only be used for a short time. Another great advantage would be that the teams of horses or oxen could be worked together when the necessity arose, such for instance as in ploughing, and the members of the community not engaged in driving them could be employed in putting up the necessary buildings, fences and looking after the general work of the settlement. It is not contemplated, however, that the lands or products should be held in common, each individual would have the benefit of his own industry and labor, each individual of the community would be competing with his neighbor for the highest efficiency in production and each community in turn would be competing with the other communities for supremacy."

ONTARIO'S CITIES' SINKING FUNDS

The sinking funds of Ontario's cities are given in a recent bulletin of the provincial bureau of industries. The figures are: Sault Ste. Marie, $127,218; Brantford, $622,394; Ottawa, $2,726,012; St. Thomas, $20,595; Windsor, $97,199; Kingston, $138,326; Belleville, $278,871; Sarnia, $10,648; St. Catharines, $300,072; London, $363,365; Woodstock, $278,354; Stratford, $415,335; Peterborough, $338,918; Fort William, $855,525; Port Arthur, $572,627; Guelph, $427,850; Hamilton, $1,132,126; Toronto, $12,818,766.

◆

FARMERS SELL THEIR WHEAT

Out of the total crop in 1913 of 231,717,000 bushels, less than 1 per cent., representing little more than 2,000,000 bushels, remained on hand, whilst the quantities of barley and oats were not more than 2 per cent. (987,500 bushels) and 3½ per cent. (14,450,800 bushels), respectively. Of wheat, more than half the crop is grown in Saskatchewan, and yet in this province less than 1 per cent., or only 547,000 bushels, remained on hand, according to an enquiry instigated by census and statistics office of the department of trade and commerce in August.

On the whole, the result of the enquiry is to show that the quantities of wheat, oats and barley left over on farms in Canada at the close of the agricultural year is practically negligible. The relatively small quantities that do remain are required for feeding purposes, a proportion, however, leaving the country in the shape of the finished product, cheese or bacon, as the case may be.

◆

The Monetary Times Annual is doing business as usual. Issued at the end of 1914, it will be the best record of a year teeming with financial and commercial events of interest.

The Uranium Steamship Company, says a New York despatch, has discontinued business in the United States. Cessation of transatlantic travel owing to the war is assigned as the reason for closing the offices. Such affairs as may be pending or unfinished have been taken over by the Canadian Northern Railway. The company's three steamers, the Uranium, the Principelle and the Campanello, which usually ply between New York and Rotterdam, are being operated by the Canadian Northern Railway between Montreal and Bristol.

Saskatchewan's final crop report shows that the acreage under wheat this year was 6,00[illegible],522 acres, an increase of 243,[illegible] acres, or 4.2 per cent. over the previous year. Owing to drought in the south-west and west central portions of the province, the yields vary from two bushels per acre in the south-west to [illegible] bushels in the north-east districts, while the northern portions of the province report an average yield of 16 bushels per acre. The average yield for the whole province is estimated to be 12 bushels per acre, a total production of 74,6[illegible] bushels, or 66.3 per cent. of last year's. The total number of bushels of grain will be 152,023,854, in comparison with 24[illegible] in 1913. The total value of the 1914 crop is estimated at $100,004,102, against 116,428,000.

ALBERTA'S FINANCES IN GOOD SHAPE

Provincial Treasurer Says So and Tables Estimates—Loan of $3,000,000

The finances of Alberta are in good condition, according to the budget presented by Hon. C. R. Mitchell, provincial treasurer. The net provincial debt on December 31st, 1913, was $18,420,000, and at the end of December of the present year it will be $21,333,000. Of this amount $19,500,000 has been expended in public works, including $7,885,000 for the telephones, which department now has a surplus of $476,000 available for a sinking fund. All liabilities have been promptly paid during the year and at the end there will be an estimated surplus of $1,323,000. This includes $475,000 held for elevator assistance.

Estimates for Next Year.

The estimates for 1915 on current revenue are $5,628,000, exclusive of any borrowed money and the estimated current expenditure $5,402,000. It may be necessary in 1915 to curtail the expenditures if the revenue should further decline. The provincial treasurer dealt at length with the railways guaranteed by the province. Of the total mileage, 2,435, guaranteed, 1,209 had steel laid and 387 more would be completed by the end of the year. This represented a total liability to the province of $40,000,000. Many telephone extensions had been made during the year, and despite the war, the revenues had kept up and a larger revenue was expected next year. To meet shortage some new measures for raising revenue had been included in the taxation of wild lands and increase in succession duties as well as increased license fees, he added.

Objected to Loan.

The leader of the opposition in the Alberta House, Mr Michener, objected to the bill authorizing a loan of $3,000,000, $2,000,000 of which is provided for in the estimates. His objection was confined to the extra $1,000,000. Premier Sifton replied that the money was asked in case that further demands be made on Alberta as a result of unexpected contingencies of the war. He was doubtful if any of the money could be raised on good terms for some time to come. However, he said, on returning from England just before the war, he had realized that a period of depression was coming, even before a great European war appeared imminent and he had instructed all the departments to curtail their expenditures. The result was that the province had still on hand a big surplus of unexpected money, borrowed last year.

New Sources of Revenue.

Hon. C. R. Mitchell tabled the estimates for the year 1915 and supplementary estimates of nearly $500,000 for 1914 to provide for war contingencies such as gifts to the British government and the Belgian Relief Fund. The estimates for 1915 are: Revenue, $8,052,062; and expenditure, $7,775,095. This leaves an estimated credit balance at the end of 1915 of $1,176,965.

A bill which repeals the old act and imposes considerably heavier duties on properties passing to parties outside the province on the death of the original owners was adopted with several amendments. Other measures considered provided for the imposing of license fees on travelling shows, amending the companies ordinance, the poolroom and liquor license ordinances and respecting contributions by civil servants to the patriotic fund.

◆

There is business to be done, but it needs a little extra energy.

[illegible] that we have been able to borrow too [illegible] away the incentive to produce.

Good [illegible] prices and the prospects for higher prices [illegible] effect on Western Canada. Building operations [illegible] in many cities, including Regina. The large [illegible] for Messrs. Campbell, Wilson and Strathdee is [illegible] completed; the Saskatchewan Co-operative Elevator Company's [illegible] building is being rushed to completion; the city's work, including sidewalk laying, new power house and [illegible] reservoir, are being proceeded with. In addition to these works several new structures are now proposed, including a [illegible] temple, a Methodist church and a [illegible] temple [illegible].

CANADIAN GROWERS TO PRODUCE SEED

Soil and Climate Offer Superb Conditions—Government Subvention May Be Paid

Canadian imports and exports of grass and clover seeds are mainly from and to the United States. In an average year we export nearly two-thirds of our total output of alsike and nearly half our red clover seed. Europe is the natural market for our alsike, although some of it is sold through United States trade channels. As a rule the United States produce a little less red clover seed than is required for home consumption and usually buy Canadian seed.

The 1914 crop in North America is estimated to be about sufficient to meet the requirements of the trade at prices somewhat firmer than last year. The alsike crop, especially in Canada, is much below average, and although prices may be unstable during the early season, it is believed that neutral countries will be able to find markets for the surplus, if any, offered in Canada.

The exports of grass and clover seeds for the year ended March 31, 1914, totalled over $1,200,000 in value, but the imports amounted to only about $100,000 less than that sum. Canada obtains nearly 70 per cent. of her timothy from the United States and this item alone makes up the bulk of the import values.

A full supply of timothy at normal prices is assured. The effect of the war may be felt to some extent on fescues and others of the finer grasses, but no real hardship will result to Canadian users if the supply of these is somewhat reduced for the next two or three years.

Crow Half at Home.

From the present outlook it seems desirable that at least half of the field root and garden seeds required in Canada be grown here. Growers should place themselves under the consulting direction of experts employed by federal or provincial experiment stations who are working with the kinds of crops to be grown, suggests Seed Commissioner Clark in a recent report.

Canada has depended largely on Europe for field root and garden seeds. France and Germany are sometimes called the seed gardens of the world. Last year we imported 1,285,108 lb. of beet and mangel seed, more than 900,000 lb. of which came from these two countries. Half of the carrot seed ([illegible] lb.) came from France and 22,000 lb. from the United Kingdom.

Apart from sweet corn, beans and peas, most of the vegetable seeds are not grown in Canada. Tomato, onion, cucumber and melon seeds are produced to a limited extent, but come mostly from the United States. Cabbage, cauliflower, celery, parsnip, garden beets, radish and like crops are mainly from Europe [illegible]. Florists' stocks have been obtained principally from Germany, and these offer the most serious difficulties at present.

Can Meet 1915 Demand.

It is estimated that the reserve supply, together with the 1914 crop in Europe that will be available, will enable Canadian [illegible] to meet the 1915 demand for all principal kinds, except perhaps some florists' stock. Mother plants of such biennials as mangels, beets, cabbage, celery and the like should be [illegible] and stored this autumn, before they are [illegible] for the production of seed next year [illegible].

It is important that Canadian farmers and gardeners make provision for their requirements now. The soil and climate of Canada provide superb conditions for the production of field root and garden seeds. That they have not been grown [illegible] for commerce is due to the fact that [illegible] day can accomplish [illegible] Canadian farms who receive [illegible] offered to Canadian [illegible] to offset European cheap [illegible].

The following [illegible] bounties of the kinds and varieties of [illegible] that may be paid [illegible] bona fide growers of them:— [illegible] swedes, 4; carrots, [illegible] garden varieties, 10; parsnip, 7; [illegible] 50; onions, 25; celery, 40; [illegible] water-melon, [illegible]; muskmelon, 30.

Guaranteed Investments

SIXTY-SIXTH ANNUAL REPORT OF THE
CONSUMERS' GAS COMPANY
OF TORONTO

In presenting to the Stockholders the Sixty-sixth Annual Report of the Company, with the accompanying financial statements, it affords the Directors pleasure to be able to exhibit increases in the consumption of Gas, in the number of consumers, in gross revenue and net earnings. That these results have been realized notwithstanding the keen competition which has been met with, is very gratifying to the Directors, as it will be to the Shareholders.

During the year 6,918 new Services have been installed and more than 46 Miles of Street mains have been laid; this being the largest mileage of Mains laid by the Company in any one year in its history. A considerable proportion of these pipes are of 24" and 36" sizes, required as additional trunk lines. When it is borne in mind that the quantity of Gas put out during the past year is nearly double the quantity sold six years ago, the necessity for this large increase in the Company's system of trunk mains will be apparent.

Further considerable increases have been made in the assessed value of the Company's property for Municipal Taxation, which necessarily increases the cost of our production.

A Special Meeting of the Shareholders was held on March 3rd, 1914, for the purpose of passing certain By-laws, and in accordance with these By-laws application was made for Supplementary Letters Patent, which were granted on August 28th, 1914, enlarging and extending the powers of the Company.

Your Directors sold by public tender on December 15th, 1913, Three Thousand One Hundred and Forty (3,140) Shares of the Company's Capital stock, having a par value of One Hundred and Fifty-seven Thousand Dollars ($157,000.00), and the premium realized amounted to Ninety-seven Thousand Two Hundred and Sixty-two Dollars and Fifty Cents ($97,262.50).

In view of the unfavorable financial conditions prevailing during the later months of the year just closed, your Directors have not considered it desirable to make any further issue of Capital Stock, but made arrangements with the Company's bankers for the provision, on reasonable terms, of such funds as were required by the Company.

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Sales.
Year ending 30th September, 1914	99,648	$2,453,417.64
“ “ “ 1913	91,284	$2,294,308.21
Showing an increase of	8,364	$ 159,109.43

All of which is respectfully submitted.

A. W. AUSTIN, President.

A. W. AUSTIN,
President.

ARTHUR HEWITT,
General Manager.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto, for the year ending 30th September, 1914, and certify to their correctness.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A.,
Auditors.

Toronto, 16th October, 1914.

The following gentlemen were unanimously re-elected Directors for the ensuing year: A. W. Austin, A. H. Campbell, Sir Wm. Mortimer Clark, K.C., LL.D., Wellington Francis, K.C., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L., Herbert Langlois, Thomas Long, Sir Edmund Osler, M.P.

At a meeting of the Board held subsequently Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President respectively.

◆

The Grand Trunk Pacific has let contracts to the value of $300,000 for terminals at Prince George, Emdako, Smithers, and Pacific, B.C. The contract has been let to Carter, Halls and Aldinger, of Winnipeg, and work has already started.

CONSUMERS' GAS COMPANY'S GOOD REPORT

Year Was Notable for Extensions and Improvement of Financial Condition

The shareholders of the Consumers' Gas Company of Toronto were presented with the sixty-sixth annual report this week with its accompanying financial statements. The report covered the year ended September 30th, 1914. Although two months' war-time were included, none of the adverse effects of war were exhibited in the statement. Increases were noted in the consumption of gas, in the number of consumers, and in gross revenue and net earnings.

The balance sheet shows capital stock of $4,882,000. There is a reserve fund amounting to $3,534,532. Of that, $2,601,527 represents premium on stock. The plant and building renewal fund totalled $1,199,012. The reserve for the next dividend amounts to $122,050. Sundry accounts payable totalled $209,349. Among the liabilities is a special bank advance of $736,212. Although the company borrowed that amount, it is to be noted that its liquid assets, such as investments, materials and supplies, cash, and accounts receivable, amount to more than $1,000,000. This is in addition to the company's real estate, plant and equipment, placed at $9,655,352. The "other investments" appearing in the assets, and amounting to $207,333, represent city of Toronto bonds.

Gain in Balance.

At the end of the year there was a balance of $944,949, representing a substantial gain of nearly $100,000 over the balance brought down a year ago. This was appropriated as follows: Interest, $32,079; dividends, $483,337; plant and buildings renewal fund, $426,996; reserve fund, $2,535, thus after providing for all the usual payments, the already substantial reserve fund benefited by another contribution.

In 1910, the company had a surplus accumulation of about $77,411. On January 1st, 1911, the price of gas was reduced, and the company drew from its surplus and reserve on September 3rd, $48,478 to help meet this reduction. In 1912, $84,817 was similarly drawn, and in 1913, $13,417. In the past year's report, the surplus is seen to have been recovered. It usually takes about three years thus to cover a decrease made in the price of gas.

The past year, so far as extension of business is concerned, was one of the most notable on record. During the year 6,918 new services were installed, and more than 40 miles of street mains were laid, this being the largest mileage of mains laid by the company in any one year in its history. A considerable proportion of these pipes are of 24-inch and 36-inch sizes, required as additional trunk lines. When it is borne in mind that the quantity of gas put out during the past year is nearly double the quantity sold six years ago, the necessity for this large increase in the company's system of trunk mains will be apparent.

The following statement for the past, as compared with the preceding year, shows:—

Fiscal year.	Meters.	Gas sales
1914	99,648	$2,453,417.64
1913	91,284	2,294,308.21
Showing an increase of	8,364	$ 159,109.43

The directors sold by public tender on December 15th, 1913, 3,140 shares of the company's capital stock, having a par value of $157,000, and the premium realized amounted to $97,262 50. In view of the unfavorable financial conditions prevailing during the later months of the year just closed, the directors did not consider it desirable to make any further issue of capital stock, but made arrangements with the company's bankers for the provision, on reasonable terms, of such funds as were required by the company.

The management and directorate, under the able guidance of Mr. Arthur Hewitt, general manager, and Mr. A. W. Austin, president, have achieved success for the company, especially when the special circumstances are considered. There are probably very few companies on this continent which have been so hedged in and worried by civic rules and regulations. The city of Toronto has a considerate say in the company's affairs, and at the same time it competes with the company through its hydro-electric commission. Further considerable increases have been made also in the assessed value of the company's property for municipal taxation, which has necessarily increased the cost of production. Despite all these substantial drawbacks, the company has accomplished much.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Ottawa, Ont.—By-laws to borrow $832,567 have been passed and registered.

District of Saanich, B.C.—The municipality will be in the market shortly to sell debentures.

Galt, Ont.—A by-law to raise $55,000 to make extensions to the Galt waterworks system was carried.

Vancouver, B.C.—The finance committee are to consider the suggestion that the city issue $100,000 of baby bonds.

Shoal Lake, Man.—No offers were received for an issue of $11,000 5 per cent. twenty-year electric light debentures.

Vancouver, B.C.—A block of the city's local improvement debentures have been purchased by the sinking fund trustees.

Alberta.—Wang S.D. No. 550 has been authorized to borrow $1,200. P. W. Strand, secretary-treasurer, Wetaskiwin.

Toronto, Ont.—The council passed a by-law for the issuance of $1,000,000 for extension of the city's hydro-electric system.

Wainwright, Alta.—The town is applying to the provincial legislature for power to issue $50,000 debentures to acquire natural gas rights, etc.

Montreal, Que.—The council at its recent meeting rejected proposal of the Controllers to pay contractors executing permanent works by means of civic debentures.

St. Albert, Alta.—The town is asking the provincial legislature to confirm a by-law empowering the issuance of $5,000 debentures to repay a loan to the Imperial Bank.

Ste. Agathe des Monts, Que.—An offering of $60,000 five per cent. debentures of the municipality of Ste. Agathe des Monts is being offered by Messrs. Hanson Brothers, Montreal.

Alberta.—Several bills to obtain legislation permitting church organizations to sell debentures to meet building costs and expenses are to be dealt with by the Alberta legislature.

Toronto, Ont.—The board of control have instructed the city treasurer to make a report on the advisability of issuing short-term debentures of $50 at par, or even at 5 per cent., to be sold to the citizens of Toronto.

Brantford, Ont.—Ninety-one per cent. of the total amount of the taxes of this municipality, for 1914, have been paid, reports city treasurer Bunnell. The total amount due for 1914 was $454,000, and the amount received, $413,500.

Penticton, B.C.—Mr. R. Baird, inspector of municipalities, has issued a certificate of approval of two by-laws of the corporation of the district of Penticton for $700 and $2,000 6 per cent. ten-year debentures for school purposes.

Toronto, Ont.—A private loan amounting to $2,000,000 has been obtained by the board of control from local financial institutions. The money will be devoted to local improvement work. The bonds will bear interest at 5½ per cent., and will mature in one, two and three years.

South Vancouver, B.C.—"The government do not see their way clear to comply," wrote Hon. H. E. Young, provincial secretary, in answer to a request made by Reeve Kerr and Councillor Stevens that the provincial government advance the money for the construction of lateral sewers in South Vancouver.

"The conditions existing at the present are so uncertain," continues the letter, "and the uncertainty as to what the future may bring forth, constrains us, for the present at least, to conserve our resources in every possible way."

Lachine, Que.—The city's appropriations for the year 1914 as embodied in the finance committee's report, which has been adopted, are as follows: Interest and sinking fund, $93,0[illegible]; [illegible], $10,000; salaries of permanent employees, $45,500; hospital subsidies, $2,400; grants for industrial institutions, etc., $[illegible],000; preparation of plans for new city hall and homologation of streets, $3,000; general expenses, $6,100; audit expenses, $1,500; roads maintenance, $25,000; street lighting, $6,120; sewerage maintenance, $1,500; power for sewerage pumps, $1,440; aqueduct maintenance, $6,000; power for aqueduct pumps, $9,000; lighting and maintenance of public buildings, etc., $11,040; police maintenance, $1,500; maintenance of fire department, $3,500; maintenance of park, $[illegible]; maintenance of health department, $6,000. Total, $[illegible]. The revenue for the year was estimated as follows: Real estate taxes, $100,000; business taxes, $[illegible]; [illegible], $[illegible]; market, $2,[illegible]; fines, $800; interest, $[illegible]; [illegible] taxes, $52,000; lighting power, $35,000; [illegible], $[illegible]; various, $27,185. Total, $256,580.

A Municipal Bond is secured by the total assessable property of the issuing Municipality.

At most critical periods the security remains unaffected.

The present is a most opportune time to purchase leading issues to yield from

the Fairview Department Store and apartments on the two top floors. Fire in rubbish in basement from some cause unknown. Slight damage resulting to stock from smoke. Damage, $310, covered by insurance.

September 6—Alarm from Box 716 at 7.37 p.m. Fire in frame dwelling at 837 Broadway E., owned by Hong Wo and occupied by R. H. Buck. The blaze started in an upstair rear room and was caused by curtains coming in contact with a lamp, part of the roof being burnt off. Damage, $810, partly covered by insurance.

September 8—Alarm from Box 2113 at 9.47 p.m. Fire in Winton automobile, No. 4703 at Union and Renfrew Streets, cause unknown. The car, which was owned by R. Robinson, had been stolen from the Exhibition grounds, and was practically a total loss. Damage, $1,900, partly covered by insurance.

September 9—Telephone alarm at 10.45 p.m. to 1117 Seaton Street, owned by Mrs. E. P. Davis and occupied by the Army Service Corps. Small fire in an upstair floor caused by a defective fireplace. Damage, $75, covered by insurance.

September 10—Telephone alarm at 11.24 a.m., to 1372 Seymour Street, owned by Miss A. Holden and occupied by Mrs. J. Bambridge as a dwelling. Small fire in kitchen partition caused by stove being set too close to wall. Damage, $65, partly covered by insurance.

September 11—Verbal alarm at 4.35 a.m. Small fire in bedroom at the Sun Rooms, 366 Powell Street, caused by man smoking in bed, the mattress and bedding being damaged. Building occupied by N. Yshemurea and owned by Sun Syndicate Company. Damage, $10. Telephone alarm at 1.50 p.m. to apartment house at 846 Smythe Street, owned by Mr. Rhinehart. Some curtains hanging near a spirit lamp caught fire in suite occupied by Mrs. Taylor. Damage, $65, covered by insurance.

September 19—Telephone alarm at 12.30 a.m. to 437 Homer Street, owned by Thomas Storey and occupied by stores and offices. The blaze occurred in a wall-paper store occupied by B. Cross from some unknown cause and was confined to the store, but damage to both building and contents resulting. Damage, $1,096, covered by insurance.

September 23—Alarm from Box 56 at 10 p.m. Fire in a two-story brick warehouse to 1090 Hamilton Street, owned by A. J. Forsyth and occupied by the following firms:—A. R. Coutts and Company, electrical supplies; Edward Kidd and Company, manufacturers' agents; A. J. Forsyth and Company's stock of steel and iron. The blaze started on the main floor in part occupied by A. R. Coutts and Company from some cause unknown, considerable damage resulting to the stock. A third alarm was turned in for this fire. Damage, $7,710, covered by insurance.

September 24—Telephone alarm at 4.44 p.m. Fire in automobile, No. 5112, owned by G. H. Barry, in shed in rear of 838 Granville Street, caused by leak in gasoline tank. Fire confined to auto. Damage, $300, covered by insurance.

September 25—Telephone alarm at 11.33 p.m. to the Canada Shingle Company's mill, foot of Wall Street. Fire started from an overheated bearing, setting fire to large driving belt and pulleys and damaging one of the machines. Damage, $341, covered by insurance.

September 29—Telephone alarm at [illegible].08 a.m. to Denman and Davie Streets. Fire at the Auto Clearance House garage, 1805 Beach Avenue and the Imperial Skating Rink, Beach and Denman Streets, both buildings and contents being practically a total loss. The buildings were owned by the Morton Estate, the garage being occupied by Hickey and Sheenan, and the rink by A. M. Gibson. The blaze apparently started in the garage from some unknown cause, both the rink and garage being a mass of flames when the fire apparatus arrived and damage was also done to the following surrounding property: Morton Block, 1813 Morton Avenue, glass broken and window sashes on fire; Simpson Brothers' Block at Davie and Denman Streets, cornice work, windows and [illegible] blinds damaged and slight damage resulting to stock in drug store; A. M. Gibson's cottage, 18[illegible] Beach Avenue, both building and contents damaged besides several [illegible] houses. Sixteen automobiles in the garage were destroyed. A second alarm was turned in for this fire. Estimated damage, $11,005, partly covered by insurance.

[illegible]—Telephone alarm at 11.11 p.m. to 1056 [illegible] W., owned and occupied by T. Harvie. The [illegible] in the rear, with [illegible], was destroyed. Cause of fire unknown. Damage, $1[illegible], covered by insurance.

STOCK EXCHANGE TRADING CONDITIONS

Some Effects Noted in New York—Montreal Committee's Plan

Monetary Times Office,
Montreal, October 28th.

The committees of the Montreal and Toronto Stock Exchanges in deciding to permit trading of a limited character, followed to a large extent the conditions adopted by the New York Stock Exchange some weeks ago when trading was resumed at a minimum price based on previous closing prices.

The Street is interested in the sequel to the trading permitted by the New York Stock Exchange. The course of prices has been downward, as shown by transactions in the "gutter" market, although the prices on the stock exchange have remained steady up to the present. The decision, it is claimed, has now been reached by the committee to permit trading at a decline from closing prices. This decision was apparently the result of the recognition that prices were out of line with intrinsic values and that the latter had of late been falling by reason of the smaller earnings and the passing or reducing of dividends.

Banks Position has Bearing.

In addition, it would seem that the banks have been accepting the "gutter" market as the basis of values and have been calling loans from brokers on that basis. The brokers, however, were not permitted by the exchange to liquidate their stocks at less than minimum prices, so that they were unable to place themselves in a position to meet the call of the banks.

Although the situation in New York is most interesting, it is unlike that of Toronto or Montreal in that Canadian banks have agreed not to call loans from brokers at all. Nevertheless, considerable pressure is being brought to bear by the banks upon brokers and by brokers upon clients to margin their stocks up to closing prices, which prices are being accepted by the two exchanges as a basis for trading.

Some Readjustments First.

The committee of the Montreal Stock Exchange issued the following circular to its members:—"Members of the exchange desiring to buy securities for cash may send a list of same to the committee, two members of which will be in the committee room daily (Saturdays excepted) from 11 to 12 noon.

"No offers to buy at less than the closing prices, as per enclosed list, will be considered.

"Members of the exchange desiring to sell securities, but only to relieve the necessities of themselves or their clients, may send a list of same to the committee. No prices less than specified on the enclosed list will be considered.

"All orders sent in will be considered good until cancelled in writing."

With the circular has been sent a price list showing the minimum prices at which transactions may be submitted to the committee. With the additional arrangements made by the Montreal Stock Exchange, for trading on a cash basis, it is thought among some of the local houses that for some days at least, whatever transactions occur will be in the nature of readjustments between different houses in connection with various accounts which they may be carrying.

The readjustment will result in the situation gradually being cleared up, and will make for improvement when developments have reached the point where trading can be entered into on a wider scale.

TRADE WITH SOUTH AMERICA

Some Facts Which Must Be Recognized Before Business Can Be Done

The opening of the Panama Canal and the temporary elimination of Germany as a trader awakened last year an unusual interest in South American trade. Considerable generalities were indulged in by Canadian and United States business men regarding business in South America. The reports of Canadian trade commissioners and of trade organizations generally tend to the conclusion that basic conditions must improve before existing trade can be handled by the United States and Canada, to say little of the much discussed greater business in the future. A statement of the national foreign trade council, made to *The Monetary Times*, draws attention to the fact that exports to and imports from South America were halted by the confusion into which the war threw European shipping and European banking, upon which the expeditious transaction of South American trade long has depended.

Characteristics of Trade.

The normal elements of South America's foreign trade have been:

1. Agricultural, forest and mineral exports, constituting raw materials necessary to the life and industry of Europe and the United States.
2. Imports of manufactures.
3. European investments in South America, creating a market for European manufactures.
4. European banking, providing these investments and handling South America's trade with the United States, as well as with Europe.
5. European steamship lines, trading houses, and sales organizations serving a part of the United States' as well as Europe's South American trade.
6. A limited number of the United States' ships, trading houses and sales organizations.

Influence of the War.

The effect of the war upon this commerce has been:—

1. Curtailment of the foreign market for South American products, due either to diminished purchasing power of the warring nations, or to their inaccessibility, as in the case of Germany.
2. Curtailment of South America's source of supply of manufactures, as in Germany.
3. Shrinkage of South American purchasing power through curtailment of European investment in South America, entailing suspension of transportation, industrial, agricultural and mining projects, which normally consume foreign manufactures.
4. Dislocation of London exchange, the universal currency of South American foreign trade and declaration of moratoria, rendering either impossible or expensive payments or collections in London bills of exchange.
5. Interruption of steamship communication, due to German marine's disappearance from the sea, and, for a time, prohibitive war risks.

How great an opportunity has the United States and Canada to sell South America merchandise hitherto bought in Europe? Any answer must take into consideration the already proven fact that European war diminishes South America's purchasing power because it reduces European investment. Whether the curtailment of European supply of manufactures exceeds the curtailment of this purchasing power will largely determine the extent of our opportunity to increase exports to Argentina, Brazil, Chile and other states.

Germany, as a source of supply of manufactures, is cut off, but this, by no means, delivers German trade into American hands. The United Kingdom, although at war, impressively keeps open and travelled its world trade routes and with banking and shipping resources that the United States lack, appreciates all opportunities for the capture of German trade.

Nor is European trade easily uprooted even by the shock of war. British commerce with South America is well grounded on vast investments in railways, industrial, agricultural and mining enterprises, and government loans, an estimated total on January 1, 1913, of $3,376,495,837, yielding about $16[illegible],000,000 in annual interest.

Trade naturally follows investment, but British, French and German investors have not rested content with the natural outworking of this economic law. In recent years they have systematically fortified their South American trade by stipulating that materials from the country providing the funds be preferred in the resultant construction and equipment contracts. Thus British financed railroads often use exclusively British rails, rolling stock, etc., power plants built with German capital are equipped only with German electrical machinery, etc. The practice closed many commercial doors to the United States, while Canada has not sought any great trade there as yet.

Will they remain closed? This depends upon whether European capital continues almost exclusively to supply the funds for continuance of these projects.

While individual opportunities will offer themselves to American exporters and importers, the general security and prosperity of the South American trade can be guaranteed only by the formulation of a definite policy upon the part of business men as well as the government and by co-operation among all elements. Increased South American trade founded on anything less substantial will remain vulnerable to the changing fortunes of European finance and business.

Canada's Opportunity.

Sir George Foster, discussing the rearrangement of commercial relations in South America, says that Canada with other countries will find an opportunity for "greater trade," adding:—"The country, moreover, that is the first to realize fully the significance of this opportunity will have a decided advantage over others in their efforts to capture a share of the South American trade lost for a time to Germany and other warring nations of Europe."

◆

STEAM AS A FIRE EXTINGUISHER

At a meeting of the American Society of Municipal Improvement at Boston, Mr. J. C. McCabe, boiler inspector of Detroit, read a paper in which he advocated steam as a fire extinguisher in place of water. He said:—

"If buildings were fitted with a system of pipes to admit steam to a room in such a way that its expansion would force out the air, much of the loss by water would be avoided, as the condensation from the steam would dry rapidly."

The value of this method would be clearly indicated, he thought, in the control of fire originating in inflammable liquids.

◆

Confidence is mental attitude, but in the aggregate it makes a nation that does things.

After the apple movement, some companies would favor a "buy a steel girder" campaign.

"Billy Sunday," the famous evangelist, says:—"If I should die to-night, that which would give me the most comfort, next to my faith, would be the knowledge that I have in a safety deposit vault in Chicago, life insurance papers paid for up to date and my wife could cash them in and she and the babies could listen without fear to the wolves' howl for a good many years."

A tribute to the Belfast agent of the Canadian Pacific Railway is paid by the Belfast Daily Telegraph, of October 10th, which reproduces a photograph of Mr. W. M'Calla, the Belfast agent of the company, together with his staff, all in regimentals. "The Canadian Pacific Railway," it says, "has placed the benefit of its wide-spread organization at the service of the Empire in the present crisis, and has developed itself into a great recruiting agency for the British Army. Every office is a centre of patriotic activity, and the company's employees have given an excellent lead to others in joining the King's forces in large numbers. The Belfast office, [illegible] managed by Mr. W. W'Calla, is no exception, and of the group of the chief and his staff, shown herewith, [illegible] six are now preparing for the front as [illegible] members of Lord Kitchener's army. The display of pictorial posters in the windows of the Victoria Street office [illegible] very fine, and certainly it cannot be said that the [illegible] has been deaf to the stirring appeal under one of the most effective of them:—'Lads of the desk and wheel and loom, Noble and trader, squire and groom, Come where the [illegible] of England play, Over the hills and far away.'"

COAL IN SASKATCHEWAN

Thirty-two Operating Mines—Brick Clay Finds Ready Market

Saskatchewan's coal production of the past 14 months in the province, amounting to 248,48 tons and giving employment to an average of 280 persons, has not shown any great improvement over the previous period, although there has been more concentration, the larger operators doing the most of the business. The output has been curtailed largely on account of the extreme mild climatic conditions that have prevailed.

Whether the decision of the railway commission on western coal rates will tend to further foster the coal industry in Saskatchewan has yet to be proved.

In the earlier months of 1913 there was considerable stir in the sale and transfer of coal lands, especially where good brick clay could be obtained in connection with the coal. The main body of clay which overlies the coal is considered the best in the province and the finished product finds a ready market in both the adjoining provinces.

The interest taken in the value of lignite coal has been very materially assisted by the carbonizing plant which has been established at Estevan by the provincial government. The carbonized coal has been given a thorough and satisfactory test in Regina at a gas producer plant. The carbonized coal has been tried out for briquette making with an equal amount of success. There is no doubt that these investigations carried out further will eventually prove of the greatest advantage in establishing other industries in south-east Saskatchewan, suggests Mr. F. B. Smith, Saskatchewan's inspector of coal mines, in his report. There have been 56 mines opened up in the province of which the department were notified, but several mine openings have been made in the Wood Mountain and other districts which have not been registered, 32 being the number in operation.

A number of the smaller mines have been closed down, but whether they have been abandoned or not the department has not been notified.

Estevan is Centre.

Within a radius of six miles of the city of Estevan there are 18 mines working, mostly on a small scale. The larger are:—

The Great Western Coal and Brick Company, Limited, who have established an extensive brick plant at the mine and expect to be in operation this fall.

The Maple Leaf Coal Company, Limited, are situated on the main line Canadian Pacific Railway at Shand Station. The brick work consumes a large portion of their coal production, but their shipping trade in the winter is considerable.

The Estevan Coal and Brick Company, Limited, have the largest brick plant in the district, for which their mining operations is mainly used.

The George Parkinson Coal Company have a very steady coal trade, as they have secured most of the large contracts in the district.

Other mines working do but very little in the summer, mainly doing development work and repairs.

Over Two Thousand Tons per Day.

The coal industry at Roche Percee has been very light for the past two years, due more to the absorption of a large coal area by other operators; some of the smaller mines working steady in the winter supplying local trade mostly.

The mines in the Pinto district have practically all been closed down for the past two years, although not abandoned entirely.

The Bienfait district takes in the largest operating mines in the province. It is from this point on the line of the Canadian Pacific and Canadian Northern Railways that the great proportion of coal is shipped. The Hawkinson Mine, the Manitoba and Saskatchewan Mine and the Taylorton Mine are capable of producing 2,500 tons per day at most times during the winter when they have a full complement of men. These mines are all equipped with a modern colliery plant, including hoisting machinery, tipples, shaking screens and box car loaders.

All the mines in the Dirt Hills district are on a very small scale, none of them have shipping facilities.

[illegible] the small outcrop mines at many various [illegible] importance ex[illegible] some distance from the railway.

UNDER BRITISH COLUMBIA INSURANCE ACT

Thirty Life Companies Submit Returns—Analysis of Miscellaneous Business on Pacific Coast.

British Columbia's "Insurance Act," which deals with insurance other than life insurance, came into force October 1st, 191[illegible]. Up to the 1st day of June, 1914, there had been licensed under the Act, according to the report of Superintendent Gunther, [illegible] fire insurance, twenty Canadian, four British, and six American companies; accident insurance, twelve Canadian, eight British and six American companies; sickness insurance, twelve Canadian, eight British, and five American companies; automobile insurance, four Canadian, one British, and six American companies; burglary and theft insurance, five Canadian and two American companies; guarantee insurance, eight Canadian, four British, and three American companies; hail insurance, one American company; inland transportation insurance, three American companies; live stock insurance, one Canadian and one British company; plate-glass insurance, one British Columbia, six Canadian, four British, and four American companies; sprinkler-leakage insurance, one American company; steam-boiler insurance, two Canadian and two American companies; tornado insurance, two American companies. Marine insurance has now also been brought under the Act by amendment. Temporary licenses have been issued.

Invested Thirteen Million.

The following companies, to which temporary licenses were issued, have ceased to transact business in British Columbia: American Casualty Company, American Credit Indemnity Company, International Insurance Company, Limited, Missouri Fidelity and Casualty Company, New World Life Insurance Company, Western Empire Life Insurance Company, Western Life and Accident Company.

Life insurance companies collected premiums totalling $2,516,595 in British Columbia during 1913. The amount of policies, new and taken up, was $18,486,654, and the net amount in force was $76,700,702. Policies becoming claims accounted for $1,540,272 and claims paid for $114,962. Life companies have $8,270,397 invested in mortgages in the province and $4,779,242 in other securities.

Miscellaneous Insurance Business.

In British Columbia accident insurance companies collected $890,367 in premiums and paid out $310,272 in claims. Other insurance companies' returns were: Automobile premiums $56,383, losses $9,787; burglary premiums $3,092, losses $280; guarantee premiums $65,346, losses $58,930; plate-glass premiums $21,760, losses $14,854; live stock, boiler, sprinkler premiums $5,804, losses $530, the total miscellaneous insurance premiums amounting to $1,051,763 and losses $304,655, with $158,343 unsettled claims.

◆

BUD AND CAMBOO

In his "Bud and Bamboo," John Stuart Thomson tells the story of China so that the boy and girl may understand it. Mr. Thomson has already made a reputation as an authority on the Far East, having lived there for many years and being the author of "The Chinese" and "China Revolutionized." The people of America are beginning to realize that great things will probably happen in the Orient during the next [illegible] years. Mr. Thomson has made this plain in his writings. The present volume will give the child an excellent idea of Far Eastern life.

"Bud and Bamboo." By John Stuart Thomson; 96 pages; published by D. Appleton and Company, New York and Chicago. Price, [illegible] cents.

FROM PRODUCER TO CONSUMER

Transportation and the Cost of Living—Some Interesting Suggestions

By A. T. Drummond, LL.D.

The ideal method of reducing the cost of food products in our cities and towns is to bring the producer and the consumer into direct contact. Presently, in actual experience, the producer too often receives less than he is entitled to, and the consumer pays greatly more than he should. Transportation charges, frequent handling, high customs dues, and too many middlemen, with excessive profits taken by each, all come in for blame, and the question is still being discussed as to how the ideal method can be brought into practice.

The familiar way in our cities of meeting the difficulty is the establishment of public markets, to which the farmers living within a reasonable distance can, in their wagons, bring their produce for sale on fixed days convenient to the residents. Competition is, however, restricted and a tendency to maintain city prices created by the fact that the producers living beyond a radius of ten or more miles cannot well take advantage of the market facilities, whilst, on the other hand, the buyers must themselves provide for the delivery of their market purchases at their homes. Thus, among the needs of the present system are the making of these markets available as well to the distant producers as to those near at hand, and the securing of a larger circle of buyers by having some arrangements for cheap delivery throughout the city.

It is just here where the new interurban electric railway, with its quick service and its frequent stops, can be of use. It is quite feasible to construct special market cars which would carry at low rates farmers, gardeners and their products from points thirty and forty miles away, and would run directly into the market buildings alongside the stalls, the return journey being made the same afternoon at a convenient fixed hour. It is also quite feasible for this railway, with its motor cars constructed for its own parcel delivery service, to establish at the same market-place a delivery system under which, at fixed hours and reasonable rates, buyers could have their purchases delivered at their homes.

Another Direct Method.

But there is another direct method of bringing the producer and the consumer together. Whilst the new parcel post system considerably cheapens the transportation of small packages and secures delivery at the receiver's home, its purpose is general, it assumes no liability in case of loss, and it does not provide for collection of the price and payment of it to the seller. A plan in operation on some of the English railways suggests how all this can be done effectually. In connection with their extensive parcel systems, booklets are published giving the names and addresses of reliable dealers in foodstuffs along their lines, and townspeople can arrange at moderate prices for delivery, free at their homes, of vegetables, fruit, poultry, and even butcher meat.

The method could in part be adopted by the express companies connected with our Canadian railways, but the limited number of stopping-places on these railways and the excessive charges for short distances and on small packages, largely preclude direct dealings with the actual producers on the farms. It is, however, here where the new interurban electric railway, with stoppages every mile, if necessary, almost at the farmer's door, and with reasonable charges on parcels, becomes of service. The consumer in the city desires to deal only with reliable producers, and the railway, through its agents, is enabled to ascertain this reliability and in its published lists to recommend dealings with producers along its lines, far and near.

Just One Intermediary.

Its part is to carry the article to the city, deliver it at the consumer's home, collect the price, and, after deducting its own fixed compensation, pay the balance through its station agent to the producer. There is thus only the one intermediary—the transportation company—between the farm or orchard and the point of actual consumption, and, with the frequent trains on the electric road, there can be two or three parcel services daily each way, and prompt deliveries ensured.

It should be here explained that the day of the electric railway, as heretofore understood in Canada, cheaply built on the public highways and only intended to carry passengers and to be run at a slow speed, is gone. The new interurban electric road is being constructed on its own right-of-way and to the best standards of the steam roads in roadbed and equipment with a view to high speed and to carrying all descriptions of freight as well as passengers.

◆

TO CLEAR SUEZ CANAL

The British government will remove from the Suez Canal all German and Austrian ships which have taken refuge there and which have not hitherto been detained because of hostile acts. The British Foreign Office sent a note to all the foreign powers giving formal notification of the government's intention.

The government maintained that the German and Austrian ships which have interned themselves in the canal and the neighboring waters, are putting the canal ports to a use never contemplated by the canal treaty; have all their crews aboard, and according to reports received here, there have been a number of happenings leading the government to believe that these aliens plan an attempt to destroy the waterway.

◆

GRAND TRUNK MAKES UP DEFICIT

At the annual meeting of the Central Vermont Railway at St. Albans, Vt., the annual report showed that the Grand Trunk, which controls the road, was obliged to make up a deficit of $259,257 on the year's operations to enable the company to meet its fixed charges amounting to $752,251.

This compares with a deficit shown in the previous year of $9,796, the fixed charges in that year having reached the high water mark of $761,223 compared with $718,276 for 1911-12 and as already stated $752,251 for the year ended June 30, 1914.

The principal features of the company's statement for a period of six years show as follows:—

	Gross.	Net.	Surplus.
1908-09	$3,795,332	$716,143	$ 3,117
1909-10	4,088,411	745,812	24,774
1910-11	4,337,644	806,384	90,251
1911-12	4,435,832	731,229	12,953
1912-13	4,577,590	751,427	*9,796
1913-14	4,500,111	554,037	*259,257

*Deficit.

The interest, on the company's $12,000,000 first mortgage bonds is guaranteed by the Grand Trunk under a traffic contract by the terms of which the Grand Trunk agrees to pay in any one year a sum not exceeding 30 per cent. of its earnings from business interchanged by the Grand Trunk and the Central Vermont. Of the $12,000,000 first mortgage $250,000 is held by trustee for improvements but the total funded obligations of the company amount to $12,758,000 of which $973,000 are equipment trust obligations.

The report shows general decreases in train and car mileage, freight dropping 18,770 and passenger 61,109, total of all classes being 124,730. Passenger car mileage decreased 300,095 and freight 170,363 making a total of 219,732.

There was a sharp increase in percentage of expenses to earnings from 79.92 in the preceding year to 87.68 per cent., a jump of 7.76 per cent.

◆

The somewhat startling heading in one of the newspapers the other day: "W. Grant Morden takes on record cargo," is one more proof of the complications bound to arise by placing personal names of real live humans on tugs and steamers and other marine monsters!—Montreal Financial Times.

More especially so if the W.G.M. is a tank steamer.—Toronto Saturday Night.

Or a schooner.—Financial Times again.

Or in short, any kind of a transport of delight.

CANADA-FRANCE TRADE

Canadian Commissioner-General Roy, in Paris, Sends Suggestions for Securing Orders

In a report to the trade and commerce department, Ottawa, Hon. Philipp Roy, Canadian commission general at Paris, discusses the possibilities of French purchases from Canada. Economic relations between Canada and France, he says, appear to be ruled by the following general conditions:—

As soon as the general mobilization was over, the French Government must have considered the means of offsetting the closing down, almost total during a few months, and then partial until the end of the war, of the large factories. Trained mechanics have gone to the army, or at any rate the majority of them. The laborers who remain are insufficient and can be adequately increased only by untried labor, which would be costly to manufacturers without bringing sufficient returns (damaged plant, defective output, etc.). On the other hand; the enforcement of the "moratorium" has deprived these manufacturers of the necessary financial resources. However, it is probable that small manufacturers, which utilize and transform raw materials, and those which turn out every-day goods, will quickly find the means of starting work again, and will take care of the demand more or less satisfactorily. It is therefore rather as regards large manufactures (cloth, finished leather, woolens, steel, iron, nails, beams, lumber for building purposes, etc.), that the scarcity of production will be felt.

The government is aware that it can remedy partly these requirements by turning for supplies to British industry (cloth, cotton, etc.).

Channels Already Prepared.

Consequently, it does not appear possible to count upon urgent needs which would induce the government or commercial circles in France to solicit the industrial assistance of Canada. The easiest way will ever be resorted to, that is to say the channels already prepared in the United States. Consequently, Canadian trade must offer its co-operation and seek direct its share in the orders which France is preparing to place.

The solution offering, therefore, is that Canadian dealers and industrial leaders should take the trouble of coming to France with all the necessary documents and full power to conclude transactions. They alone would be in a position to ascertain the needs, the character of goods demanded, delivery and payment conditions, and quote prices which would be profitable, but also equal to those which might be quoted by the United States. With respect to "tenders" called for by the French government, it is customary that manufacturers should themselves forward them, comply with the specifications and call on the officers in charge of the contracts, obtain from them the prices previously quoted in former tenders and ascertain the quality of the goods.

Suggestions for Securing Orders.

With regard to orders from wholesale dealers, French custom also requires that the offers should be made verbally, subject to acceptance.

Whatever may be the positive or practical results thus secured by Canadian manufacturers or dealers—which it is impossible to foretell—they will at any rate have gained this great advantage of getting a better knowledge of the French market and starting connections which later on will bear profitable fruit. This has become all the more necessary now that, according to probabilities, the German market will be closed to Canada during some years and that this loss will have to be compensated by a gain in France. It may be added that from the financial standpoint, the extension of commercial relations would facilitate the holding of the ground taken by Canadian securities on the French market, a feature which it is imperative not to neglect.

As to French Needs.

The necessities of war prevent the French government from making known "urbi et orbi" certain needs pertaining to the state of war, such as those for rails, iron and steel for the repair or reconstruction of bridges, railway ties, etc. In these circumstances also the necessity is manifest to come on the ground to look into the matter direct. Should the commission of Canadian [illegible], the risk would be run of appearing to be indiscreet.

Consequently [illegible] private trials would be desirable rather than [illegible] general commercial investigation. It would not be advisable that a Canadian committee, however well formed it might be, should come to France on an official visit similar to the trip made some years ago by the Canadian Manufacturers' Association. The time is far from favorable for such a step and a campaign to impress public opinion is out of the question. Industrial managers and leaders must come privately and seek to obtain orders each for himself. They must bring with them all the necessary information, taking care beforehand to convert prices and measures to the French standard. A sort of scale prepared in advance for each industry will be necessary.

Mr. Roy also gives details in his report regarding various trades, including iron and steel, lumber, dressed leather and hides, paper, food products and cattle.

WAR AND LIFE INSURANCE

Officials at the London offices of American life insurance companies say that, in view of the policies held in Europe, it is probable that a good deal of money will have to be paid out as a result of the deaths of policyholders in the present conflict. It is impossible to learn how many policyholders there are in the different armies.

An official of the Mutual Life Insurance Company of New York said that no more policies would be written by that company for any person intending to take part in the war.

At the Equitable Life Insurance Company's offices, it was said that a premium would have to be paid if any person seeking to be insured expected to take part in the war.

ALBERTA'S RAILROAD BONDS

In reply to questions in the Alberta legislature, Hon. C. R. Mitchell, provincial treasurer, has stated that at the present time there is in the custody of the Dominion government the sum of $12,000,000, received from guaranteed railway securities, and not paid. The amount in connection with each railway company is as follows:—

Canadian Northern Railway Company, $1,148,959.

Canadian Northwestern Company, $2,759,652.

Grand Trunk Pacific Branch Lines Company, $1.

Edmonton, Dunvegan and British Columbia Railway Company, $1,935,160.

Alberta and Great Waterways Railway Company, $6,095,555.

Lacombe and Blindman Valley Electric Railway, $140,035.

Total, $12,070,371.

These balances, which include accrued interest, are deposited in the Imperial, Union, Commerce and Merchants' banks. Mr. Mitchell further stated that the total amount received from the railway securities executed by the government was $31,686,500, of which amount $19,620,107 had been paid out as construction was completed.

Mr. Mitchell also stated the province had received the interest provided for under the Alberta and Great Waterways Act, the amount being $950,456.54, which was received on December 24 last. No arrangement had been made with the various holders of Alberta and Great Waterways bonds in regard to the proceeds of the sale of the bonds, as no arrangement was considered necessary.

* * *

After the war is over—how will your business look then if you do not hustle now?

The annual report of the department of customs, Ottawa, reviews the trade of Canada, customs revenue and shipping in comparative tables covering the period since Confederation. The grand aggregate trade of the last fiscal year is given as $[illegible],744,725, of which the exports amounted to $[illegible] and the imports to $650,746,707. The duty collected amounted to $107,180,578.33, the percentage of duty on the [illegible] value of goods entered for consumption dutiable and [illegible] being 16.[illegible] as against 17.0[illegible] in the previous year. The [illegible] collected is shown by ports, and under this head [illegible] some large totals, $24,460,814.30 being collected at Montreal and $18,806,881.2[illegible] at Toronto.

INSURANCE IN PROPORTION TO VALUE

Co-insurance Clause and What It Does—Appraisements, Losses and Premiums

The co-insurance clause is probably the most used and at the same time the least understood of all the many clauses which appear in policies of fire insurance.

Insurance buyers are frequently under the impression that it is a vexatious device inserted for the sole advantage of the insurance company.

The position really is that the cost of insurance cannot be properly calculated by a rate per cent. unless it is known on what proportion of the value at risk that rate per cent. is to be paid, state Messrs. Willis, Faber and Company, Toronto and Montreal, managers of the insurance department of the Canadian Manufacturers' Association in a bulletin of the association. For instance, if there are two buildings equal in all respects except in the matter of value, the following example will show why it is necessary for the insurance company to know on what proportion of the value the rate is to be paid.

Two Buildings of Different Values.

Suppose building "A," exclusive of foundations, is worth $100,000 and insured for $80,000, which at, say, 1 per cent., produces $800 premium for the insurance company.

And building "B," exclusive of foundations, is worth $200,000 and insured for $80,000, which at 1 per cent., produces $800 premium for the insurance company.

When the policy does not contain a co-insurance clause, the insurance companies have to pay (up to the total of the policies) any loss that may occur. It is partial and not total losses that are of most frequent occurrence and are the greatest drain on insurance companies.

It is obvious that, other conditions being equal, there is a far greater chance of a heavier loss where there is $200,000 instead of $100,000 at risk.

The co-insurance clause provides that the insurance shall be in a certain proportion to the value, or that the assured shall bear his proportion of any shortage.

Applying the 80 per cent. co-insurance clause to the above example produces the following results: Building "A," valued at $100,000, insured for $80,000, produces $800 premium and provides full protection for any loss that may occur up to $80,000.

Building "B," valued at $200,000, insured for $80,000, produces a premium of $800, but does not provide adequate cover, as is shown by the following imaginary case:—

A fire involving loss of, say, $25,000 occurs. The value is $200,000, and the co-insurance clause provides that 80 per cent., or $160,000, must be insured. The proportion of insurance to 80 per cent. of the value is 80000, 160000, or half of $25,000 = $12,500 paid by insurance companies, $12,500 borne by the assured.

To Produce Enough Premium.

Thus it will be seen that with the co-insurance clause, in order to provide for the collection of such a loss in full, the assured should have taken out policies for $160,000 at a premium of $1,600, or exactly double what he paid.

The main principle of the co-insurance clause is to produce enough premium; the hardship of it is that the assured often intends and believes that he is properly insured until the fire incurs. Then it may happen that an appraisement of the values proves them to be materially higher than he believed, thus, after all, bringing the co-insurance clause into operation.

The alternative of insuring without a co-insurance clause usually involves a substantial increase in cost and imposes an unnecessary hardship on the assured, who is, in fact, insuring a fair proportion of his values.

◆

There are many advantages in being a mere "peanut' financier, to judge by the straits of "real" financiers.

Heavy stores of farm produce are being assembled at certain points throughout Ontario, for shipment to England. The consignment, apples, roots, beans, potatoes, cheese and butter, and meat, is said to be in sight to cargo three large ships. All this will go as a free gift from the farmers of Ontario to the British government for the various purposes [illegible] by the w[illegible]

SASKATOON MAY SELL BABY BONDS

Local Citizens Could Finance Needed Works, Say Commissioners in Report to Council

Saskatoon's civic commissioners in a report to the council show that the following works could be constructed by the city if some means can be devised for raising the necessary funds, amounting to $78,254. These works were included in this year's programme, but were suspended upon the outbreak of the war, owing to the financial house to whom the debentures had been sold failing to provide the money:—

(a) Extension to the power-house to make accommodation for two new boilers, etc., $36,000.

(b) Storm sewers. The approximate cost of this work (excluding material which is on hand) is $21,000; of this amount certificates have been issued for $6,533, which leaves a balance of $14,580 still to be expended.

(c) Sedimentation basin.—The estimated total amount of this contract, $33,800. Estimates have already been issued for $6,126, leaving a balance of $27,674 still unexpended. Probably only a part of this work could be carried out before the severe weather sets in.

In addition to the above works, arrangements have been made to continue the contract for constructing a force water main across the river. The work will mean the employment of between 20 and 30 men through the winter.

Difficulty is in Raising Funds.

While it is comparatively easy to select the work which may be carried out to provide relief, it is not, owing to financial conditions which at present prevail throughout the world, such an easy matter to raise the necessary funds with which to finance same, suggest the commissioners.

"The amount required is not large, and it has been suggested that possibly those who are in permanent positions, and those who have small sums of money for investment, could provide the necessary funds to find work for those out of employment, at the same time obtaining an excellent investment for their money.

"The proposal made is as follows:—

"That the city issue debentures to the value of $100,000 to the residents and non-residents who may desire to purchase, in denominations of $10, or any multiple thereof, up to $100, bearing interest at the rate of 5 per cent., payable half-yearly.

"By purchasing debentures with moneys in the sinking fund, when required, it can be so arranged that debenture holders can redeem their debentures at any time.

Some Suggested Benefits.

"The benefits of this system are:—

"(a) It enables the city to finance the work that it could not otherwise finance, and without delay.

"(b) It serves as a medium for the small investor to place his money where he can receive a moderate rate of interest with absolute security, with the privilege of withdrawing his money any time he may wish.

"(c) It serves to keep the interest at home instead of sending it away to other centres.

"(d) It is an advantage over the savings bank, inasmuch as deposits obtain 2 per cent. higher interest, and depositors can withdraw their money at any time with interest to the date of withdrawal.

"By a recent amendment to the city act it is necessary to obtain the approval of the provincial local government board to any investments which may be made with moneys in the sinking fund.

"The commissioners recommend that the matter be taken up by the finance committee with the Bank of Montreal and the local government board for permission to purchase debentures with moneys contained in the sinking fund." The proposal to sell the debentures in small denominations over the counter is favored by Saskatoon's business men.

THESE ARE GOOD INVESTMENTS

While the present attractive return upon Canadian municipal debentures, say the Canada Bond Corporation, Limited, Toronto, may account for the increasing demand for this class of investment, and it is unquestionably true that the real value of these securities is gradually becoming better understood by Canadian investors, yet only a small part of these realize that the wealth and assets of an entire province, city, town or other municipality stands back of its debentures; the interest payments are as regular as day and night; the principal is always paid when due; there is always a market for them; they are collateral on which banks and other financial institutions make liberal loans; they are virtually taxes, payable before first mortgages; they are not subject to serious shrinkages in value; and that failure to pay either principal or interest upon Canadian municipal debentures is practically unknown.

Considering the rate of interest these securities now yield, that the investment can be made to cover a long or short term of years as may be desired, and that the purchase can be arranged in amounts from $200 up, there is no investment on the market that compares with it.

◆

DOW FRASER TRUST COMPANY

The general balance sheet of the Dow Fraser Trust Company for the year ended August 31st, 1914, shows assets of $344,035.20, made up as follows: Cash—In office, $12,708; Bank of British North America, Vancouver, current account, $1,594.45; Bank of British North America, savings account, $40,487.45; Bankers' Trust, New York, $642.60. International Bank, San Francisco, $1,055.45; Seattle National Bank, Seattle, $1,936.71; total cash, $58,424.66. Stock and bonds, $42,875; first mortgages on real estate, $82,790.65; securities deposited with Minister of Finance, $40,877.38; collateral loans, $37,002.81; accounts receivable, $21,517.27; investments Real estate (at cost), $49,676.44; furniture and fixtures, $10,860.98; total, $344,035.20.

The liabilities are divided as follows: To the public—Savings deposits, $207,706.79; time deposits, $7,232.37; demand collections, $9,032.22, $223,971.38. To the shareholders — Undivided profit, $23,883.82; less dividend, $8,320, $15,563.82. Capital stock—1,045 shares at $100 each, issued and fully paid, $104,500.000, $120,063.82.

A continuous audit of the company's books was made by Messrs. Crehan, Martin and Company, chartered accountants, who report as follows:

(a) We verified by actual count the cash in the office. (b) We also verified the bank balances by vouchers and statements submitted by the different banks. (c) We examined the stocks and bonds and found them in order. They are placed on the books at actual cost, par value being greater. (d) We examined all the real estate mortgages held in the office and found them in order. (e) The real estate held by the company is placed on the books at the original cost. (f) The company has deposited with the government securities to the value of $40,887.38 and a mortgage for $25,000, and has taken out guarantee bonds to the amount of $75,000, making a total of $140,887.38 for the protection of their depositors. This, together with the cash on hand as at August 31st, makes a total of $199,312.05 against the savings deposits of $207,706.79, without taking into account the other liquid assets, namely, stocks and bonds, mortgages, collateral loans and accounts receivable, totalling $225,073.11. (g) The interest earned by the mortgages on real estate has not been taken into account as an asset, whereas the interest on all deposits has been computed and credited up to the end of August and either paid or taken into the liabilities.

The Incorporated Accountants' Year Book, issued by the Council of the Society of Incorporated Accountants and Auditors, is just published for 1914.15. It contains the names of [illegible] members. Of these 2,080 are in England and Wales, [illegible] in Scotland, 66 in Ireland, and 441 in other British possessions and foreign countries. The society has district societies in [illegible] of the leading towns of the United Kingdom, and there are also branch societies of Incorporated Accountants in Scotland, Ireland, Australia, South Africa and Canada. The current volume extends to 528 pages, and contains, in addition to the foregoing, the society's regulations and [illegible].

MORE EMERGENCY FINANCIAL MEASURES

The New Zealand parliament has passed an act, known as the Mortgages Extension Act, under the provisions of which it is not lawful for a mortgagee, without the leave of the Supreme Court of New Zealand, to foreclose so long as the war lasts, and for a period not exceeding six months after war has ceased. The provisions of the act also apply to agreements for sale and purchase of land and to leases of land containing an optional or compulsory purchasing clause. In Cyprus the moratorium has been extended to October 13th.

A decree, dated August 24th, authorizes the Brazilian government to issue paper notes to the value of 250,000 contos of reis, of which 150,000 contos are to be set apart for meeting duly authorized treasury liabilities and 100,000 contos for loans to banks. Ten per cent. of the weekly Customs receipts of Rio de Janeiro and Santos are to be ear-marked for paying off the 150,000 contos, while the bank loans must be paid off by the end of 1915. The issue of a portion of these notes to the value of 150,000 contos of reis was authorized by a further decree of the same date. Of this amount, 100,000 contos are for loans to banks and 50,000 contos for meeting treasury liabilities.

SELKIRK DOCK AND THE FUTURE

The Dominion government marine railway drydock at Selkirk, Manitoba, was opened last week. On that occasion, Mayor Deacon, of Winnipeg, said:—"It will take several years for the whole significance of this work of the development of Lake Winnipeg navigation, which your member, Mr Bradbury, has so long advocated and championed, to become entirely apparent. But sooner or later, I firmly believe that the lower end of Lake Winnipeg will be connected by rail with the Hudson Bay Railway, and when that great artery of traffic is opened in its fullness then I believe you will find much of its shipping will be diverted from Selkirk and Winnipeg to the lake, and hauled to the end of the lake in a fleet of steamers far larger and finer than any you now have plying these waters. It is for that day and for those boats, as much as for the needs of the present, that this truly magnificent structure is intended."

Mr. Bradbury, M.P. for Selkirk, said:—"We have a magnificent heritage in the fisheries of Lake Winnipeg, and in them an industry that, with proper conservation of the lake, will be worth hundreds of thousands of dollars annually for all time to come. In carrying out measures of conservation now, we are accomplishing much to correct some of the awful wrongs done in the past on Lake Winnipeg. In years gone by, I have seen, and you have seen here at Selkirk, runs of from six to ten millions of fish per season brought off the lake, until Lake Winnipeg was in grave danger of being entirely depleted. The government, none too soon, stepped in and limited the catch to two and one-half millions of pounds per annum, yet so far had the depletion of the lake gone that we have seen the large commercial fish companies, with all their equipment, fail to secure even that quota in a season.

"One of the prime necessities that led to the building of this marine railway was the construction of the steel patrol boat, which will be the largest boat on the lake, and which you saw on the way here this morning. The purpose for which this boat has been constructed is to secure spawn and bring it into the two large hatcheries that the government have built at Gull Harbor and on the Little Saskatchewan."

OCTOBER FIRE LOSSES

This Year's Total Shows Satisfactory Decrease Compared With Past Three Years

The Monetary Times' estimate of Canada's fire loss during October amounted to $772,115, compared with September loss of $720,278 and $1,383,572 for the corresponding period of last year. The following is the estimate for the October losses:—

Fires exceeding $10,000	$605,000
Small fires	46,400
Estimates for unreported fires	120,715
	$772,115

The fire waste in each province for the first nine months of 1913 and 1914 has been estimated by *The Monetary Times* as follows:—

	1914.	1913.
Ontario	$6,746,224	$7,322,118
Quebec	4,026,474	3,853,051
New Brunswick	1,763,487	1,057,005
British Columbia	1,500,438	903,594
Alberta	1,051,439	3,636,431
Manitoba	1,004,297	2,062,797
Saskatchewan	759,299	1,945,328
Nova Scotia	644,274	1,548,717
Prince Edward Island	36,747	452,791
	$17,532,679	$22,781,822

The fires at which the loss was estimated at $10,000 and over were:—

Centreville, N.B., Oct. 1	Business section	$30,000
Moncton, N.B., Oct. 1	Freight sheds	15,000
Galt, Ont., Oct. 1	Business block	10,000
Lac du Bonnet, Man., Oct. 2	Lumber plant	125,000
Winnipeg, Man., Oct. 8	Warehouse	40,000
Brockville, Ont., Oct. 9	Picture theatre	10,000
Amherst, N.S., Oct. 11	Stores	10,000
Montreal, Que., Oct. 11	Factory	100,000
Medicine Hat, Alta., Oct. 19	Milling plant	20,000
Winnipeg, Man., Oct. 21	Pavilion	25,000
Winnipeg, Man., Oct. 24	Block	25,000
Hanna, Alta., Oct. 26	Business section	20,000
Halifax, N.S., Oct. 27	Business section	100,000

Of the presumed causes 12 were incendiary, 4 defective flues, 4 sparks, 4 defective wiring, 3 overheated stoves and furnaces, 1 candle, 1 rats and matches, 1 lightning, 1 engine backfiring, 1 tramps, 1 gasoline explosion, 1 overheated stove pipes, 1 boys with matches.

OCTOBER MUNICIPAL BOND SALES

Largest Total This Month Since the Outbreak of War

The municipal bond sales in Canada for October, as compiled by *The Monetary Times*, amounted to $737,429, compared with $510,950 for September and $3,452,282 for the corresponding period of last year.

Calgary disposed of $250,000 debentures privately in London.

The following are the particulars of the October municipal bond sales in Canada by provinces:—

British Columbia	$300,000
Saskatchewan	156,129
Ontario	153,500
New Brunswick	124,000
Alberta	3,800
	$737,429

The following table, compiled from the records of *The Monetary Times*, shows the sales in the Dominion during the first ten months of 1914, compared with the three previous years:—

	1911.	1912.	1913.	1914.
January	$ 420,337	$ 2,133,531	$ 1,337,500	$ 1,628,337
February	1,037,287	2,596,378	1,038,806	5,095,336
March	6,271,925	1,026,716	335,492	5,108,776
April	3,010,288	[illegible]27,160	3,693,857	2,708,153
May	[illegible],046,047	1,[illegible]28,748	880,630	5,655,755

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100.00 invested has produced all the way from $127.00 to $193 00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

IMPORTANT PRIVY COUNCIL DECISION

Case Regarding Federal and Provincial Incorporation in Canada, Decided in Favor of Former

A Canadian Associated Press despatch from London, dated October 26, says:—An important judgment involving company law in Canada was delivered by the Privy Council to-day in the consolidated appeals from the British Columbia Supreme Court in John Deere Plow Company vs. Theodore Wharton and Garnet Duck, with the Attorney-General for the province and the Dominion intervening. The appellant company was incorporated in 1907 by letters patent issued under the Companies Act of the Dominion. The letters patent purported to authorize it to carry on throughout Canada the business of dealer in agricultural implements.

Held by the Court.

It was held by the court below that certain provisions of the British Columbia Companies Act had been validly enacted by the provincial legislature. These provisions prohibit companies which have not been incorporated under the law of the province from taking procedings in the courts of the province in respect of contracts made within the province in course of their business; unless licensed under the Provincial Companies Act; they also impose penalties on the company and its agents if not having obtained license, it or they carry on the company's business in the province. The appellant was refused a license by the Registrar. It was said that there was already a company registered in the province under the same name. The question which has to be determined is whether the legislation of province which imposed these prohibitions was valid under the British North America Act.

Interfere with Business.

Their lordships had to decide whether it was competent to the province to legislate so as to interfere with carrying on of business in the province of a Dominion company under circumstances stated. The distribution of powers under the British North America Act, said the Privy Council, interpretation of which is raised by this appeal, has been often discussed before judicial committees and the tribunals of Canada, and certain principles are now well settled.

The general power is conferred on the Dominion by section 91 to make laws for the peace, order and good government of Canada extends in terms only to matters not coming within the classes of subjects assigned by the act exclusively to the legislatures of the provinces, but if the subject matter falls within any of the heads of section 92, it becomes necessary to see whether it also falls within any of the enumerated heads of section 91, for if so, by the concluding words of that section, it is excluded from the powers conferred by section 92.

Expression "Civil Rights."

Turning to the appeal before them, the first observation their lordships make is that the power of the provincial legislature to make laws in relation to matters coming within the classes of subjects forming No. 11 of section 92, the incorporation of companies with provincial objects cannot extend to a company such as the appellant company, the objects of which are not provincial, nor is this defect of power aided by the power given by No. 13, relating to property and civil rights; unless these two heads are read disjunctively the limitation in No. 11 would be nugatory.

The expression "civil rights" in a province is a very wide one, extending, if interpreted literally, to much of the field of other heads of section 92 and also to much of the field of section 91. But the expression cannot be so interpreted and it must be regarded as excluding cases expressly dealt with elsewhere in the two sections notwithstanding the generality of words. If this be so, then the power of legislation with reference to the incorporation of companies with other than provincial objects must belong exclusively to the Dominion parliament, for the matter is one not coming within the class of subjects assigned exclusively to the legislatures of the provinces within the meaning of the initial words of section 91 and may be properly regarded as a matter affecting the Dominion generally and covered by the expression "the peace, order and good government of Canada."

[illegible] from the premises that those provisions of the [illegible] Act of British Columbia, which are relied on [illegible] compelling the appellant company to obtain [illegible] of the kind about which controversy has arisen [illegible] as condition of exercising its [illegible], are inoperative for these purposes. The question is not one of the enactment of laws affecting general [illegible] in the province and relating to civil rights or taxation or administration of justice. It is in reality whether the province can interfere with the status and corporate capacity of a Dominion company in so far as that status and capacity carries with it powers conferred by the parliament of Canada to carry on business in every part of the Dominion.

Their lordships are of opinion this question must be answered in the negative.

They think the legislation in question really strikes at the capacities which are the natural and logical consequences of the incorporation by the Dominion government of companies with other than provincial objects. These appeals are allowed and judgment entered for the appellant company in the action of Wharton vs. John Deere Plow Company with costs of the action by the company against respondent Duck must, unless parties come to an agreement, be remitted to the court below to be disposed of in accordance with the result of this appeal. As to the interveners, the Attorney-General of the Dominion and Attorney-General of the province, there will be no order as regards costs. Respondents Wharton and Duck must pay the costs of appellant company's appeal, excepting so far as those increased by the interventions.

◆

COMPANIES LICENSED

The following companies have been licensed to do business in British Columbia: Metals, Limited, of Calgary. Mannesman Tube Company, Limited, of Montreal. Victoria Acreage (Canada), Limited, of Calgary.

The following company has been licensed to do business in Ontario: The Anglo-French Exploration Company, Limited, of Great Britain; capital, $200,000.

Economic Weapons Which Help British Arms

GREAT BRITAIN is showing the strength both of its resources and resourcefulness in carrying on the war. The delay during the first two weeks after the outbreak was caused more because the British Empire is a larger, more complex and more powerful machine to set going at full speed than is the German Empire. Great Britain is now settling down to the business of war. It is prepared to carry on that business until the world's belligerent menace is crushed. Aside from the actual scene of hostilities, striking demonstration is given of the power of commerce and capital as effective weapons. When the British government appointed a "sugar" commission, it obtained in a short time, temporary control of the raw cane sugar market. The general conclusion was that this action was taken to prevent speculators from raising prices to the detriment of consumers. The commission contracted for 900,000 tons of raw cane sugar at an average price of $100 per ton, representing a sum of $90,000,000.

Now it transpires that this action had far greater significance. The British government has prohibited the importation of sugar into the United Kingdom with the object of preventing German and Austrian sugar reaching there from neutral countries. It is of interest to read the official explanation of this move: "Measures already have been taken to prevent the importation into Germany and Austria of goods necessary to the conduct of war, but when neutral countries have the opportunity of making great profits on the enhanced prices which Germany and Austria are willing to pay, it is impossible to put a stop to all importations," says the memorandum, which continues:—

"At the present time there are few exports of great value which can be sent out in exchange for goods which Germany receives from neutral countries. Of these sugar is chief. Already exchanges are rising against Germany and Austria, and if the exportation of sugar could be prevented or rendered unprofitable a further serious blow would be struck to their trade.

"German and Austrian sugar may not be imported here under its true colors, but if it is first exported to a neutral country and then re-exported from the neutral country to Great Britain it passes as innocent. Already advices have been received that bids for German sugar are being greedily sought in neutral countries. Even if this sugar did not come into this country, though there is reason to believe that the traffic has begun, it would set free a corresponding amount of sugar in a neutral country, which might be shipped into the United Kingdom. The only ultimate big market for this sugar is the United Kingdom, and nothing less than total prohibition of importation into this country will hinder the German and Austrian exportation.

"In ordinary circumstances such prohibition would be inconceivable, but large supplies secured by the sugar commission assure ample supplies for British consumption for many months. The price at which it has been bought permits of retail sale without loss at a rate below that now current, namely, 3¾ pence per pound for granulated sugar, and a reduction may be expected.

"In these circumstances the government has decided to prohibit for the time being the importation of sugar, with the object of defeating the German and Austrian efforts to turn their stocks into money. This measure was not adopted earlier, as the danger did not exist until recently, as the exportation of sugar from Germany and Austria was prohibited. The prohibition has been relaxed now that they found Great Britain has been able to make other provision. We have already rendered their prohibition useless. We shall now deprive them of any financial advantage from its removal."

That is but one of many assaults with the ammunition of commerce upon the enemy's defences. With the British navy patrolling the world's shipping lanes, Great Britain is able to enforce in practice the important plans devised in London.

As pointed out in these columns recently, the "silver bullet," so called by Mr. Lloyd George, is doing its work, too. Indeed, its success may compel a change of name to the "silver shell." To date, Great Britain has financed its own war operations with treasury bills. It has raised £75,000,000 in that way, in five issues of £15,000,000 each. All of them were oversubscribed. On its one-year bills it obtained money at exceptionally easy terms, namely, 3½ per cent. From the total mentioned, the Imperial government loaned £10,000,000 to Belgium. The London market has responded freely to issues of £2,000,000 of India bills; £2,000,000 of French sterling treasury bills, and £600,000 of Norwegian treasury bills. The Canadian finance minister, Hon. W. T. White, has arranged with the Imperial government and the Bank of England that the Bank shall advance to the Dominion government the funds required by Canada for naval and military purposes from time to time, as required. *The Monetary Times* learns on the best of authority that the arrangements so made are most favorable to Canada.

A message from London last week stated that in ordinary circumstances gold would now be going from Great Britain in large amounts to Egypt to finance the cotton crop. The financial dislocation has necessitated the issue of £5,000,000 of Egyptian treasury bonds which will have the guarantee of the British government. A portion of the proceeds will provide a reserve for the emergency bank notes issued in Egypt. These emergency notes in Egypt will probably cure the native fellaheen of their Oriental propensity for hoarding gold, just in the same way as it is believed that the £1 notes in Great Britain may not go out of circulation now that the public has become accustomed to them.

The Russian Minister of Finance, also, has been authorized by Imperial decree to place short-term treasury bonds amounting to $60,000,000 on the English market, and the English market will show how friendly is the "silver bullet" to its allies.

Not a country in the world, other than Great Britain, could finance its own extensive war operations, those of its overseas empires, those of its allies, in addition to financing various important commercial transactions and using generally the "silver bullet" to clear the way for the ultimate victory of British arms.

WAR AND AMERICAN BUSINESS

How Domestic and Foreign Markets Are Affected—Development of Export Trade

"For the present the purchasing power of all nations has been reduced, and, except for food products and some raw and partly manufactured materials for the United Kingdom, we may expect a sudden development of our export trade only in the necessities of life. The important gain which we can now make is to establish trade relations, even at a temporarily lessened profit, which will help to make the United States and Canada leading suppliers of the world's manufactured goods."

These are the conclusions of the specialists of the research department of the Alexander Hamilton Institute, of New York and Toronto. The Institute has just published the results of its second investigation concerning the effects of the war on American business. This report, a copy of which has been received by *The Monetary Times*, takes the form of a world map upon which are indicated the trade opportunities opened to Americans because of the partial suspension of the commerce of the warring countries.

According to the map of the Institute the largest opportunities for trade expansion are in Europe. Germany and Austria-Hungary are not considered, as communication with these countries is suspended. It is suggested that France needs our coal and coke, foodstuffs, lumber and machinery. But Great Britain is shown to be the richest field.

As to Domestic Opportunities.

But it is not in the export market alone that the war affords an opportunity for trade expansion. The experts of the Institute estimate that the suspended imports in lines well represented by domestic industries amount to more than $400,000,000 annually. Home industries have opened to them, therefore, an immense market at their very doors. Canada, in the same way, must look to her own manufactures and to us to supply goods to the value of $110,000,000 which can not now be secured abroad.

Canada and the United States have been importing, as shown on the map, goods of the same general classes as those which have been manufactured for domestic and export consumption. The suspension of these imports means, then, that we need not create new industries, but rather that we must develop those already established. For example, we are heavy importers of Belgian glass and steel, machinery, electrical supplies, paper, all kinds of textiles, leather goods, light hardware, chemicals and the like. Also, we export considerable quantities of these same classes of goods. Substitution of American for foreign manufactures in most lines should, therefore, not prove difficult.

Tabular Statement of Industries.

In order to add further value to the information contained on the map, the experts of the Research Department of the Institute have collected and classified data concerning the leading industries of the United States. The statements concerning the effects of the war upon foreign trade, prices, etc., in the various industries are based upon information drawn from a large number of sources, and, in the judgment of the Institute, represent the best opinion available at this time.

Under the general head of public utility companies [illegible] considers steam railroads, water transportation, street and electric railways, electric light and power companies and telephone and telegraph companies. Curtailment of [illegible] the inability to finance new extensions [illegible] of dividends, is predicted [illegible] water transportation [illegible] as the registration [illegible] to finance new construction is reflected in the iron and steel industries, in lumber, in builders' hardware, in stone and terra cotta and other industries supplying allied products.

The compilers of the map sum up their work as follows: "Everything in our power has been done to check the accuracy of these statistics, the best authorities have been consulted, and conflicting opinions carefully weighed.

"There are too many factors of uncertainty, however, to make predictions easy or authoritative judgment absolutely safe. First of all, the uncertainty concerning the probable length of the war makes everyone extremely cautious; then, the uncertainty concerning the adjustment of the financial markets makes it almost impossible to finance any business, even though it may surely be benefited by the present conflict. The closing of the exchanges, the suspension of dividends, the foreign exchange situation, the difficulty experienced in securing the raw and crude materials which formerly came from abroad, the European contraband lists, together with the increased ocean freight and insurance rates, all these tend to make foreign trade impossible or impracticable, and to depress industry to such an extent that, in spite of the favorable influences, industrial leaders fear to take advantage of new or widened markets."

Just as rapidly as these factors of uncertainty are removed, American industries will prosper.

◆

DOMINION BANK'S NEW HOME

The Dominion Bank will move into its new building at the corner of King and Yonge Streets, Toronto, on November 14th, and will be open for business there two days later. This is the second building of the skyscraper type to be completed at this busy corner. The Dominion Bank will have excellent and commodious premises for its head office staff, while every convenience has been provided also for the public. Special attention has been given to the arrangement of the safe deposit vaults. These are among the best installed in Canada. The round vault door to the vault containing the safe deposit boxes weighs approximately forty tons, and in addition to the solid construction an elaborate electrical protection system has been installed. A number of coupon and committee rooms have been provided, all of which contain desks, chairs, materials for writing, telephones, etc. There is a large storage vault in connection with this department where trunks, boxes containing silverware, etc., and other articles of bulk can be safely stored.

The Dominion Bank continues to make good progress, and is enhancing further its already enviable reputation as a sound and progressive financial institution.

Hon. P. S. G. Mackenzie, for the past four years provincial treasurer in the cabinet of Sir Lomer Gouin in succession to the Hon. W. A. Weir, died at Melbourne, Que., this week.

Mr. Samuel Clark Duncan-Clark, the well-known fire underwriter, died at his home, Toronto, on Tuesday. Mr. Duncan-Clark was born in Dumfries, Scotland, and came to Canada at the age of [illegible], settling in Toronto. His early years were spent in the [illegible] business, but later he connected himself with fire insurance, and took charge of the [illegible] Insurance Company, and built up [illegible] connection. He continued in charge [illegible] business was taken over by the [illegible]. For many years he was president [illegible] Underwriters' Association, which position he [illegible] from active business about [illegible]

CANADIAN WESTERN LUMBER CRITICIZED

Affiliated Companies Guarantee System—Analysis of Finances and Profits

A financial scheme for an arrangement between the Canadian Western Lumber Company and the Columbia River Lumber Company has been carried by the debenture holders. Much criticism and comment was heard regarding this in London and the London Financial Times said: The Canadian Western Lumber Company, with a share capital of $15,500,000, was brought out in 1910, and the Columbia River Lumber Company, which was a subsidiary, and has a share capital of $5,500,000. in the following year. All the share capital has been issued in both cases the Canadian Western holding the whole of that of the Columbia River. A further associated concern is the Columbia Western Lumber Yards, which has a share capital of $5,000,000, and acts as the retail organization of the other two ventures, which own all the $2,500,000 ordinary capital. The public in London were offered $2,500,000 preference shares, on which the Canadian Western and the Columbia River jointly and severally guarantee a minimum dividend of 6½ per cent. per annum. The Canadian Western placed £1,500,000 five per cent. first mortgage debenture stock here at 88 in 1910, and the Columbia River £600,000 five per cent. first mortgage debenture stock at 89 in 1911; the latter is guaranteed by the Canadian Western. Thus we have a somewhat complicated guarantee system, which is really of little value unless all the companies are doing well, for each is so dependent on one or both of the others that if they fail to prosper they bring their associated concerns down with them.

Prospectus and Profits.

Neither the Canadian Western nor the Columbia River has earned anything approaching prospectus estimates, save in one year in the case of the former. The Canadian Western relied on a gross profit of about $1,010,000 and the Columbia River on a gross profit of about $480,000 per annum. What has actually been accomplished the following table shows:—

Year.	Gross profit.		Carry forward.	
	Canadian Western.	Columbia River.	Canadian Western.	Columbia River.
1910	$ *360,100	....	$ 11,100	....
1911	877,900	$*247,700	183,400	$128,800
1912	1,336,500	337,900	488,900	260,500
1913	985,000	297,700	13,300	354,900

*For nine months.

No Stock Dividends.

Up to last year debenture service was covered, but no dividends were paid on the preferred and ordinary shares, the carry forward in the case of each company representing the accumulated net profit. The close family connection between the various concerns seems to have had a rather demoralizing effect on the accounts, and it is a little difficult to know how the separate undertakings stand. Thus, though the net profit of the Columbia River is supposed each year to be transferred to the Canadian Western, the balance sheet shows that it is apparently still retained by the former concern. Nevertheless, the Canadian Western also takes credit for it in its own accounts.

Now the companies find themselves badly in need of funds, notwithstanding that the statements in the last annual reports, which were issued as recently as March, were of a very optimistic character.

Independent Report Suggested.

Yet financial difficulties must be acute or there would not even be a superficial justification for the drastic proposals put forward. Not only are the debenture holders of the Canadian Western and the Columbia River asked to accept payment of the October coupon in the one case and the December coupon in the other half in cash and half in two-year deferred warrants, but they are invited to surrender their first charge principal in exchange for new five per cent. debenture stock in the Canadian Western, only 50 per cent of which will be so secured, the other 50 per cent. being merely income stock. That the holders are offered as a sop $225 in ordinary shares in respect of each £100 of debenture stock does not make the scheme any the more inviting. The interest on the income stock, as its name implies, will, though cumulative, be dependent annually on profits, and so, too, will that of the first debenture stock for the next two years.

The Columbia River debenture stockholders will lose the separate guarantee by the Canadian Western they now possess, and the status of the whole of the new debenture stocks wants defining in relation to the guarantee given by the two companies in respect of the Columbia Western Lumber Yards preference capital. Since the original debenture issues the total of the Canadian Western has been raised to £2,000,000 and that of the Columbia River to £1,000,000, partly in order to cover floating indebtedness. Allowing for redemptions the aggregate of the two concerns now outstanding is £2,768,600. The amount of floating loans as at July 31st was $3,733,400. The commercial position of the undertakings is by no means clear and the debenture holders are practically asked to go into the scheme in the dark. The Financial Times final comment was that there certainly should be an independent report on the businesses before anything further is done, and we advise those who are interested in the companies to strongly oppose the arrangement now suggested.

◆

CANADA TO SUPPLY SOME CAPITAL

Supply of Thirty Millions Per Month Cut Off, Increased Production Necessary

Great Britain has financed her own national debt, and also her own public utilities, and then loaned thousands of millions all over the world. On the other hand Canada has had to borrow practically all its national, provincial and municipal debts from England, while the mortgage funds and other moneys came from the same source, was the summing up of Mr. J. W. Flavelle before the Canada Club at Montreal. Last year she had to pay 27,000,000 pounds sterling in interest alone, and probably this year, between the balance of trade and interest there would be $[illegible] going out of the country. It was the duty of the banks to so conserve matters that confidence in Canadian finances would remain unshaken, and then she would be able to discharge her obligations.

There was a disposition to criticize the banks, and Mr. Flavelle admitted that at times they seemed unreasonable, but on the whole he thought they had honorably performed a great service to the country.

Borrowing Thirty Millions Monthly.

There was an impression that the banks had plenty of money and only refused loans on good security from a desire to be nasty. But the banks had not only to examine the soundness of the security, but also to assure themselves of the regularity of repayment when they took money from general use and loaned it for individual use. He argued that the chief anxiety this year would not be commercial but financial. We had to face the problem of living on what we had unless we could re-establish borrowings. At the moment practically no money was thus coming into Canada, where for years past it had been coming in at the rate of $30,000,000 a month, and if this cessation continued it would mean very anxious times for bankers as well as merchants and manufacturers.

Apply the Remedy.

"In the past we have come by our money easily; we have prospered with a minimum of effort other than energy. If some have lost let us pay up without whining. There is grave danger of a mean spirit getting abroad, and that we shall think of our inconvenience and trouble. Instead of blaming ourselves we are too apt to blame the banks, the government, or someone else. It is hard to see our savings go, but the world will go on just the same, and the discipline may be good for the country in the long run, and we must not show ourselves poor losers. We must play the part of men, confronted as we are with conditions which are not temporary. There is a period of readjustment ahead that will tax all our best qualities for a year or more to come. Instead of scolding we must apply the remedy, and that is produce more and spend less."

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully *both* your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

HOW CANADA IS FINANCING

Canada is doing pretty well with its financing during war time. The Dominion government has arranged with the Bank of England for advances for naval and military purposes, as required from time to time. The Ontario government is making a five-year bond issue locally which is meeting with success. Other provincial governments have made satisfactory arrangements for temporary financing. During the past three months Canadian municipalities have sold $1,660,134 of their debentures in Canada, according to the records of *The Monetary Times*. In addition the banks have on loan to our municipalities, $44,338,873, of which $7,966,597 was loaned in September. Other important financing includes the securing of funds for the Toronto-Hamilton concrete highway and Calgary's sale of $250,000 debentures in London. Toronto is also making an offer of $2,000,000 5½ debenture notes at par, maturing at the end of one, two and three years. There should be little difficulty in disposing of such an attractive municipal security. All of which indicates that Canada is keeping up the traditions of the British Empire by finding ways and means despite the difficulties forced by the Kaiser and his coterie.

◆

Surely the life of the British Empire is worth a few inconveniences and sacrifices.

* * * *

Adding the estimates of M. Yves Guyot, the noted French economist, of the losses to the chief countries at war through the suspension of industrial production for six months, the total for Germany, France, Great Britain and Russia, is more than $8,500,000,000. The countries named are placed in the order of the extent of their losses. Germany, according to M. Guyot's estimates, loses in the six months more than the other three nations combined, her total approaching $4,400,000,000. These figures should interest former war advocates.

HOW THE MORATORIUM WORKS

Here is a copy of a letter received by a lender from a borrower in Manitoba. It shows how the selfishness of a borrower, able to discharge his liability, is served by the blanket legislation passed at the recent session of the legislature in that province:—

"I would like if you would send me a statement of the payment and interest due on October 3rd next on ———. I may say that owing to the money market being so tight and living being so high, I may have to let the principal go this time, and only send you the interest due. As you are aware, an act was passed last week under which I can do that and be within my rights. If you will tell me what is the lowest possible cash payment you will take in full, you to give me a clear registered title to the lot in question, all expenses paid by you, I will see if I can get the money (should the cash look good to you) and will place all my papers in my lawyer's hands for final settlement, and in any case an answer by return of mail will oblige."

This letter, which requires no comment, recalls another of its kind, sent to a loan company, and which was shown to *The Monetary Times* a few months ago. Here it is:—

"Dear Sirs,—In reply to your letter of the 18th of March, I must say that I can not pay you the interest on your mortgage this year. You seem to think you can make me pay this as you state in your letter that you will not allow it to remain. How shall I pay when I have not got it? You can make extension till next year or not just as you please, there are millions of acres of unoccupied land out here. And what good is it to us farmers any-way, we only get a d—— poor living from it, and if you are not satisfied with the way I am running your property out here come and run it yourself. You threaten to foreclose on the 3rd of April; why did not you? I am getting tired of waiting for it.

"I would advise you to wait till next year as you will get at least one more year's interest. Why is it that you fellows that produce nothing and do nothing useful own everything, and we that produce everything own nothing? You seemed to think that my last letter was too short, perhaps this will suit you better. Yours, etc. P.S.—You can answer this letter or not as you please."

The tone of these cheeky communications tends to convince us that it is not a moratorium that is needed in Western Canada, but rather another cheek to turn.

◆

If you feel blue, figure how you would feel if Germany were dictating its war indemnity terms to England. After that, you may well be cheerful, up and doing.

* * * *

The manager of a Montreal bond house thinks that investors are only awaiting clearer skies before taking advantage of the present bargain prices for high-grade securities. The war situation has its uncertainties and there is considerable money lying idle, represented by recent dividend and interest payments, as well as by general savings. It seems fair to assume that with definite news of victories by the Allies at least a portion of these funds will seek employment in the ordinary channels.

NOW AND LATER

From Mr. William Molson Macpherson, president of The Molsons Bank, comes the first review of conditions in Canada, with a word as to the outlook. Mr. Macpherson is a type of banker inclined to err on the side of conservative statement. It is, therefore, all the more gratifying to know that at the annual meeting of his bank at Montreal this week, he took a decidedly cheerful view of the situation. He thinks that the present depression, by forcing a stop to the extravagant expenditures of the last few years, both public and private, will put the country on a much sounder basis. This, undoubtedly, is the correct view. Many lessons are being learned in economics, finance and business, which will prove of great service when normal conditions return. We must remember, also, that the activity of 1912 was abnormal. If that fact had been recognized more fully at the time, many difficulties would have been obviated.

The experience of The Molsons Bank is typical of the attitude of Canadian business during the past few months. The monthly totals of the bank's circulation and deposits have been considerably below the totals of the previous year, but within the last two months they have again risen, and are now practically the same as the figures of last year. Herein are reflected the sudden loss of business confidence and the comparatively rapid return to faith in the Canadian situation.

Describing the present position, Mr. Macpherson said: "While the slowing up in trade has forced some factories to run on short time, yet the situation is somewhat relieved by the very large orders for boots, clothing and military supplies which many factories are now receiving from the government, and also by the increased demand for pulp and paper caused by the war.

"The abundant crops in the country, and the unusual demand for farm products, including cheese, butter, wheat and live stock, etc., in consequence of the war, have stimulated business throughout the farming sections of Canada. The eastern provinces have benefited largely, and the crops in the western provinces, although not as large as in former years, are of excellent quality, and the increased prices for grain and cattle have strengthened the financial position of the farmers. The almost certain prospect of higher prices for another season or so, has encouraged the farmers to prepare very much more ground for seeding than usual. The price of horses, which had fallen very considerably of late, has been practically regained, owing to the large demands of the War Office for horses suitable for army purposes; although heavy horses are still difficult to sell.

"Country payments are well met, and the farmers' business, which after all is the foundation of the country's trade, is sound."

Some interesting statistics were also given by the president of the bank. Among them were figures showing deposits in Canada in 1913 to be $1,141,378,931. That sum was increased this year to $1,165,131,486. In that fact alone, there is good reason for at least a small measure of confidence.

◆

Nobody but party politicians want an election now. If they force one, they may figure on losing the thousands of votes of the men who think for themselves.

CANADA'S TRADE DEPARTMENT

Canada's trade service has made substantial improvement during the past few years. Sir George Foster, as minister of trade, heads the department of trade and commerce. With him are Mr. F. C. T. O'Hara, deputy minister, and Mr. Richard Grigg, chief trade commissioner. They have all worked zealously in various channels and have given considerable assistance to the Dominion as a trading nation. Trade commissioners abroad are looking after our interests in all important countries and the British consular service is now largely at the disposal of Canadian business men.

Sir George Foster is a sort of commercial missionary and his addresses to public organizations in various cities have been of great help. He has the practical knowledge of the student and the globe trotter. He has an analytical mind, a retentive memory and an epigrammatic tongue. His speeches, therefore, give the dry and necessary facts of commerce with the relish of human interest.

The valuable work of Sir George and his officers is brought to mind just now by a reprint recently issued of articles dealing with the German war and its relation to Canadian trade. Sir George Foster desires to call attention both to this pamphlet and to the general usefulness of the weekly report of the department. Heads of firms sometimes inform the department that they do not receive the weekly report, but on inquiry the name of the firm is found on the mailing list. The explanation always given is that having in the past held the report very lightly because of its negligible character a direct journey is accomplished from the postman to the waste paper basket, but the report has been so greatly enlarged and improved that it is more than double in size and nearly doubled in circulation. Sir George Foster is giving personal attention to both the matter and the form of its production and every effort is being made to render it worthy the attention of leading men of business, having regard to vital importance of industrial production and export. In short, it is now a trade report which Canada's business men cannot afford to ignore.

◆

We all know the food value of the Canadian apple. What we want to know is how to shorten the bridge between producer and consumer.

BUYING IN THE EMPIRE.

The allied forces in Europe will not bombard the cathedrals of Germany when those forces are on German soil. They do not engage in wanton destruction. It is far more likely that the British and French artillery will mark for destruction the Krupp works at Essen. There, Germany's war machines and ammunition have been manufactured. The firm of Krupp, which has worked hand in hand with the Kaiser in his long-planned scheme to re-make the map of Europe, has acquired numerous companies until it has become a gigantic enterprise. With all its ramifications, it now employs no fewer than 70,000 persons; and if members of families are counted, the livelihood and fortunes of nearly 250,000 persons—or exactly the combined population of the four smallest German principalities—are dependent upon the prosperous work-

SAVINGS DEPARTMENT

Interest allowed on deposits at all Branches of Bank from date of Deposit

ing of this one enterprise. The amalgamated works comprise six coal mines, a number of iron mines, cokeries, six iron and steel works, including rolling mills, the famous cannon works at Essen, a large shipbuilding-yard, and a fleet of vessels for the Rhine transport service, worked from Rotterdam. The various works of this firm consume 2,500,000 tons of coal yearly, most of which is obtained from its own mines.

The allied armies may be left to look after the Essen works. The Canadian army at home—the thousands of consumers—may be trusted to make just as effective warfare by purchasing only goods made in Canada, the British Empire, and in friendly neutral countries. All the wealth and brains and labor behind the great Krupp works have been the servants of a system which has sought and brought war. All the wealth and brains and labor in Canada for the past century have been exerted in the cause of peace and prosperity. It is to further that cause in Canada and the Empire that every citizen to-day should be mighty particular to know where the article he proposes to buy was made. And it is up to the Canadian manufacturer to supply the proper price and quality.

◆

A correspondent objects to our criticism of Mayor Mederic Martin of Montreal. His letter, which states he will "knock" *The Monetary Times*, fails to answer the question as to whether Mayor Martin's mayoralty term is helping the credit of the city of Montreal. As to the "knocking," we can only say, go ahead. *The Monetary Times* has heard all kinds of threats, big and little, during its forty-seven years. A paper worth its salt always gives an honest opinion and an honest opinion does not please everyone. This particular letter is dated from Montreal.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 30th:—

La Rose Mine, 100,000; McKinley-Darragh-Savage Mine, 87,090; Mining Corporation of Canada, Limited, (Townsite City Mine), 86,460; total, 273,555 pounds, or 136 tons. The total shipment since January 1st, 1914, are now 30,839,493 lbs., or 15,419 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the first three weeks of October:—

Canadian Pacific Railway.

	1914.	1913.	
October 7	$2,273,000	$3,145,000	— $ 872,000
October 14	2,226,000	3,298,000	— 1,072,000
October 21	2,040,000	3,252,000	— 1,212,000

Grand Trunk Railway.

October 7	$1,008,265	$1,088,759	— $ 80,494
October 14	1,012,328	1,083,182	— 70,854
October 21	969,483	1,163,307	— 193,014

Canadian Northern Railway.

October 7	$ 563,900	$ 575,600	— $ 117,000
October 14	493,900	593,700	— 98,800
October 21	349,800	609,900	— 260,100

The Canadian Northern Railway's September returns shows the following increase:—

	1914.	1913.	Increase.
Gross earnings	$2,109,900	$1,994,900	$115,000
Expenses	1,519,200	1,470,000	49,200
Net earnings	590,700	524,900	65,800
Mileage in operation	4,670	4,520	150

The September statement of the Grand Trunk System shows net revenue as follows: Grand Trunk proper, £3,450 sterling increase; Grand Trunk Western, £3,600 decrease; Grand Haven, £7,050 decrease; whole system, £7,200 decrease.

The Canadian Pacific Railway statement for September, 1914, follows: Gross earnings, $10,754,139; working expenses, $6,387,091; net profits, $4,367,048. For the three months ended September 30th, 1914, the figures are as follows: Gross earnings, $31,153,876; working expenses, $19,645,224; net profits, $11,508,657. In September, 1913, the net profits were $4,415,578, and for the three months ended September 30th, 1913, net profits were $12,493,511. The decrease in net profits is, therefore, for September, $48,530, and for three months ended September 30th, $984,850.

MANUFACTURERS' AND FARMERS' EXPORTS

Canadian trade for the twelve months ending with August last totalled $1,063,908,233, a decrease of $42,030,379, as compared with the preceding twelve months. The decrease of trade in merchandise is considerably larger than the aggregate figures show, since coin and bullion imports increased by nearly twenty millions and exports by some three millions.

The decrease in imports of merchandise during the twelve months was $117,121,716, the total for the year being $575,264,642. Exports of merchandise totalled $468,537,872, an increase of $75,091,337. Customs revenue for the twelve months was $95,327,982, a decrease of $22,429,090.

There were increases of more than eighteen millions in exports of animal produce, of twenty-four millions in exports of agricultural produce, and of nearly fifteen millions in exports of manufactures.

Exports to the United Kingdom during the twelve months totalled $218,254,968, an increase of $33,215,708. Exports to the United States totalled $209,033,603, an increase of $33,473,678.

GERMANY'S TEN TRADE COMMANDMENTS

Within the last three years hundreds of thousands of the following "German Ten Commandments" have been circulated in Germany, and in many offices they are framed and hung on the walls, Sir G. Pragnell recently told a meeting of British manufacturers.

They read as follows:—

1. In all expenses, keep in mind the interest of your own compatriots.
2. Never forget that when you buy a foreign article your own country is the poorer.
3. Your money should profit no one but Germans.
4. Never profane German factories by using foreign machinery.
5. Never allow foreign eatables to be served at your table.
6. Write on German paper, with a German pen, and use German blotting paper.
7. German flour, German fruit, and German beer can alone give your body the true German energy.
8. If you do not like German malt coffee, drink coffee from German colonies.
9. Use only German clothes for your dress and German hats for your head.
10. Let not foreign flattery distract you from these precepts; and be firmly convinced, whatever others say, that German products are the only ones worthy of citizens of the German Fatherland.

RAILWAYS PREPARING FOR TRAFFIC

Britain's Confidence in Canada is Best Asset—After the Treaty of Berlin

BY REX CROASDELL.

The idea that a country like England could go to war with a highly organized and wholly prepared Germany, without fuss, and shoulder her chosen responsibility of keeping the lusty young Dominions overseas supplied with a reasonable amount of development funds, and maintain open trade routes to all parts of the world where her citizens had accustomed themselves to doing business, was regarded by publicists as something new in national work. So it is. Yet it is merely England's way of emphasizing the fact that in the great scheme of Empire of which she is head and front, war is but one problem. By demonstrating that it is only an incident in the general routine of Empire-running she has established more firmly than ever before her commanding position among the nations of the earth.

Bankers had Confidence.

Important evidence of the sincerity of this broad British spirit as far as Canada is concerned, has been given in the provision made for funds enabling the Canadian Northern Railway to continue the prosecution of its transcontinental enterprise. The bankers of Britain, despite the sheltering moratorium, took that decisive action because of their confidence in the Dominion whose development they have fostered for so many years, and in the Canadian Northern Railway, with its splendidly located lines, superior grades and developmental administration. As a result, the company has been able to continue its construction work, the strain of unemployment has been relieved and confidence restored.

Transportation Systems Must be Ready.

As a natural effect of the signing of the Treaty of Berlin it is expected that there will be a marked revival of world interest in Canada; and that the tide of immigration, temporarily suspended because of the conflict in Europe, will set Canadaward again. The war harassed people of the old world will set their faces toward the west, and Canada, her own lessons learned, will profit by the exchange. Tonnage will return to the railways, and prosperity will accrue to the nation as a whole. It is essential when that time arrives that the transportation systems of the Dominion be completed to the point where they can handle business most expeditiously. The welding together of Canadian Northern steel into a continuous rail highway from Quebec to Vancouver is now practically guaranteed, and, as a finished network of lines through productive portions in Canada, it will take its place in the march of Canadian and Imperial development. The line connecting the industrial east with the agricultural west has already been completed. It is expected that the Pacific coast section—Edmonton to Vancouver—will be linked up by the end of the year.

◆

War orders mean an active winter for many factories. Canada is getting many such orders. The payment for them is assured, and every dollar helps.

Application has been made in the Montreal Practice Court and a petition filed in the Insolvency Court for a winding-up order against Messrs. W. H. Scroggie, Limited, one of Montreal's large dry goods stores, by Messrs. Stewart and Macdonald Exports, Limited.

Discussing the Canadian banking position, the London Economist says: "We are still in the early stages of the war, and it would be unwise to assume that the storm has already been weathered; but it may, at any rate, be claimed that in resisting the great strain that has up to now been imposed upon it the Canadian banking system has justified those who placed their trust in its soundness and strength."

Orders for copies of the 1915 Monetary Times Annual are now being received. Price 50 cents per copy

INCREASING FACILITIES AT ST. JOHN

Harbor May Have Its Busiest Winter—Pulp Exporters Can Supply Britain

(Special Correspondence.)

St. John, N.B., Nov. 3rd.

Though St. John, in common with the rest of Canada, has suffered from business dislocations as a result of the war, there is a decidedly optimistic feeling as to the future. Unless something unforeseen occurs, the indications are that this port will do one of the largest businesses in its history during the coming winter. Two new steamer berths have been provided on the west side of the harbor, and these will probably be utilized by the C.P.R. boats. The remounts for the British army will be shipped from the east side, near the big sugar refinery. In addition to the shipping traffic, the harbor development schemes on the east and west sides will keep a large number of men busy throughout the winter. Lumbering and general business are fairly satisfactory.

The provincial government has removed the ban which prohibits the exportation of timber for pulp purposes cut on the crown lands of New Brunswick, so far as it relates to the British Isles. This suspension of the regulation will probably remain in force until the close of the war.

Gradually, the ocean steamship companies are lining up for their winter campaign at St. John. The new Canadian Pacific Railway steamer Missanabie will sail from this port about December 11th. The New Zealand and Australian steamers will resume sailings next month. A direct weekly service from Manchester to St. John and a direct fortnightly service from this port to Manchester is announced for the winter, the first steamer, the Manchester Spinner, leaving Manchester November 7th and St. John November 28th. The Donaldson line company expect to send several steamers here for general freight and for the transhipment of remounts. The Allan line boats have been released by the government, and the Tunisian is scheduled to steam from St. John on Saturday, November 28th, for Liverpool.

◆

LIFE AND TIMES OF LORD STRATHCONA

"The Life and Times of Lord Strathcona," by Mr. W. T. R. Preston, a well-known former official of the Dominion Government, has been published in London by Eveleigh Nash. The alternative title for the book might very appropriately have been, "How the Canadian Pacific Railway Came Into Being," for a goodly portion of the volume deals exhaustively with the inception of this undertaking. Considerable space is also devoted to the Hudson Bay Company's deeper influences on the west, states a Canadian Associated Press cable.

The author betrays no hesitation whatever in saying what he thinks concerning both these corporations and the prime directors thereof. He has plenty of observations too, regarding their effect upon the political life of Canada, while full credit is given to Lord Strathcona's strength of character, foresight and charming personality. The author contrasts his career with that other master Empire-builder, Cecil Rhodes, finding that "there is little to compare, but much to contrast, not only in their early, but also in their later careers." He goes on to pay tribute to Hon. Clifford Sifton as the man responsible for the only successful immigration propaganda. He speaks of Sir Wilfrid Laurier and Sir Robert Borden as statesmen representing the highest aspirations of political purity, and respecting whom not a breath of scandal has touched their careers.

The author foresees an agitation by the western farmers, demanding to be relieved of the heavy burden now endured, by either the cancellation of Government loans to rival lines of the Canadian Pacific, or the purchase of these railways by the country finally.

Mr. Preston has changed the usual formula as to what Canada owes to Lord Strathcona into what Lord Strathcona owes to Canada. Declaring that figures loom up in a haze when language fails to find expression in arithmetical calculations, he alleges that if Donald Smith had never appeared on the scene the Dominion of Canada would now own the entire railway system in the west, and an area of prairie land double the size of [illegible] would never have been given away for nothing. He [illegible] that more than one government will be defeated before the western farmers will secure their fr[illegible]

PAYMENT OF INTERNATIONAL DEBTS

How United States Financiers Regard Their Obligations to Great Britain—Condition of Cotton Trade

The presence in America of Sir George Paish as a special representative of the British treasury has aroused interest in the object of his mission, as well as in the general causes that led up to his visit.

The main object is to determine how the debts owing by the United States of America in England may be paid off most quickly and with the least trouble. Were the debts owed by the government, or in large blocks by a few of the corporations, it would be a relatively easy matter. The debts, however, are owing by individuals, firms, and corporations throughout the United States. Concerted action is consequently difficult, the more so, since the government has no means of compelling the immediate payment of debts contracted by citizens. If the government had the necessary power, it would be doubtful if it would be willing to exercise it, as the demand of England is, in its last analysis, a demand that, failing other means, the debts should be paid in gold. "Other means" the United States has not immediately at hand. That is the difficulty, remark Messrs. Spencer Trask and Company, New York.

How did the United States manage to pile up a debt to England estimated at $200,000,000 or $250,000,000? Principally through imports, through payment of freight and insurance, by dividends and interest on American securities, by the large sums spent in the aggregate by travellers, and also by the repurchase of American securities.

Decrease of Sixty Millions.

These debts were accumulated during the months preceding the war. In normal times the United States pays off debts by exporting the products of farms and factories. Thus it had a balance in its favor, between imports and exports of merchandise, 1909, $252,600,000; 1910, $303,400,000; 1911, $561,200,000; 1912, $581,200,000; 1913, $693,800,000.

This year, the difference between imports and exports of merchandise has turned against the United States, the balance of exports over imports having fallen from $421,000,000 for the first nine months of 1913, to $57,000,000 this year.

The heaviest single item of export is represented by cotton. During the last five years cotton exports have returned about $550,000,000, on an average annually. This year, owing to the interference to trade by the war, cotton exports have fallen off heavily. Thus in September, which is the first shipping month of the new crop, exports totalled only $5,806,707, against $65,744,007 for the same period of 1913. These figures cover total exports to all countries. The heaviest individual buyer is England, who has taken during the last five years an average of nearly 3,500,000 bales, or 25 per cent of our total production. In this September only $2,000,000 worth was shipped against $26,500,000 in September, 1913.

Treasury and Bank Gold not Free.

It will be seen from this how seriously the United States balance of trade is suffering from this one item. As a partial offset there has been shipped more wheat, but notwithstanding this, the balances owed Great Britain are considerable.

There is not any intention on the part of the United States business men to repudiate their debts; at the same time the view is taken in some quarters that as their difficulties arise from the war, and the war is not of their doing, due consideration should be taken of their position. The negotiations with Sir George Paish are now turning on the question as to the best methods of increasing United States exports to Great Britain. The latest proposal is that British shippers should take a considerable amount of this year's cotton at prices which would be mutually satisfactory. Nothing definite has yet been concluded although it is not beyond the range of probabilities that something along those lines may be arranged.

When Sir George came to the United States, he could not understand that with $1,000,000,000 in gold in the treasury, and some $300,000,000 in the banks, we stuck at settling our debts, which, as has been stated before, are estimated at $200,000,000 or $250,000,000. The $1,000,000,000 in gold in the treasury is not free gold, but simply remains there in great part as cover for gold certificates issued in its stead. As a nation we do not like to carry gold in our pockets; a small piece of paper, called a gold certificate and which gives us a call on gold, is preferred.

The $300,000,000 gold, representing the reserves of our banks could not be released without causing serious financial disturbance. On our gold reserves are built up the loans made by banks in the proportion of four to one; that is for every one dollar gold the banks are allowed under the present act to loan four dollars. Under the new Federal Reserve Act, which is now scheduled to go into effect the middle of November, only 18 per cent. in gold reserves is required by the banks in central reserve cities, and 15 per cent. by banks at other centres. To that extent we shall be better off, but even then it would be best that we keep the liberated gold within our borders, as we have issued some $365,000,000 of emergency currency since the war began, and while there is no question as to the soundness of that currency, still, gold as a basis for money, is the highest standard.

Great Britain has been able to increase her gold holdings since the war began by over $160,000,000. This she has been able to accumulate in great measure through the shipments we made her in the days just prior to the outbreak of hostilities; by shipments of gold to the branch of the Bank of England at Ottawa, and by the gold mined in South Africa and Australia, for the time being left with depositaries in those countries. Owing also to this increase in her gold holdings, it is considered in many United States quarters that it would be only a matter of fairness for our English creditors to hold off until we can settle through shipments of merchandise the debts we have contracted.

◆

PRUDENTIAL WILL BE MUTUAL COMPANY

The Prudential Insurance Company of America, of which the capital stock is being transferred from the stockholders to the policyholders, is a huge institution. The movement to mutualize the company involves as a fundamental principle the retirement of the stock. This will give to stockholders $455 a share as a full and final consideration for the surrender of their proprietorship, an appraisal of the value of the shares of the company (par value $50) at $455 per share, by a board of appraisers acting under appointment of the court.

When the mutualization proceedings have been completed all future profits of the company will belong exclusively to the policyholders and will be distributed among them, from time to time.

Stockholders will be paid, no more dividends, no more earned surplus will be segregated on stockholders' account. The policyholders of the Prudential will become the sole proprietors of the company and all future profits, to the last cent, will be applied for the sole benefit and use of policyholders.

◆

DISCOURAGE ACTIVITY OF GERMAN AGENTS

"Evidence has come before the department of trade and commerce to the effect that German shipping and forwarding agents, to compensate themselves for cessation of trade in their home centres, have transferred their offices to London and points in Canada. In this way they are attempting to retain their business connections in competition with British and other firms until peace enables them to re-establish themselves in Germany. In order to do this they offer rates that preclude British firms from doing business on a reasonable basis. While it would be difficult to directly interfere with such practices as here indicated, it is nevertheless desirable for Canadians to discourage hostile activity of this kind by assuring themselves of the standing of the firms with which they may have occasion to transact business."

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

"Business as Usual"

WILL SUPPLY GOVERNMENT WITH APPLES

The Graham Company, of Belleville, has, through Mr. J. W. Johnson, M.P.P., been awarded a contract for 25,000 pounds of evaporated apples for use by the Ontario government.

MUCH MORE ACREAGE

According to reports received by the Grand Trunk Pacific Railway, there is a large increase in plowing at every point along its line. The increase in acreage under the plough this fall over last year varies from 10 per cent. to 200 per cent.

RUBBER AND SHOE FACTORIES BUSY

The rubber factories at Berlin, Ont., are working two shifts a day to turn out orders for the Canadian and British governments for winter equipment. All shoe and leather manufacturing firms are also working full time, and in some cases overtime, to turn out orders.

MONTREAL REAL ESTATE GOOD

"Until Montreal runs away from its present strategical situation as the eastern and greatest national port of Canada, there is no reason for anyone to feel timid as to the future of real estate in this city." Mr. John P. Callaghan, managing director of the Marcil Trust Company, Limited, Montreal.

WILL BE BUSY ALL WINTER

An order for 1,500,000 shirts for the British forces has been allotted among the various shirt manufacturers in Canada by the British purchasing agents now in Canada, acting in conjunction with the Canadian government. The order will keep almost every shirt factory in Canada busy during the winter months.

CONTRACTS LET FOR BIG HOTEL

The Royal Connaught Hotel Company, Hamilton, which will erect a new hotel on the site of the old Waldorf Hotel, announces that the contracts have been let, and the work of construction, which will give employment to 300 men, will be commenced at once. The building and furnishings will cost $1,200,000. The contract has been let to Messrs. Stone and Webster, Boston.

DOMINION GOVERNMENT WILL CONTINUE WORKS

There will be no cessation this winter in the big public works of the government in so far as weather conditions will permit. The harbor works at St. John, Halifax, Quebec and Montreal, the Port Nelson terminals, the Welland Canal work and the coastal terminals at Vancouver and Victoria are to go ahead. Any minimizing of operations will be with the smaller undertakings. A large contract now being awarded provides for a breakwater at Goderich.

BIG ORDERS FOR WIRE

Great activity is in evidence at the Canadian steel mills in the manufacture of barb wire. Most of the plants with [illegible] equipment are working to capacity in the [illegible]. The Dominion Steel Corporation [illegible] about [illegible] a day, and its plant is working at full capacity, but [illegible] thousands of tons have had to be refused owing to the impossibility of making delivery. The orders [illegible]

STILL BUYING HORSES

According to advices received by the Canadian Pacific Railway, three trainloads of horses, the gift of Saskatchewan to the British War Office, will leave Saskatoon in the course of the next few days for the east, en route to England. One train is to leave Saskatoon, and two from Regina. The company has offered every facility in connection with the transportation of horses bought in the west by the Imperial government, which has spent large sums of money in the purchase of suitable animals.

QUARTER MILLION REAL ESTATE SALE

Mr. F. M. McDowell, of the law firm of Millar, Ferguson and Hunter, has bought, for a customer, the southeast corner of Bay and Adelaide Streets, Toronto, for about $250,000. The vendor is Mr. R. D. Richardson. This property, which includes Mr. J. J. McCaffery's Bay Tree Hotel site, has a frontage of 80 feet on Bay Street, and a depth of 140 feet on Adelaide. From a Bay Street standpoint, the price is at the rate of $3,000 per foot. It is said that $5,000 per foot was paid for the Jackman Hotel property across the street.

FUNDS FOR ONTARIO

Ontario will benefit by the lifting of the British moratorium and the settling back into place of financial affairs for this will probably mean that a large part of the loan floated in England may be expected in the treasury coffers before long. Taking into account, however, the unsettled conditions which yet prevail in financial circles, the provincial treasurer, Hon. I. B. Lucas, is not counting too strongly on a speedy return. The reception of the funds will naturally lighten the position of Ontario, which, with other large money handlers, was taken a little off guard at the outbreak of war.

HERRING FISHERS' RETURNS

This season has witnessed one of the biggest catches of sardine herring that has ever been taken in the Bay of Fundy. Official figures place the value of the September catch at $90,000 for Charlotte County, and $40,000 in St. John County. Most of these herring, though caught in Canadian waters, have been packed in United States factories. An effort is being made to organize a company to take over and operate the large canning plant at Chamcook, St. Andrews. Sir William Van Horne, it is reported, will be one of the new company, as he was a leading member of the old corporation.

SEND YOUR PRICE LISTS

Mr. D. H. Ross, Canadian trade commissioner at Melbourne, Australia, has written the department of trade and commerce, urging that a special appeal be made to Canadian manufacturers to forward their catalogues to Canadian trade officials. Price list and discounts sheets should also be sent, as without these essentials the catalogues are of no avail. In view of the present opportunity for the extension of Canadian trade everything possible should be done to assist the Canadian trade officials in their work. It is to be hoped therefore that this appeal will meet with a ready response from Canadian manufacturers and that a material benefit will accrue therefrom not only to the manufacturers concerned but also to Canadian trade generally.

HUNDRED MILLION DOLLARS CREATED HERE

The grain crop of Saskatchewan in 1914 is valued at [illegible] by the provincial department of agriculture. On [illegible] the wheat crop is estimated at 74,[illegible] and valued at $66,070,410, or approximately [illegible] that the grain market reports would [illegible] better prices than that estimated [illegible] crop is estimated at 66,698,053

bushels and valued at $22,679,591.20. The barley crop is estimated at 5,625,783 bushels and valued at $2,827,960.95, and the flax crop is estimated at 5,086,475 bushels and valued at $5,366,221.12. The acreage under wheat this year was 6,003,522 acres, an increase of 243,373 acres, or approximately 4.2 per cent. over the previous year. The government figures are based on an estimate of 12 bushels of wheat per acre.

WILL FINANCE LEGITIMATE BUSINESS

Mr. C. G. K. Nourse, manager of the Bank of Commerce at Calgary, when speaking in that city to the Canadian Credit Men's Trust Association, said:—"No Canadian banks have tried to take advantage of the crisis by raising their rates. It is true that money is not loaned so freely as before. The deposits in banks are about $1,000,000,000 and loans total about $7,000,000,000. The banks' capitals are inconsiderable compared with these figures. They must safeguard their depositors and lenders by piling up a big reserve to meet any calls that may be made.

"The banks are doing only what every good wholesaler does—scrutinizing the credit of would-be borrowers carefully. But I think I can honestly say that I believe the banks are doing everything necessary to finance all legitimate business."

STILL ASKING FOR PIT PROPS

The letters received by the department of trade, Ottawa, have been so numerous on the subject of pit props, that it has proved impossible to reply promptly in all cases. The inquiry was made on behalf of a commissioner from the Imperial government who has visited Canada and returned to England in order to report in time for work this winter. A very large quantity of mining timber is found to exist in Newfoundland and eastern Canada at points close to salt water and permitting comparatively low ocean freight rate. Prices paid by Canadian collieries average about one cent per running foot delivered. This price is much higher than British collieries have been accustomed to pay. It must be understood that the department of trade and commerce are not themselves buying pit props, but will be glad to gather the fullest information in the form of quotations per running foot alongside ocean steamer. The greater number of pit props are four feet to eight feet long and from three and one-half inches rising to seven inches diameter at small ends.

FARM MORTGAGES ARE GOOD

According to F. W. Thompson, of Chicago, president of the Farm Mortgage Bankers' Association, farm loans have been less seriously affected by the financial difficulties growing out of the war than has any other branch of the loaning business. The farmers are probably in a better condition than any other class of people just now, in the opinion of Mr. Thompson.

"I do not believe there will be as heavy a demand for farm loans the coming spring as there has been in the past," said Mr. Thompson. "With general money conditions such as to call for higher rates on other loans, it is natural to expect that new loans on farm property will be made at slight advances. I should say that in that territory where 5 per cent. has been the normal rate, 5½ and 6 per cent. will be asked while in sections where 6 per cent. has been the ruling figure, rates of 6½ and 7 per cent. reasonably may be looked for.

"The farmer, however, is not worrying. No one is trying to impose any hardships on him and he is getting a high price for his product. Loans maturing are being paid just as readily as they have in the past, and I do not see any reason for assuming that they will not be in the future. In fact, the farm loan looks like a most excellent security at this time."

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

PERSONAL NOTES

Mr. C. A. Magrath, former member for Medicine Hat, has been appointed to the chairmanship of the Canadian section of the International Joint Waterways Commission.

Mr. J. Gardner Thompson, Canadian manager of the Liverpool and London and Globe Insurance Company, attended the annual convention of managers of the company held at Atlantic City last week.

Mr. R. C. Mission, sales manager of the eastern division of Sherwin-Williams Company of Canada, has been appointed to the position of manager the eastern division, with headquarters at Montreal. Mr. Mission has been connected with the Sherwin Williams Company since the beginning of the business in 1895.

Mr. H. H. Stevens, M.P., was a little wide of the mark in his reported statement at a Conservative association meeting at Kerrisdale, B.C. The banks, he said, were supposed to recall their loans in New York in times of crisis, "but mighty little of it has returned." As a matter of fact, $48,000,000 of these call loans had been brought back to Canada in the three months July, August and September.

Hon. Colin H. Campbell, for many years attorney-general of Manitoba, died last week after a year's illness. He was 55 years of age. Mr. Campbell was attorney-general of Manitoba from 1900 to 1912, and became minister of public works in the latter year. He was admitted to the Bar in 1881, after studying at the Toronto Law School. He was the son of John H. and Jane Campbell, and was born at Burlington, Ont.

Mr. H. Morden has been elected president of the North Vancouver board of trade. The other officers elected were: Mr. Charles R. Stovell, secretary; Mr. C. G. Heaven, treasurer; Messrs. W. Dickenson, A. Y. Tullis, Geo. S. Shepherd, H. D. Ruggles, John Lawson, D. MacLurg, Alex. Smith, A. Curry, C. T. Haslem and John R. Chapman, executive committee. Mr. H. H. Stevens, M.P., was re-elected honorary president.

Mr. Alfred James Mason died at Toronto last week. For 40 years he was associated with, first, the Canada Permanent Loan and Savings Company and later the Canada Permanent Mortgage Corporation, rising to the position of assistant manager. Born at Ivybridge, Devon, England, in 1831, Mr. Mason came to this country with his parents in 1842, settling in Toronto shortly after arrival. He spent some years with the firm of Ridout Brothers, but later joined with his brother, Mr. J. Herbert Mason, in the Canada Permanent Loan and Savings Company. Mr. Mason was a man of splendid character, a capable, well-liked and respected citizen.

MUST INCREASE PRODUCTION

In an interesting letter to *The Monetary Times*, Dr. Adam Shortt, of Ottawa, says:—"The banks cannot possibly take the place of either foreign investments or of loan companies within the country. When, by a very natural, and in our case fairly easy, readjustment in order to bring up our productive energies, it is possible for us to place Canada in a very sound position before the world, it is surely not the part of wisdom to shut our eyes to actual conditions regarding at once the supply of foreign capital and the recent lines of our domestic expansion, and to pretend that everything is all right, and that we should go ahead as usual in the same lines as before. To my mind that is the surest means of preventing our safe recovery from threatened stagnation and loss of credit."

Every dollar earned helps the community. War orders will stimulate trade and carry us over.

An Ottawa despatch says that a loan of $6,000,000 has been made by the Dominion government to the Pacific Great Eastern Railway, now under construction from Vancouver to Fort George. This loan will tide over the company until its bonds can be sold in the old country. The railway bonds are guaranteed by the provincial government and the work is two thirds completed.

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

TORONTO STOCK EXCHANGE RESUMES

But Only for Private Trading in All Listed Securities

The Toronto Stock Exchange opened for trading last week in all listed securities upon the basis which have governed transactions in the limited list previously selected. All transactions will be for cash. The stock exchange committee desire to relieve margined holdings which may be embarrassed.

The official statement of the committee says:—

"Owing to the satisfactory manner in which transactions have gone through the Toronto Stock Exchange committee in the interlisted stocks, it has been decided to extend the list to embody all the securities listed on the exchange, the same special rules to pertain to the full list as to the partial."

The following list gives the minimum prices as fixed by the committee. Bonds are quoted "and interest":—

APPLE CONSUMERS DIRECT BUYERS

How to Save Part of the Three Dollars Between Producer and Consumer

There is no doubt that the apple crop of 1914 is one of the largest that Canada has ever produced. It is also a fact that many former avenues of trade are cut off, with the result that hundreds of carloads of apples will waste in the orchards of Ontario. This pertains specially to Western Ontario, where we are constantly advised that 75 per cent. of good, marketable apples in many districts will fall upon the ground and rot. It is also a fact that consumers are paying prices ranging from $3 to $4 per barrel for apples in our cities. This is a most unsatisfactory condition of affairs, comments Mr. D. Johnson, Dominion fruit commissioner. The producer spends years in the production of an orchard, protects his crop from insects, fungi, and weather conditions, to find in many cases that he is not able to market his apples at all; while many of those who have been fortunate enough to find a market are getting only 25 to 75 cents a barrel in the orchard. We find that even with apples costing only 30 cents a barrel in the orchard, they are sold to the ultimate consumer in our large Ontario cities at from $3 to $4 per barrel, and in the west from $4 to $5 per barrel.

Difference of Three Dollars.

Taking 50 cents as the average cost or the price received by the producer, and $3.50 as the average price paid by the consumer, we find there is a difference of $3. How can this be accounted for? Are there any charges in the $3 that can be eliminated? In this must be included the following items: Cost of picking and packing, cost of the package (barrel or box), cost of transportation, and the profits of the wholesaler and retailer. The consumer is this year more interested in these items than is the producer, and consumers might, through self-organized groups or through municipal or other organizations, take the matter up with a view of cutting down this big addition of three dollars. Where "distribution" costs six times as much as "production" there would seem to be an opportunity for greater economy in the cost of food to the consumer.

The attention of Mr. Johnson was called to a carload of apples which were bought at 25 cents per barrel on the trees. They were loaded into a box car in bulk, the apples being piled about 2½ feet deep, and shipped to a city 150 miles from the place of production. The apples arrived in good condition, and were sold out immediately at $1 per barrel to hucksters, pedlars, dealers, etc., who re-sold them to the consumers at from $2 to $3.50 per barrel, according to the quantity bought. These apples were inspected by the writer at the time of delivery and were in good condition, and would make excellent cooking and eating apples the greater part of the winter. These apples could have been sold to the consumer, in bulk form, at $1 a barrel, and still have given a fair profit to the dealer.

Producer Gets Little.

This is but a sample of what is being done throughout the consuming centres of Canada. The producer is getting very little for his apples, and the consumer is paying a high price for them. It is for the consumers to organize themselves in such a way that they can send a man into some of the districts of Western Ontario, where apples may be bought, in bulk form, delivered on car, at from 30 cents to 40 cents per hundred pounds. These apples could be delivered in the cellars of our cities at $1 per barrel, in bulk form, and would give the people a grade of apples that would be serviceable for many months of winter use. Such varieties as Baldwins, Spies, Kings, and Russets could be procured in this way. The evaporators throughout the country are buying apples, all the apples they require, amounting to many thousands of barrels daily, at 15 cents to 25 cents per hundred pounds, delivered at the evaporator, and will take nothing but firm apples, not less than 2½ inches in diameter. Why should the consumers in our cities pay these high prices for apples when the solution of the situation is in their own hands?

DOMINION TRUST COMPANY

Official Statement Issued—How the Last Balance Sheet Looked

The offices of the Dominion Trust Company have been closed, at least temporarily. This was decided at a special meeting of the directors of the Dominion Trust Company on October 23rd. The company issued the following statement:

"Owing to the unfortunate death of the managing director, it is difficult for the directors at once to grapple with the financial position of the company without making minute enquiries and investigations as to the amount of liabilities and the securities held by the company.

"The general depression caused by the war has also added greatly to the difficulties of the situation, but it is expected that at the shareholders' meeting the directors will have formulated a plan with the object of being able finally to meet their financial engagements. This may take the form of the company going into voluntary liquidation, when some changes may be made in the management and a competent receiver placed in charge. The working out of the company may take some little time, as it is difficult to realize at once upon even the best securities, but if financial conditions improve, as the directors hope, then there is every reason to believe that the voluntary liquidation will obtain the very best results.

Will Take Some Time.

"The business has been so large and voluminous that the securities are many, and it will take some little time to properly estimate their present value and also to realize upon them. It is expected that a large sum will be obtained by the company from the life insurance of the late Mr. Arnold, and there is also a bond of $250,000 filed with the minister of finance at Victoria, under the provisions of the Trust Act, which may be available in the final straightening out of the company's affairs.

Favor Voluntary Liquidation.

"The directors wish the general public, who have been depositors, as well as the other creditors, to be as patient with the new management as possible, as every endeavor will be made to obtain the most competent man to undertake the winding-up of the estate, in order that the very most can be obtained from the realization of the securities. The liquidator will be assisted by an advisory committee of independent men who are not in any way connected with the company or its management.

"This result has been arrived at by the directors after a careful survey of the whole situation and after consulting with a committee of the strongest financial men in the city, representing the largest institutions, who are interested in seeing the very best results obtained and have come to the conclusion that this can best be done by voluntary liquidation."

What the Figures Show.

At the ordinary meeting of the Dominion Trust Company, held in the head office at Vancouver on Tuesday, February 24, 1914, the balance sheet as at December 31, 1913, was reported as:

Liabilities—Shareholders' liabilities, authorized, $5,000,000; subscribed, $2,500,000; paid-up, $2,167,570; reserve, $800,000; dividend No. 16, payable January 2, 1914, $42,111; profit unappropriated, as per revenue account, $74,412; total, $3,084,094.

Public liabilities—Deposits and uninvested trust funds, $1,292,744; clients, $255,771; mortgage assumed on purchase of company's office premises, $225,000, sundry creditors, $54,058; total, $1,828,473.

Guaranteed first mortgage investment certificates issued, $503,687.

Total liabilities, $5,416,455.

Assets—Properties—Office premises, safe deposit vault, fixtures, etc., $655,085.

Investments—Mortgages and secured loans and accrued interest, $1,748,993; municipal and other bonds and debentures and accrued interest, $1,005,823; shares in other companies at cost and accrued dividends (amount uncalled upon these shares, $121,420), $683,250. Total, $3,438,066.

Sundry other assets, $54,450; sundry debtors, including advances to estates, $587,620; cash in hand and in banks, $177,345; guaranteed first mortgage investment securities, $502,387; cash uninvested, $1,500.

Total assets, $5,416,455.

Invested trust funds and executivesbips and other trusts under administration were $1,,480,221; trusteeships for bondholders were $20,508,000.

The late Mr. William R. Arnold, managing director, then said:—

"The gross profits of the business were $621,000 in 1913, while those of 1912 were $626,000, or a decrease of only about $5,000 during the period recognized as one of great financial stringency. The policy of your directors has been vindicated in that such a large proportion of your funds is kept invested in first mortgages or first charges on land where the loans are for an average period of not exceeding three and a half years, so that with the early days of maturity, the satisfactory interest rate and ample security, no writing down is called for, to meet market value during such periods as that of last year.

"During the year offices have been opened in Winnipeg, Halifax and Charlottetown, while about 20 agencies have been established in various cities in the Maritime Provinces; and the way your company has been received augurs well for its success."

Names of Directors.

The election of officers resulted in the re-election of the old board, with the addition of Mr. E. P. Miller, thus making the 1914 board consist of the following:—Messrs. William H. P. Clubb, W. D. Brydone-Jack, E. W. Keenleyside, C. W. Twelves, of Antwerp, James Stark, David W. Bole, of Montreal, E. P. Miller, T. R. Pearson, James Ramsay, William R. Arnold, C. E. Drew, R. L. Reid, John R. Gray, H. W. Riggs, F. R. Stewart, William Henderson, John Pitblado, of Montreal, Edmund Bell, John A. Machray, of Winnipeg.

At a subsequent meeting of the directors the following officers were elected:—Mr. W. H. P. Clubb, president; Mr. W. R. Arnold, vice-president and managing director; Dr. W. D. Brydone-Jack and Mr. F. R. Stewart, vice-presidents; Mr. E. P. Miller, general manager; Mr. A. H. Bain, secretary.

Petition to Wind Up Company.

A petition has been filed in the Supreme Court of British Columbia, asking for the winding up of the Dominion Trust Company. The petitioner is Mr. A. J. Maxton, a capitalist of Calais, France, who claims to be a creditor to the extent of approximately $130,000. His agent in Vancouver, who is personally looking after the petition, is Mr. J. B. Matthers, who was the first president of the Dominion Trust Company, though he now holds no interest in the concern, and was succeeded several years ago in the management by the late Mr. W. R. Arnold.

Mr. C. R. Drayton, manager of the Vancouver Financial Corporation, has been appointed provisional liquidator of the Dominion Trust Company, by an order of Chief Justice Hunter.

◆

TWO MILLION DOLLAR BLANKET MORTGAGE

A blanket mortgage covering properties in British Columbia, Alberta, Saskatchewan, Ontario, Quebec and Nova Scotia, and calling for $2,000,000, was registered recently in the Toronto Registry Office on behalf of the Canadian Realty Corporation, Limited, and the Northern Trust Company of Manitoba, and constitutes one of the largest securities that has been recorded in Toronto in years.

The Canadian Realty Company is better known as the holding company for the premises of the Union Bank of Canada, and it has built a great many of the branch offices of the Union Bank.

The large $2,000,000 mortgage is in the form of a trust deed to secure a contemplated bond issue, the purpose of which seems to be to convert assets of a non-liquid nature into specie, or readily marketable securities. The bond flotation will bear interest at 5 per cent. per annum, and it is understood that the Union Bank has arranged for the entire issue in London, interest payments to be made at the chief office of the bank in London.

The Northern Trust Company is the mortgagee or trustee for the bondholders. The mortgage papers are being filed in all of the six provinces, in which the properties are located

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

◆

CANADIAN PROVINCES SHORT-TERM BILLS

Several provinces have made temporary financial arrangements in London during recent weeks. Saskatchewan had £300,000 of its short-term bills falling due at the end of October. These were placed a year ago at about 5½ per cent. Of these maturing bills, about 25 per cent. were paid off in cash, and the remaining 75 per cent. were extended for a further twelve months. A much higher rate had to be paid, however, namely, 6½ per cent.

A Canadian Associated Press message to *The Monetary Times* states that it has been arranged to renew £600,000 Province of Ontario bills for six months, on the basis of [illegible] per cent. "It speaks well for the position of the province," remarks the London Standard, "that it has been able to carry out this operation on such satisfactory terms. Not only is the rate good, but the saving of expense implied in the high rate of exchange must be a considerable item.

Ontario is also issuing $1,000,000 5 per cent. five-year loan locally.

Alberta's sterling bills for $750,000, maturing on October 1st were paid off. This fact, says the London Chronicle's financial writer, is an indication of the satisfactory position of the province's affairs.

Manitoba is making temporary financial arrangements. It has a loan of $2,000,000 in contemplation.

◆

The industries of the maritime provinces use annually over two hundred million feet board measure of wood, this does not include the wood used in rough building construction and for poles, railway ties, fuel and some other uses of wood. [illegible] kinds of wood are used, and the total quantity [illegible] at $[illegible]. A report has been compiled from [illegible] six hundred manufacturers, [illegible] in the bulletin, which may be obtained [illegible] the director of forestry, department of the interior, [illegible]. Spruce easily leads among the kinds of wood used.

THE MOLSONS BANK REPORT

Among the veterans in Canada's banking line, which have proved their substance and worth, is The Molsons Bank, which held its fifty-ninth annual meeting at Montreal this week. The net profits for the year, after making ample provision for bad and doubtful debts, amounted to $608,-[illegible], from which has been deducted $440,000 in quarterly dividends at the usual rate of 11 per cent. per annum. Eighteen thousand and seventy dollars has been applied as a contribution to the officers' pension fund, $15,000 set apart for patriotic and relief funds; and, in view of the disturbed condition of business in Canada caused by the war, it has been thought advisable to transfer the surplus profits of $150,000 this year to provide for contingencies, which has been done, leaving a balance of $67,058.44 at credit of profit and loss account.

In view of the large growth of the staff since the inauguration of the officers' pension fund in 1902, and to meet the suggestion of the actuary, the board have agreed to augment the bank's annual contribution to the fund to an amount adequate to provide for the increased membership.

The general business of the bank to-day is in a satisfactory condition, it was reported, notwithstanding the extremely depressed state of affairs in Canada, due to decline in value of real estate, the curtailment of business generally prior to the war, and the unprecedented extraordinary conditions brought about by the war. The conservative course which the directors have always followed has saved them [illegible] in these trying times, and they propose to continue the same policy in the future.

During the year six branches were opened, namely, at: S[illegible], Que.; Tetreaultville, Que.; Formosa, Ont.; [illegible] (Bridgewater); Sutton, Que.; Upper Town, Quebec [illegible], Que. (sub-agency to Knowlton).

The bank has made a good showing as the result of [illegible] fiscal year, and is in a strong [illegible] the future may bring, good or ill.

1915 - MONETARY TIMES ANNUAL - 1915

The Monetary Times Annual which has now been issued each year for forty-seven years has become recognized not only throughout Canada, but in all countries which have investment and commercial interest in Canada as the most reliable, most complete and comprehensive source of information concerning the financial and commercial possibilities of the Dominion.

In many offices of the principal financial centres of the world the Monetary Times Annual will be found as a work of reference and its value in this connection has been demonstrated over and over again.

While previous Annuals have had wide circulations, our plans for the 1915 Annual insure a wider and more valuable circulation. Editorially, too, it will have new features introduced that will make it more useful and attractive.

In spite of these larger plans for editorial and distribution purposes, the advertising rates will remain the same as in previous years. All advertisements will be placed on right hand pages and opposite reading matter.

In order to insure your securing the best position, it would be well if we were to receive your order as early as possible

The Monetary Times Annual has been endorsed by the leading business men and financiers and newspapers of Canada and elsewhere. Read what a few of them had to say about the 1914 Annual :—

"It contains much valuable information and should be of great use to investors and those interested in the progress of Canada."—SIR EDMUND OSLER.

"The Monetary Times Annual is always excellent, but this year it is particularly interesting because of the large amount of accurate and useful information it contains about the railroad, industrial and commercial affairs of Canada."—SIR T. J. SHAUGHNESSY

"Regarding your Annual, I can only say that it is creditable both to you and your organization and to Canada, and I am sure it will be read with great interest in England, and to some extent in the United States. It is more than a Trade Review, it is a Dictionary of reference of the whole country embracing the whole field of financial and trade operations."—SIR HENRY M. PELLATT.

"We beg to acknowledge your esteemed favor of the 15th inst. and the receipt of your Annual Review for 1914, and we compliment you upon the attractiveness and completeness of the publication."—E. W. WEST, Glens Falls Insurance Company

"A copy of your Annual number has come to hand, and we wish to congratulate you upon it. We think its matter is excellent. We also think our copy well set up"—C. L. CANTLEY, Nova Scotia Steel & Coal Co.

"We should be very much obliged if you would forward us another copy of the Annual as the first copy has been removed from our files. There is a great deal of valuable information in your Annual, which we find very useful to refer to from time to time."—OSLER, HAMMOND & NANTON.

"The Monetary Times Annual contains a great deal of very valuable information, especially for reference purposes, and I am glad to have it"—SIR RICHARD MCBRIDE

"The Monetary Times Annual is a work of great value to business men. The book contains nearly three hundred pages, and it is a veritable encyclopedia of financial, commercial and industrial information." —TORONTO STAR.

"Replete with information of a business and financial nature is the Monetary Times Annual for 1914. In addition to a wide range of special articles prepared by those well qualified to handle the same, the publication contains many interesting tables and charts covering the range of securities prices for 1913 The Annual fills up 292 pages, all of it interesting and instructive" SATURDAY NIGHT

"We have received a copy of the 1914 Annual Review of 'The Monetary Times of Canada,' with head offices at 62 Church St., Toronto. The publication consists of 292 pages and is divided into a Banking Section, Bond Section, Editorial Section, Industrial Section, Insurance Section and Investment Section. This number is similar to those issued previously by the 'Times' in that it contains an immense amount of valuable statistical matter, besides numerous interesting articles by well-known authorities."—THE COMMERCIAL AND FINANCIAL CHRONICLE, NEW YORK.

"A mighty fine issue was the annual review number of the Monetary Times of Toronto. It had 292 pages brimful of interesting facts about Canada. The Times is one of the great financial papers of the world."—BONDS AND MORTGAGES, CHICAGO.

"I am much struck by the amount and value of the information contained in the Monetary Times Annual"—SIR WILLIAM VAN HORNE.

"Always a publication of the highest merit, the Monetary Times Annual this year is unusually complete." TORONTO NEWS.

"The Monetary Times Annual for 1914, recently issued by the Monetary Times Co. of Toronto, deals comprehensively with all matters of financial interest to Canadians. Articles by leading authorities on the present industrial situation and the outlook for the year make interesting reading and valuable statistics are given on finance and commerce in 1913."—THE GAZETTE, MONTREAL.

"The Monetary Times Annual is one of the best collections of articles on financial and commercial activities we have seen in many days. It is crammed full of useful information, not the kind to last for a day, but a book of reference useful for the twelve months of the year" NEW GLASGOW, N.S., NEWS.

"Probably the completest record of Canadian financial and industrial development in 1913 available, is contained within the covers of the Monetary Times Annual Every department of finance is represented and the articles on the various subjects are all handled by experts." TORONTO TELEGRAM.

"The Monetary Times Annual, an excellent publication, is better than ever, and that is saying a good deal It is more than a mere annual, it constitutes a work of reference which should be carefully preserved for use all through the year."—THE FINANCIAL EDITOR, WINNIPEG SATURDAY POST.

BANKING FOR WORLD'S BANKS

Diplomatic Old Lady of Threadneedle Street Handled Pressing Suitors Efficiently

One thing stands out, and that is the strength of the "one-reserve system," provided it is efficiently managed. Those who possess inside knowledge will probably agree that, though the constitution of the Bank of England does not facilitate co-operation with the joint-stock bankers, an emergency of almost unthinkable peril was met and overcome with coolness, prudence and success, says the London Economist. The treasury did much to co-ordinate efforts; and the Bank of England faced a truly appalling situation courageously and without over-estimating its own strength, as it has sometimes done before. The tremendous strain which the bank has sustained is evident from the summary of its weekly returns covering the period of stress at the foot of this page.

In order to render the return more complete, the currency notes outstanding and the gold earmarked against them ought to be added to the circulation and the coin and bullion respectively. On October 21st there were £[illegible] of notes outstanding and £8,500,000 of gold earmarked against them.

Was Normal July 22nd.

On July 22nd the position was perfectly normal, and in spite of the low bank rate (3 per cent.) gold was coming in plentifully in preparation for the usual autumn demand. During the week the European situation grew worse, and the action of the joint stock banks in restricting their discounts is evident in the increase in liabilities, and the reduction of the ratio of reserve from 52 . to 40 per cent., though the amount of gold which went out was only £2,000,000. On July 30th the "panic week" began, and though the return was dated August 7th, it should be remembered that the bank had not been open since Saturday morning (August 1st). The return came out on the Friday, August 7th, but it is not publicly known whether it gave the position at the close of business on the previous Saturday or at some later date, for though the banks were closed to their customers, movements of coin and notes went on with the Bank of England. The next return (August 12th) showed continued expansion in the liabilities of the bank, although it was not until August 13th that the government guaranteed it against loss on its pre-moratorium bills. The huge amount of gold shown as gained from abroad was partly due to the crediting of sums placed to its credit in South Africa and Canada, and the figures clearly show that gold was still being absorbed by the internal demand, as the coin and bullion rose only £5,400,000, while the note circulation actually declined. By the next week (August 19th) the gold had begun to come back. It is doubtful if very much of it ever really went into actual circulation. It went to fortify the cash holdings in the branches of the joint stock banks, the [illegible] the weakening influence which the branch bank policy has exerted on our system.

Was Bankers' Bank.

In fact, the strain upon the Bank of England arose from its position as the "bankers' bank." It has long been an axiom that "the Bank of England cannot fail." Bankers have now been taught that the system based upon the Bank of England also cannot fail without winding up the British nation and with it the whole world's financial system.

From the end of August onwards the "other securities" have shown no further tendency to increase, the movement on balance being a [illegible] of £3,000,000, a feature which has been followed as [illegible] that pre-moratorium bills were [illegible] of the new bills taken to the bank. In three months more we may hope to see the "other securities" at a more normal figure. The fact that the "other securities" at their highest point did not reach [illegible] above normal, and the progress already made in reducing them are signs that the ultimate loss under government guarantee may prove to be [illegible] expenditure of 1914.

◆

PREMIUMS TREBLED IN FOURTEEN YEARS

At the opening meeting of the sixteenth session of the Toronto Insurance Institute, Mr. W. H. Hall in a splendid inaugural address referred to the founding of the institute in the following terms: "The organization of the institute was originally proposed by Mr. John B. Laidlaw, who is present with us to-night. The first meeting was held in the board room of the Canadian Fire Underwriters' Association in the Board of Trade Building on March 29th, 1899. The initial charter list included some thirty names, but before the list was closed an enrolment of one hundred and seventy-three members was secured. Steady growth has since been made until the names now on our membership roll number about four hundred and fifty. Our financial resources have increased proportionately, and the institute now has a substantial invested surplus. With one exception, the late Mr. J. J. Kenny, who was the first president of the institute, the ranks of our past presidents remain unbroken."

Mr. Hall said the evidence of the growth of insurance in Canada is shown during the period the institute has been in existence, in the following figures from the reports of the superintendent of insurance, Dominion of Canada.

1900	Total insurance premiums received in Canada	$23,058,874
1913	Total insurance premiums received in Canada	76,080,816

Through the efforts of the educational committee of the institute council arrangements were concluded with the Young Men's Christian Association, Toronto, for a course of study suitable to the requirements necessary to pass the institute examinations. A number of members have enrolled and the classes are now under way.

Mr. Hall also outlined the legislation affecting life, fire and casualty branches of insurance passed by the Dominion and Provincial governments during the past year. He then stated a carefully arranged programme had been prepared for the session, including papers by experts in the various branches of insurance.

◆

Two large equipment orders have been placed by the Canadian government railways, one with the Eastern Car Company of New Glasgow, and the other with the Nova Scotia Car Works, of Halifax. The former order is for 250 fifty ton 40 feet freight cars for general service, and is valued at about $[illegible]. The Nova Scotia Car Works' order is for [illegible] all steel flat cars. Orders for some sleeping cars have also been placed with the Preston Car Company.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing Operations, Developments, Extensions, Dividends and Future Plans

Trust and Loan Company.—The directors of the Trust and Loan Company of Canada have declared the usual half-yearly dividend at the rate of 9 per cent. per annum, payable December 4th next, free of income tax.

Melachrino and Company.—Messrs. M. Melachrino and Company, Limited, of Canada, Montreal, cigarette manufacturers, have increased their business to the extent that they are in a position to pay quarterly dividends of 5 per cent.

Home Bank.—The Home Bank of Canada has declared a dividend at the rate of 7 per cent. per annum on the paid-up capital stock of the bank for the three months ending November 30, 1914. The dividend will be payable at the head office and branches of the bank on and after Tuesday, December 1. The transfer books will be closed from November 16 to 30, both days inclusive.

Bank of Montreal.—The regular dividend for the final quarter of the current fiscal year and supplemented by a bonus of 1 per cent., has been declared by the Bank of Montreal.

The 1 per cent. bonus is the sixth consecutive half-yearly distribution of the kind. The Bank of Montreal dividend and bonus will be paid December 1st to shareholders of record October 31st.

Canadian Car and Foundry Company.—Action on the dividend of Canadian Car and Foundry preferred has been postponed until the annual meeting of the company in December.

President Curry states that if pending negotiations for equipment orders materialize, the dividend for the quarter will be declared; otherwise the directors will probably decide to defer its payment.

Bank of Commerce.—The Canadian Bank of Commerce has declared the regular dividend at the rate of 10 per cent. per annum for the three months ending November 30, together with a bonus of 1 per cent., payable December 1. Books close November 16 to November 30, inclusive.

Last year the bank paid 10 per cent. dividends and a bonus of 2 per cent., and in 1912 dividends of 10 per cent. and a bonus of 1 per cent.

Carriage Factories, Limited.—At a meeting of the directors of Carriage Factories, Limited, it was decided to postpone the declaration of the fourth quarterly dividend on the cumulative preferred stock due on the 31st instant, until the next annual meeting of shareholders, which will be held in January. The directors, in view of trade conditions, consider it prudent to conserve the resources of the company. The outstanding preferred stock amounts to $1,200,000.

The British Columbia Fishing and Packing Company, Limited, has declared a dividend of 1¾ per cent. on its common stock, payable November 30th. This is the initial dividend of this company. This is equivalent to 7 per cent. per annum on the shares of the British Columbia Packers Association, which shares are exchangeable for the shares of the British Columbia Fishing and Packing Company, Limited, at the rate of two shares of the new company for each share of the old.

Canadian Goldfields Syndicate.—Mr. John Hyde, liquidator of the company, is proceeding with the winding up. A dividend of 1¼ per cent. is to be paid November 16 to holders of record September 11, and the 4,000 shares of Consolidated Smelters in the treasury are to be distributed among Canadian Goldfields Syndicate holders in the proportion of one Consolidated for every 1,500 Canadian Goldfields Syndicate. The shareholders of the latter are given up to November 2[illegible] in which to send their shares to the liquidator, when the distribution will be made.

Hollinger Reserve Mines, Limited.—The lack of ready money to meet the payment of a note for $[illegible] due the General Development Company of New York has forced the directors of the Hollinger Reserve Mines, Limited, to make an assignment to the Liquidation Department of the Trusts and Guarantee Company. A meeting of the creditors will be shortly held. The liabilities of the company are estimated at $75,000. The principal creditors are Ben Hollinger, $40,000; the General Development Company, New York, $30,000, and miscellaneous accounts totalling about $4,000. The company's mine and plant are located at Ogden, about three miles south-west of the Hollinger Mine.

La Rose Consolidated Mines Company.—On October 1st the company had a cash surplus of $1,244,453. Ore in transit and at smelters, as well as ore sacked ready for shipment, was valued at $[illegible]. The dividend disbursement totalled $187,500, which was paid from accumulated surplus as it was not earned for the three months just closed. The total earnings for eight months of this year are given as only $154,000. Depletion of ore reserves and money spent in looking for new ore bodies are stated, in a circular issued by the company, to be the causes for the decrease in profits.

Acting on the joint report of Mr. P. A. Robbins, manager of the Hollinger Mines, and General Manager Watson, the circular states that the directors have decided to inaugurate a plan of exploration.

Hudson's Bay Company.—The sale of farm lands by the Hudson's Bay Company for the quarter ended September 30th, amounted approximately to 1,300 acres for £3,700, as compared with 7,100 acres for £30,300; and sales of town lots to £150, as compared with £7,700 for the corresponding period of 1913. The receipts are £40,800, as against £70,300 in 1913.

The sales for the six months to September 30th, 1914, are 5,500 acres for £20,100 and town lots were sold for £3,600, as compared with sales of farm lands 17,800 acres for £70,800, and town lots for £19,500 for the corresponding period of 1913. The total receipts for the six months ended September 30th amount to £127,300, as compared with £214,800 for the corresponding six months of last year.

Canadian Western Lumber Company.—The proposed scheme for an arrangement between the Canadian Western and the Columbia River Lumber Company, has been carried. Under the new scheme the debenture holders of the latter company receive £50 of 5 per cent. first mortgage debenture stock of the Canadian Western Company for every £100 of their present holdings, together with £50 5 per cent. cumulative debenture stock, $225, in ordinary shares of the Canadian Western Company, the payment of cash in December of the half interest due on December 1st and the deferred interest warrant carrying 5 per cent. for the other half of the interest.

The scheme also involved acceptance by the preferred shareholders of ordinary shares in place of the preferred shares and by cancellation of all arrears of dividend on preferred shares.

Fight or pay, and anyway try to do business.

Even the backyard garden can do its little part.

Be as persistent in business faith and action as the Allies are at the front.

Figure the thing any way you will, and Canada has one of the best places "in the sun."

Think it over carefully; you will conclude then that British courage and persistence has done business as usual.

Inland revenue in the month of September aggregated $1,556,661, as compared with $1,886,040 in the corresponding month of last year. The decrease is accounted for mainly by the quantities of liquor removed from bond in August.

Two hundred thousand pounds of dried apples are Ontario's second contribution toward the Imperial cause. The department of agriculture has made arrangements to secure and forward to the British Admiralty 100,000 pounds of prepared apples, while a similar amount will be sent to the headquarters of the Belgian Relief Committee in Montreal. The purchase of the apples represents an expenditure of about $[illegible],000.

FROM THE GERMAN VIEWPOINT

Scientific Advances in Agriculture — What Potsdamer Chamber of Commerce Says

The most important foundation for the successful management of the household affairs of a nation is found in its population, remarks the Potsdamer chamber of commerce in Berlin in a recent statement prepared by the chamber. The following figures show the status and increase of the population of Germany in comparison with other lands:—

	1871.	1912.	Increase per cent.
Germany	40,997,000	66,096,000	61.2
United Kingdom ..	31,556,000	45,663,000	45.0
France	36,190,000	39,602,000	9.4

The raising of important foodstuffs from its own soil has kept pace in Germany with the large increase of its population, as can be seen from the following table:—

	1880.	1912.
Rye—		
Amount of crop in 1,000 tons	4,971	11,598
Average production per hectar (2.4 acres) in tons	8.4	18.5
Wheat—		
Amount of crop	2,353	4,361
Average production	12.4	22.6
Oats—		
Amount of crop	4,243	8,520
Average production	11.3	19.4
Barley—		
Amount of crop	2,150	3,482
Average production	13.2	21.8
Potatoes—		
Amount of crop in 1,000 tons	19,513	50,209
Average production per hectar (2.4 acres) in tons	71	150

This great increase in the production of the soil has been attained by an intensive cultivation, by an increased and proper use of artificial manures based on scientific investigations, and by an appropriate selection of the varieties to be planted. Germany is far ahead of other lands in this respect. In 1912 the amount of crop per hectar (2.4 acres) amounted in double hundredweights—100 kilograms 220 pounds as follows:—

	Wheat.	Rye.	Potatoes.
Germany	22.6	18.5	150.3
France	13.8	11.1	96.1
European Russia	6.9	9	81.7

In this comparison, England does not come into consideration, since it obtains its foodstuffs almost exclusively by importations from abroad. Also in other agricultural products, the greater production in Germany per unit of cultivated land, compared with other agrarian countries, is considerable.

The development of live stock breeding in Germany has been very favorable. In 1873 there were 15,777,000 head of cattle and 7,124,000 swine, while in 1912 the numbers were 20,159,000 cattle and 21,885,000 swine. In addition to the increase in numbers, the milk production and the weight of the animals have improved. Germany shows, accordingly, in comparison with the other large agrarian States of Europe by far the greatest accomplishments in the directions mentioned.

Foreign Trade Development.

In mining, the production of coal and brown coal, iron ore and salt comes especially in consideration. The amount of coal, including brown coal, mined in 1885, was 73,675,000 tons, and this had risen to 259,435,000 tons in 1912, while the English production had only increased from 161,000,000 to 261,506,000 tons in the same period. It is well known that Germany has the greatest coal deposits in the world. The output of iron ore amounted in the year 1912 in Germany to [illegible] 602,100, in France to 18,500,000, in England to 14,011,700, and in Sweden to 6,6[illegible] tons. The salt mining industry of Germany produced in 1912 saleable products of the value of almost 200,000,000 marks, a figure which was reached by no other country.

It is, of course, generally known that the foreign trade of Germany has extraordinarily developed in the last decades. The import and export figures give the following results:—

	In millions of marks.	
	Import.	Export.
1872	3,464.6	2,492.2
1900	5,765.6	4,611.4
1912	10,691.8	8,956.8
1913	10,770.4	10,097.9

The significance of this development appears yet more if we compare the total of import and export of the German special foreign trade with the corresponding figures of other countries; for example, with those of Great Britain and France, in the last 30 years, as given below:—

	In millions of marks.	
	1883.	1912.
Germany's foreign trade	6,492.3	19,648.6
Great Britain's foreign trade .	12,279.5	22,850.5
France's foreign trade	6,687.5	11,954.7

The great increase of the German foreign trade, which almost reaches the extent of the English, might produce the impression that Germany, to the same degree as England, is dependent on foreign countries. This impression, however, would be wrong, for the products of Germany's industry and the demands of the German home market have increased in a yet higher degree than the export figures. It is to be regretted that no statistical data for the total amount of the production of German industry exist.

Advances in Home Consumption.

Many national economists, from trustworthy indications, for instance, number of machines, horsepower in use, workmen, etc., and from the estimates of experts, have demonstrated that in the most important branches of industry, the home consumption has increased more rapidly than the export. This is founded upon the fact that with the increasing wealth of the German population German industry has found a continually stronger home market. The wealth of Germany—at present estimated at 300 to 400 milliards of marks —has so increased that it now far surpasses the French wealth, and even exceeds the English.

As a result of these considerations, one can in any case see that the German economic position is more independent than ever, and that its strength lies in the productivity of its soil and in the firmness of its home market. It is not to be forgotten that for the German foreign trade with neutral countries important connections remain open, the maintaining of which must be valuable also to the neutral States.

The English politicians who form their opinions from the great increase of German foreign trade and their own commercial conditions, have deceived themselves concerning the limitations on the independence of German economic relations and in reference to their own power. Here lies the principal error in their calculations, concludes the Potsdamer chamber of commerce.

NEARLY NINE MILLIONS MORE CIRCULATION

Monetary Times Office,
Montreal, November 5th.

Thirteen chartered banks in Canada called upon the circulation provided by the Dominion government for this purpose, during September. The total of such excess circulation outstanding by these banks as at the end of September was $8,919,400, made up as follows:—

	Circulation Sept. 30, 1914.	Excess.
Bank of Montreal	$17,097,412	$1,097,412
Commerce	15,608,881	608,881
Royal	14,030,419	2,470,419
Union	7,120,069	2,129,069
Nova Scotia	6,483,280	483,000
Ottawa	4,195,620	195,620
Nationale	3,375,596	1,375,595
Hamilton	3,055,465	55,465
Standard	3,013,543	77,313
Home	2,127,700	183,522
Sterling	1,211,580	18,403
Provinciale	1,190,778	190,778
Weyburn Security	340,752	33,652
13 banks	....	$8,919,409

WELLAND CANAL'S MAGNITUDE

Freights Will Pass to Extreme Limits of Great Lakes—Help to Western Canada

Few who have not come directly into touch with the plans and estimates for the new Welland Canal, now under construction by the government of Canada, realize the magnitude of this undertaking, or the effect that it is destined to have upon the grain and flour trade of this continent, says The Northwestern Miller in a recent article.

In some respects the work is a more imposing one than the Panama waterway, although the engineering difficulties and cost will be less. When finished, the Welland will be capable of accommodating the largest of the upper lake freighters, and it is being so constructed that it may be made still deeper if the growth in size of vessels should demand it.

The Welland Canal is one of the oldest and most important of the artificial waterways of Canada. Its history dates back to the early years of the 19th century, and it has played an interesting and at times exciting part in the economic and political affairs of this continent. Only a few weeks ago an Irish citizen of the United States was released from one of the penitentiaries of Canada where he had served a term of 14 years for conspiring to destroy the canal with dynamite, the result of a too fervent hatred of Great Britain and of all things British. On an earlier occasion, at the time of the Fenian raids into Canada from the State of New York, in the sixties, a part of the conspirators' plan was to blow up and destroy the Welland Canal. Happily their design was frustrated after a considerable expenditure of the Queen's ammunition by Canadian volunteer troops.

Obviate Waste of Transhipment.

Economically this canal has been of enormous service to the people of this continent as a channel of communication between Lakes Erie and Ontario, and in the regulation of railway freight rates. During a recent argument before the Dominion Railway Commission on the question of railway freight rates in western Canada it was claimed by the railway companies and accepted as a guiding principle that the effect of this and other eastern waterways in fixing rail rates could not be allowed to establish a standard which would be equally applicable to the rates in the west, where no such circumstances are to be found.

Geographically the Welland Canal is located west of the Niagara River in Ontario, and follows a line from the village of Port Colborne, on Lake Erie, to Port Dalhousie, on Lake Ontario. In length the old canal is 25 miles. It has 25 lift locks, each 270 ft. in length with 14 ft. of water on the sills, and at the time of its completion in 1881 was capable of carrying the largest vessels then to be found on the Great Lakes. Few of the regular freighters of the present day can use it, hence the recent construction by the Canadian government of a 2,000,000 bushel grain elevator at Port Colborne for the purpose of transhipping grain from the larger to the smaller holds. With the new canal in operation the economic waste of this transhipment will be obviated, and cargoes of grain and other heavy freight may pass to the extreme limits of the Great Lakes either way.

Single Leaf Gates.

The canal on which construction has begun will have a lake-to-lake length of 25 miles. Its width at the bottom will be 200 ft., at the water line 310 ft., its depth on the sills 30 ft. The usable length of the locks, of which there will be seven, will be 800 ft. Each will have a lift of 46½ ft., making a total lift of 325½ ft. By way of comparison it may be noted that the length of the Canadian lock at the Sault Ste. Marie is 800 ft. and of the American lock 900 ft.

On the Panama and on the "Soo" canals the lock gates [illegible]. On the new Welland Canal the gates will be of the "single leaf" type, one gate only being used at each end of the lock. The lower gates on the locks will be 85 ft. in height, [illegible] ft. in length and 10 ft. thick. These gates will be built of structural steel, and the 10 ft. thickness will provide an ample driveway for an automobile or vehicle and [illegible] plenty of room at the same time. Each of these gates will weigh [illegible] tons. The gates on the Panama Canal [illegible]. They will not sit squarely across [illegible] the opposite wall, an addition of [illegible] width of the gate more than the width of the lock [illegible] the point of [illegible] down the lock wall. The [illegible] floating chamber and will remove the [illegible] which the gate is swung of much of its weight, although the pin is designed to carry the weight of the gate [illegible] filled with water.

At present some [illegible] men are employed on the work of excavating the [illegible] of the new canal. These are equipped with every appliance for rapid work. Other sections are being prepared further along the route and the contracts for all have been let. The canal is to be finished by 1918, and its total cost will be fifty million dollars. All of this cost is being assumed by the Dominion government.

Naturally the bulk of the freight traffic to be handled through this new waterway will be grain, though there will be also enormous quantities of coal and other bulk freight destined for the upper lake ports. The canal will be free to all vessels desiring to use it, as is the practice in all Canadian canals.

Its value to the commercial and agricultural interests of the west will lie in the saving effected in the cost of carrying heavy commodities to and from their markets. The saving on grain alone will be of immense benefit to the farmer of western Canada, where every cent of reduction in carrying and handling charges is so much added to the return from his product.

◆

CANADA'S PUBLIC UTILITIES

The Montreal Light, Heat and Power Company in August showed a gain in earnings, and the preliminary figures for September indicate a gain of 6 per cent. in gross and of 8 per cent. in net over September, 1913. For the five months of the fiscal year ended September 30th both gross and net are ahead of the gross and net for the corresponding five months of the preceding fiscal year by approximately 6 per cent. It is stated that the gains in earnings are due to the new business being taken on more than making up for the decrease due to war conditions.

On November 3rd the Waterford Public Utilities Company, Limited, will present to the board of commissioners of public utilities at its office, Halifax, a petition for the approval and ratification of an issue of fifty thousand dollars common stock of the company.

The total cost of Winnipeg's light and power department up to April 30th was $6,724,372.58. The original expenditure was $5,739,478.09, made up of $2,336,195 for the plant at Point du Bois; $1,390,486.30 for the transmission line and terminal receiving stations, and $2,012,796.79 for the distributing system.

The fiscal year ending April 30th showed a profit of over $60,000 after the payment of all operating expenses and fixed charges. The accumulated deficit of the first two years has been reduced to $82,000.

The first year of operation, from October 15, 1911, to the same date in 1912, brought the city 14,508 customers, and the gross billings for the year were $220,013.86.

On October 15th, 1913, the number of customers of the light and power department was 25,615, and the gross billings were $753,480.55. On October 14th there were 31,487 customers on the city's books and gross billings of over a million dollars.

The traffic receipts of the Saskatoon Municipal Railway for the month of September amounted to $10,662.25, a decrease of $731.32 as compared with the corresponding month of last year. The receipts, which represent 211,855 passengers, are made up as follows: Cash receipts, $9,710; tickets, $802; advertising, $88; police, $13; postmen, $41; miscellaneous, $5.

The total mileage for the month was 57,302, as against 52,389 miles run during September, 1913.

The total operating expenses for the month were $14,835, estimated as follows: Salary of employees, $6,049; stores issued and accounts paid, $800; traction power, $2,007; electric light, $[illegible]; water, $20; insurance, $175; interest, $2,6[illegible]; sinking fund, $929; depreciation, $1,300.

◆

Don't drop all your business strings. You will need them after the war.

[illegible] only a small part of the burden and it will [illegible] nation.

[illegible] sent to try us. Confidence and [illegible] take us into the good days to come after the war.

NEW INCORPORATIONS

Several Hotel Companies Receive Charters—Speculators Are Still Interested in Fur and Oil

Canada's new companies incorporated this week number 61. The head offices of these companies are located in seven provinces. The total capitalization amounts to $3,471,500.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	4	$ 100,000
Alberta	14	1,736,000
Saskatchewan	14	265,500
Manitoba	2	10,000
Ontario	8	710,000
Quebec	15	456,000
Prince Edward Island	4	194,000
	61	$3,471,500

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Leduc, Alta.—Leduc Lumber Company, Limited, $20,000.

Saskatoon, Sask.—Armstrongs, Limited, $10,000.

Indian Head, Sask.—Western Fair, Limited, $20,000.

Regina, Sask.—Kelsey Mining Company, Limited, $10,000.

Hathersage, Alta.—George Hay Company, Limited, $10,000.

Redvers, Sask.—Redvers Telephone Company, Limited, $2,000.

Melville, Sask.—The Balcarres Hotel Company, Limited, $50,000.

Kindersley, Sask.—Kindersley Farms Company, Limited, $20,000.

Lestock, Sask.—The Lestock Trading Company, Limited, $25,000.

Lethbridge, Alta.—The Klenzo Manufacturing Company, Limited, $50,000.

Keremeos Centre, B.C.—The Central Hotel Company, Limited, $40,000.

Victoria, B.C.—Illinois-Vancouver Timber Company, Limited, $25,000.

Prince Albert, Sask.—The Herald Printing Company, Limited, $25,000.

Elfros, Sask.—The Elfros Co-operative Live Stock Association, Limited, $40,000.

Welwyn, Sask.—The Welwyn Curling and Skating Association, Limited, $3,500.

St. James, Man.—Lauzon, Limited, $5,000. J. H. Lauzon, J. Lauzon, L. Goulet.

Edmonton South, Alta.—Stannard Coal and Cartage Company, Limited, $20,000.

Lachine, Que.—E. Hebert, Limited, $19,000. J. O. Besette, A. Bonneville, T. E. Simard.

Vancouver, B.C.—Crandall Company, Limited, $25,000. Fairview Grocery, Limited, $10,000.

Lloydminster, Sask.—The Empire Insurance and Loan Agencies Company, Limited, $10,000.

Edmonton, Alta.—Furnishers, Limited, $10,000. Clyde Lumber Company, Limited, $20,000.

Westmount, Que.—The Westmount News Company, $20,000. H. Groves, T. B. Hurson, S. J. Bye.

Maisonneuve, Que.—La Compagnie Grenier, Limited, $20,000. A. Grenier, A. Marchand, O. Marchand.

Portage la Prairie, Man.—Peerless Hotel Company, Limited, $5,000. D. Ripstein, N. Ripstein, M. Bialin.

Essex, Ont.—Essex Motorcycle and Machine Company, Limited, $100,000. J. W. Brien, J. R. Gay, J. A. Hill.

Port Arthur, Ont.—Gordon Agencies, Limited, $40,000. W. H. S. Gordon, A. J. McComber, W. F. Longworthy.

La Tuque, Que.—St. Maurice Fur Farming Company, Limited, $90,000. H. M. Martinson, C. Johnson, O. J. Oleson.

Wetaskiwin, Alta,—The Criterion Hotel Company of Wetaskiwin, Limited, $25,000. E. Pearl, Limited, $10,000.

Moose Jaw, Sask.—Provincial Brokerage and Investment Company, Limited, $20,000. The Lumber and Land Company, $10,000. Baird and Clarke, $20,000.

Calgary, Alta.—The Allies Oil Company, Limited, $1,000,000. Regent Company, Limited, $25,000. Uncle Joe's Store, Limited, $[illegible],000. Well, Tool and Iron Works, Limited, $20,000. Thistle Oil Company, Limited, $500,000. Consumers Fuel Company, Limited, $20,000.

Prince Edward Island.—The Prime Quality Silver Black Fox Company, Limited, $48,000. F. W. Jardine, G. R. McMahon, J. Pickering, Sr. West Prince County Fox Company, Limited, $30,000. B. M. Hill, K. B. Richards, W. B. Hayes. The Dundas Silver Black Fox Company, Limited, $90,000. D. E. Morris, A. T. Gay, M. McKay. The Equity Silver Fox and Fur Company, Limited, $20,000. W. A. Brennan, A. R. Brennan, W. Tanton.

Toronto, Ont.—Anglo-Canadian Motor Sales Company, Limited, $50,000. A. G. Browning, A. Fry, G. E. Buchanan. Canadian Mexican Estates, Limited, $100,000. J. S. Lovell, W. Bain, R. Gowans. Canadian National Trading Company, Limited, $250,000. G. N. Limpricht, H. R. Burrows, F. C. Allen. United Cigar Stores Op.-Co., Limited, $50,000. W. A. J. Case, J. B. Taylor, C. G. Lynch. Melville-Davis Touring and Steamship Company, Limited, $40,000. M. Bray, C. M. Brearley, M. Magee. The Standard Radiating Company, Limited, $80,000. J. W. Brown, F. Kennedy, A. M. Linton.

The Blashill Wire Machinery Company, Limited, $48,000. J. A. DeCew, L. L. Cohen, H. A. Radford.

Application is being made for letters patent for the following companies:—

Hillsborough, N.B.—Salem Fox and Fur Company, Limited, $49,600. I. S. Dawson, K. Duffy, C. Bishop.

Bolestown, N.B.—W. R. McCloskey, Limited, $40,000. C. J. McCloskey, H. F. McCloskey, M. V. McCloskey.

Douglas, N.B.—McFarlane Wagon Company, Limited, $20,000. W. L. McFarlane, S. H. McFarlane, J. W. McFarlane.

Albert Mines, N.B.—The Albert Mines Fur Farm Company, Limited, $49,000. J. A. Livingston, B. Vannatter, I. C. Steeves.

Penniac, N.B.—New Brunswick Karakule-Arabi Sheep and Fur Company, Limited, $49,000. W. B. Bishop, F. B. Edgecumbe, C. C. Camp.

Shannon, N.B.—The Springfield and Wickham Rural Telephone Company, Limited, $2,100. J. H. DeLong, R. B. McCready, A. M. Day.

◆

Skulking and complaining only hinder the real men.

Where would you want to be doing business, if not in Canada?

Every man has a place to fill, but not always the one he wants. Get adjusted.

What Great Britain lacked in being prepared for war, it is making up by planning, hard work, and confidence. That is what business needs.

If German Ambassador Bernstoff at Washington in face of all, can talk optimism, we can afford to work and have faith in our country and its future.

ONTARIO MINES WANT SKILLED MEN

Last Year's Mineral Output Made New Record—Metals and Metalliferous Ores

Lack of skilled labor is a handicap from which Ontario's mineral industry suffers, despite this, the province's output for 1913 was the largest achieved and is valued in the return of the deputy minister of mines, Mr. T. W. Gibson, at $53,000,000.

The production of minerals in 1913 was again the largest on record, amounting in "spot" value to $53,232,311, as compared with $48,341,612 in 1912—an increase of $4,890,699 or 10 per cent. To show the large advances which the yearly output is now making, the figures for ten and five years ago may be cited. In 1903 the value of the production was $12,870,593, and in 1908 $25,019,373. Thus during the last ten years the mines and mineral works of the province have increased their output by 313 per cent., and during the last five years by 112 per cent.

Of late years the chief annual gain has been in metals and metalliferous substances, due to the great development which has characterized mining for silver, nickel, copper and gold—in other words, to Cobalt, Sudbury and Porcupine. In 1913 both the metallic and non-metallic branches of the industry shared in the growth; in fact, while the former had a greater absolute advance, the latter showed a higher percentage of gain—15 per cent., as against 7.7 per cent. for the metallic division. In the aggregate, however, the metals bulk much more largely than the non-metals, contributing 70.5 per cent. of the total as compared with 29.5 per cent.

What Nature Provides.

Mr Gibson, in referring to the evolution of this extractive industry, portrays excellently the beginnings of a nation He suggests that diversity of occupation exercises a favorable influence upon the development of a new country. No one industry, of course, is self-sufficient, and, in these days of increasing specialization, every industry tends to become more dependent upon and more necessary to all the others.

The industries which first take root in a given area are those for which its resources are most evidently adapted. In a wooded country, such as northern Ontario, the first in order of time is lumbering. Where the land is good and railway access is afforded, agriculture comes at once upon its heels, closely followed, where there are workable minerals, by mining.

Soon all three industries are found in various stages of development, each playing an important part in the settlement of the country. Felling the trees and hauling the logs give employment to the settler during the winter months and help him to earn some ready money. Lumberjacks and miners alike must be fed, and so there is a home market for all the farm produce which the settlers can raise beyond their own requirements. The settler is himself a lumberer so far as his own farm is concerned, and brings sawlogs, pulpwood, railway ties and fence posts to market. Buildings must be put up at farm and mine, and for these lumber is necessary.

Beginnings of Community Life.

Most of the lumberman's cut of sawlogs or the output of his sawmill is transported elsewhere to find a market, and this is also the case with the silver, gold, copper or nickel won from the mine. In the production and handling of these commodities much labor and capital are called into use. Communities are formed, and industrial and social development goes on. Water powers, so numerous in northern Ontario, are compelled to furnish power, light and traction Pulp and paper mills are erected to make use of the abundant supplies of spruce and poplar Roads and railways are built Schools, churches, hospitals and other institutions with improvement and amelioration as their end, come into being. So too, unfortunately, do jails and blind pigs, for crime and excess accompany the human animal whether he is found in forest or mine or the crowded town.

A large proportion of the labor in mine and lumber camps, and in railway and wagon road making, is of the unskilled type, where muscle counts for more than mind. Much of it is supplied by immigrants from foreign lands, chiefly those of continental Europe, and hence a surprisingly large [illegible] of the industrial population of the north is composed of [illegible], Poles, Au[illegible], Italians, Bulgarians, etc. There are also Syrians in considerable numbers and Greeks, but they are usually in business and are rarely found engaged in manual labor.

Mine managers and railway contractors assert, and no doubt with truth, that they could not operate their mines or build their embankments were it not for this foreign labor. Anyone looking over the list of mining accidents, compiled by Mr. T. F. Sutherland, chief inspector of mines, cannot but be struck with the large percentage of names of foreign origin. Doubtless there is a connection between this fact and the comparatively high death and accident rate in the mines of the province. In part this may be due to unfamiliarity with the English language and the difficulty of comprehending quickly spoken orders in an emergency. Mental traits have also to be reckoned with, and the fact that very few of these men were miners before coming to this country, or at any rate to this continent. Ignorance of the risks in mining and the handling of explosives, a certain lack of resourcefulness in the presence of danger, amounting almost to inertia or even stupidity, and other characteristics, contribute to the same result. The building up of a strong force of capable and experienced miners such as the mining industry of Ontario now imperatively requires, will be a slow process, but when accomplished it will mean much for the effective and economical operation of our mines.

◆

WILL SECURITIES BE THROWN ON MARKET?

The fear of Germans and Austrians holding securities will throw them on the market, once it is available, is an obstacle to the opening of the London Stock Exchange, states a cable from the Metropolis. No way to certainly avoid such realization has yet been discovered. It is feared that these holdings might be sold through Amsterdam or some other neutral exchange, or be surreptitiously shipped to London. The British authorities have control of London agencies of the German and Austrian banks, and Sir William Plender is official supervisor of them.

He has written the stock exchange, in answer to enquiries, as to foreign security holdings, and dividends that may be paid on them:

(1) In cases where shares stand in name of London agency of one of these banks, and that bank has parted with ownership of the shares but is still registered in respect to them, it will, as in the past, pay any dividends received by it to real owners of the shares (provided they are not alien enemies) on being satisfied as to their ownership by production of certificates.

(2) The same applies to shares standing in names of nominees of any of the London agencies. These gentlemen are officials of the banks, and if dividends are received by them, they will be paid over, as in case No. 1.

(3) With regard to shares registered in the name of any one of the banks, without the London agency of such bank being specifically referred to, I am not in a position to say that dividends will be received in London. If the shares are in Canadian companies they would presumably either be paid to the London agencies or withheld, as the companies would not be entitled to pay to Berlin.

American companies would, however, be under no such restriction, and I am not in a position, therefore, to say that dividends might not be forwarded to Berlin on instructions of the Berlin office.

If, however, any dividends are received by London agencies of the banks in respect of shares of which they are not the owners, they will be paid over as above (1 and 2).

WAR AS DESTROYER OF CAPITAL

What Europe's Devastation Would Mean in Canada—More Production Necessary

By J. DOWER.

Taking a factory as an example, we find in its make-up are six of the principal forms of productive capital: (1) Buildings, (2) machinery and tools, (3) raw materials, (4) aids to operation, such as oils, chemicals, coal, (5) finished stocks, (6) personal services of scientists and members of various professions. Some of the other forms of productive capital are generation of power, means of transportation, railway, shipping, together with a wide variety of productive agencies.

The following figures relative to Canada's development will enable one to realize what Europe is suffering, and the enormous destruction that is being wrought in these seven divisions of productive capital on the other side of the Atlantic. Canada is a nation in its youth. Britain, Germany, France and Belgium are the ancient parents of this newer world.

Take first (1) real property and improvements. During the last nine years Canadian building operations in city and town approximate $1,000,000,000.

(2) The capital invested by Canada's farmers.—This is made up of land, buildings, implements, and live stock, and represents $4,224,000,000.

(3) Capital invested in mines.—In this primary industry the available statistics show that buildings and plants alone are valued at $108,000,000.

(4) Industries.—The census showed that in 1910 the capital invested in Canadian industries had grown 276.19 per cent. in ten years, it being in that year about $1,250,000,000.

(5) Fisheries.—The fishermen's capital invested in vessels, boats, canneries, and fish-houses is put at $24,000,000.

(6) Gold bullion and coin.—The amount held by the banks and comptroller of currency, in round figures, is $255,000,000.

(7) Steam and electric railways.—These in Canada are capitalized at $1,673,000,000.

Eight and a Half Billions.

Tabling these as below, we see the size of these divisions of a nation's invested capital:—

(1)	New buildings, urban	$1,000,000,000
(2)	Farming	4,225,000,000
(3)	Mining plants and buildings....	108,000,000
(4)	Industries	1,250,000,000
(5)	Fisheries	24,000,000
(6)	Gold and bullion	255,000,000
(7)	Steam and electric railways	1,673,000,000
		$8,535,000,000

In these seven divisions, Great Britain and other countries, according to "Capital Investments in Canada," published by *The Monetary Times*, have invested in nine years $2,273,000,000.

Canada last year produced, with the help of invested capital and other factors from these five sources, the following approximate sums:—

Farm	$1,000,000,000
Mine	140,000,000
Factory	1,500,000,000
Forest	70,000,000
Fishery	34,000,000
	$2,573,000,000

Many Years to Replace.

At the end of last year the ordinary savings of the people deposited in banks, with loan companies, etc., were $750,000,000. If it were necessary to utilize this accumulation of years together with future savings to replace the eight odd billions, plus the lost production, what a burden Canada's future generations would have to bear! Yet this is practically what would happen were a war here to wipe out farm, factory, mine, fishery, railway, plus savings. That is what is happening in Europe to-day. Europe has in past years used nearly two billions annually, presumably as an insurance premium against war. The accumulated premiums have now taken the form of a huge machine, which to-day is dealing destruction and death. Harvests are unreaped, factory wheels are motionless. Village, town and city are ruin mounds. The men, normally active producers, are increasing the devastation in the arena where eight nations have unleashed their dogs of war.

An estimate, published in these columns, gave $50,000,000 per day as the cost of the war. Canada pays for two days' warfare with its appropriation of $100,000,000. This in normal times is the sum Canadian municipalities would spend in a year. The crippled European nations for many a year will need all the savings to replace property destroyed.

An active propaganda is being carried out in Canada for increased production. This means a further investment of capital. With European sources cut off, it devolves upon Canadian people to produce more, and thus provide a larger share of capital themselves. When militarism has received its death-blow, then perhaps it may be that this young and vigorous nation, with its resources and equipment, will prove still more attractive to the investor and the immigrant than the old nations, whose treasures are depleted and productive equipment destroyed.

◆

BRITISH ARRANGEMENTS FOR EXCHANGE LOANS

To facilitate stock exchange business and to prevent undue depreciation in investments by avoiding the necessity for forced realization, arrangements have been made for the British government with the Bank of England to make advances to certain classes of lenders to enable them to continue their loans until after the end of the war, states a London cable.

The scheme will be confined to "account to account" loans made to members of the stock exchange by lenders other than banks to which currency facilities are open. All such bankers have agreed not to press loans for repayment or require a deposit of further margin until after the expiration of twelve months from the conclusion of peace.

The government will arrange with the Bank of England to advance to lenders 60 per cent. of the value of securities they hold against any loans they had outstanding on July 29th. Loans by banks are to bear interest at 1 per cent. above the bank rate, with the minimum five per cent. The interest will be payable fortnightly, or at each settlement when the stock exchange is re-opened.

The bank will not press for the repayment of advances until a year has elapsed from the conclusion of peace. A stock exchange committee has undertaken to formulate rules to make the scheme as widely advantageous as possible. The committee will not open the exchange without first obtaining the consent of the treasury.

Lenders, except banks and insurance companies, will be allowed to get 60 per cent. of loans returned on the lodging additional collateral of the Bank of England.

The stock exchange committee will guarantee the legal expenses of any suits arising between banks and members relative to loans.

Banks will be allowed to demand the repayment of loans as soon as quotations on collateral are firmly established at the minimum prices prevailing at the end of July.

Hard workers are wanted always.

After the war, what will your present work bring?

"Buy-a-barrel-of-apples" did well. Now acquire a keg of confidence.

Smashing Kaiserism is a big job, but it will be done and business and the world will be better than usual.

The department of agriculture of Saskatchewan has announced that several of the Saskatchewan farmers who sent exhibits to the dry farming congress at Wichita, Kansas, last month won prizes. Seager Wheeler, Rosthern, was again successful in carrying off the most important events, winning first and sweepstakes in wheat, and also in barley; William Henley, Qu'Appelle, won first reserve for wheat and first and sweepstakes for peck of flax; H. H. Carter, Fort Qu'Appelle, won sweepstakes for sheaf of rye grass, and also for sheaf of brome grass; W. G. Creighton, Stalwart, won sweepstakes for peck of rye grass seed. The department of agriculture is encouraging the farmers of Saskatchewan to compete in such grain competitions by paying the express on all exhibits which meet with the government's approval.

PROFITS OF THE MOLSONS BANK

Satisfactory Returns Indicated by Profit and Loss Account

The Molsons Bank's net profits for the year ended September 30th are $608,196, against $694,356 for the previous year, showing a decrease of $86,160. The profits of the bank for the year however were 15.20 per cent. on the capital stock, against 17.36 per cent. in 1913, and 17.12 per cent. in 1912. An increase is shown in the bank's loans and discounts during the past year, bringing the total from $30,545,679 to $32,201,379.

Profit and Loss Figures.

The profit and loss accounts for the past two years, summarized, are as follows:—

	1914.	1913.
Net profits	$608,186	$694,356
Previous balance	81,932	161,828
	$690,128	$856,185
Less		
Dividend	$440,000	$440,000
Contingent reserve	150,000	....
Pension fund	18,070	10,000
Patriotic fund	15,000	....
Branch premiums	......	47,269
Taxes	......	24,083
Reserve current loans	......	52,000
Reserve depreciation	......	100,000
Reserve	......	100,000
Total deductions	$623,070	$774,252
Balance	$ 67,058	$ 81,932

The balance shows total assets of $50,390,343, or about $6,000 higher than a year ago. Savings deposits increased by about $250,000. Demand deposits were lower by about $160,000.

Balance Sheets Compared.

The principal figures in the statements for the past two years compare as follows:—

Assets.

	1914.	1913.
Specie	$ 1,056,654	$ 560,564
Dominion notes	3,485,242	4,472,324
Deposit with government	200,000	200,000
Notes other banks	317,929	388,655
Cheques other banks	1,478,945	2,217,314
Due by other banks	15,523	42,965
Due outside banks	1,567,829	1,372,102
Government securities	260,000	425,000
Municipal securities	910,142	710,094

MORE WAR ORDERS

Mr. Frederick Stobart, now at Montreal, as purchasing agent of the Imperial Government, has placed an order for 600,000 sweater coats, to be delivered by December 15th. The average price per dozen at which the coats are to be supplied is $18.

The Dominion government has ordered 50,000 pairs of military boots.

◆

DOMINION TRUST COMPANY'S AFFAIRS

The recent meeting of the Dominion Trust Company's shareholders passed a motion to move at once for voluntary liquidation, which, it was alleged, would avoid a forced sale of the assets, in which case there might be nothing at all left for the shareholders. The liabilities are two millions, including $800,000 to depositors.

At the meeting it was stated that the late manager, Mr. Arnold, owed the company $114,000, and another statement was made which appeared to show that he owed an additional sum. The embarrassment of the company was much hurried by the failure of Alvo Von Alvensleben, who is stated to have owed about a million and a quarter to the company. Von Alvensleben is now living in Seattle.

◆

TORONTO'S DEBENTURE NOTES

Short-term investments appeal to investors at present. An attractive issue is that of 5½ per cent. debenture notes of the city of Toronto. This is being offered by the Toronto bond houses of Messrs. Wood, Gundy and Company and Messrs. A. E. Ames and Company.

Of these notes, $750,000 are due November 2nd, 1915; $650,000, due November 2nd, 1916; $600,000, due November 2nd, 1917. The interest payable May and November, and the principal and interest is payable at the Canadian Bank of Commerce, New York City, and city treasurer's office, Toronto.

The notes are in amounts of $500 and $1,000 each, and the investor has the choice of selecting any of the maturities named. The price of each debenture is $500 or $1,000, as the case may be, with accrued interest from November 2nd, that being the date from which interest will run. The security is absolute, the debenture notes being an obligation of the whole city, while the interest return is exceptionally high.

◆

WINNIPEG ELECTRIC RAILWAY'S POSITION

In reply to an inquiry made by *The Monetary Times* as to the story that the Winnipeg Electric Railway would probably pass its dividends next January and April, the company states that, in the first place, the reason the October dividend was paid, was because the company had earned it and for no other reason. There is no foundation for saying that the dividends for January and April will not be paid. It is quite true that in so far as the street railway branch of the company's business is concerned it has had a similar experience to all other business, and there has been a decrease in its earnings, but it is misleading to say that the company's light business is suffering from the city's competition. The fact is that the company's commercial light and power business is showing substantial increases from month to month and they are taking on a great many new contracts. The January and April dividends have not been discussed by the directors.

MINERAL PROSPECTS IN BRITISH COLUMBIA

Provincial Mineralogist Will Report—Shipping Rates Twenty Per Cent. Less

(Staff Correspondence.)

Vancouver, B.C., October 26th.

Mr. W. Fleet Robertson, provincial mineralogist, has in hand the preparation of a report bearing on the work of a Victoria syndicate formed to run a tunnel to crosscut several of the different claims in the Portland Canal district. This tunnel was constructed at an approximate depth of 1,000 feet. Operations to date are satisfactory and indicate that ore values continue with depth. The report is understood to be optimistic. It is well known that this official is conservative in his statements, and any favorable mention is always backed up with statistics. If the ore is there, it will mean a future for the northern camp, which was prominent about four years ago. Considerable English money was invested there, and operations were discontinued because the amount of capital was insufficient.

Convenient transportation facilities should assist development of the district, once conditions revert to the normal trend. The Granby Company's copper smelter is in that locality, but in addition a silver-lead stack will also be necessary once operations assume any proportions, for much of this ore is to be found in the north.

Coal and Copper Developments.

Another item of interest relative to the north is that development is to proceed of the coal areas in the Groundhog district. This is where Mr. D. A. Thomas, the Welsh coal magnate, is interested, and the work will call for the construction of a portion of the line of railway which has been projected from the coast to Prince Albert. It is declared that the coal of the Groundhog district is the only hard, steam, smokeless anthracite outside of Wales, Pennsylvania and West Virginia.

The Similkameen Consolidated Copper Company has been organized with a capitalization of $2,000,000 to take over the entire group of the Voight properties near Princeton in the Similkameen. A close examination has been made, and it is believed the copper assets will afford reserves for 75 years. It is arranged that the capitalization is to be increased later to $20,000,000. Interested in the company are Mr. W. S. Ayres, of Hazel, Pa., who besides being president is also consulting engineer; Messrs. W. E. A. Wheeler, Robt. McKenzie, H. B. Baker and L. Barker, of New York; Dr. G. A Harrington, Hazelton, Pa.; Robert Barron and I. G. Frankau, of Scranton, Pa.; and A. Mitchell and John C. Law, of Carbondale, Pa. Messrs. Ayres and Law spent some time investigating the claims.

Twenty per Cent. Rate Reduction.

The reduction of 20 per cent. in freight charges announced by some of the big steamship carriers will assist the lumber industry on this coast. When the war broke out, extra charges were imposed which practically stifled the exportation of lumber from this province. The British authorities announced that it would give a war risk, which meant that the charges would be increased about $1 per thousand feet on lumber. The steamship companies, however, raised the rate many times higher. As a result, when the opportunity came to tender on a cargo of three and a half million feet of lumber for Delagoa Bay, the price from manufacturers here was $4 too high. Trade with Britain was also greatly affected, and though there are opportunities there these could not be taken advantage of because of the high rates of transportation. The Blue Funnel line has announced a cut from 100 shillings to 80 shillings to London and Liverpool, and from 105 shillings to 85 shillings to Glasgow. The Harrison line has also announced a 20 per cent. reduction.

◆

Canada made goods must always be good goods.

Don't block the way with complaints and pessimism.

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

TORONTO REAL ESTATE NOTES

The city of Toronto must pay Mr. Henry Griesmann $50,170 for land expropriated for the registry office site at 45 to 50 Chestnut Street, and 81 to 83 Louisa Street. There are 143 feet on Chestnut Street by 78 feet on Louisa Street. This was the award of the official arbitrator at Osgoode Hall

A lease has been completed whereby Mr. J. J. Follett, tailor, will rent to the Diana Sweets property at 181 Yonge Street, having a frontage of about 18 feet by a depth of 120 feet, for a period of twelve years at an aggregate rental of about $108,000. The property comprises about 2,160 square feet.

The Balmoral Apartments, on Jarvis Street, Toronto, have been sold for $80,000. The purchaser was Mr. Frank S. Anderson, of New York, and the vendor, Mrs. Jennie Carnegie. The building is on a lot having 76 feet frontage by a depth of 132 feet. It contains twenty suites, and the price included the furniture. The deal was negotiated by Mr. W. S. Thomas, of the International Capitalists, Limited.

◆

MONTREAL AND SOUTHERN RAILWAY COMPANY

Monetary Times Office,

Montreal, November 5th.

The Montreal and Southern Counties Railway seems to be making gradual progress not only in the matter of business but in its relationships with the city. The company is an electric one, controlled by Grand Trunk interests, and operates across the Victoria Bridge from Montreal to St. Lambert, Longueuil, Chambly and other points on the South Shore. It had a long fight to obtain permission to enter the city, and was eventually permitted to establish its terminal at McGill Street, not far from the docks, the examining warehouse and the head office of the Grand Trunk. For a considerable time past it has been endeavoring to obtain the right to extend its tracks across McGill Street and to operate up McGill to Victoria Square. During the past few days, however, the Southern Counties has been granted the right, if exercised within six months, to extend across McGill Street and make a loop around Youville Square, opposite the Grand Trunk Railway head offices. This will bring the company a block nearer the centre of the city.

The company has been making good progress in the matter of its traffic, and the extension of its lines. During the past year it carried 1,915,379 passengers as compared with 1,661,245 the previous year. Its growth during the five years of its existence has been constant, as shown by the tact that the two cars operated at the beginning of its career has been increased to 32, and its three miles of track to 57 miles.

SUGAR PRICES IN CANADA

Monetary Times Office,

Montreal, November 5th.

According to Boston advices, sugar refiners announce a 20 point reduction in the price of granulated sugar, bringing the price to 5.80 cents a lb., with the exception of the federal which is selling at 5.70 cents.

In Canada the granulated sugar is now quoted officially 8 cents a lb., an advance of previous prices of 30 cents per 100 lbs. It was recently selling on bargain days at 6¼ cents to 6½ cents in limited quantities. Apparently the discounts from price quoted above constitute the sole profit of the retailer at present, as the official wholesale quotation is 8 cents a lb. and the retailer is advertising to sell at 8 cents. The prediction is made that sugar will go to 10 cents a lb.

Mr. H. R. Drummond, president of the Canada Sugar Refining Company, being asked to explain why Montreal should be paying more for its sugar, stated that there are several reasons for this, the principal one being that the raw article can be purchased in Boston on the stock market, whereas, in Montreal, the refiners have to buy two or three months ahead. Mr. Drummond pointed out that in August sugar was selling here at 4½ cents a lb., when the price was 7¼ cents in Boston. There are, according to Mr. Drummond, other reasons for the relatively high price of sugar here. Included in these are, higher duties, higher freight rates and higher discounts.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Stanley Mineral Springs and Brewing Company.—A meeting of the bondholders is called for November 25 to consider the advisability of deferring interest and sinking fund payments. The company is building a brewery at Winnipeg, and needs money to complete the plant.

Intercolonial Coal Company.—A meeting of shareholders of the Intercolonial Coal Mining Company has been called for November 25th. The purpose of the meeting is to empower an issue of $100,000 debentures and to authorize the making of a mortgage to the government of Nova Scotia to secure their guarantee of the debenture issue. Authorization of an issue of bonds to retire certain outstanding bonds will also be asked.

Montreal Debenture Corporation.—The Montreal Debenture Corporation has been taken over by the Prudential Trust Company, the registrars of the corporation. The debenture holders have been informed that by the change in the management a saving of 75 per cent. in operating charges has been effected. The Montreal Debenture Corporation is interested in two real estate subdivisions—Angus Park and Chelsea.

A. Macdonald Company.—The A. Macdonald Company bad $200,000 of its short-term notes, issued a year ago, to meet on November 1st. The company was prepared to make the payment.

The note issue was $600,000, of which $200,000 was to be retired on November 1, 1914, 1915 and 1916 respectively. Half of the issue was taken by the vendor of the business and half by outside interests.

Algoma Steel Corporation.—An informal meeting of the 5 per cent. and refunding mortgage bondholders of the corporation, together with the three-year gold note-holders, has been convened for Monday, November 9, to consider a proposal for funding two years' interest on both issues. It is understood that the financial position of the undertaking is perfectly sound, says a London cable, but since the commencement of the war, the general industrial outlook in Canada has become so uncertain, it is felt special arrangements should be made with bondholders, enabling the directors to conserve the whole of their available resources.

Toronto Housing Company.—President Beer, of the Toronto Housing Company, Limited, stated at the annual meeting of the shareholders that the company bad earned $4,120 or 6 per cent. on its investment on Spruce Street, Toronto, already. The directorate has not considered it wise to declare a dividend, although that would be quite within its power.

The members of the newly elected board of directors are Messrs. G. Frank Beer, Thomas Findley, J. C. Scott, Alex. Laird, Mrs. H. S. Strathy, Mrs. S. K. Currie, Messrs. Thomas Roden, A. R. Clark, A. M. Ivey, Edward Kylie, C. V. Massey, Mrs. H. D. Warren, Mrs. A. M. Huestis and Mr. W. G. MacKendrick.

(Other investment notes appear on page 30).

Endowments of the Mutual of Canada

Dejected speculators in mining stocks, real estate bargains, oil shares, etc., bestrew the landscape thick as autumn leaves these days. Their hopes have fallen "thick in the blast."

The lucky man to-day is the one who invested his money in Mutual Life Endowment Policies! These combine household protection with a safe and remunerative investment.

Each $100.00 invested has produced all the way from $127.00 to $193.00, according to the term of the endowment, exclusive of the insurance feature.

Mutual Life endowments are the very thing to buy and to sell in days of panic and in war-time.

MUNICIPAL BOND MARKET

Hamilton, Ont.—The library board has requested the board of control for permission to issue $50,000 of debentures for improvements and paying the debt off the property.

Owen Sound, Ont.—This town is applying to the Ontario legislature for the validation of a by-law to authorize a loan of $60,000 to the Doric Cement Works and to issue debentures for this purpose.

Victoria, B.C.—The city has funds available with which to prosecute the relief works decided upon by the city council to supply occupation for unemployed workmen of the city. Nothing has been done in the flotation of treasury notes to the amount of $250,000 which, it was decided, would be offered for local subscription.

Montreal, Que.—Montreal's 1915 borrowing power shows a reduction as compared with the current year. The city was authorized to borrow this year the sum of $13,000,000, while in 1915, from indications of the figures relative to increased property values in Montreal, the borrowing power will be about one-fourth of what it was for 1914.

Alberta.—In this province certain municipal debentures issued are required to be passed upon by the department of municipal affairs, of which Mr. J. Perrie is deputy minister, these being the village debentures, rural municipality debentures and the debentures of towns, which wish to have the department's certificate. This is practically the debentures of all towns under the Alberta Town Act.

Saanich Municipality, B.C.—This municipality will be shortly in the market to dispose of the following debentures: $375,000 30-year 5½ per cent. waterworks debentures; $450,000 15-year 5½ per cent. road improvement debentures; and possibly some local improvement debentures of smaller denominations running from five to 15 years. The assessed value of land is $20,576,030 and the assessed value of improvements is $4,163,880; land exempt from taxation, $467,705; improvements exempt from taxation, $4,163,880. The assessed value for taxation is $20,109,135 and the estimated true value of taxable property $33,615,225. The debenture debt for general purposes is nil, for school purposes $33,500 and for local improvement, $42,124. Saanich's sinking funds are: School debentures, $2,941; local improvement debentures, $9,076, while the total value of assets owned by municipality is $186,118. The rate of taxation for 1914 is, general (subject to abatement of 1-6th), 7.2 mills; school, 1.8 mills; the area of the municipality is 45,000 acres and estimated population 8,500.

DIVIDEND NOTICE

NORTHERN CROWN BANK,

Head Office, Winnipeg

DIVIDEND NO. 16.

Notice is hereby given that a dividend at the rate of six per cent. per annum on the paid-up Capital Stock of this Bank has been declared for the six months ending November 30th, 1914, and that same will be payable at its Banking House in this City, and at all its branches on or after the 2nd day of December next, to Shareholders of record of the 16th day of November, 1914.

By Order of the Board,

ROBERT CAMPBELL,
General Manager.

Winnipeg, 27th October, 1914.

WANTED.—Position as Special Agent by thoroughly experienced Life Insurance man, with American experience. [illegible] former offices. Steady Hustler. Box 1,77, Vancouver, B.C.

INDEMNITY FOR UNCONTROLLABLE LOSSES

Business Organizations Protect Buildings, Finances and Expert Members by Insurance

"Business insurance is indemnity against business losses arising from causes beyond the control of those conducting the business. This may be fire insurance on store or factory, liability insurance, insurance on the fidelity of employees, or insurance against the death of a partner, officer or other member of the organization in whose life the partner or corporation has an interest which would be damaged by his death. Such damage may be (1) loss of expert services; (2) loss of commercial credit; (3) loss of capital; or (4) loss of business.

"Up-to-date business men are protecting their interests with business life insurance as a matter of course, the same as they carry fire insurance on stores or factories. Last year the Northwestern Mutual issued 824 policies covering $9,018,000 (average policy $10,944) on lives of partners, corporation officers and employees," says the field notes of the Northwestern Mutual Life of Milwaukee. "Such is the variety of business relationships leading to the issue of business insurance that anything like a complete enumeration would be impossible.

Gives Protection and Inspires Confidence.

"Only a few general classes indicating the need of business insurance may be outlined:—

"(1) To indemnify partners, stockholders, employers or business associates for loss by death of the service value of an individual possessing special training, inventive genius, knowledge, experience, credit, influence or whatever quality would make it difficult, if not impossible, to fill his place without a loss of time, business or efficiency.

"(2) To furnish funds to replace the capital value of a deceased associate whose estate must be liquidated by the sale of his stock or partnership interest in the enterprise.

"(3) To protect business associates from ill-advised interference in their enterprise by the heirs and legal representatives of a deceased associate.

"(4) To meet impairment of commercial credit usually following the death of any important member of a business organization.

"(5) To win the confidence of possible investors who are wise enough to foresee the effects of death on the business.

The Provision of Funds.

"(6) To cover depreciation in the use value of property disturbed by the death of a business associate.

"(7) To provide funds for the retirement of bonded or other indebtedness either at a fixed date or upon the death of an associate.

"(8) To replace capital withdrawn from the business by the death of an associate or creditor.

"(9) To protect the financial interests of business organizations by the creation of a sinking fund in readily available form.

"(10) To answer in all cases the question 'What would be the effect of A's death upon the firm, corporation or employer?' "

What the Royal Mint is Doing at Ottawa

It coined a total of 17,668,978 gold, silver and bronze pieces in 1913, including 4,040 British Sovereigns.—Dr. Bonar, Deputy Master of Canada's Mint, discusses circulation of coinage and Dominion notes in this country.

LITTLE is heard of the Ottawa branch of the Royal Mint. This may be because money coining never has received much publicity and because the Canadian department of finance are workers rather than advertisers and because Dr. Bonar, the deputy master of the Canadian branch of the Mint, is a modest man. Besides all of which, the Royal Mint is an Imperial government institution which still knows the sombre atmosphere of the British government and the strength of red tape. Twice a year at least are we permitted to know something as to what the Royal Mint, London, and its branches at Sydney, Melbourne, Perth (Australia), and Ottawa, are doing. These occasions occur when the comptroller of the Mint issues his annual report and when Dr. Bonar sends some figures each year for *The Monetary Times Annual.*

The latest report of the comptroller of the Royal Mint, just issued, contains an unusually interesting report, dated March 16, 1914, of Dr. Bonar, the deputy master of Canada's branch of the Mint. It relates to the operations of the twelve months of 1913. During that year Canada's Mint struck a total, in all three metals, of 17,668,978 pieces, as against 17,276,874 in 1912. Of that number, 4,040 were British sovereigns, of which there was no coinage in 1912; 149,232 were Canadian gold pieces of ten dollars, and 98,832 of five dollars, as against 74,759 of ten and 165,680 of five in 1912.

Of silver pieces, 11,681,469 were struck in 1913, as against 11,928,793 in 1912.

Of bronze, 5,735,405, as against 5,107,642 in 1912.

There has thus been a decided increase in the gold with a small decrease in the silver and a small increase in the bronze. The total of pieces struck is larger than for any year but 1910, an abnormal year when prudence demanded large reserves.

The profits on silver bullion purchased for coinage were $626,926.04 and on bronze metal purchased for coinage $44,016.10. There was a loss on worn silver coin of $16,501.95, and from the terms of purchase there was a gain on worn and mutilated bronze coin of $5.32.

Silver coins to the value of $1,175,000 and bronze to the value of $55,600 were issued to the Dominion government during the year.

In 1913 the finance department deported foreign silver (mainly of the United States) to the amount of $2,034,937.67, so distributed:—

Ontario	$ 784,615.87
British Columbia	550,878.40
Manitoba	252,695.24
Quebec	215,799.07
Alberta	112,011.00
Saskatchewan	78,235.34
New Brunswick	22,802.75
Nova Scotia	17,390.00
Prince Edward Island	450.00
	$2,034,937.67

The charges paid by depositors of gold amounted to $8,796.73, the commission on bars to $61.25 and miscellaneous other revenue to $1,010.80.

The net amount realized by the sale in 1913 of gold and silver "sweep" belonging to 1912 was $717.41 in the operative department and $1,454.29 in the refinery, or a total of $2,171.70.

The gold represented in the "sweep" sold amounted to 101.722 ounces fine, or $2,101.80. This amount was deducted from the total net amount realized ($2,171.70) and placed to the credit of the Royal Mint bullion account, the balance (of $68.90 for silver) being placed in revenue and advances account as a revenue receipt.

It has not yet been possible to reduce the work of the refinery to fixed and stable routine. At the beginning of the Mint it was thought that the bulk of our rough gold would come from eastern Canada and could easily be handled by a refinery of small capacity. But it soon appeared that the gold from the northwest and centre would come in much greater quantities than expected. The deposits of rough gold rose from 65,009 ounces in 1910 to 105,568 ounces in 1912, the Yukon being the chief contributor.

The average time needed, without night work, for the passing of rough gold through the silver cells and the gold cells till it is refined and ready for coinage is a little over three weeks, the greater part of the time being needed by the silver cells. Under such circumstances it became difficult to make returns to depositors within the fourteen days of the Mint's own rules.

Accordingly it seemed desirable to shorten the time of refining in its earlier stage by substituting the chlorine process for the silver cells, the gold cells of the electrolytic process remaining as before for the final stage. The Dominion government agreed to the extension of the refinery. Estimates to the amount of $35,000 were passed by the House of Commons on June 5th, 1913. This winter should find the Mint at Ottawa in command of its new and enlarged premises.

The refinery was able in 1913 to reduce to metallic form and deliver to the Mint office for coinage 15,954.74 ounces of fine silver contained in the gold deposits, purchased by the Mint.

The bank act revision in 1913 established central gold reserves for the securing of issues made above the paid-up capital of the issuing banks. The Ottawa Mint, however, has more direct concern with the statutory reserve of the Dominion's finance department, held against Dominion notes and (in small part) against deposits in Dominion savings banks. On March 31, 1913, the Canadian gold coins of this Mint figured in the reserve for $810,970 and the gold bars for $222,933.99.

The figures for the whole reserve on December 31, 1913, were as follows:—

British sovereigns	$ 6,382,362.02
Canadian gold coins	2,118,210.00
United States gold coins ...	106,651,981.50
Bullion	222,933.99
	$115,375,487.51

The issues of Canadian gold coin made in the ordinary way to assistant receivers-general in 1913 were only $75,000, and to sundry persons directly by the Mint only $1,190, while there were sent to the currency branch of the finance department in Ottawa, coins to the value of $1,814,500, the great part of which may be presumed to have passed into the reserve. On December 31st, 1913, the Mint retained no more than $150 in Canadian gold coin.

"It seems to me impossible" says Dr. Bonar, "to form an accurate estimate of the gold coin in circulation. Even if we assume that all the Canadian gold coin issued to assistant receivers-general remains in circulation (amounting in 1912 and 1913 to $875,500), we have no means of knowing the amounts of British sovereigns, since we have no monopoly of the issue of these in the British Empire; still less do we know the amounts of United States gold pieces, which are legal tender in this part of the British Empire though coined and issued apart from British control. The actual circulation in Canada of gold money, of any of the three kinds recognized by law as legal tender is known to be extremely small.

Dr. Bonar, Deputy Master, Royal Mint, Ottawa.

"The circulation of the subsidiary silver and bronze can be estimated with fair exactness. The amounts of the successive coinages are known, and in the accompanying table we give as the net circulation the total of the money coined, minus the amount of withdrawals and recoinages. Allowance might be made for the presence of foreign silver in quantities roughly corresponding to the amount deported year by year; but the average figure given in our table would seem to be near the truth for Canadian coinage, somewhat more than two dollars in

TABLE showing the circulation per head, throughout the Dominion, of Canadian Silver and Bronze Coin, and of Dominion Notes of denominations of less than $5.

* These figures were supplied by the Census [illegible].
† Census year
Notes of $5 were in circulation to the amount of $[illegible] on 31st December, 1913

silver and fourteen cents in bronze for every unit of population. With the foreign silver (almost entirely from the United States) the first figure might be set down as two and a half. A fairly exact estimate is more easy to reach in the case of the bronze coinage, as the amount of deported foreign bronze, and therefore the presumable quantity thereof in circulation would seem to be small. The amount deported does not exceed the value of $500 in each year. The circulation of bronze coin in Canada may, therefore, be taken as rightly estimated in the table, namely 14.5 cents per unit of population. The increase in the use of bronze (14.5 cents per head in 1913, as compared with 12.4 cents in 1901) is smaller than the increase in the use of silver ($2.31 per head in 1913, as compared with $1.53 in 1901). The need for such parsimony as involves a constant reckoning in small fractions of currency does not yet seem to be seriously felt over the length and breadth of Canada."

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Falkenburg, Ont.—Mr. A. Moore's sawmill. Loss and cause unknown.

Arden, Ont.—November 4—Royal Hotel, post office and three stores, etc. Loss and cause unknown.

Loss, contents, $500; building, $1,000; dwelling of Misses Davenport and Mackie, 56 Alexander Street, owned by Dr. Geo. Graham. Loss, $110; store of T. S. Stenberg, 70 Dundas Street. Cause, gas iron left burning, ignited board. Loss, $75.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Medicine Hat, Alta.—Adjustment of the fire loss recently sustained by the Alberta Linseed Oil Mills, Limited, has been placed at $20,000.

Vancouver, B.C.—The total damage done by fire during October was $7,207, the insurance loss was $7,202, leaving the property loss above insurance $5, according to Mr. N. Lee's, secretary of the fire department, report. The value of property involved was $229,285. The department responded to 23 alarms during the month as follows:—Fires where damage occurred, 9; small fires where no loss resulted, 6; false alarms, 3; chimney fires, 3; smoke scares, 2. A list of alarms where damage occurred follows:—

October 3—Alarm from Box 321 at 11.54 a.m. Fire in dwelling owned and occupied by A. H. Wallbridge at 1300 Bute Street. The blaze started in the bath room upstairs and was caused by a basket of clothes being placed too close to stove pipe, damage to both building and contents resulting. Damage, $998, covered by insurance; telephone alarm at 7.45 p.m., to 1801 Nelson Street, owned by Mrs. Langley. Fire had started from several different places in the house and was evidently of incendiary origin, slight damage resulting to furniture and building before the blaze was extinguished. Damage, $258, covered by insurance.

October 5—Alarm from Box 57 at 11.43 p.m. Fire in upstair partition in vacant house at 1021-23 Homer Street, owned by R. P. Latta. The blaze appeared to be of incendiary origin. Damage, $350, covered by insurance.

October 9—Alarm from Box 2115 at 7.05 p.m. Fire in small house at the north-east corner of Pender and Cariboo Streets, owned and occupied by Mr. Havens. The building was all in flames when the apparatus arrived and was a total loss. Cause of fire unknown. Damage, $850, covered by insurance.

October 10—Telephone alarm at 2.10 p.m. Small fire in woodwork around chimney in dining room at 1603 Grant Street, caused by a defective chimney. Building owned by N. F. Byrnell and occupied by G. W. Fitch. Damage, $10. covered by insurance.

October 16—Telephone alarm at 3 a.m. to E. W. Moore's Vancouver Millinery, 149 Hastings Street E. The blaze started in the centre of the store from some unknown cause, considerable damage resulting to the stock before the fire was extinguished. Greek Club occupied the second floor of the building, which was owned by George Munroe. Damage, $4,450, covered by insurance.

October 18—Alarm from Box 18 at 11.08 p.m. Fire in waste paper basket in bedroom on fourth floor at the University Club, 310 Seymour Street, caused by carelessness with matches. Building owned by Clarke and Stuart and used as printing and stationary store, the top floors being occupied by the club. Damage, $20, covered by insurance.

October 25—Telephone alarm at 1.50 p.m. to 514 Granville Street, occupied by Foster, Thomas and Company, clothing store. Small fire in some clothes hanging in closet in rear of store, caused by an electric drop light being left turned on and which was in contact with the clothes, slight smoke damage also resulting. Damage, $256, covered by insurance.

October 29—Alarm from Box 12 at 1.10 a.m. Small fire in basement at 649 Granville Street, caused by a gas stove being left burning and becoming overheated, setting fire to the bench on which it was placed. Building owned by P. W. Charleson and occupied by R. Hocker, Vancouver Photo Company. Damage, $15, partly covered by insurance.

(Other fire information appears on Page 32.)

PERSONAL NOTES

Mr. Geo. A. C. Jones, inspector for Ontario of the Dominion Gresham Guarantee and Casualty Company, goes to Montreal on November 17th, and sails from there for England on the 19th.

Mr. F. Augustus Heinze, who died in Saratoga, N.Y., was best known in Canada through his flotation of the West Dome Mining Company.

Sir Daniel H. McMillan was one of the provisional directors of the Great-West Life Assurance Company, when it was organized in 1892. At that time he was provincial treasurer for Manitoba, and then Hon. Daniel Hunter McMillan. He has remained on the board of the company continuously since then, acting, during the last three years, as one of the policyholder's directors. Sir Daniel was born in Whitby, Ontario, and went to the west as a captain in the First Ontario Rifles in the Wolseley Red River Expedition of 1870. Being favorably impressed by the west he decided to settle in Manitoba and soon became deeply interested in various enterprises in Winnipeg and province. He became a member of the Manitoba Legislature in 1880, and was a member of the government, acting as provincial treasurer for 10 years 1880-1899, was appointed Lieutenant-Governor of Manitoba in 1900, and was re-appointed at the end of the first term, retaining office until 1911. In 1902 he was created Knight Commander of the Order of St. Michael and St. George. Sir Daniel is president of the Northern Crown Bank, vice-president of the Canadian Mortgage Association, a director of the Toronto General Trusts Corporation and chairman of the western board, and also a director of several other financial concerns.

SIR DANIEL H. McMILLAN.

Messrs. Hubert Reade and Company, chartered accountants, have removed their offices from [illegible] Royal Bank Building to 407-408 Quebec Bank Building, Portage Avenue, Winnipeg.

Mr. J. R. Grey, the second largest shareholder of the Dominion Trust Company, and a director of the company, died on Saturday last in Oakland, California. Mr. Grey was present at the recent directors' meeting.

Sir George Paish has gone back to Washington, after having spent last week-end at the country home of President Rea, of the Pennsylvania Railroad, near Bryn Mawr. Sir George said on Monday that he was unable to say anything for publication on the subject of his visit to the United States. Some newspapers, he declared, had made the mistake of saying that he was going home soon.

Mr. J. S. C. Fraser, manager of the Victoria, B.C., branch of the Bank of Montreal, who died recently, was born at Fraserfield, Ont., and entered the service of the Bank of Montreal as junior clerk in Ottawa in 1878. He was successively at St. John, Toronto, Hamilton and New Westminster, succeeding to the managership in Rossland in 1896. In May, 1912, he was appointed manager at Victoria, which post he maintained until the time of his death.

CUSTOMS REVENUE DECLINES

Canada's financial statement for October and for the first seven months of the fiscal year shows a continued decline in revenue as expected. The October statement reflects the result of the war in cutting customs revenue. For the past month customs receipts totalled $5,331,508, a decrease of $3,71[illegible],337 as compared with October of last year. For the seven months of the fiscal year customs revenue has totalled $47,238,177, a drop of nearly twenty millions.

The total revenue for the seven months has been $80,072,466, which is $20,130,848 less than for the corresponding period of last year. The October drop in total revenue was $3,584,344.

Expenditures for the ordinary expenses of administration show, on the other hand, a continued increase. For the seven months consolidated fund expenditure has been $65,211,703, an increase of $7,764,875. Capital expenditures show some curtailment this year. The comparative figures are $23,630,856 for the first seven months of this year, as compared with $30,720,490 for the first seven months of 1913-1914.

The net debt of the Dominion is now higher than it has ever been. The war expenditures hardly begin to enter yet in the returns. At the end of October the net debt was $352,675,399, an increase of $51,547,862, as compared with October 31st of last year. During the past month the increase in the national debt was $9,288,814. Temporary loans now amount to $20,573,333, an increase of about eleven millions during the month.

Despite the increased excise taxation put on at the war session of parliament, the excise revenue for the past month was only $1,613,641, or $322,057 less than for October of last year.

BRITISH COLUMBIA CAN DELIVER THE GOODS

(Staff Correspondence.)

Vancouver, November 9th.

Many of the articles in immediate demand in the world centres can be had in British Columbia. In 1913 China imported 161,375,117 feet of lumber as compared with 78,912,408 feet in 1912. This supply came mostly from Japan and the United States, but there is no reason why manufacturers on the Pacific coast of Canada should not obtain a section of this trade. Effort is now being made to secure a preference for Canada in Australia, and a complete statement of the case to be considered has been forwarded by the local government to Sir George E. Foster, minister of trade and commerce. Mr. O. Beele, of Sydney, who was twice president of the Associated Chambers of Commerce of the Commonwealth, and is quite an industrial authority, pointed out that to secure trade in that part of the world, attention had to be paid to the requirements of the market, instructions of buyers carefully noted, and the article supplied as it is wanted.

Hemlock in the coast forests has not been given much attention, but of late it has come under notice. It is used in the manufacture of pulp, and logs bring $6 or $7 a thousand feet. It is being used for other purposes also, and hereafter will be looked after more carefully.

The demand for pulp and paper has given an increased activity to mills on the coast, and with plants now operating going day and night it is not improbable that other plants, now idle, will be again started.

Vancouver has a wire nail industry, and already orders have been received from the east and elsewhere.

Canadian tobacco is being received with favor in centres of Great Britain. Tobacco has been successfully grown in the Okanagan district, and it is probable that the areas under cultivation will be gradually extended.

With German hops unobtainable, there should be greater demand for hops grown elsewhere. The hop crops on the lower mainland of British Columbia were never better than this year.

GREAT BRITAIN'S FINANCIAL STRENGTH

Great Britain continues to show that the silver bullet, so-called by Mr. Lloyd George, is a real weapon. The following figures, compiled by *The Monetary Times*, show the extent of the financing which Great Britain has accomplished since the outbreak of war.

Five issues of treasury bills, £15,000,000 each; all over-subscribed.

Loan of £10,000,000 to Belgium.
Loan of £2,000,000 to India.
Loan of £2,000,000 to France.
Loan of £600,000 to Norway.
Guarantee of Egyptian loan.
Loan of £20,000,000 to Australia.
Loans to Canada, for military and naval purposes, as required.

Great Britain has raised £90,000,000 in treasury bills since the outbreak of war. This leaves to be issued £10,000,000 of the first war appropriation of £100,000,000. The money has been raised on exceptionally easy terms. The British government is considering the question of issuing a public war loan of £200,000,000, redeemable in ten years. It is expected that the rate of interest will be fixed on this popular subscription at four per cent., and that the issue will be sold at par or a fraction under.

Canada will obtain the money it needs for military and naval purposes from Great Britain, and Sir George Paish, in an interview at Washington the other day, held out the hope that the Dominion will be able to finance its ordinary requirements also in London next year. These methods are better than the German way of appropriating a first instalment of 25 per cent. of its people's savings accounts for the war loan.

◆

After having the portraits of "financial magnates" printed and reprinted till they haunt in dreams, why not pictorially immortalize William John Jones, the man who lives within his income?

NEUTRALITY, FINANCE AND COMMERCE

Scepticism of the factor of neutrality in the war is increasing. Turkey was the serio-comic performer on the neutrality stage. Holland has for weeks been doing a tragic balancing act. The United States is endeavoring to mix the spirit of neutrality with the desire to do business. Viewing the question only in its financial and commercial phases, neutrality begins to look somewhat like bunkum. President Wilson a few weeks ago made known his disapproval of loans by United States bankers to belligerent governments. *The Monetary Times* asked the Washington administration whether this ban included Canada. Secretary of State Bryan said it did. Canada being a country at war, neither the federal nor the provincial governments can obtain loans in the United States, that is, unless financial houses there care little for the presidential frown.

Now comes a Washington despatch of a few days ago saying that "Viewing credit loans to belligerent countries as private transactions, the Washington administration will not attempt to interpose its influence against such transactions on the part of American bankers." This, it was added, was learned on the highest authority after it became known that German financiers were contemplating the establishment of a credit loan in the United States. That is apparently a direct reversal of policy and is another slap at the hardening character of neutrality. The reason for the change is perhaps revealed by another part of the same despatch which states that the decision of the Washington administration may lead to the purchase in the United States of about $50,000,000 worth of supplies by Russia, and an equal, if not a greater amount by Germany. The wiggling process is further assisted by this statement:—

"High officials of the Washington administration insist that President Wilson has not changed his view announced at the outbreak of the war that the loaning of money to belligerents would be 'inconsistent with the true spirit of American neutrality.' A distinction was drawn by officials, however, between the loans referred to at that time, such as bond issues offered for public sale, and credit transactions intended as a checking account against the purchase by belligerents of foodstuffs and supplies from American firms."

All this leads to the question as to what is the difference, from the neutrality viewpoint, of a Canadian provincial government being loaned money by the United States to build, say, a railway or a highway, and money being loaned by the United States to Germany that it may purchase from the United States foodstuffs and materials to carry on the war. In this materialistic and warlike world we do not object to such commercial transactions. At the same time, it is inconsistent to carry them on with the warning finger of neutrality upheld and the slogan "Get all the business you can and how you will" shouted on the side.

Coming nearer home, and to what appears a far more serious phase of war limitations, there is a recent order-in-council passed by the Dominion government. This entirely prohibits the export from Canada of goods classed as contraband of war and destined, either directly or indirectly, to the enemy. If this order were carried out it would stop the export of Ontario nickel to Germany, there to be manufactured into arms and ammunition for use against British soldiers and sailors. The Canadian contingent even have not enthusiasm in the "Made-in-

Canada" campaign sufficient to desire Canadian nickel in the German arms which they will face.

The order-in-council looks formidable enough, but an Ottawa despatch to The Toronto Star seems to reveal a dangerous loophole. It says: "The prohibitory order, while sweeping in its terms, is possibly not so practicable of enforcement as may appear on the surface. The export to the United States is not prohibited, and there is apparently no practicable way of absolutely stopping the re-export from there to Holland, Denmark, or Italy, and thence to Germany or Austria. The main effect of the order is apparently to stop any direct export from Canada to Denmark or Holland."

If this is the case, it means that while contraband of war cannot be exported from Canada through the front door, it can go by way of the back door. And that is a serious matter.

So far as the United States are concerned, it would seem better for the nation to discard the hollow neutrality fad as it relates to commerce and finance. So far as Canada is concerned, its orders-in-council should be made effective enough that the fight for the British Empire's existence may be helped in every possible way. We all want to see the end of this war and the right end.

◆

Put a good bond in the Christmas stocking.

* * * *

Investment funds are accumulating the world over. The war loans will not swallow them all.

RUNNING CIVIC RAILWAYS

Seldom does municipal ownership confess the error of its ways. *The Monetary Times* has frequently given a friendly word of warning to municipalities which have thought that a town or city could not be properly considered as such unless it had a street railway. Street railway financing by Canadian municipalities would make the subject of a doleful document. Commissioner Harrison, who is in charge of the public utilities of Edmonton, and who is one of the most business-like of its citizens, has given some facts and figures which should cause local authorities in other cities to ponder. Mr. Harrison submits his figures to show "why the city should be careful in giving free tickets to any person."

Before a car starts out in the morning, he says, and before it takes in any receipts, the following fixed charges have to be met before a profit can be made for each day:

Interest and sinking fund charges	$650	
Depreciation	280	
Interest on overdrafts in bank	55	
		$ 985
Operation and maintenance charges:		
Wages and salaries per day	$900	
Power charges	350	
		$1,250
Total		$2,335

In other words, before the street railway begins to show a profit it must earn not less than $2,335 per day or must carry at least 47,000 passengers per day to pay expenses. At the present time the street railway is carrying on the average 32,000 passengers per day, and is losing at the rate of $500 to $800 per day.

After submitting these figures, he says: "I find that our system is over-capitalized; that we have twice as many miles of track per thousand of population as any city in the Dominion of Canada, and in many instances four times as many miles; in other words, we have extended our system far more rapidly than good business practice would warrant."

Mr. Harrison suggests the appointment of a civic committee to examine these matters, with a view to reducing operating expenses and power charges, and to refusing to extend the railway further into non-paying territory. One of the suggestions he makes seems to suggest danger—that the establishment of skating rinks and amusement parks at the end of the line may increase the traffic, and in time overcome the deficit. Investors who hold Edmonton's bonds may view civic skating rinks with suspicion.

◆

And this time the heirs of Turkey, the sick man of Europe, will really get the life insurance.

* * * *

Every war loan put out in Great Britain has been over-subscribed—a case of the bulldog in finance.

DOMINION TRUST AFFAIRS

The collapse of the Dominion Trust Company, of Vancouver, is a reminder that someone always has to pay the penalty of the good looking but dangerous days of wild speculation. In 1912, then, just before and just after, Canada was living such days. With trade depression and war conditions, the punishment is being exacted now in the shape of a failure here, a collapse there, and trouble in many places.

A committee has been appointed by the shareholders of the Dominion Trust Company to investigate the company's affairs. The appointment of a provisional liquidator, made recently, will continue for another month, when it is hoped that the fight for charge of the winding-up proceedings may result in a permanent appointment which will be in the best interests of the share and debenture-holders.

According to the Vancouver Sun's report of the meeting of shareholders on November 2, "in opening the meeting, President Clubb said the shareholders would be given every bit of information possible to obtain. He said in answer to a question from a shareholder if there were any discrepancies that there 'were grave discrepancies.' The statement was made that some $243,000 of the funds of the company had been misapplied, but it was not explained in just what particular, nor how, though the responsibility, it was said, naturally rested upon the work of the late managing director, Mr. W. R. Arnold, who was killed while putting away his shotgun last Thanksgiving Day."

The subtle suggestion that the late Mr. Arnold is likely to be shouldered with the responsibility, does not look good. Too often have dead men been made the scapegoats of financial breakdowns. Mr. Arnold was the managing director, but surely the rest of the directorate were not mere dummies, taking no interest in the company's affairs, following blindly Mr. Arnold's lead and seeing no danger ahead? The public will want to know about that, and they are not likely to view with good grace any attempt to bury all the blame for this disaster with the managing director.

Let us have a thorough investigation. In the meantime, other concerns with whom rumor is busy, should examine themselves with the hope that it is not too late.

FLAWS IN CANADA'S FIRST INDUSTRY

Government Investigation Suggested to Discover Remedies and to Help Agricultural Prosperity

"The minimizing of economic waste should be the particular care of our governments. Especially at a time like the present, when all of Canada's resources should be utilized to the fullest extent in strengthening us for the world struggle in which we are engaged, should such problems be given close and careful study by those who could provide the necessary relief."

This statement is contained in the summarized results of a conference held at Winnipeg between representatives of the Grain growers' Association of Manitoba and Saskatchewan, the United Farmers of Alberta, and the Canadian Manufacturers' Association.

Various phases of production and distribution and proper remuneration of services tariffs are mentioned in this report. Two examples of wasteful conditions are mentioned.

Prices for Feed.

"In portions of our western provinces to-day there are thousands of immature hogs, whose owners have lost, or largely lost, the crops that were to have provided the feed needed to prepare those hogs for market. Local prices for feed have advanced to a point where it will not pay to purchase it. Unless something is done, and done at once, a valuable asset will be lost to Canada at the very time when other parts of the country, where feed is more plentiful, are complaining of a shortage of hogs. The obvious solutions of bringing feed to the hogs, or hogs to the feed, are inoperative because of freight rates and the lack of a proper system of distribution. What is to be done?

"In Ontario there are thousands of barrels of first-class apples that may never be harvested, because, it is alleged, it will not pay the farmers to pick them. Yet the Canadian west is crying out for apples it would be glad to buy in carloads at prices that should be remunerative to the producer. Again it may pertinently be asked, Cannot something be done?"

Organization Might Effect Improvement.

After mentioning the need of improved methods of distribution and transportation problems, cheaper money, or easier credit, is pointed out to be another requisite if agriculture, particularly in western Canada, is to afford a return commensurate with the labor that is spent upon it.. Frequently the reason that more advantage is not taken of the opportunities which agriculture presents is, not that the farmer is not alive to those opportunities, but that he lacks the means and is unable to obtain the credit necessary to profit by them. It would also appear desirable to modify the present practice of insisting that payments shall fall due immediately after the harvesting of a crop, for it frequently compels sacrifices which the farmer can ill afford. Neither of these reforms is likely to be accomplished by individual effort. Some improvement might be effected through organized effort. A great deal of much needed relief could be afforded through the intervention of some properly constituted authority clothed with the necessary power.

Study the Tariff.

To whatever extent the tariff is responsible for the handicaps under which the farmer has to labor, it should be carefully studied with a view to its rectification. If the lack of educational facilities in rural communities is a factor in depopulating our farmers, these facilities should be provided wherever possible and as conveniently as possible.

The weaknesses that stand in the way of proper agricultural development must be more fully studied and some machinery must be provided for their correction. The whole future of Canada, her attainment of the destiny which we believe awaits her as one of the first nations of the world, not only suggests but demands that her citizens as a whole apply themselves to this all important problem.

Government Should Investigate.

The conference placed itself on record as of the opinion that all matters affecting the agricultural interests of Canada, particularly production, transportation, distribution, [illegible] be made forthwith the subject of a [illegible] by a committee or board to be appointed, in accordance with the best British practice, with the least possible delay, by the federal government, that committee or board to be composed of non-partisan men of outstanding ability, broad experience, high ideals and unquestioned probity, for the purpose, first, of thoroughly acquainting themselves with the needs which exist; second, of evolving and submitting to the government in time for report to the approaching session of the parliament of Canada, a plan calculated to meet those needs, and, third, of putting that plan when approved or amended into execution, with power to act in matters of urgent need, with government approval only.

Anticipating favorable action, the conference appointed Messrs. Maharg, Henders, Tregillus, Sherrard and Cantley to strike committees for the fuller investigation of these matters, these committees to report to a future conference of agricultural, manufacturing, financial and transportation interests, to meet on the call of the chairman, Mr. Henderson, president of the Canadian Manufacturers' Association.

◆

ANOTHER DOMINION TRUST REPORT

The report presented to the shareholders of the Dominion Trust Company on November 6th stated that the securities of the company consist largely of real estate holdings. These will have to be valued and audited before an approximate estimate can be made of the total amount, and this valuation will not be made until after a permanent liquidator is named.

The life insurance of the late managing director was stated to be $425,000 and there is an accident policy for $10,500. The company may claim against this total amount for any shortages which investigation may develop.

In a review of what the total assets would realize, the committee took the view that there appeared to be ample securities to meet all obligations in the course of time, and that the creditors should not lose anything.

Included in the assets is the $250,000 reserve put up with the provincial government under the regulations of the new Trust Companies Act. This includes a general trust bond for $50,000 and a special bond of $200,000 to cover depositors. These are guaranteed bonds, and the quarter million will be available in meeting obligations of the company.

Regarding the investments with the Alvo von Alvensleben interests, it was said these may have been made by the Dominion Trust Company on behalf of itself or some of its clients. It is not yet ascertained how they were made. They are estimated at $1,143,540, but the account has not been audited and is not vouched for by the special committee. On the other hand, it is pointed out that Mr. Alvensleben himself claims the sum is only a little over half a million. The transactions involved consisted of money loans, which were secured, but the present value of the securities has not been looked into yet.

It was stated in the report that the chief difficulties of the company came from the making of unauthorized loans, and that a serious shortage was due to this.

In regard to the signing of the company's cheques, the report states: "We find on investigation that the authority for signing cheques was vested in the president, and members of the advisory committee, managing director, general manager, secretary, treasurer, assistant treasurer, manager and accountant of the Vancouver branch, or any two of them, or anyone of them together with a member of the advisory committee. This authority was rarely exercised, especially during the present year. This places the responsibility in the hands of the late managing director and the officials under his control."

The report continues that a large number of investments were made on the instructions of the late managing director without the knowledge of the directors or advisory board. There is in existence a record of all loans and investments authorized by the directors.

"There are four accounts that are conceded to be associated with the name of the late managing director. They represent loans made on various securities which nominally cover the whole amount, but no valuation has yet been made. The amount is not ascertainable because of the fact that the late official apparently carried a number of matters in his head and left no record of same."

In conclusion, the committtee said that the directors, Mr. C. C. [illegible], the new managing director, and Mr. C. R. [illegible], the provisional liquidator, furnished them with every facility toward their investigation and placed at their disposal the company's lists of securities, auditors' reports, etc.

Why Britain is at War

(Prepared for the Victoria League)

By SIR EDWARD COOK

I

It was a reflection of the first of political philosophers that disturbances in states, though they may arise on trifling occasions, do not involve trifling issues. The present world-wide war started from the case of Servia, but involved, even from the start, much larger issues. If only a dispute between Servia and Austria-Hungary had been in question, Britain, as Sir Edward Grey repeatedly stated, would have had no concern in the affair. But since, as we shall see, this dispute was bound to have ulterior consequences, it is necessary to understand what the dispute was about.

Servia is a small, but very ancient, kingdom in the Balkan peninsula. It obtained considerable accession of territory as the result of the recent wars in the Balkans, the war between the Balkan States and Turkey, and then the war among the Balkan States themselves. The Servian people are akin, in race and religion, to the Slavs, of which race Russia is the predominant Power, and to which race also many of the subjects of Austria-Hungary belong. On June 28th, 1914, "the crime at Serajevo" was committed, namely, the murder of the heir-apparent to the throne of Austria-Hungary and his consort in the capital of Bosnia. That province, once a part of the ancient Servian kingdom, had fallen into the possession of the Turks; the administration of it had been given to Austria, by the Berlin Treaty after the Russo-Turkish war, in 1878; and in 1908 Austria had annexed it. The Austrian government alleged (but has not proved) that the crime of Serajevo was a culminating point in a "subversive movement" organized by the Servian government "with the object of detaching a part of the territories of Austria-Hungary from the monarchy." On July 23rd the Austrian government addressed an ultimatum to Servia. Austria had been "left a perfectly free hand" by Germany.

Document was Formidable.

It was admitted by Sir Edward Grey that "one naturally sympathized with many of the requirements of the ultimatum," and that "the murder of the Archduke and some of the circumstances respecting Servia quoted in the [Austrian] note aroused sympathy with Austria." Russia also admitted that "the demands were reasonable enough in some cases." But there were two features in the Austrian ultimatum which caused alarm and regret to those who desired to see the peace of Europe maintained. The first was the inclusion of a time-limit, so short (forty-eight hours) as to leave diplomacy little time to avert war. The second was that what Austria demanded within forty-eight hours was not a reply, but the reply dictated by Austria. "I had never before seen," said Sir Edward Grey, "one state address to another independent state a document of so formidable a character." The German foreign secretary "admitted that the Servian government could not swallow certain of the Austro-Hungarian demands." Sir Edward Grey advised Servia to go to the furthest possible point in meeting those demands, and similar advice was given to her by France and Russia. The Servian government replied, within the appointed time, conceding the greater part of the Austrian demands. The conceded demands were of a very stringent character. The Servian reply "involved," said Sir Edward Grey, "the greatest humiliation that he had ever seen a country undergo."

Austria Declared War.

Nevertheless Austria refused to accept the reply, and declared war against Servia July 28th. The part of the Austrian demands which Servia had felt unable to concede touched her very existence as an independent state, and with regard to these matters she offered to submit them to the Hague Tribunal. The fact that Austria, while receiving satisfaction on the other points, had made the refusal of the latter a casus belli raised suspicions of her ultimate intentions. "The real question," said the Russian foreign minister, "was whether Austria was to crush Servia and to reduce her to the status of a vassal, or whether she was to leave Servia a free and independent state."

It had been recognized from the first that the case of Servia could not be isolated. The aggression upon Servia by Austria (with the previous consent of Germany) was bound to involve other powers.

The German government did, indeed, protest to Sir Edward Grey that "the question at issue was one for settlement between Servia and Austria alone"; but everybody else knew that it could not be so, and the German government, as we shall see presently, seem to have known this also. The relations between Austria and Russia had already been strained by the Austrian annexation of Bosnia and Herzegovina. Aggression by Austria upon Servia was certain to be regarded by Russia with the utmost alarm and indignation. During the Balkan crisis the Russian foreign minister "had made it clear to the Austrian government that war with Russia must inevitably follow an Austrian attack on Servia. It was clear that Austrian domination of Servia was as intolerable for Russia as the dependence of the Netherlands on Germany would be to Great Britain."

No Limits to Issues.

"It must be obvious," said Sir Edward Grey in the House of Commons (July 27th), "to any person who reflects upon the situation that the moment the dispute ceases to be one between Austria-Hungary and Servia and becomes one in which another great power is involved, it can but end in the greatest catastrophe that has ever befallen the continent of Europe at one blow; no one can say what would be the limit of the issues that might be raised by such a conflict." War between Russia and Austria, in a cause wherein Germany had supported the latter, must involve Germany as her ally, and France would be drawn in as the ally of Russia. The action of Austria and Germany in the case of Servia was thus likely to challenge a European war. England and France and Russia saw this. Italy, the ally of Austria and Germany, saw it also. When the general war was breaking out, the Italian government, being asked to state its intentions, replied: "The war undertaken by Austria, and the consequences which might result, had, in the words of the German ambassador himself, an aggressive object. Both were, therefore, in conflict with the purely defensive character of the Triple Alliance, and in such circumstances Italy would remain neutral." "We were fully conscious," said the German government itself, "that a possible warlike procedure by Austria-Hungary against Servia might bring Russia upon the scene and so involve us in war in accordance with our duties as Allies." "As for Germany," said the German ambassador at Vienna to the British, "she knew very well what she was about in backing up Austria-Hungary in this matter."

(To be continued.)

TELEPHONE COMPANIES SELL BONDS

During September and October Saskatchewan rural telephone companies sold bonds totalling $37,300. A list of the companies follow:—

Westbrook and Gladwin, Jedburgh, $5,200, 15 years, 8 per cent; Little Manitou, Watrous, $3,700, 15 years, 8 per cent; Pelly, Pelly, $1,200, 15 years, 8 per cent.; Garden Valley, Outlook, $4,000, 15 years, 8 per cent.; Ivanhoe, Moosomin, $4,500, 15 years, 8 per cent.; Hume, $4,000, 15 years, 8 per cent.; Regal, Swift Current, $5,800, 15 years, 8 per cent; Swift Current Rural Telephone Company, Swift Current, $1,700, 15 years, 8 per cent; Hanson Rural Telephone Company, Lajord, $2,000, 15 years, 8 per cent.; Froude Rural Telephone Company, Froude, $1,000, 15 years, 8 per cent; Dalrymple Rural Telephone Company, Cupar, $4,200, 15 years, 8 per cent.

◆

Hilaire Belloc estimates total cost of first 100 days of war at $4,128,000,000, apportioning expense as follows:—England, $468,000,000; France, $660,000,000; Russia, $700,000,000; Germany, $1,250,000; Austria, $600,000,000; Belgium, $100,000,000; Japan, $250,000,000; Servia, $100,000,000.

A memorandum has been received at Ottawa from the Imperial government calling the attention of insurance companies to an announcement issued by the British board of trade warning such companies against the business of insuring cargoes in neutral vessels from capture. It is pointed out that the insurance or reinsurance of cargoes by British companies of cargoes of neutral ships against capture or detention by his Majesty's government or allied governments, is prohibited by the law of England

DUTIES OF INSURANCE SUPERINTENDENTS

Mr. A. E. Fisher Shows What the Provincial Government is Doing in Saskatchewan—Bane of Unlicensed Companies

Taken as a whole the duties of the Saskatchewan superintendent of insurance are threefold:—First, his duty to the province by virtue of the Insurance Act; secondly, a duty to all citizens of Saskatchewan to see that their rights are respected and safeguarded; thirdly, a duty to the licensed companies and the agents to see that they have that protection which should be accorded companies and agents that comply with the intent and spirit of the law, suggests Mr. A. E. Fisher, Saskatchewan's energetic insurance superintendent.

From the increasing number of requests for information and advice regarding insurance, there is no doubt but that the citizens of the province are beginning more and more to appreciate the fact that the insurance branch will render them service. During the year numerous complaints covering unsatisfactory settlements and claims have been presented to the superintendent. In some cases the companies have been at fault, but the indifference of the assured to the requirements of the adjusters has resulted in settlements being delayed in a great many instances. In almost every case just settlements to all parties interested have been arranged and numerous controversies and much consequent litigation been avoided.

Unlicensed Contracts are Null and Void.

The regulation of unlicensed insurance is a question that vitally concerns all insurance departments. This refers to all classes of unlicensed insurance. It is surprising that some of our citizens and good business men continue to patronize the unlicensed concerns. Their contracts are null and void under our laws, and are not enforceable in our courts. Parties placing insurance in such companies have the following conditions to contend with:—First, the difficulty in case of any loss which may occur as the policyholder is without recourse to the courts of the province to secure his rights, and of necessity must resort to the home state of any such company; secondly, the insurance branch, having no jurisdiction, would be unable to assist the assured in any way. The operation of the Saskatchewan act will tend to lessen the amount of unlicensed insurance, there being no discrimination between insurers by its terms.

The act requires that each and every person, firm or corporation representing an insurance company must have a certificate of authority from the superintendent. Up to the date of this report 1,630 certificates have been issued.

Started Last Year.

The Saskatchewan Insurance Act, which became operative on February 15, 1914, brought all classes of insurance under the supervision of the superintendent of insurance, whereas the Saskatchewan Fire Insurance Act of 1912, under which the insurance branch operated in 1913, dealt with fire insurance companies only.

In 1913 there were 87 fire insurance companies operating in the province.

Under "An Act respecting Hail Insurance," 13 companies transacted the business of hail insurance, their operations having been placed under the superintendent's supervision by order in council

One hundred and sixty one companies have been licensed under the new act, classified as follows: Fire insurance companies, 83; life insurance companies, 32; hail insurance companies, 6; plate glass insurance companies, 3; accident insurance companies, 26; mutual fire insurance companies, 7; fraternal societies, 4; Dominion licensees, 134; provincial licensees, 27. In many cases companies have taken out supplementary licenses.

Withdrawals from Province.

Up to June this year the following companies, operating in Saskatchewan, have withdrawn from the province:—Western Union Fire Insurance Company, policies reinsured with the Pacific Coast Fire Insurance Company, Vancouver, B.C.; Winnipeg Fire Insurance Company, policies reinsured with the Nova Scotia Fire Insurance Company, Halifax, N.S.; Nova Scotia Fire Insurance Company, policies reinsured with the Home Insurance Company of New York; Saskatchewan Insurance Company, policies reinsured with the Central Canada Insurance Company, Brandon, Man.; Alberta-Canadian Insurance Company, policies reinsured with the Central Canada Insurance Company, Brandon, Man.; Security National Fire Insurance Company, policies reinsured with the British Northwestern Fire Insurance Company, Winnipeg; Sovereign Fire Insurance Company, policies reinsured with the Phœnix of Hartford; Union Life Assurance Company, in liquidation, policies reinsured with the Metropolitan Life of New York; Ontario Fire Insurance Company, in liquidation; Rimouski Fire Insurance Company, in liquidation; British Columbia Accident and Employers' Liability Insurance Company, withdrawn; Factories Insurance Company, withdrawn.

The following companies have withdrawn the deposits made with the government under the Saskatchewan Fire Insurance Act: Imperial Underwriters, secured Dominion license; Winnipeg Fire Insurance Company, reinsured; Alberta Canadian Insurance Company, reinsured; Security National Fire Insurance Company, reinsured; Saskatchewan Insurance Company, reinsured; Western Union Fire Insurance Company, reinsured.

MONTREAL TRAMWAYS PROPOSAL

Mayor Martin's recommendations to the Montreal board of control in reference to the franchise of the Montreal Tramways Company are, in brief, as below:—

Twenty-two year extension of present franchise to be granted to the Montreal Tramways Company. All existing franchises in Montreal to be surrendered on signing of new traffic agreement. City to pay cost of constructing all subways, and company to pay city rental for same over contract period of ten years or longer.

Tramways Company to widen at own expense Vitre Street between St. Denis Street and Victoria Square. Tramways Company to widen at own expense St. Antoine Street between Convent and De Courcelles Street. Tramways Company to expropriate Mount Royal Incline Railway. Company to double-track single line on St. Antoine Street.

City to grant exclusive autobus contract to company in five years if present autobus franchise granted for ten years is not taken up. Company to cede city sufficient land to extend Notre Dame Street from St. Remi (Cote St. Paul Road) to Rockfield Road, Montreal West. Company to cede city land between St. James Street and St. Clothilde Church in Turcot village for a public park. Fares on subways to be five cents; on all surface lines, regular eight workmen's and ten school children's tickets for 25 cents.

Company to double-track its line on St. Lawrence Boulevard from Canadian Pacific Railway tracks to the Riviere des Prairies. Company to double-track line on Cote des Nieges Road from Cemetery entrance to existing line on Queen Mary Road, and from St. Dominique Street, via Isabeau Street and St. Lawrence Boulevard to Cremazie Road. Company to complete double-tracking on Notre Dame Street east to eastern limits of the city. Company to construct double line from Papineau Avenue, via Rosemount Boulevard to St. Michel Road. Company to double-track line from Centre Street, via Atwater, St. Patrick, Duberger, Gladstone and Archibald to Church Avenue. Company to establish Tramways service on Boyce Street, between Maisonneuve and Tetreaultville, as soon as city shall have opened the street named.

New lines after subways under or bridges overhead railways have been constructed from Wellington Street, via Charlevoix and Atwater, to St. James Street. Company to extend Davidson Street line from Ontario to Notre Dame Street. Company to extend line from Ahuntsic Station to Val[illegible] Street, via some new street approximately parallel with Gouin Boulevard. Company to connect Glen line with St. Antoine Street via De Courcelles Street, to Notre Dame Street. Company to pay city $12,000 for watering of tracked streets. Company to defray one-half cost of snow removal from tracked streets.

◆

Think of the men, day and night in the trenches, helping to keep [illegible] going; then help yourself a little.

The report of Canada's dairy and cold storage commissioner for the fiscal year ending March 31st, 1914, deals with the progress of dairying, the expanding home market, the export trade, the importation of New Zealand butter, and the work of the Finch and Brome Dairy stations, of the extension of markets division, of the fruit division and of the division of cold storage. Copies of the report are available upon application to the publications branch, department of agriculture, Ottawa.

A SAFE INVESTMENT

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

DOING BUSINESS AS USUAL—WHY WE SHOULD TRY

Some Further Facts, Figures and Cheerful Sentiment, Cited for the Benefit of Occasional Wavering Faith in a Great Country

"I AFFIRM that of all the countries in the world, Canada to-day occupies the best position," said Sir George Foster, addressing the Toronto board of trade. "I say it for several reasons, which I will briefly give you. In the first place, we are contributing men and money to the war. But though we are doing that, we are absolutely at peace within our own borders and there is no wastage on the field, there is no wastage in the factory, there is no wastage anywhere which makes it necessary that one single stroke less of work in the Dominion of Canada shall be done from this time henceforth than has been done in Canada.

"Canada is strong, too, because it is the country, the great country par excellence, where primary products and natural resources constitute the strength of her position and the great source of her wealth; $432,000,000 of products of Canada were exported last year. Think over what they were of the field, of the forest, our agricultural products in the way of meats, dairy products, stock, everything of that kind; our mines, our timber, our fisheries these are the great products that made up all but $44,000,000 of the $432,000,000 of exports. Do not you see the strength of Canada's position is that the vast proportion of what she has to sell is what she makes up on primary products and from her natural resources? The roar of cannon and carnage of war may run riot in Old Europe, but in Canada not an echo of artillery, not a shadow of the darkness of war, makes it essential or necessary or probable that Canada's natural resources of primary products will thereby be diminished during the coming year and the next year. In fact, if it is possible at all to feel satisfaction that war is going on or, to put it better, some satisfaction whilst war is going on, and despite it—it is that Canada will be called upon to fill the vacuum and repair the damages made by the waste and destruction of war; and her primary products in nearly all particulars will be greater in demand and higher in price than they have been during the past year. So I say that in this respect Canada occupies a favored position. In truth, to compare her with other countries, I come to the conclusion—and I believe it is a wise and proper conclusion—that to-day her position in this respect is better than that of any country outside of the region of war."

AS USUAL, SAY PAPER MEN

Officials of Canada's leading pulp and paper mills inform *The Monetary Times* that with satisfactory demand and prices prevailing, they are working at full capacity and selling the output as manufactured. Future export conditions are not easily gauged owing to the difficulties arising from the European war. The various companies have replied to the inquiry as follows:—

Laurentide Company.—The mills are working at full capacity; but there seems to be considerable uncertainty in the market due to unforeseeable conditions in the export market.

Spanish River Pulp and Paper Mills.—All the mills are working at full capacity and the demand is keen at the present time.

Riordon Pulp and Paper Company, Limited. The mills are working as usual at full capacity. The demand is normal and prices a little better.

Wayagamack Pulp and Paper Company.—Ever since the mill commenced working the company has been operating at full capacity, which is about 50 tons paper and 50 tons pulp per day.

Abitibi Power and Paper Company.—The mills are working at full capacity. The demand is normal and the company has been able to sell the entire output as fast as made.

Economy does not mean that debts must not be paid.

LIBERTY, JUSTICE AND HONOR

What, then, is Canada's immediate duty? It stands clear as the morning sun above the prairie rim. The Empire stands to-day for liberty, justice, honor among nations as among men, and Canada stands with the Empire for these. It is no longer a question of a colony giving support to the motherland. We have gone far past that. It is a question of whether Canada shall stand with the free nations who believe in government by free choice, justice among nations, honor in international relations, and with her last man and her last dollar [illegible] things that determine a nation's character and its future happiness. I repeat that it is no longer a question of aiding the motherland in a fight for national or Empire existence. Canada is herself a nation with a proud sense of nationhood. Canada's future is involved in this conflict, and with every instinct of her national soul and with every throb of her national life she hates and opposes the spirit, the ideals, the methods for which the German Kaiser with his Prussian Junkertum is now so desperately contending.—Ralph Connor.

Every man can help crush Kaiserism by trying at least to do business as usual.

BANK CLEARINGS BETTER

Canadian bank clearings for October were the best of any since the war started.

Stick to business now. It is one of the best ways to stay in business after the war.

STOCK SHIPMENTS ARE LARGE

Two hundred carloads of cattle and sheep left the Lethbridge division of the Canadian Pacific Railway last week. Local experts are optimistic as to the future of the livestock industry in southern Alberta, and believe the heavy shipments noted above are but a fore-runner of what may be expected when the farmers realize the full significance of the industry.

There are many good reasons for optimism.

OVER A MILLION FOR SHIRTMAKERS

The Imperial government has placed orders with Canadian shirtmakers for 1,000,000 shirts. The aggregate order is valued at about $1,[illegible].

[illegible] bad after 100 days of war, and there's good [illegible] for business.

Bank of Hamilton

Dividend Notice

Notice is hereby given that a Dividend of Three per cent. (Twelve per cent. per annum) on the Paid-up Capital of the Bank, for the quarter ending 30th November, has this day been declared, and that the same will be payable at the Bank and its Branches on 1st December next.

The Transfer Books will be closed from 23rd to 30th November, both days inclusive.

By Order of the Board.

J. P. BELL,
General Manager.

TORONTO BRANCH—A. B. PATTERSON, Manager

REPLACING GERMAN MANUFACTURES

The first cargo of Dominion Steel Corporation products on the way consists of wire rods, wire nails and billets. It is expected to be first of a continuous shipment of Sydney products to replace German manufactures, cables "Windermere" from London.

Colonel Pelletier, agent general for Quebec, informs this correspondent that a Belgian spinner who recently advertised in Montreal papers for a factory site, is about to visit Canadian municipalities who replied offering a tax free site and other inducements. Cables have been received from Drummondville, and a point six miles from Montreal.

We are all feeling the pinch but not as much as the enemy is and will.

BIG PLANT REOPENS

The Massey-Harris Company's plant at Brantford, which closed the day after war was declared, throwing 1,200 men out of work, is reopening, employing 800 men five days a week. The Toronto plant will also take on more hands.

Don't get mad because you have to work for a living now.

ANOTHER BIG CONTRACT LET

The Grand Trunk Pacific has entered into contracts with Messrs. Carter-Halls-Aldinger Company for the construction of terminal buildings at Prince George, Endako, Smithers and Pacific, four of the company's divisional points.

The banks are granting reasonable accommodation for business purposes to all those whose financial position entitles them to it.

PACIFIC OUTLET FOR WESTERN WHEAT

Several tenders have been received by the government for the erection, at Vancouver, of a storage and transfer elevator. The elevator will be of the same plan and construction as those erected at other points in the west, and the same system of grading and handling grain will be put into effect as followed at Port Arthur.

Tenders are to be in by November 30th, and work will start immediately afterwards so that the elevator will be in a position to handle next year's crop.

Mr. C. Birkett, secretary of the board of grain commissioners, when writing on the subject of shipping wheat from Canada's Pacific ports, stated:—

"The market for Canadian grain via the Pacific coast is at present a very restricted one. It is either a coastwise trade or consists of small shipments to the Orient.

"It is hoped, and by many expected, that the opening of the Panama canal will lead to the shipment of Canadian grain in bulk to the United Kingdom, especially from Alberta and western Saskatchewan. It is also hoped by some that with the increase of flour consumption in Japan and China there will develop a considerable export of Canadian grain to those countries.

"The board of grain commissioners recommended the government to erect a transfer elevator on Burrard inlet, Vancouver, with a capacity of one million bushels, or slightly over, for the purpose of testing the Panama route and facilitating these expectations. The elevator will be operated by the commissioners and will be equipped, amongst other things, with a sacking apparatus. It is hoped, however, that in time grain will be shipped in bulk and the elevator will be designed with that in view.

"A terminal elevator is being built by the government for the commissioners at Calgary with 2½ million bushels storage capacity. The inspection of the grain shipped via the Pacific coast will be done at Calgary. There is a question, which only experience can solve, about the effect of the moisture upon grain shipped in bulk via the Panama canal. The commissioners believe that grain shipped via the Pacific coast should be thoroughly tested for moisture at Calgary and if necessary dried there. As there is no closed season for navigation at Vancouver, it is less necessary to store the grain at the port."

Stop talking moratorium and pay your debts.

MORE OF THE BRITISH SPIRIT

"Every woman here almost is knitting something for the soldiers or sailors. The people are doing all they can. The authorities have only to say what they need and in it rolls. Rich and poor are trying to do all they can. Blankets by the thousands and field glasses by the hundred are being sent in response to the request of the authorities. It is difficult sometimes to realize that the war is proceeding, as most things are normal here." Extract from English letter to *The Monetary Times*.

PROBLEM OF PAYING OUR DEBTS

The question of how Canada will meet her interest payments in London this year, now that the usual credits set up by our borrowings are cut off, has not received much attention publicly, writes Mr. R. D. Bell, of Messrs. Greenshields and Company, investment house, Montreal. While we have in this country a large stock of gold, considering the population, it is only enough to cover about one year's interest and maturities in London. There are no immediate pressing demands, however, and it is hoped that our rising exports and our necessarily declining imports will give us a large enough credit balance in the course of the next year to cover our obligations.

For the first time in the July and August period since Canada's present era of development started, we have registered an excess of exports. It amounted to about $4,000,000, and, as the crops had not begun to move, and the imports had not begun to be affected by war conditions, we can be certain of a very large credit balance in months to come. That it should reach as near as possible to the estimated $140,000,000 needed is a patriotic goal for which every citizen should strive, first by increasing our production as much as possible, and, second, by decreasing our imports through the purchase wherever possible of goods made in Canada.

◆

Cease criticizing the banks and try a little elbow grease.

TO WIND UP DOMINION OF CANADA TRUST

A compulsory winding-up order for the Dominion of Canada Trust Corporation, Limited, London, Eng., has been granted in the chancery division court, state London cables.

Affidavits presented to the court showed that by the nature of its investments the company was obviously unable to pay its debts in London. It was also shown that there was a complete deadlock in the management of the corporation's affairs, and the court granted the usual order.

The petition was presented by Mr. John Marvel, of the stock exchange, and it was announced that he had the support of the holders of 10,444 shares, while the holders of 19,933 shares had communicated a desire that compulsory proceedings be taken to bring the corporation's affairs to a finale.

The Dominion of Canada Trust Corporation, Limited, was incorporated in April, 1910, and of £240,000 shares of £1 each, there were 145,411 issued, in addition to which there was an issue of 100,000 deferred shares of £1 each outstanding.

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

EUROPE'S HOLDINGS OF AMERICAN STOCKS

Of 195 Companies, $544,000,000 or 8.4 Per Cent. of Their $6,484,000,000 Stock is Held Abroad

The largest amount of stock held in Europe of any company whose securities are listed on the New York Stock Exchange, is Canadian Pacific. By far the greater part of its $260,000,000 common and $78,225,000 preferred is held abroad. It is estimated that England alone holds about two thirds of the stock. Estimates place the amount of securities of the United States held in Europe at, at least, $5,500,000,000, and possibly over $6,000,000,000.

In order to classify these holdings as much as is possible, the Wall Street Journal has made inquiries of all the larger corporations of the United States as to the exact amount of their stock held across the water. Returns to date have been received from 195 companies whose stock held in Europe as of June 30, 1914, or the nearest available date thereto, totalled $543,976,518 of a total outstanding stock of $6,484,254,365, equal to 8.4 per cent.

Four Billions in Europe.

Europe's investment in railroads of the United States alone is placed at $4,000,000,000, of which approximately $3,000,000,000 is held in Great Britain. Analysis received thus far from the railroads giving the amount of their stock held abroad indicates European holdings of the stock of all the railroads to be in the neighborhood of 10 per cent. of the total issued. This accounts for but $600,000,000 of the $4,000,000,000, leaving $3,400,000,000 representing investment in American railroad bonds, equal to about one-third of all such bonds outstanding.

Liquidation preceding the closing of the exchange barely scratched the surface of Europe's enormous stake in the United States. It has been roughly estimated at $100,000,000, or less than 2 per cent. Foreign liquidation of Steel just before the close of the exchange was generally supposed to be of large proportions, but the company's stock books show a very small decrease of foreign holdings over that period. Total foreign holdings of Steel August 31, 1914, were $123,592,700 common and $31,010,800 preferred, a decrease of but 2½ per cent. for the combined stocks as compared with foreign holdings June 1, 1914. In St. Paul liquidation was proportionally greater, amounting to about $2,500,000, or 12.6 per cent. of foreign holdings.

Eliminated Weak Accounts.

Although this liquidation was but a very small percentage of the total holdings, it undoubtedly eliminated a large proportion of the weaker speculative accounts. The big question now is how much of an effect will the war have in shaking out investment holdings. Estimates have been made by the Stock Exchange governors as to how much foreign liquidation might be expected on the reopening of the exchange. The maximum estimate places it at over $500,000,000 for all securities, while it is admitted that the least that might be expected is $200,000,000.

If the Stock Exchange adopts the plan of reopening gradually under regulated trading, with internationally held shares temporarily suspended, there are many important stocks that could be so traded in, as their European holdings are but slight. The tobacco and express companies show little stock abroad. American Ice has no European stockholders. Other important corporations with little stock abroad are: American Sugar Refining, Central Leather, Atlantic Coast Line, New Haven, Seaboard Air Line, Brooklyn Rapid Transit, Corn Products Refining, Delaware and Hudson, National Lead, Nevada Consolidated, Westinghouse Electric, Buffalo, Rochester and Pittsburgh, Laclede Gas, St. Louis Southwestern, F. W. Woolworth and S. S. Kresge. Of course this list includes only such companies as have made public the amount of their stock abroad.

None of the former Standard Oil subsidiaries that have reported show any large amount of stock on the other side; in the majority of cases European holdings are less than [illegible] per cent.

Thirty-four public utility companies with a total outstanding capital stock of $[illegible] report $[illegible] held abroad, equal to [illegible] per cent. Of these 34 companies seven report no European stockholders of record.

United States Steel, as might be expected, shows the largest amount of stock held in Europe of those reporting, holdings of common June 30 being $122,404,500, or 21.1 per cent., and of the preferred $27,514,200, or 7.6 per cent. Pennsylvania is second with $74,490,442, or 14.9 per cent. abroad, and Southern Railway third with $62,852,400, or 34.9 per cent. Other large holdings are Great Northern, $38,127,500, or 16.57 per cent.; Kansas City Southern $22,205,500, or 43.5 per cent.; Cities Service $22,159,100, or 51.4 per cent.; American Smelters Securities $25,513,300, or 54.2 per cent.; New York Central $21,212,900, or 10.6 per cent.; St. Paul $17,185,400, or 7.3 per cent.; and American Telephone $12,479,900, or 3.6 per cent.

One hundred and twenty-three companies have reported their holdings on June 30, 1913, as well as on June 30, 1914. In the majority of cases the change shown is trifling, increases being the rule. Total amount of stock of these companies held in Europe, June 30, 1914, was $239,372,183, as against $217,177,395 June 30, 1913, an increase of $22,194,788, or 10.2 per cent.

The number of European stockholders in proportion to the amount of stock held abroad is in the case of many companies small. In this connection it must be remembered that many of these stockholders of record are banking and brokerage houses who represent perhaps hundreds of clients. Of the corporations that have given the number of European stockholders, Pennsylvania shows by far the largest with 11,822 foreign of a total of 90,114 stockholders, an average holding of 126 shares (par $50). Great Northern is second with 2,177, Eastman Kodak third with 1,560, and St. Paul fourth with 1,408. Kansas City Southern reports only 126, average holdings being 1,320 shares.

Number of Stockholders Increasing.

That stockholders of the corporations of the United States continue to steadily increase in numbers is amply illustrated by the 105 companies that have reported the total number of their stockholders. On June 30, 1914, these companies had 779,054 stockholders of record, as against 717,780 on June 30, 1913, an increase of 61,274, or 8.5 per cent. United States Steel reports the largest number with 128,098, of which 47,695 are holders of common stock and 80,403 holders of preferred stock. Pennsylvania is second with 90,114 and American Telephone third with 57,639.

The results of an exhaustive inquiry of *The Monetary Times* as to how Canadian stocks are held, will appear in *The Monetary Times Annual.*

◆

IMPORTANCE OF NICKEL OUTPUT

The importance of Canada's nickel mining industry may be more fully realized when it is considered that Canada produces over 80 per cent. of the world's output of nickel.

In 1913 the Canadian Copper Company's smelter at Copper Cliff, in the Sudbury district, treated 665,000 tons of ore, containing over 44,000,000 pounds of nickel, or about 90 per cent. of the total output of Canada. The nickel was recovered as matte and shipped to the United States for refining.

Pure nickel is employed in small amounts for a number of purposes because of its strength and durability and its white color, which resists tarnishing.

Though the importance of pure nickel is likely to grow, the chief use of the metal is in the production of alloys, particularly nickel steel, in which the greater part of the nickel now refined is employed.

Steel containing 2½ to 3½ per cent. of nickel has certain of its properties greatly improved, so that for many purposes it is replacing ordinary structural steel. Its value for armour plate has long been known, and the rivalry of the great maritime nations in the building of Dreadnoughts is one of the causes for the recent increased demand for nickel.

In [illegible] Canada exported 43,341,207 pounds of nickel, contained in ore or matte to the United States and 4,826,783 pounds to the United Kingdom.

MANY BRANCHES OF CONSERVATION WORK

Indications of Progress Achieved by Canada's Commission

Satisfactory progress of the conservation movement during the past year is indicated in the report of the Commission of Conservation.

The chairman of the commission, Hon. Clifford Sifton, in his annual address, covered the commission's activities with respect to waters and water-powers, minerals, public health, agriculture, fisheries and fur-bearing animals and forests, indicating clearly and succinctly a number of the problems that had been grappled with and the advances that had been made in their solution.

With respect to water-powers, lengthy reports are presented covering the work in connection with the water-power surveys carried out in Western Canada. Two volumes will be issued later giving the results of these surveys and will prove of great value to those who are interested in the development of the water-powers of Canada.

The commission's committee on minerals has been further strengthened by selecting as chairman, Dr. Frank D. Adams, of McGill University. Dr. Adams is an outstanding authority on the minerals of Canada, and his assistance will be of great value to the commission. The report contains an excellent review by Mr. W. J. Dick, mining engineer of the commission, on the "Importance of Bore-hole Records and the Capping of Gas Wells."

Public Health Problem.

Several aspects of the problems of public health are dealt with in the report by well-known authorities. Dr. Hodgetts in a brief address summarizes the work of the committee on public health, and, in addition, presents reports on such problems as "Infant Mortality," "First Aid to the Injured," and the work of the City-Planning Conferences held in Chicago and Boston in 1913. Mr. G. Frank Beer, president of the Toronto Housing Company, develops at some length the housing and city-planning question in Canada, with especial reference to the work of the Toronto Housing Company, and Col. J. H. Burland outlines the legislative requirements for town-planning.

The work of the committee on lands is described by Mr. F. C. Nunnick, the commission's agriculturist, who pays especial attention to the progress of the experiments with the growing of alfalfa in Quebec. Mr. Nunnick also describes in detail the commission's "Agricultural Survey" for 1913, showing in concise form the farming conditions in the several provinces as ascertained by the committee's investigators. Dr. James W. Robertson and Mr. John Fixter describe the work of the illustration farms of the commission.

Forest, Fur and Fishery.

Mr. J. Walter Jones follows in detail the progress in fur-farming in Canada during the past year. The work of the committee on fisheries was confined, during 1913, chiefly to the development of the oyster industry. Hon. A. E. Arsenault describes the new method of leasing oyster beds in Prince Edward Island. This method was advocated by the commission two years ago, and will do much to regenerate the oyster industry in the Maritime Provinces. An interesting paper on the "Protection of Migratory Birds" is given by a leading United States authority, Mr. W. S. Haskell, who urges Canada to join with the United States in providing sanctuaries for these birds.

Considerable advance has been made in the conservation of forests during the year. The commission has co-operated with the board of railway commissioners and the several provincial and federal forest services concerning the prevention of forest fires, with the result that much has been done to prevent forest fires along railway lines, especially in Western Canada. In addition to the report of the chief forester, Mr. Clyde Leavitt, there are addresses on forestry by Dr. B. E. Fernow and Mr. R. H. Campbell.

The report contains a number of illustrations and gives in concise form much information that is of value to all Canadians interested in the conservation of our natural resources.

Good baby bonds don't cry and they cause no trouble to those who adopt them.

BALANCE BETWEEN DOMINION AND STATES

Will the Gold Bars Cross the Border?—Interesting Exchange Situation

A noteworthy financial development recently has been the advance in New York exchange at Montreal. In the height of the monetary disturbance after the outbreak of war, and when it was impossible to get gold out of New York, Montreal exchange fell as low as 2 per cent. discount. Even until lately the discount stood at abnormal figures, notwithstanding the shipment of gold to Ottawa, which, of course, did not affect the Canadian banks as it went only to the credit of the Bank of England. During the last few days, however, Canadian exchange has risen and is now quoted at 3-64 of 1 per cent. premium.

This change in the rate is probably due to the fact that Canadian grain shipments are falling off, on account of the approach of winter, and, hence, there are not such large Canadian balances being created here.

Change in Trade Balance.

It denotes a change in the trade balance between the two countries which is not unwelcome at this time. If it goes higher, to 5-64 of 1 per cent. premium, it may mean gold shipments in this direction, although this is rather doubtful. Canadian banks are likely to hold on to their gold, just as we have been holding on to ours. The regular gold moving points do not always count in these days.

Now that the New York assay office has been stocked with a large amount of gold bars, especially brought on here from Denver by the government, there may be a resumption of the gold export movement, out of New York on a large scale.

May Ship More for Britain.

The decline in exchange lately has curtailed the shipment of gold coin across the border, but if gold bars are available, which they were not before, the shipping point is immediately lowered. Consequently it may be possible to ship some more of the metal to Ottawa for account of the Bank of England to meet maturing obligations.

The rather anomalous spectacle may then be witnessed of gold being shipped from here to Canada, while at the same time Montreal exchange on New York stands at the gold export point. Of course, the movement to Canada is in effect a movement to London, so that the two movements would not be extraordinary inasmuch as New York is frequently a pivotal point between Canada and London. Two years ago, for instance, we were importing gold from London and shipping it to Canada because Canadian capital was being supplied by Europe through New York.

◆

FARMERS ARE WANTED IN THE WEST

After the receipt of a handsome set of cut glass from the board of control of the International Irrigation Congress in recognition of his work as chairman of the board, Mr. J. S. Dennis in his reply said: "While in urban development we are in the van, in agriculture we are at the tail of the procession in western Canada.

"It does not seem possible to make Canada realize that upon what happens now depends our whole future. What good is it to have a highly developed city if we have nothing outside it. Let us fill up all the vacant areas with farmers.

"We have too many settlers on the land and too few farmers. There are tens of thousands of get-rich-quick artists who wish to clean up the money and then get away, but there are few men who have gone on the land to make a home and raise a family. The man who is going to make the greatest success is the man who goes on to a ready-made farm. We have only begun. We must go on till we can place on the territory east of Calgary thousands of farmers who will make happy and prosperous homes, and then the city will grow."

◆

"When the war is over" sounds pretty good.

The moratorium in Great Britain, the world's greatest lender, is at end, so Canada can well afford to stop talking about commencing moratoria.

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

DOMINION TRUST COMPANY'S POSITION

Official Statement Says Finances Are "Somewhat Involved"—Investigating Committee Appointed

"Somewhat involved," is how an official statement to the press, describes the finances of the Dominion Trust Company. The shareholders met at Vancouver on November 2 and the following report of the meeting was given to the newspapers:—

"A meeting of the shareholders of the Dominion Trust Company was held in the company's office at 2 o'clock for the purpose of considering the present state of the company's affairs. The president, Mr. W. H. P. Clubb, presided. A balance sheet as at October 10 was distributed among the shareholders and explained.

"It appeared that the liabilities to the public amount to $2,446,257.26, which includes depositors $934,885.82; trust and administration funds, $418,829.30; mortgage loan in process of completion, $196,239.77; and sum due to bank, $229,549.92. Against this there are assets of a book value of $5,063,749.10, which includes office premises, safe deposit vault, etc., $666,761.71; secured loans and mortgages, etc., $1,902,158.81; bonds and debentures, $346,145.64; shares in other companies, etc., $306,769.38; advances to estates, $551,486.89; owing by clients, insurance premiums, etc., $530,607.52.

Lack of Financial Help.

"The directors presented a report showing the steps they have taken in connection with the company's affairs following the death of the late managing director, Mr. W. R. Arnold. Owing to their being unable to get any promise of financial assistance, and owing to the short time at their disposal in which to make any arrangements, it had been decided to appoint Mr. C. G. Pennock as superintendent and to call for the stipulated notice in connection with the withdrawal of deposits. This, it was hoped, would give the company time to make the necessary financial arrangements, but the directors regretted to report that they were unable to arrange this in the short time at their disposal.

"Since Mr. Arnold's death investigation into the affairs of the company had been taking place, which shows that the finances of the company were somewhat involved. There were also a number of loans and other investments which had been severely criticized, but in regard to each it was in the meantime impossible to make any definite statement, as the auditors had not been able to complete their report.

Applications for Winding Up.

"Owing to the failure of the company to secure financial assistance, two applications have been made to the court for a winding-up order, and it was necessary for the shareholders to consider whether a creditor for a small sum should have control of the winding-up proceedings, or whether the shareholders, who had much larger interests at stake, should conduct these proceedings themselves in the event of no other satisfactory solution being found.

"Questions were asked by a number of the shareholders, and after some further explanations had been given it was resolved that application be made to the court for a winding up order on behalf of the shareholders, in order that their interests may be properly protected.

Shareholders' Committee Appointed.

"A committee of shareholders, consisting of Messrs. T. T. Langlois, William Savage, Robert McPherson, Jonathan Rogers and H. W. Levens, was appointed to investigate the company's affairs along with the directors, and to report at an adjourned meeting to be held on Friday afternoon [illegible] p.m." (November 6th.)

A despatch from Vancouver, dated November [illegible], says that Chief Justice Hunter decided, following a hearing which lasted nearly all day, to continue Mr. C. R. [illegible] as provisional liquidator for another month.

Sir Charles Hibbert Tupper appeared for Mr. A. [illegible], a French creditor for $130,000; Joseph Martin, M.P., and G. H. Cowan were counsel for depositor C. H. [illegible], who had already secured the appointment of Mr. [illegible] as provisional liquidator. The same counsel appeared for the Methodist Church which had $5,000 on deposit and [illegible] under covenants. Mr. Charles Wilson, K.C., wanted to [illegible] at $150,000 removed from the Dominion Trust, and an immediate accounting. Mr. W. B. A. Ritchie, K.C., appeared for the Dominion Trust directors. Sir Charles Tupper also represents Sir Gilbert Parker, who had $25,000 worth of stock and $15,000 on deposit. Mr. [illegible] Stewart, of Edinburgh, was also a client of Sir Charles, whose claim in this particular matter was $12,000.

Balance Sheet in October.

The following is the company's balance sheet as at October 10, 1914:—

Liabilities.

Capital authorized	$5,000,000.00
Capital subscribed	2,500,000.00

London Papers on Failure.

Discussing the failure, the London Globe says that it will cause considerable anxiety among the stockholders in England. There are circumstances surrounding the failure, it adds, which are not yet understood and fuller information will be desired by the investors in the United Kingdom. The London [illegible] weekly, Canada, expresses the hope that the British advisory committee will be composed of men of reputation and that a statement will be issued as soon as the facts are known.

CAPITALISTS AND THE OTHERS

Former Director of United States Mint Discusses Some Absorbing Problems

If it is admitted that all of the members of the community as consumers derive benefits from the increasing production of goods, let us now turn and see how much benefit the capitalist derives from owning the equipment, said Mr. George E. Roberts, formerly director of the United States Mint, in an address to the Farm Mortgage Brokers' Association, at Chicago. Can he absorb any benefits except in the same capacity—i.e., as a consumer? Evidently not. It is true that he will probably consume on a larger scale than his employee. He may live in a larger house, keep an automobile, travel abroad and spend more on his table and in many other ways. But these expenditures, representing consumption, include the only part of his income that is devoted to himself. All the rest of it is added to the investment fund, in which it is now agreed the entire community is interested.

Ownership Represents Real Distribution.

If this statement is correct, whenever a person reaches the position where his income is permanently above his personal and family expenditures, all additions to it go to benefit the public. This, of course, is provided the surplus is invested for productive use and its proceeds reinvested continually in the same manner. There is no escape from this conclusion after the admission is made that the public does share in the benefits of the investment fund, for if the owner continually returns his share of the fund's earnings nobody but the public draws from it.

It appears then that if we wish to measure the actual division of gains accruing in the last hundred years, as between capitalists and the rest of the community, a wholly different basis must be adopted from the one commonly used. The entire industrial plant that has been built up in this time must be left out of the calculation. This plant is permanent, except as it is from time to time replaced, and is of no use to anybody except as it produces a flow of benefits.

All of the values of the plant come out in this flow, hence it is the division of the flow that should be measured. The idea that all of the capital invested in the modern industrial plant has been taken away from the public and appropriated by the owners to their own exclusive use is a chimera. The truth is that the plant is devoted to public use, in supplying public wants, as truly as if owned by the State, although the private owners have a first claim on the net product for what they want to consume themselves. The rest of the product goes to the public, either directly in articles of consumption or in additions to the equipment for production.

Expenditures for Construction.

When this is seen the division which troubles so many good people takes on a very different aspect. They have been thinking about an equalized division of all income, including what now goes into the investment fund. But if all profits were distributed for current consumption the enlargement and improvement of the industrial plant would stop and progress come to an end. If society is to go on perfecting its control over the forces of nature, and constantly increasing the flow of desirable things, as it has been doing in the last hundred years, it must continue its expenditures for experiment and construction. Even if the State owned all of the industries it would have to do the same.

Steadily Toward Equality.

Notwithstanding much said to the contrary, the natural development of society is steadily toward equality. There are inherent and unseen forces that work everlastingly to this end. The leaders and organizers who are effective in enlarging production come, by virtue of their functions, into control of the productive machinery, but they consume an insignificant portion of the product. The rest goes to the public, by one route or the other. If they seem to apportion, and in some instances do apportion, too small a share directly to their employees in wages, the remainder goes into the investment fund and creates a new demand for wages and a new supply of products, thus strengthening the employee's position both as a wage-earner and as a consumer. What is withheld from the wage-earning class at one point is thus restored to it at another. Individuals, in instances, may not have justice, but the broad movement is beyond control.

Natural laws never have taken much account of individuals, but it should be remembered that as individuals we have all benefited by the labors of those who have gone before us, and if the fruits of some of our own labors escape us and are passed on to our children it is only an equalization of benefits. We are glad to work for our children, and it is reassuring to know that what one generation fails to divide and consume becomes capital for the generation that follows. With capital increasing faster than population, and production increasing faster than population, the race is constantly lifted to higher levels of life and opportunity. The new man, the child born into the world to-day, has a higher and more commanding position and possesses in his own faculties the equivalent of greater wealth than the child of any other year since the world began.

Kind of Equality Desired.

So far as ownership of the industrial plant is concerned the public is chiefly interested that the management shall be intelligent and efficient, and that the flow shall be as large as possible. As the general standard of living rises, and as all of the people come into the enjoyment and appreciation of new opportunities for culture and development, the way will be open for a broad approach toward equality in those mental and moral traits that make men efficient and successful, and that fit them for responsibility.

This is the kind of equality toward which, let us hope, the race is moving, and as it makes progress the question of equality in the ownership of property will take care of itself. The mistake of the critics is in thinking that conditions are fixed and permanent except as they can laboriously change them, whereas society is in process of evolution by its own natural forces.

DOMINION GOVERNMENT WANTS NO MIDDLEMEN

The Dominion Government will not allow any alleged middlemen to represent themselves as able to secure army contracts. So says Sir George Foster, who adds:—

"It has come to the Government's knowledge that several persons in the United States, and chiefly in New York, are representing themselves as official buyers of army supplies for the Canadian Government or as purchasers for or advisers of the representatives of the British and allied Governments who may be buying in the United States, and are so purchasing and advising by the official sanction and authority of the Canadian Government.

"Last week representatives of three important firms in New York came to Ottawa to see me to ascertain the truth of the statements made by some of these persons who had approached them for business, and, needless to say, on the basis of a fat commission to be paid on the amount of the order. These persons are doing much harm, not only in confusing reputable firms and raising prices, but in spreading the impression that crooked dealing is being carried on by Canadian Government representatives.

"I desire to say that no one has any authority from the Canadian Government to represent himself as having been authorized to buy for the Government or as having been authorized by the Canadian Government to buy for the account of the British or allied Governments, nor to act as adviser or helper of any representative of such Governments. These people are making a nuisance of themselves and injuring the reputation of Canada, and all honest dealers should give them a wide berth. The names of some of these are being sought by the Government and will from time to time be published as they are obtained and, if possible, be dealt with under the law."

These are the times that confidence counts.

The Redcliff Knitting Mills, of Redcliff, Alta., organized by Dr. Bonnar, is to be added to the list of working industries of Redcliff early next year. The knitting mills will commence work at that time on a large order of woolen socks for the British government. Arrangements have been made with the town for water supply and gas extensions, which will be ready when the machinery arrives.

British Columbia

Contains 252,800,000 acres of rich farm and fruit lands, timber, mineral and coal lands, which railroads now building will open up to settlers and investors.

We specialize on British Columbia Investments, and can tell you about opportunities to GET IN AT THE BEGINNING in town lots, townsite subdivisions or farm, timber, mineral, coal lands and water powers, wholesale or retail.

LINKING PRODUCER WITH FOREIGN BUYER

Need of Intermediary Connection to Supplement Efforts of Department of Trade and Commerce

Editor, *The Monetary Times*:—

The work done by the minister of trade and commerce and his department, in collecting and distributing statistics showing the quantity, value and kind of materials imported by the countries where we have trade commissioners, demonstrates that there are many markets for materials which Canada is especially equipped to supply, in quantities that can only be limited by her capacity for production.

Sir George E. Foster, on several occasions, has drawn attention to the want of co-operation, by Canadian producers, with his department's efforts towards the building up of an export trade. Several of the trade commissioners, in their reports to the department, state that it is only by having direct representation that we can hope to build up a Canadian export trade on a permanent basis.

That Canadians desire and will be benefited by larger markets for their products admits of neither doubt nor discussion. The question therefore is, how can full advantage be taken of the good work being done by the department of trade and commerce?

Between Producer and Buyer.

The answer is by the organization of an institution that will form a connecting link between the Canadian producer and foreign buyer, supplying the former with a collective selling service, in foreign fields, equal to that received from their individual representatives in the home markets and for payments here against shipments. While for the buyer there will be provided such credits as their financial and commercial responsibilities entitle them to.

This result will be brought about by sending men to the different countries, who not only have a thorough knowledge of the said countries and speak its language, but by education, tact and experience are able to meet and associate with leaders in all walks of life. Such qualifications are essential, especially in Spanish speaking countries, where friendship and social relations count for so much in securing business.

How To Supply Demand.

From the operations of this institution there would be created such a demand for "Made in Canada" goods, that the cry will be, not where we can sell, but how to supply the demand.

This institution will, by providing foreign markets for Canadian products, do for the Canadian producer in these foreign markets what the "national policy" has done for him in the home market.

It is with a full appreciation of the benefits that have accrued to Canada through the working of that policy, that I most earnestly urge upon our leaders in all walks of life to give this suggestion their most serious consideration, and if it appeals to them as it does to the writer, as a means of turning to good and practical account the work done by Sir George E. Foster and his department, they will not rest contented until it is put into active operation, on such a sound financial and commercial basis that Canada will be able to take full advantage of the opportunities which now present themselves.

Yours faithfully,

William Johnson

◆

GRAIN GROWERS' PROFITS

A net profit of $151,08[illegible] on the year's operations of the Grain Growers' Grain Company, being approximately [illegible] per cent, was announced at the annual meeting by President [illegible]. A 10 per cent dividend was declared and the balance placed in the reserve fund. During the year the company handled thirty million bushels of grain. The Manitoba Government elevators handled by the company showed a profit for the first time of over four thousand dollars.

ALBERTA LIFE AGENTS' LICENSES

Edmonton Life Underwriters' Association was recently addressed by Mr. R. L. Nicholson, Superintendent of Insurance for the Province of Alberta, who explained the sections of the amended Alberta Insurance Act dealing with life insurance.

Following the lead of Saskatchewan insurance legislation, all life agents, whether full time or part-time, must, after the first of January, 1915, be licensed by the Alberta Insurance Department. The annual fee for life men is $3.

President Edgett was in the chair. The secretary of the association is Mr. Ernest Reynolds, Canada Life Company.

October 13—Alice Hubbs, 75 Jackson Street. Brick sheds in rear. Value, $230. Insurance, $75. Loss $154. Cause unknown.

CANADIAN SECURITIES IN LONDON

An announcement is being published in London, says a Canadian Associated Press message, that holders of Ontario and Quebec stock, upon which £30 has already been paid, may close their liability by accepting stock to the value of £26.

In various quarters the opinion has been expressed that the time is ripe for new issues, and that they would likely meet with favor. It is questionable though if this is a very sound view of the position of the money market. Potential borrowers from the Dominion will, without doubt, receive advice to wait longer.

The British Government itself is expected to be in the market towards the end of the year with a huge loan, probably £[illegible]. Nobody knows what this will be floated at, but a [illegible]-year loan is talked about. Until this is out of the way other borrowers will have to wait.

It is gratifying to find in the case of the recent Dominion [illegible] per cent. loan that the public have bought so freely of scrip since the closing of the Stock Exchange that original subscribers have been able to reduce their indebtedness to a sum which they can meet without inconvenience.

No indulgence is now asked for over this loan. There are [illegible] popular issues on which calls are outstanding, the issuing houses of which may possibly follow the example of the South Indian Railways directors, who have acknowledged the difficulty by giving subscribers the option of taking up such amount as they have already paid for without continuing their obligation to pay for the balance.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Car and Foundry Company.—The directors have decided to defer payment on the company's $7,000,000 preference stock, due on October 25th. The common stock dividend, which is usually declared at the annual meeting held early in December, will not likely be paid.

Humphrey's Underwear, Limited.—This company tells *The Monetary Times* that the six months' dividend, maturing on September 30th, was paid the first week in October. The preferred dividend paid is seven per cent. cumulative. The company has preferred stock, issued and paid-up, $200,000, and common stock, $200,000.

Canadian Sardine Company.—The Bank of Nova Scotia has foreclosed the mortgage on the company's property at St. Andrew's, N.B. This company was incorporated in 1911. It has $500,000 common and $543,250 preferred stock outstanding. There is also a bond issue of $300,000 deposited as collateral for loans. In May this year a receiver was appointed at the request of the bondholders.

Canadian Pacific Railway Company.—The directors of the Canadian Pacific Railway Company have declared a dividend of two and one-half per cent. on the common stock for the quarter ended September 30th last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from special income account, was declared payable January 2nd next to shareholders of record at 3 p.m. on December 1st next.

Royal Trust Company.—At the annual meeting of the Royal Trust Company the yearly report was presented and the board of directors re-elected. The business of the year was considered satisfactory.

The board of directors and officers were re-elected as follows:—H. V. Meredith, president; Sir William C. Van Horne, vice-president; Sir H. Montagu Allan, Messrs. R. B. Angus, A. Baumgarten, A. D. Braithwaite, H. R. Drummond, C. B. Gordon, Sir Lomer Gouin, E. B. Greenshields, C. R. Hosmer, Sir W. C. Macdonald, Hon. R. MacKay, David Morrice, Sir T. G. Shaughnessy, Sir Frederick Williams-Taylor, and Mr. A. E. Holt, manager.

Hollinger Mines, Limited.—The statement of the Hollinger Gold Mines, Limited, for the four weeks' period ending October 7th shows gross profits of $149,798. The Hollinger surplus is now in excess of $1,100.00. The average value of the ore treated during the four weeks' period ending October 7th was $13.54, which is a shade above the average for the present year. Owing to changes in the mill the tonnage treated fell slightly below the previous month. The failure in the power supply and other causes contributed to a temporary shutdown. Working costs during the month showed an increase because of the smaller tonnage treated. The general manager states that the mine continues to yield satisfactory results.

Chadwick Brass Company, Limited.—A meeting of the holders of the 6 per cent. first mortgage twenty five year sinking fund gold bonds of the Chadwick Brass Company, Limited, is to be held at Toronto on December 7th, to sanction a scheme of reconstruction, involving the transfer of the undertaking of the company to a new company and substituting for the bonds and fully paid 6 per cent. cumulative preference shares entitled to dividend as from 1st of January, 1915, at the rate of $100 in such shares for every $100 in bonds, the bondholders also to receive fully paid up common stock in such new company equal to 20 per cent. on their respective holdings of bonds and notes of the new company for interest up to January 1st, 1915.

Western Canada Investment Company, Limited.—The [illegible] revenue for the past year was £20,6[illegible], as against £20,-[illegible] in the preceding year, stated Mr. J. G. [illegible], C.M.G., at the company's [illegible] annual meeting. After paying management expenses, debenture interest, etc., the net revenue was [illegible], to which [illegible] added the balance brought forward, making [illegible] balance of £15,466. After deducting the preference dividend and paying an interim dividend on the ordinary shares at the rate of 7 per cent. per annum, the balance [illegible]. This it is proposed to utilize by writing £1,000 off preliminary expenses, reducing that item to £3,000, and in paying a final dividend on the ordinary shares, making the total dividend 7 per cent. for the year, as against 6 per cent. in the previous year. This enables £6,364 to be carried forward, and in addition, the company has a reserve fund of £4,000.

Quebec Central Railway.—The Quebec Central Railway, a subsidiary of the Canadian Pacific Railway, in its annual report for the ending of the fiscal year, June 30th, shows assets of $10,282,377. The cost of the main line extensions and equipment at June 30th was $9,382,871. The operating expenses came to $1,078,616; balance carried to net revenue account, $474,556. The liabilities, which are made up of share capital, $3,381,603; funded debt of $6,233,406; revenue balance, unexpended appropriations and reserves, reserve contingent fund, interest and dividends, due and accrued, amount to $10,282,377. The net revenue account shows $561,595.

The freight revenue came to $1,092,900, and the passenger revenue to $400,664; mails, $20,812, and express, etc., $38,795—the whole making $1,553,173.

The president of the company is Mr. D. McNicoll, and the vice-president, Mr. I. G. Ogden. Mr. J. H. Walsh is general manager, with headquarters at Sherbrooke.

San Antonio Irrigation Company.—A voluntary petition in bankruptcy against the San Antonio Land & Irrigation Company has been filed by the Empire Trust Company. The trust company is a trustee of the first mortgage. The liabilities are said to be over $9,000,000.

The San Antonio Land & Irrigation Company is a Pearson enterprise. It recently asked its bondholders to submit to the postponement of interest on $6,000,000 6 per cent. bonds for two years from May 1st, 1914. The company planned to build a large reservoir to store water for the irrigation of 60,000 acres near San Antonio, Texas. When the scheme was completed the district was visited by a drought. In addition to the bonds, the company has $8,000,000 of stock outstanding. The land is now held at $125 an acre, which is a lower price than that made at the time of the organization of the company. The value, however, is considered large enough to protect the holders of the bonds in any event.

Algoma Steel Corporation.—A meeting of the holders of five per cent. first and refunding mortgage bonds, and of the holders of the three-year gold notes of the Algoma Steel Corporation was held on Monday in London for the purpose of considering the proposal for the funding of two years' interest on the bonds and the notes, says a Canadian Associated Press dispatch. Mr. Stanley Boulter, who presided, said the company has suffered very severely through the war, and it was proposed that the interest on the bonds should be funded for two years. The output of that great concern had been restricted by no less than 50 per cent. President Taylor explained the position of the company with regard to the guarantee of interest given by the Lake Superior Corporation. He pointed out that that corporation was a large holder of stock in the Algoma Company, which was a fellow sufferer with the bondholders.

The committee, which was appointed to consider what steps should be taken, had done its best in the light of all the circumstances. Explaining the reason why they were unable to pay the interest on the debentures for the year prior to the war, which was a successful year, he pointed out that they had locked up at June 30th over £[illegible] in accounts receivable and that instead of having £120,000 in hard cash, as at the corresponding period, the former year they had only £10,000 in cash.

Quoting Sir Thomas Shaughnessy's hopeful statement of the Canadian outlook when peace is restored, President Taylor said the Canadian government had given them ample and adequate protection in the matter of steel rails, and that they [illegible] further. He said, in matter of structural steel, that the necessary legislation will come into effect when [illegible] to their satisfaction that we are able [illegible] demand from the railway development.

NEW INCORPORATIONS

Two Million Dollar Cement Organization—Total of Fifty-three Companies

Canada's new companies incorporated this week number 53. The head offices of these companies are located in five provinces. The total capitalization amounts to $7,161,000. The largest companies are:—

Calgary Petroleum Products, Limited, Calgary ..	$1,500,000
The Associated Cement Company (Canada), Limited, Victoria	2,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	15	$2,990,000
Alberta	16	2,293,000
Manitoba	2	45,000
Quebec	18	1,723,000
Prince Edward Island	2	110,000
	53	$7,161,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Camrose, Alta.—Camrose Curlers, Limited, $20,000.

Ferintosh, Alta.—Bonnieview Farm, Limited, $25,000.

Sooke, B.C.—Victoria Acreage (Canada), Limited, $20,000.

Pincher Creek, Alta.—Western Union Oil Company, Limited, $125,000.

South Lethbridge, B.C.—J. B. Turney and Company, Limited, $100,000.

Nanaimo, B.C.—The Nanaimo Dairy and Supply Company, Limited, $5,000.

Medicine Hat, Alta.—Prairie Lands, Limited, $50,000. Dauntless Townsite Company, Limited, $200,000.

Valleyfield, Que.—Chateau Salaberry, Limitée, $49,000. Jos. Frederick Rodrigue Leduc, Jos. Alfred Masson, Dolose Cardinal.

Victoriaville, Que.—Les Abattoira de Victoriaville Limitée, $40,000. Augusta Bourbeau, J. C. Thibeault, J. A. Beauchesne.

Winnipeg, Man.—Fort William Investments, Limited, $40,000. D. Wood, Jos. Le Comte, Paul Sala. Western Free Loan Association, $5,000. Morris Waisman, Max Lobanov, Max Barinisky.

Vancouver, B.C.—Fairview Grocery, Limited, $10,000. The Inland Securities, Limited, $100,000. Amalgamated Agencies, Limited, $50,000. Gageweigh Scale Truck Company, Limited, $300,000.

St. Hyacinthe, Que.—Saint Charles Canning Canning, Limited, $20,000. Elzéar Normendeau, Arthur Normendeau, Damien Normendeau. Rosetown Machine and Auto Company, Limited, Rosetown, Sask., $25,000.

Prince Edward Island.—The Ellerslie Silver Black Foxes, Limited, $80,000. Alfred England, Ellerslie, Louis Dystant. A. H. Locke Company, Limited, $30,000. Duncan A. McPhee, Arthur H. Locke, T. Waitê, Wm. R. Waite.

Edmonton, Alta.—The Ross McCaig Company, Limited, $2[illegible],000. Podnore Creameries, Limited, $60,000. Leamington Mansions, Limited, $100,000. Bert L. Perry, Limited, $10,000. The McManus Liquor Company, Limited, $50,000. Nozick, Limited, $30,000.

Calgary, Alta.—Calgary Petroleum Products, Limited, $1,500,000. George Allford, Percy Ralph Curti, John Mont[illegible] Bell. Imperial Dry Goods Company, Limited, $20,000. R[illegible]ions Realty, Limited, $[illegible],000. Piedmont Construction Company, $50,000. Canadian North West Mounted [illegible], $[illegible],000.

Victoria, B.C.—Island Fat Stock Products, Limited, $10,000. [illegible] Building Company, Limited, $[illegible]. Do[illegible], Limited, $200,000. The Associated Cement Company (Canada), Limited, $[illegible]. James Steller Lovell, William Bain, Robert [illegible]. Fort George Section 2614, Limited, $20,000. Majestic Theatre, Limited, $10,000. Central Hotel Company, Limited, $40,000. Illinois-Vancouver Timber Company, Limited, $25,000.

Montreal, Que.—Henders and Company, Limited, $50,000. Walter Herbert Henders, John Bodrug Berezowski. Lyons Cut Rate Drug Stores, Limited, $50,000. Dame Lea Jubinville, Herbert Henry Lyons, Adolphe Veilleux. Dominion Equity and Securities Company, Limited, $500,000. William Langley Bond, John Bicknell Johnson, Frederick Charles Orr. Canadian Underwriters Inspection Bureau, $25,000. Alfred William Hadril, Leonard Howgate, Charles Malcolm. New Land Company, Limited, $50,000. Jos. Masse, Chas. Valentine, Chas. Varin. Radnor Water Company, Limited, $100,000. John Wesley Blair, Francis Joseph Laverty, Charles Albert Hale. A. Laurion and Company, Limited, $50,000. Alderic Laurion, Alexandre Laurion, Alfred Lariviere. Canadian Tar Products Company, Limited, $500,000. Errol Malcolm McDougall, Gilbert Sutherland Stairs, Pierre Francois Casgrain. Chaleur Pulp and Lumber Company, Limited, $75,000. Howard Salter Ross, Eugene Real Angers, James Greig Robertson. Canadian Inspection and Testing Laboratories, Limited, $100,000. Height of Fashion Ladies Tailory, Limited, $20,000. Samuel Witts, Jr., Samuel Witts, Sr., Abraham Baron. Saint Charles House, $20,000. Télesphore Braid, Azilda Pelletier, Adolphe Pelletier. St. James Buffet, Limited, $20,000. Georges Brosseau, Annie Masse, Adélard Champoux. Grand Union Hotel, Limited, $20,000. Mrs. Maryann Murray, Miss Betha Ellen Murray, Miss Grace Margaret Murray.

Application is being made for letters patent for the following companies:—

St. John, N.B.—Morris Realty Company, Limited, $24,000. Alexander P. Barnhill, William A. Ewing, Charles F. Sanford.

Alberton, P.E.I.—Waltham Silver Black and Patch Fox Company, Limited, $70,000. Sydney W. Gray, Andrew W. Gray, H. E. Burns.

◆

There is business to be done and planned. Do and plan it now.

So far only six trust companies in British Columbia have registered under the new Trust Companies Act of the province, and but three of these—the Canadian Financiers Trust Company, the Dow Fraser Trust Company and the Westminster Trust Company—are entirely provincial in operation and ownership. The other three—the Guardian Trust Company, Limited, the Imperial Trust Company and the British Empire Trust Company—qualify as extra-provincial companies, having their head offices outside of the province.

Cargoes of grain, especially going forward by way of the Panama Canal to New York and Europe from the northwest in the last three months, virtually equalled in volume cargoes going by way of Cape Horn for a like period last year, according to statistics published at San Francisco. Shipping from that port via the canal jumped from $1,376,000 in August to $4,248,000 in September and rose another million in October. New York got most of the cargoes, including wheat, barley, onions and prunes.

The Prudential Insurance Company, Newark, N.J., has just published a little booklet addressed to mothers and having entirely to do with the care of babies. It has been called "The Baby Book," and is replete with excellent advice and other useful information as to the health, feeding and physical and moral training of the new arrival in the household. The book is divided into chapters, each one prefaced by a clever drawing marking somewhat the various stages of infancy and early childhood. The cover is in several colors and of a very novel and original style, depicting, as it does, two roly poly, bare-bodied tots seated on a flower-strewn mound with a couple of newspapers before them from which they are apparently deriving much enjoyment and satisfaction. On the whole the book is one of the most attractive publications ever issued by the Prudential. An edition has been printed for general distribution and any one desiring a copy can secure the same by writing to the home office of the company at Newark, N.J., or by making request to the local Prudential agency in the town or city where they reside.

STEEL REPORT REFLECTS CONDITIONS

Net Earnings Declined—Dividend Position—Orders on Hand

The net earnings of the Dominion Steel Corporation for the six months ended September 30, were $694,084. This is after making deductions for depreciation, sinking funds, payment of fixed charges, etc. How the depression has hit the steel industry is illustrated by the fact that this company's earnings for the corresponding period last year, were $1,548,903. There is thus a decline in net earnings of $854,819, or 55 per cent. The company's consolidated profit and loss account for the six months ended September 30, is as follows:—

Net earnings, after deducting all manufacturing, selling and administrative expenses and special provisions against inventories and accounts receivable, but before charging provision for sinking funds and depreciation and interest ..		$2,106,771
Deduct—		
Provision for sinking funds, exhaustion of minerals and depreciation		484,704
		$1,622,066
Deduct also—		
Interest on bonds and loans	$853,290	
Proportion of discount on bonds and notes sold	74,691	
		927,982
Net earnings .		$ 694,084
Add—		
Balance at April 1, 1914 ..		796,907
		$1,490,991
Less—Dividends paid—		
On preference shares	$210,000	
On preferred stock of Coal Company ...	105,000	
		315,000
Balance September 30, 1914		$1,175,991

As to Dividends.

The Dominion Steel Corporation maintained the dividend on its preference stock and on the preferred stock of the Dominion Coal Company The preferred dividend of the Dominion Steel Company was deferred. The preferred dividend of the Steel Company was earned, though not paid. The preference and preferred dividends require $490,000 for a half-year, and earnings of $694,084 were sufficient therefore to have made all preferred stock payments, leaving a balance of $204,084. By withholding the preferred dividend of the Steel Company, the corporation was able to carry forward out of the half-year's earnings a sum of $379,084 to add to the previous balance at credit of profit and loss, bringing that account up to $1,175,991. More was added to profit and loss, therefore, than was paid in dividends. Had all the preferred dividends been paid, the balance remaining out of earnings, $204,084, would have been equal to about .65 of 1 per cent. earned on the $32,000,000 common, or at the rate of 1.3 per cent. for a year.

Orders on Hand.

As to the present business of the company, Mr. J. H. Plummer, president, says that a fair amount of export business has been received since the war broke out, but the demand for steel and steel products from countries other than Canada is not large. Construction work everywhere is at a low ebb. The company has a 10,000-ton rail order for New South Wales on its books which has not yet been filled. Under this contract delivery must be made before the end of the year, but the management is not sure that delivery will be accepted. Meanwhile it is awaiting orders regarding the matter. The rail mill has been shut for some time.

COMPANY INCORPORATION IN CANADA

Questions affecting incorporation and licensing of companies in Canada will come up before the privy council when the hearing of an appeal from the supreme court is taken. The privy council has recently given special leave to appeal. The appellants are the attorney-generals of all the provinces, the respondent being the Dominion attorney-general. The proceedings arose out of the reference to the supreme court by the governor-general of seven questions cited for decision. But in allowing leave to appeal the Lord Chancellor pointed out that the council would perhaps rule that they had already answered some of these questions, and might also refuse to answer others. Further questions regarding fire insurance contracts were also permitted to be included.

◆

At a recent committee meeting of the Belgian Relief Fund, which was held at the Montreal headquarters, it was decided to appropriate the sum of $125,000 for the purchase of food to be shipped to the stricken country as soon as a vessel can be chartered at Montreal.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Morris, Man.—This municipality may borrow $4,000 for drainage work.

Hillsburg, Man.—A by-law has been passed to issue $20,000 for good roads.

Whitby, Ont.—The issue of $80,000 6 per cent. sewer construction debentures has been passed by the council.

New Westminster, B.C.—The local improvement programme of the city involves the issuance of $140,485 5 per cent. 29-year debentures.

Montmarte Village, Sask.—An issue of $1,800 water and park, $875 rink, $325 purchase of lots, 8 per cent., 15 years debentures, has been sanctioned.

Penticton, B.C.—This municipality is providing a school site and building to cost $2,700. The debentures covering this are 6 per cent. and mature in ten years.

Theodore Village, Sask.—This village is spending $1,000 on water, roads and drainage. The debentures for this purpose bear 7 per cent. interest and mature in fifteen years.

Saskatoon, Sask.—The civic authorities are hoping that the Bank of Montreal may make a further advance on capital account and so obviate the necessity of selling bonds locally, as suggested by some citizens.

Richmond District, B.C.—The recent financial arrangements of the district include $40,000 5 per cent. 40-year waterworks debentures, $40,000 5 per cent. 40-year dyking debentures, and $25,400 5 per cent. 40-year dyking debentures.

Saskatchewan School Districts.—The following have been authorized to issue 8 per cent. 10-year debentures: North Regina, No. 3313, $1,000; Red Cross, No. 3245, $2,000; West Lawn, No. 3132, $2,200; Mullingar, No. 2014, $700; Broadacre, No. 3087, $2,000.

Port Alberni, B.C. By-laws 53-8 will authorize the following expenditures: Street improvements, $10,000; municipal buildings, $7,500; electric light extension, $10,000, and bridge, $6,000, the debentures to bear 6 per cent. interest, and their maturity, 10 and 20 years.

Verdun, Que.—The finance committee reports that the Bank of Hochelaga has agreed to advance the municipality $25,000 on the ordinary revenues of the corporation. The mayor and secretary-treasurer were authorized to sign forty unsold debentures to be deposited with the bank.

Calgary, Alta.—The mayor and Alderman Costello have been appointed a sub-committee to interview the Bank of Montreal in regard to the city's treasury notes falling due at the end of the year, and amounting to about $2,000,000. They will also report as to how the payment of the debenture interest falling due, amounting to $251,000 shall be met.

Burnaby, B.C.—Burnaby has secured a loan of $200,000 from the Royal Bank of Canada. Reeve Fraser stated that this money was required to pay certain obligations of $101,000 for interest and sinking fund to meet issues of debentures and treasury notes. The other $100,000 would be used to pay the present loan at the bank. During the year, some $200,000 has been paid out for 1913 accounts, and that there was about $400,000 in unpaid taxes, and $60,000 in the bank.

Toronto, Ont. If the work of constructing the Bloor Street West car line from Dundas Street to Quebec Avenue is gone on with provincial legislation will be passed authorizing the issue of debentures for $150,000 to cover the cost of the work without a vote of the ratepayers. This is the information contained in a letter from Hon. W. H. Hearst, Prime Minister, to Mayor Hocken. The Premier intimated that in acceding to the city's request in this instance, the action of the government must not be taken as a precedent, and that all such expenditures should first be approved by the ratepayers.

Calgary, Alta. That the city should, by the issuance of long-term debentures at low rates of interest, raise enough capital to take care of its current expenses until the taxes are collected, as well as of its local improvement bonds and unsold ordinary debentures, was a proposal made by Mr. F. M. Harvey, manager of McIntosh and Hyde, auditors, before a Calgary audience. Mr. Harvey declared that the sinking fund and interest charges necessary to take care of these debentures would not amount to more than the ordinary charges on borrowing from the banks at high rates of interest, with the difference that in this way at the end of the debenture period the city would have the debentures paid for. Mr. Harvey further stated that the city was now short about $2,300,000. He estimated tax arrears at $1,250,000, the purchase of stores for which no funds were in sight at $300,000, and the loss of debenture sales of the past year's at around $750,000.

◆

DEBENTURES AWARDED

Manitoba and Saskatchewan School District Debentures.—$12,400 6 and 7½ per cent. 10 and 20 years, to Messrs. H. O'Hara and Company, Toronto.

New Imperial Rural Telephone Company (Saskatchewan).—$26,000 7½ per cent 15 instalment debentures to Messrs. H. O'Hara and Company, Toronto.

◆

ONTARIO TO MARKET ANOTHER LOAN

The Ontario government will market another loan of $1,000,000 in Canada. Its recent issue of $1,000,000 5 per cent. 5-year bonds was a marked success. They were sold rapidly, and applications were received from all parts of the province. The second issue will be of a similar nature and in denominations of $1,000. These securities can be thoroughly recommended as a sound and remunerative investment.

◆

COMPANIES LICENSED

The following companies have been licensed to do business in Ontario:

Marine Welding Company of New York. Capital $40,000. Harry Alexander, Incorporated, of New York. Capital $40,000. The Proctor and Gamble Manufacturing Company, of Ohio. Capital $100,000. American La France Fire Engine Company, of Canada, Limited (Dominion charter). Capital $50,000.

Right To Do Business Throughout Canada

PRIVY *Council Decision is of Great Importance to Companies who wish to Operate in all Provinces—Judicial Opinions as to the Respective Rights of the Provinces and the Dominion—Text of the Judgment in Full.*

REFERENCE has already been made in *The Monetary Times* as to the recent decision of the Privy Council, in what is commonly known as the companies act case. The judgment is one of great importance and may mean the beginning of a gradual change in and a more satisfactory position of company legislation in Canada generally. The case was of the John Deere Plow Company, Limited, appellants, versus Theodore F. Wharton, respondent, the same appellants versus Garnet W. Duck, respondent, and the Attorney-General for the Dominion of Canada and the Attorney-General for the Province of British Columbia, intervenants. There were present at the hearing the Lord Chancellor, Lord Moulton, Lord Sumner, Sir Charles Fitzpatrick and Sir Joshua Williams. In view of the significance of the case and of the widespread interest in it, the text of the judgment delivered by the Lord Chancellor is printed below. It says:—

There are consolidated appeals from judgments of the Supreme Court of British Columbia. The Attorney-General for the Dominion and the Attorney-General for the province have intervened.

By the first of the judgments the appellant company was restrained at the suit of the respondent Wharton from carrying on business in the province until the company should have become licensed under Part VI. of the British Columbia Companies Act. By the second judgment the appellant's action against the respondent Duck for goods sold and delivered was dismissed. The real question in both cases is one of importance. It concerns the distribution between the Dominion and the provincial legislatures of powers as regards incorporated companies.

The appellant is a company incorporated in 1907 by letters patent issued by the Secretary of State for Canada under the Companies Act of the Dominion. The letters patent purported to authorize it to carry on throughout Canada the business of a dealer in agricultural implements. It has been held by the court below that certain provisions of the British Columbia Companies Act have been validly enacted by the provincial legislature. These provisions prohibit companies which have not been incorporated under the law of the province from taking proceedings in the courts of the province in respect of contracts made within the province in the course of their business unless licensed under the Provincial Companies Act. They also impose penalties on a company and its agents if, not having obtained a license, it or they carry on the company's business in the province. The appellant was refused a license by the registrar. It was said that there was already a company registered in the province under the same name, and s. 16 of the provincial statute prohibits the grant of a license in such a case. The question which has to be determined is whether the legislation of the province which imposed these prohibitions was valid under the British North America Act.

The Companies Act of the Dominion provides by s. 5 that the Secretary of State may, by letters patent, grant a charter to any number of persons not less than five, constituting them and others who have become subscribers to a memorandum of agreement a body corporate and politic for any of the purposes or objects to which the legislative authority of the Parliament of Canada extends, with certain exceptions which do not affect the present case. The Interpretation Act of 1906, by s. 30, provides among other things, that words making any association or number of persons a corporation shall vest in such corporation power to sue and be sued, to contract by their corporate name, and to acquire and hold personal property for the purposes for which the corporation is created, and shall exempt individual members of the corporation from personal liability for its debts, obligations, or acts, if they do not violate the provisions of the Act incorporating them.

S. 10 of the Companies Act makes it a condition of the issue of the letters patent that the applicants shall satisfy the Secretary of State that the proposed name of the company is not the name of another known incorporated or unincorporated company, or one likely to be confounded with any such name, and s. 12 gives him large powers of interference as regards the corporate name. S. 29 provides that on incorporation the company is to be vested with, among other things, all the powers, privileges, and immunities requisite or incidental to the carrying on of its undertaking, as if it were incorporated by act of Parliament. S. 30 enacts that the company shall have an office in the city or town in which its chief place of business in Canada is situate, which shall be the legal domicile of the company in Canada, and that the company may establish such other offices and agencies elsewhere as it deems expedient. By s. 32 it is provided that the contract of an agent of the company made within his authority is to be binding on the company, and that no person acting as such agent shall be thereby subjected to individual liability.

Turning to the relevant provisions of the British Columbia Companies Act, these may be summarized as follows: An extra-provincial company means any duly incorporated company other than a company incorporated under the laws of the province or the former colonies of British Columbia and Vancouver Island (s. 2). Every such extra-provincial company having gain for its object must be licensed or registered under the law of the province, and no agent is to carry on its business until this has been done (s. 139). Such license or registration enables it to sue and to hold land in the province (s. 141). An extra-provincial company, if duly incorporated by the laws of, among other authorities the Dominion, and if duly authorized by its charter and regulations to carry out or effect any of the purposes or objects to which the legislative authority of the provincial legislature extends, may obtain from the registrar a license to carry on business within the province on complying with the provisions of the act and paying the proper fees (s. 152). If such a company carries on business without a license it is liable to penalties (s. 167), and the agents who act for it are similarly made liable, and the company cannot sue in the courts of the province in respect of contracts made within the province (s. 168). The registrar may refuse a license when the name of the company is identical with or resembling that by which a company, society, or firm in existence is carrying on business, or has been incorporated, licensed, or registered, or when the registrar is of opinion that the name is calculated to deceive, or disapproves of it for any other reason (s. 18).

The Company's Powers.

The charter of the appellant company was granted under the seal of the Secretary of State of the Dominion in 1907. It purported, as already stated, to confer power to carry on throughout the Dominion of Canada and elsewhere the business of a dealer in agricultural implements and cognate business, and to acquire real and personal property. It is not in dispute that it was an extra-provincial company, having gain for its object. The chief place of business was to be Winnipeg. The registrar refused, as has been mentioned, to grant a license under the provincial act to the appellant company. The power of the registrar is not challenged, if the sections of the provincial statute under which he proceeded were validly enacted.

Points to be Decided.

What Their Lordships have to decide is whether it was competent to the province to legislate so as to interfere with the carrying on of the business in the province of a Dominion company under the circumstances stated.

The distribution of powers under the British North America Act, the interpretation of which is raised by this appeal, has been often discussed before the Judicial Committee and the tribunals of Canada, and certain principles are now well settled. The general power conferred on the Dominion by s. 91 to make laws for the peace, order and good government of Canada extends in terms only to matters not coming within the classes of subjects assigned by the act exclusively to the legislatures of the provinces. But if the subject matter falls within any of the heads of s. 92, it becomes necessary to see whether it also falls within any of the enumerated heads of s. 91, for if so, by the concluding words of that section, it is excluded from the powers conferred by s. 92.

Before proceeding to consider the question whether the provisions already referred to of the British Columbia Companies Act, imposing restrictions on the operations of a Dominion company which has failed to obtain a provincial license, are valid, it is necessary to realize the relation to each other of ss. 91 and 92 and the character of the expressions used in them. The language of these sections and of the various heads which they contain obviously cannot be construed as having been intended to embody the exact disjunctions of a perfect logical scheme. The draftsman had to work on the terms of a political agreement, terms which were mainly to be sought for in the resolutions passed at Quebec in October, 1864. To these resolutions and the sections founded on them the remark applies which was made by this board about the Australian Commonwealth Act in a recent case (Attorney-General for the Commonwealth versus Colonial Sugar Refining Company, 1914, A.C. 254), that if there is at points obscurity in language, this may be taken to be due, not to uncertainty about general principle, but to that difficulty in obtaining ready agreement about phrases which attends the drafting of legislative measures by large assemblages. It may be added that the form in which provisions in terms overlapping each other have been placed side by side shows that those who passed the Confederation Act intended to leave the working out and interpretation of these provisions to practice and to judicial decision.

Exhaustive Definitions Unwise.

The structure of ss. 91 and 92 and the degree to which the connotation of the expressions used overlaps render it, in their Lordships' opinion, unwise on this or any other occasion to attempt exhaustive definitions of the meaning and scope of these expressions. Such definitions, in the case of language used under the conditions in which a constitution such as that under consideration was framed, must almost certainly miscarry. It is in many cases only by confining decisions to concrete questions which have actually arisen in circumstances the whole of which are before the tribunal that injustice to future suitors can be avoided. Their Lordships adhere to what was said by Sir Montague Smith in delivering the judgment of the Judicial Committee in Citizens Insurance Company versus Parsons (7 A.C., at p. 109) to the effect that in discharging the difficult duty of arriving at a reasonable and practical construction of the language of the sections, so as to reconcile the respective powers they contain and give effect to them all, it is the wise course to decide each case which arises without entering more largely upon an interpretation of the statute than is necessary for the decision of the particular question in hand.

The wisdom of adhering to this rule appears to their Lordships to be of especial importance when putting a construction on the scope of the words "civil rights" in particular cases. An abstract logical definition of their scope is not only, having regard to the context of the 91st and 92nd sections of the act, impracticable, but is certain, if attempted, to cause embarrassment and possible injustice in future cases. It must be borne in mind, in construing the two sections, that matters which in a special aspect and for a particular purpose may fall within one of them may in a different aspect and for a different purpose fall within the other. In such cases the nature and scope of the legislative attempt of the Dominion or the province, as the case may be, have to be examined with reference to the actual facts if it is to be possible to determine under which set of powers it falls in substance and in reality. This may not be difficult to determine in actual and concrete cases. But it may well be impossible to give abstract answers to general questions as to the meaning of the words, or to lay down any interpretation based on their literal scope apart from their context.

Turning to the appeal before them, the first observation which their Lordships desire to make is that the power of the provincial legislature to make laws in relation to matters coming within the class of subjects forming No. 11 of s. 92, the incorporation of companies with provincial objects, cannot extend to a company such as the appellant company, the objects of which are not provincial. Nor is this defect of power aided by the power given by No. 13, "Property and Civil Rights." Unless these two heads are read disjunctively the limitation in No. 11 would be nugatory. The expression, "civil rights in the province" is a very wide one, extending, if interpreted literally, to much of the field of the other heads of s. 92 and also to much of the field of s. 91. But the expression cannot be so interpreted, and it must be regarded as excluding cases expressly dealt with elsewhere in the two sections, notwithstanding the generality of the words. If this be so, then the power of legislating with reference to the incorporation of companies with other than provincial objects must belong exclusively to the Dominion Parliament, for the matter is one "not coming within the class of subjects assigned exclusively to the legislatures of the provinces" within the meaning of the initial words of s. 91, and may be properly regarded as a matter affecting the Dominion generally and covered by the expression "the peace, order and good government of Canada."

Their Lordships find themselves in agreement with the interpretation put by the Judicial Committee in Citizens' Insurance Company versus Parsons (7 A.C., at p. 112, 113), on head 2 of section 91, which confers exclusive power on the Dominion Parliament to make laws regulating trade. This head must, like the expression, "property and civil rights in the province," in s. 92, receive a limited interpretation. But they think that the power to regulate trade and commerce at all events enables the Parliament of Canada to prescribe to what extent the powers of companies the objects of which extend to the entire Dominion should be exercisable, and what limitations should be placed on such powers. For if it be established that the Dominion Parliament can create such companies, then it becomes a question of general interest throughout the Dominion in what fashion they should be permitted to trade. Their Lordships are therefore of opinion that the Parliament of Canada had power to enact the section relied on in this case in the Dominion Companies Act and the Interpretation Act. They do not desire to be understood as suggesting that because the status of a Dominion company enables it to trade in a province and thereby confers on it civil rights to some extent, the power to regulate trade and commerce can be exercised in such a way as to trench, in the case of such companies, on the exclusive jurisdiction of the provincial legislatures over civil rights in general.

No doubt this jurisdiction would conflict with that of the province if civil rights were to be read as an expression of unlimited scope. But, as has already been pointed out, the expression must be construed consistently with various powers conferred by ss. 91 and 92, which restrict its literal scope. It is enough for present purposes to say that the province cannot legislate so as to deprive a Dominion company of its status and powers. This does not mean that these powers can be exercised in contravention of the laws of the province restricting the rights of the public in the province generally. What it does mean is that the status and powers of a Dominion company as such cannot be destroyed by provincial legislation. This conclusion appears to their Lordships to be in full harmony with what was laid down by the board in Citizens' Insurance Company versus Parsons (7 A.C. 96); Colonial Building Association versus the Attorney-General for Quebec (9 A.C. 157), and Bank of Toronto versus Lambe (12 A.C. 575).

Not Question of Enactment.

It follows from these premises that those provisions of the Companies Act of British Columbia which are relied on in the present case as compelling the appellant company to obtain a provincial license of the kind about which the controversy has arisen, to be registered in the province as a condition of exercising its powers or of suing in the courts, are inoperative for these purposes. The question is not one of enactment of laws affecting the general public in the province and relating to civil rights, or taxation, or the administration of justice. It is in reality whether the province can interfere with the status and corporate capacity of a Dominion company in so far as that status and capacity carries with it powers conferred by the Parliament of Canada to carry on business in every part of the Dominion. Their Lordships are of opinion that this question must be answered in the negative.

In the course of the argument their Lordships gave consideration to the opinions delivered in 1913 by the judges of the Supreme Court of Canada in response to certain abstract questions on the extent of the powers which exist under the Confederation Act for the incorporation of companies in Canada. Two of these questions bear directly on the topics now under discussion. The sixth question was whether the legislature of a province has power to prohibit companies incorporated by the Parliament of Canada from carrying on business within the province in the absence of a license from its Government, if fees are required to be paid upon the issue of such license. The seventh question was whether the provincial legislature could restrict a company so incorporated for the purpose of trading throughout the whole Dominion in the exercise of the special trading powers so conferred, or could limit such exercise within the province. This question further raised the point whether a Dominion trading company was subject to provincial legislation limiting the business which corporations not incorporated under the legislation of the province could carry on, in their powers, or imposing conditions on the engaging in business by such corporations, or restricting a Dominion company otherwise in the exercise of its corporate powers or capacity.

Have Read With Care.

Their Lordships have read with care the opinions delivered by the members of the Supreme Court, and are impressed by the attention and research which the learned judges brought to bear, in the elaborate judgments given, on the difficult task imposed on them. But the task imposed was, in their Lordships' opinion, an impossible one, owing to the abstract character of the questions put. For the reasons already indicated, it is impracticable to attempt with safety definitions marking out logical disjunctions between the various powers conferred by the 91st and 92nd sections and between their various subheads inter se. Lines of demarcation have to be drawn in construing the application of the sections to actual concrete cases, as to each of which individually the courts have to determine on which side of a particular line the facts place them. But while in some cases it has proved, and may hereafter prove, possible to go further and to lay down a principle of general application, it results from what has been said about the language of the Confederation Act that this cannot be satisfactorily accomplished in the case of general questions such as those referred to. It is true that even when a company has been incorporated by the Dominion Government with powers to trade, it is not the less subject to provincial laws of general application enacted under the powers conferred by s. 92. Thus, notwithstanding that a Dominion company has capacity to hold land, it cannot refuse to obey the statutes of the province as to mortmain (Colonial Building Association versus Attorney-General of Quebec (9 A.C., 157, at p. 164); or escape the payment of taxes, even though these may assume the form of requiring, as the method of raising a revenue, a license to trade which affects a Dominion company in common with other companies (Bank of Toronto versus Lambe (12 A.C., 575). Again, such a company is subject to the powers of the province relating to property and civil rights under s. 92, for the regulation of contracts generally (Citizens' Insurance Company versus Parsons (7 A.C., 96).

This Task Unattempted.

To attempt to define a priori the full extent to which Dominion companies may be restrained in the exercise of their powers by the operation of this principle is a task which Their Lordships do not attempt. The duty which they have to discharge is to determine whether the provisions of the Provincial Companies Act already referred to can be relied on as justifying the judgments in the court below. In the opinion of their Lordships it was not within the power of the provincial legislature to enact these provisions in their present form. It might have been competent to that legislature to pass laws applying to companies without distinction, and requiring those that were not incorporated within the province to register for certain limited purposes, such as the furnishing of information. It might also have been competent to enact that any company which had not an office and assets within the province should, under a statute of general application regulating procedure, give security for costs. But Their Lordships think that the provisions in question must be taken to be of quite a different character, and to have been directed to interfering with the status of Dominion companies, and to preventing them from exercising the powers conferred on them by the Parliament of Canada, dealing with a matter which was not entrusted under s. 92 to the provincial legislature. The analogy of the decision of this board in Union Colliery Company versus Bryden (1899, A.C., 580) therefore applies. They are unable to place the limited construction upon the word "incorporation" occurring in that section which was contended for by the respondents and by the learned counsel who argued the case for the province. They think that the legislation in question really strikes at capacities which are the natural and logical consequences of the incorporation by the Dominion Government of companies with other than provincial objects.

The Final Words.

They will therefore humbly advise His Majesty that these appeals should be allowed, and that judgment should be entered for the appellant company in the action of Wharton versus The John Deere Plow Company with costs. The action by the company against the respondent Duck must, unless the parties come to an agreement, be remitted to the court below to be disposed of in accordance with the result of this appeal. As to the interveners, the Attorney-General of the Dominion and the Attorney-General of the province, there will be no order as regards costs. The respondents, Wharton and Duck, must pay the costs of the appellant company of this appeal, excepting so far as these have been increased by the interventions.

BANK BRANCHES OPENED AND CLOSED

During October fifteen branches of Canadian chartered banks were opened and eleven closed. Since January 1st, 1914, there have been 223 branches opened and 81 closed. Houston's Bank Directory gives the following particulars for October:—

Branches Opened 15

Barachois, Que.	La Banque Nationale.
Batiscan, Que.	Banque d' Hochelaga.
Beachville, Ont.	Merchants Bank of Canada.
Hamilton, Ont., Market Branch	Bank of Hamilton.
Kildare, Que.	La Banque Nationale.
Lyn, Ont.	Merchants Bank of Canada.
Montreal, Que., Cote des Neiges	Banque d' Hochelaga.
Purves, Man.	Northern Crown Bank.
St. Benoit, Que., Two Mountains	La Banque Nationale.
Ste. Famille, Que.	La Banque Nationale.
Ste. Leon de Standon, Que..	Banque d' Hochelaga.
Ste. Malachie, Que.	Banque d' Hochelaga.
St. Philemon, Que.	Banque d' Hochelaga.
Villeroy Richelieu, Que.	Banque d' Hochelaga.
Windsor, Ont.	Standard Bank of Canada.

Branches Closed 11

Calgary, Alta., Ogden Shops.	Bank of Montreal.
[illegible], Sask.	Merchants Bank of Canada.
[illegible], Sask.	Merchants Bank of Canada.
Hanna, Alta.	Merchants Bank of Canada.
Huntingdon, B.C.	Quebec Bank.
Maisonneuve, Que.	Imperial Bank of Canada.
New Port, Que.	La Banque Nationale.
Princeton, B.C.	Royal Bank of Canada.
Toronto, Ont., 40-46 King St. West	Metropolitan Bank.
Valcartier Military Camp, Que.	Union Bank of Canada.
Winnipeg, Man., Portage Ave.	Imperial Bank of Canada.

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of November 13, 1913; and November 12, 1914, with changes:

	Week ending Nov. 12, '14.	Week ending Nov. 13, '13.		Changes.
Montreal	$ 48,466,690	$ 60,156,451	—	$11,689,761
Toronto	36,891,429	44,282,469	—	7,391,040
Winnipeg	37,869,164	48,215,423	—	10,346,259
Vancouver	7,053,126	11,719,890	—	4,666,764
Calgary	3,749,453	5,767,339	—	2,017,886
Edmonton	2,432,023	4,651,165	—	2,219,142
Ottawa	4,132,354	4,270,040	—	137,686
Hamilton	2,637,677	3,260,240	—	622,563
Victoria	2,139,751	3,064,340	—	924,589
Quebec	3,465,444	3,704,217	—	238,773
Regina	2,222,795	3,559,706	—	1,336,911
Halifax	1,852,396	1,961,490	—	109,094
Saskatoon	1,225,681	2,340,423	—	1,114,742
London	1,618,152	1,685,321	—	67,169
St. John	1,520,929	1,485,975	+	34,954

A GOOD BANKER

With the death this week of Colonel D. R. Wilkie, president and general manager of the Imperial Bank, and president of the Canadian Bankers' Association, comes to the end a career of a type for which Canada is famous. Colonel Wilkie typified in the banking profession the opportunity in this country for young men "with something in them," to rise from the bottom of the ladder. At fifteen years of age he was in the ranks with many other junior bank clerks. At twenty, he became the manager of a country branch, six years later becoming head of a Toronto office. At twenty-eight, the organization of the Imperial Bank created an important position as general manager, which the then young Mr. Wilkie took. He had fixed ideas regarding banking methods, ideas which by some would be called ultra-conservative. A good measure of that quality in banking, however, is not only desirable, but very necessary. At sixty years of age, Mr. Wilkie became president of his bank, and a few years later president of the Canadian Bankers' Association. His death occurred in his sixty-seventh year.

As a banker, Mr. Wilkie's chief assets were caution, a good knowledge of banking, considerable experience in Western Canada, hard work, and an exceptionally large share of common sense. Those who did not know him were inclined to regard him as somewhat of an autocrat. This impression was dispelled upon acquaintance. While he had a great respect for conventionalities, he was always accessible and invariably willing to give his views or advice on banking or kindred subjects. Colonel Wilkie's death takes away a good citizen, a good banker, and the head of a good bank.

German firms are beginning to worry about the collection of their Canadian accounts, suggesting New York banks as a medium and forgetting there are some other debts to settle first.

FARM LIFE.

The report of the joint meeting of farmers and manufacturers confirms the contention of *The Monetary Times* that farm life is not sufficiently attractive.

"We are unanimously of the opinion that something should, something must be done to make life upon the farm more attractive in all its aspects," says the report. "If, as is generally admitted, agriculture lies at the very foundation of our national prosperity, it should be our duty, no less than our privilege, as Canadians to see that those who make this occupation their life work are surrounded by conditions that will make for their material welfare, their social happiness, and the proper education of their children."

Back-to-the-land is a necessary movement, but the city must help to solve the problems of the land and of the land worker.

The Dominion Trust inquiry must not have for a motto "Dead men tell no tales." Living men want to know something of the responsibilities of other living men.

OF THE WESTERN SITUATION

Matters in Western Canada are fairly good in these troublous times. It is gratifying to learn that, for the most part, country storekeepers in that part of the country are now doing business on a cash basis, circumstances having forced this excellent policy upon them. There is reason to think that it will be adopted as the proper policy for the future.

The fantastic claims of patriotic Canadians in various parts of the country to get all the western prairie into crop next year, have a family likeness to some western schemes for producing enormous bank, trust company or life insurance company funds by a few strokes of the pen and a couple of real estate operations. Our prairie lands cannot be suddenly broken up. They must be cultivated in a proper manner. The increase of cultivation must, therefore, be gradual. The outstanding fact in the west is the splendid preparation made for next year's crop. Nothing to equal the present season has ever been observed in that country.

Collections next year in the west may prove better than is generally expected just now. The most serious problem for the farmer this year is feed for his stock. The shortage is chiefly in oats. Other grains can thrive in dry weather but the heat was too great for the oat crop. Some farmers are compelled to sell their stock on this account, while others will have to buy seed next year and that is always a costly method of farming.

The complaining borrower and the banker view it from different angles, that is all. But the difference makes safe the people's deposits.

CASH AND CREDIT

From Halifax comes to *The Monetary Times* a breezy communication as to the respective merits of cash and credit. Someone of the R. B. Seeton & Company is responsible for it and in a blunt way forces home some truths which Canada is beginning to recognize. The letter says that "the curse of the retail trade in this country is too much credit." Bringing the matter down to the individual, it adds that "everyone should settle their bills at the end of the week for that week's groceries." Even with "good-pays," no one should get credit for longer than thirty days at the outside, according to the Seeton authority. As to the things responsible for this "ruinous credit system," three are mentioned particularly—the dealer giving too much credit, the automobile and the purchase of stock in questionable new companies. Regarding the third reason, it seems that the Halifax man has several certificates of preferred stock in certain companies which he now regards as good only for "pasting up the cracks in window sashes or a hen house for the winter."

Whatever the reasons are, and there will be difference of opinion on that point, the fact remains that credit is too common in Canada. Every business man here has had enough experience in "notes" during the past few years to last him a life time. As a nation, we must cultivate a more wholesome respect for cash payments. Paper has its place; cash has, too. After the war cash will come nearer its proper position in Canadian business. Incidentally, not paying one's just debts during war time is not business, no matter who advises that it is.

◆

Mr. W. F. Maclean, M.P., and Mr. Joseph Martin, M.P., are peeved with the banks. "There is nothing in Canada good enough for them to lend money on," said Mr. Martin recently. But neither Mr. Martin nor Mr. Maclean have as yet submitted themselves as security.

UNLICENSED INSURANCE

The velvet-gloved manner in which Canada handles unauthorized insurance is in strong contrast to the treatment of the question by many of the United States state insurance commissioners. The superintendent for Maine, for instance, tells us that from time to time the agents of Maine are supplied with circulars from agencies outside of the state offering to take care of fire insurance on property in Maine which is not acceptable to authorized companies or offering to place insurance on other property at rates below those fixed by the licensed companies. The general tenor of these circulars and the liberal rates offered should be sufficient reason to prevent any cautious person from considering them seriously or to expect for a moment that any indemnity such agencies might provide can be reliable.

"Of course," says the superintendent, "no agent familiar with the facts will for a moment consider acting as agent for any unauthorized company. Our statutes also prohibit an agent from acting in any such way by [illegible] penalty for any person who solicits, receives or [illegible] application for insurance to any company [illegible] being duly licensed. The statutes, section 66, [illegible] R. S., further provide that 'an insurance agent shall be personally liable on all contracts of insurance unlawfully made by or through him, directly or indirectly, for or in behalf of any company not authorized to do business in the state.'"

Canada is not sufficiently strict with insurance raiders who come to this country, write what business they can, and poke fun at a law which winks in its sleep at them. Insurance companies doing business in this country should be licensed and should recognize the insurance department. If not, they should be put and kept out. Political and business reasons cannot get away from the fact although they seem able to wriggle around it.

Until the sinking of the Emden made the Cocos Islands famous, it was chiefly noted as the place where the gallant Captain Hackett was to search for hidden treasure with the help of Vancouver investors' savings, an incident leading to the captain going after *The Monetary Times* because it went after him. The captain's scheme was sunk some thousands of miles from the Cocos Islands.

CANADIAN BONDS IN TURKEY

When the facts and figures were being gathered for "Capital Investments in Canada," a volume published by *The Monetary Times*, it was learned that Canadian railway and government securities had found their way to Turkey. One bank at Constantinople had purchased $3,000,000 of these bonds. This was done, we were told, with a view to diversifying the investments of the bank in question. It was suspected, and we may say so now, that a German directed this particular investment. The introduction of capital in Turkey has been rather jealously watched. A few years ago the German foreign office commenced an inquiry regarding certain concessions in Asia Minor long in negotiation between the Turkish government and Rear-Admiral Colby M. Chester, United States Navy, retired. The admiral represented, it was said, a group of United States financial interests. Baron Marschall Bieberstein, then the German ambassador at Constantinople, represented to the Porte that for the Turkish government to grant these concessions would be to controvert the mining law agreed upon by the Porte and the European ambassadors. The representations of the German diplomats appear to have been made at the instance of the Anatolian Railway Company, which is financed largely by the Deutsche Bank.

The entrance of United States capital to Turkey was regarded with suspicion, particularly by German, and to a lesser degree perhaps by French and British interests already there. The Turkish government seemed inclined to encourage investments from United States, as they might have tended to relieve it somewhat of diplomatic pressure [illegible] questions of finance.

Going back to the $3,000,000 invested in [illegible] investments [illegible] other countries. [illegible] agreed with Punch who [illegible] as good as his bond.

SAVINGS DEPARTMENT

Interest allowed on deposits at all Branches of Bank from date of Deposit

INSTRUCTIONS TO INSURANCE COMPANIES

Department of Insurance Issues Circulars as to Reinsurance in Unlicensed Companies and Securities Valuation

The department of insurance, Ottawa, has issued several important circulars to insurance companies. Respecting reinsurance in unlicensed companies, Superintendent Finlayson says:—

"In the annual statements of Canadian fire insurance companies made to the department, the reserve on business reinsured in unlicensed treaty companies has heretofore been allowed as a deduction from the total reserve, but the companies have, as a rule, made arrangements with their reinsuring companies for the retention of a sufficient percentage of the reinsurance premiums to cover the reserve. In many cases, however, there have appeared in these statements unpaid losses due from such reinsuring companies to the Canadian companies which have not been similarly covered by assets in Canada, and as in many cases, these balances of unpaid losses have proved to be worthless or of little value owing to the weakness or insolvency of the reinsuring companies, the department believes that the time has arrived when no credit should be given for unpaid losses or reserve in respect of such unlicensed reinsurance unless covered fully by assets of the reinsuring companies.

"The department therefore proposes to allow in its annual report for 1914, and thereafter, credit for unpaid losses due from, and reserve on business reinsured in, such unlicensed companies, only to the extent to which such losses and reserve are covered by premiums or securities of the reinsuring companies retained by the Canadian companies and under their sole control. Such assets will be treated as first making provision for unpaid losses and the balance as providing for a reduction pro tanto from the gross reserve."

As to the valuation of securities on December 31st, 1914, the insurance superintendent says:—

"The department last year had an independent expert valuation made of all bonds, debentures and stocks owned by insurance companies and included in their annual statements made to this department, and it was the intention to have a similar valuation made at the end of the current and succeeding years.

"The outbreak of the European war, however, and the consequent closing of the stock exchanges and general demoralization of the security markets, have rendered such a valuation impracticable. At the present time there can be said to be no market values for the great majority of the securities held by insurance companies, but it cannot be said that these conditions are indicative of a change, likely to be permanent, in the interest return to be hereafter yielded by the respective classes of investment.

"As the conditions differ in this respect from those prevailing a year ago, and as the values then obtained are believed to be no higher than those which, judging from the trend of values during the first six months of the year, would, but for the outbreak of war, have prevailed at the end of this year, the department will, for the purpose of its annual report as at December 31st, 1914, value government and municipal securities held on December 31st, 1913, at the rates used at the last mentioned date. For such securities purchased since December 31st, 1913, the purchase prices exclusive of accrued interest will be allowed.

"For other securities, such as stocks and industrial and railway bonds, the foregoing rule will in general be followed, but it will be necessary to specially investigate the values of certain of these securities which have suffered obvious intrinsic depreciation during the year.

"In the lists of securities prepared for the purpose of the annual statements at the end of the year, the purchases made during the year should be shown separately or otherwise clearly indicated.

"The department hopes to be able to send to each company, within a few days after the first of the year, a pamphlet containing the entire list of securities held by insurance companies in Canada, together with the values which will be allowed for the purpose of the department's report."

Mr. Finlayson also asks that insurance companies should [illegible] with him in securing earlier publication of the annual insurance blue book.

BRITISH COLUMBIA PERMANENT LOAN DEPOSITS

The deposits of the British Columbia Permanent Loan Company, of Vancouver, have been handed to the local banks in Vancouver and Victoria for safe keeping. This action was considered advisable and was taken by the directors "owing to local conditions following the Dominion Trust failure." The company has made a bond issue to secure necessary funds and Mr. F. D. Macdonald, the manager, states that it is considerably strengthened by the change.

COLONEL WILKIE AND THE MINT

The late Mr. Wilkie was one of the few prominent bankers who supported the Ottawa Mint in its early days, when there was, elsewhere, a certain feeling of jealousy towards it, now, it is hoped, overcome. To support the Mint was a patriotic duty, as he constantly said and wrote. In the annual reports of the Imperial Bank, the services of the Ottawa Mint had generous recognition. His defence of the Mint before the Banking Commission on April 23, 1913, was typically vigorous. "You believe in a Canadian Mint?" he was asked. "I do," was the reply, "I believe that anyone who does not believe in a Canadian Mint is wanting in a national spirit."

Dr. Bonar, deputy master of the Mint, says that he and his staff felt towards Colonel Wilkie an almost personal gratitude, for, besides aiding them in every way open to him, he was a frequent visitor, full of interest in the buildings and equipment; he was an attractive character, and a man of high abilities and refinement.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 6th:—

Peterson Lake Silver Mining Company, 61,620; Trethewey Silver Mining Company, 53,510; Mining Corporation of Canada, 64,670; McKinley-Darragh-Savage Mine, 174,410; La Rose Mine, 170,020; Coniagas Mines, Limited, 242,570; Chambers Ferland Mine, 117,240; Mining Corporation of Canada (Cobalt Lake Mine), 63,730. Total, 948,670 pounds, or 474 tons. The total shipment since January 1st, 1914, is now 31,788,163 pounds, or 15,894 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 13th:—

J. F. Hickling, 4,600; Mining Corporation of Canada, 87,440; Pennsylvania Canadian Mines, 92,780; Crown Reserve, 41,400; Trethewey Silver Cobalt Mine, 55,540. Total, 281,760 pounds, or 140 tons. The total shipment since January 1st, 1914, is 32,069,023 pounds, or 16,034 tons.

Week ended November 13th:

New Liskeard

Casey Cobalt Mining Company, Limited, 56,490 pounds, or 28 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

◆

Discussing the causes of the war, the Wall Street Journal says: "[illegible] the question is closed. The act was [illegible] If the plea of military necessity had been valid, it was no better than the plea of the burglar who robs your house because he needs the money, and claims his [illegible] where you have none justifies the act. [illegible] to discuss this is like pointing out to [illegible] of a nation, and the reason why it [illegible] the final answer. But I want to. [illegible] freedom, will never get the [illegible]"

NOTED BANKER PASSES AWAY

Colonel D. R. Wilkie, Head of Imperial Bank and Bankers' Association Died at Toronto

Colonel D. R. Wilkie, president and general manager of the Imperial Bank, and president of the Canadian Bankers' Association, died in Toronto on Tuesday, at the age of 67 years. Mr. Wilkie was born in Quebec in 1846, of Scottish parentage. He was educated at the high school and Morin College, Quebec. In 1862 he entered the Quebec Bank, and became manager of a branch of that institution in St. Catharines in 1867. He came to Toronto in 1872, as manager of the Quebec Bank in this city, and in 1875 he became manager of the newly-founded Imperial Bank of Canada. Since 1906 he was president of this bank.

He had been vice-president and president of the Canadian Bankers' Association, president of the Toronto board of trade, president of St. Andrew's Society, and president of the Niagara Falls Suspension Bridge Company. At the time of his death he was a director of the Confederation Life Assurance Company, Toronto General Trusts Corporation, the General Accident, Fire and Life Assurance Corporation, and several other similar organizations.

THE LATE COLONEL D. R. WILKIE.

He was prominently identified with the establishment of the branch of the Royal Mint in Canada, and an advocate of a Canadian gold coinage. He was the author of a treatise on "The Theory and Practice of Banking in Canada," and numerous addresses and papers on banking. During the "Trent" affair he served in the volunteer militia, and received a medal for his services. In 1911 he was elected honorary president of the Canadian Art Club. He was a member of the York, Toronto Golf and National Clubs of Toronto, the Mount Royal Club, Montreal, and the Union Club, London, England.

Mr. Wilkie had been a widower since 1887. His two sons are serving in the British army.

Speaking of Mr. Wilkie's death, Sir Frederick Williams-Taylor says: "As president of the Bankers' Association, he occupied an outstanding position, and played his part, rendered particularly important by the outbreak of war. The [illegible] with which he administered the affairs of that great and sound financial institution, the Imperial Bank, is a monument to his energy, ability and good judgment."

"Colonel Wilkie had the most remarkable faculty of re-[illegible]," said Sir Edmund Walker. "He was as [illegible] [illegible] people both intellectually and physically, and [illegible] his enthusiasm and his capacity for the tasks which came to his hand. He was, of course, recognized [illegible] as one of the ablest bankers that the country has produced, and his nomination last week to the presidency of the Canadian Bankers' Association indicated the feeling of that body towards him."

PERSONAL NOTES

Mr. J. M. McCutcheon, B.A., teacher of English at Stratford normal school, is the newly-appointed secretary of the Ontario Workmen's Compensation board.

Mr. M. E. Duncan, a vice-president of the Canadian Car and Foundry Company, has been elected a director of the Canadian Steel Foundries Company, one of the Canadian Car subsidiaries. Mr. Duncan succeeds the late Mr. James Reid Wilson on the board.

Mr. N. J. Black, a well-known and liked citizen of Winnipeg, has purchased the fire insurance business of the Royal Canadian Agencies, Limited, which recently went into voluntary liquidation. Mr. Black has a fire insurance, real estate and investment business.

Mr. D. H. Ross, one of the ablest of Canada's trade commissioners abroad, has sent an excellent report on Australian trade with the countries at war. It appears in the weekly report, dated November 16, of the department of trade. Mr. Ross has his headquarters at Melbourne

Sir Charles Johnston, Lord Mayor of London, has taken a seat upon the London boards of directors of the Western Assurance Company and of the British America Assurance Company. Both companies have been fortunate for many years past in having strong and influential directorates.

Mr. Fitz-James E. Browne, of the well-known Montreal real estate firm, the House of Browne, has been elected a member of the real estate board of New York. This is the largest real estate association in New York, and it is the first time this honor has been conferred on a Canadian.

Mr. William Murray, manager of the Canadian Bank of Commerce, whose death was recorded a few days ago at Vancouver, had been a banker in Vancouver since he first took charge of the Bank of British Columbia, which was later merged into the Canadian Bank of Commerce. Mr. Murray was born in Scotland.

Mr. Walter H. Cottingham, president of the Sherwin Williams Paint Company, tells the shareholders in his report that the English affiliated company succeeded in showing a gain in sales since August 1st to November 1st, due largely to capturing trade that formerly went to the enemy, and "we consider," he added, "the outlook for this branch of your business is satisfactory."

Mr. William McBride, M.A., managing director of the Metropolis Securities, Limited, of Winnipeg, and president, in 1912, of the Life Underwriters' Association, has been in bad company it seems, for on a recent round-the-world trip, he says that Carl Hans Lody, the famous German spy, became a companion during the voyage. Life underwriters are wondering the size of the policy that "Uncle Billy" suggested would be a good thing.

Mr. Arthur Allan, of the large wholesale hat and fur house, Toronto, tell *The Monetary Times*, that so far as hats are concerned, business is excellent and the travellers are doing well with spring orders. The furs trade is bad, not particularly because of the war, but largely because of the mild weather. Mr. Allan is optimistic and has faith in his country. He is one of the business and business-like men of Canada with whom it is a pleasure to talk.

Mr. W. G. Mitchell, barrister of Montreal, has been appointed provincial treasurer to replace the late Hon. P. S. G. MacKenzie. Mr. Mitchell, of the firm of Laflamme, Mitchell and [illegible], advocates, is a prominent member of the legal profession in Montreal. He was born at Danby, Quebec, and educated at the Montreal High School and McGill University, graduating with a B.C.L. degree from the law faculty of that university in 1901. He was called to the bar in the same year and began in Montreal with the firm of Messrs. Greenshields, Greenshields, Hecker and Mitchell. The partnership [illegible] two years and upon Mr. Mitchell withdrawing [illegible] the present firm was established. He was created a King's Counsel in 1912. In politics, Mr. Mitchell is a [illegible], and is to run as candidate in Richmond, [illegible].

BANK LOANS WERE UNNECESSARY

Husbanding Resources Put Toronto Paper Company in Good Position, Says President Waldie

The president, directors and shareholders of the Toronto Paper Manufacturing Company are benefiting now by the exercise of a cautious policy in the past. This is indicated in a frank statement of the company's affairs, just issued to the shareholders and signed on behalf of the board by Mr. R. S. Waldie, president. "We are conducting the affairs of this company with the strictest economy," he says, "and results for the current year to date are that we have more than earned our fixed charges; we have not borrowed any money; we have kept the mill running; we have not reduced wages, and we have not starved the plant. We, therefore, think the shareholders may regard the company's future with confidence, and our prosperity will be coincident with the prosperity of this whole country."

Did Not Have to Borrow.

After the quarterly dividend of 1½ per cent. was paid on April 15th, it became apparent that bad times were to be expected, and the directors decided to discontinue the dividend. Their action in that regard has since proved of value, as it saved the company from the necessity of applying for assistance to their bankers in a time of great financial stress.

"Up to the beginning of the war," says Mr. Waldie, "our operations may be described as satisfactory, in view of the conditions as they existed.

Position in the Trade.

"The war has upset all that stability which is so necessary and desirable in business. In our own case, it has caused a marked increase in the cost of many of our important raw materials, without a corresponding increase in the price of the finished paper—this latter no doubt owing to the general slackness of orders. When you hear or read of Canadian paper mills being rushed with orders owing to the war, you must understand this to mean only those mills which make news print paper.

"One encouraging feature to be noted at this time is that we find our people are becoming alive to the necessity of using, as much as possible, goods of home manufacture, and we expect you to do your share in this regard by insisting on paper made in Canada. This company makes book and magazine paper, writing and envelope paper, litho and ledger paper; in short the paper used in every day affairs. Although we do not supply the printer, except through the wholesale house, yet your inquiry to him will work back to the wholesaler who buys from the mill, and so help us."

BEER, TEA AND INCOMES

Great Britain Taxes Them for War Revenues—Details of Big Loan

Mr. Lloyd-George, the British chancellor, in the Imperial House on Tuesday proposed a duty of one halfpenny a glass on beer, an extra duty of three pence per pound on tea, and the doubling of the income tax, although this year this last would be collected only in respect of one-third of income, the greater part of the fiscal year having already elapsed. On unearned incomes he proposed that a man should contribute 1-48th of his income this year and 1-16th next year. In respect of earned incomes, the chancellor said a man would have to contribute 1-80th this year and 3-80th next year. All the resolutions covering these proposals for new taxation were passed by the Commons.

Big Block of Loan Taken.

The prospectus of a British war loan of £350,000,000 ($1,750,000,000) was issued on Tuesday afternoon. The loan will bear interest at 3½ per cent., will be issued at a price of 95, and will be redeemable at par on March 1, 1928.

Five hundred million dollars of the new British war loan of $1,125,000,000 already has been taken by one firm, it was announced by the chancellor of the exchequer.

The issue of the war loan would take the form of an inscribed stock or bearer bonds. The yield of the loan to the investor, allowing for redemption, would be exactly 4 per cent. The Bank of England had patriotically undertaken to give most important facilities in connection with the new loan. The bank, for three years, would be prepared to make advances against deposit or war stock, taken at the issue price, without collateral security, and at 1 per cent. below the market rate of interest.

In conclusion he appealed for support for the loan. He said it was a loan to help this country to fight this battle for her existence. Victory meant value and defeat meant depreciation. It was an excellent investment, because the credit of Great Britain was still the best in the world.

Canada and London Market.

Commenting on Britain's war loan, the London Daily Telegraph says:—

"With regard to the purposes, other than military, for which sums are being set aside, the most welcome will be the loans to Belgium and Servia, and to those dominions of the Crown which in normal times turn to the London money market with the certainty of borrowing at a rate considerably more favorable than they could obtain elsewhere. The decision thus to ensure the continued development of the Empire's resources overseas is eminently wise, and involves no charge upon the exchequer in the long run."

Discussing the statement that out of the new issue, £30,250,000 would be for the use of the self-governing dominions in order to obviate the necessity of their coming into the London market for loans, a Canadian Associated Press message says:—

Waiting for the Issue.

This news will certainly be received with the greatest gratification in Canada. There have been several inquiries from the Dominion during the last few months as to the possibility of raising loans in the London market, at the present juncture, but such inquirers have been firmly told that no such applications could possibly meet with success at least until the new year, when the home government's own requirements would be out of the way.

Investors and others with liquid money at their disposal are already waiting for the home government's issue, which is certain to be popular, especially as the small investor is confidently expected to have his claims for easy participation recognized. Therefore it would have been little good for Canadian municipalities or provinces, however good their credit, to have applied to the London market.

The new arrangements announced will of a certainty relieve the situation in many places where money is badly needed for [illegible] civil and provincial enterprises.

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

TWO HUNDRED AND TWENTY MILLIONS

That is What is Being Realized from Canada's Root and Fodder Crops

The monthly crop report of the census and statistics office deals with the area, yield and value of potato, root and fodder crops during the past season, with the area and condition of fall wheat sown for next year's crop and with the progress of fall ploughing and summer fallowing. Root and fodder crops in Canada, consisting of potatoes, turnips, mangolds, etc., hay and clover, alfalfa, fodder corn and sugar beets, occupied this year a total area of 9,070,700 acres, as compared with 9,243,000 acres in 1913, and their estimated value is $226,668,000, as compared with $197,988,000 in 1913. Potatoes give a yield of 85,672,000 bushels from 475,900 acres, showing the excellent average yield per acre for the Dominion of 180 bushels, which is higher for this crop than in any year since 1908, excepting only in 1909, when the average reached was 193 bushels. At an average price per bushel of 49 cents—the same as last year—the total value of the potato crop is $41,598,000, against $38,418,000 in 1913. The potato yield in the Maritime provinces is especially good, the yield per acre being 213 bushels in Prince Edward Island, 220 bushels in Nova Scotia and 240 bushels in New Brunswick.

Other Roots and Crops.

Turnips and other roots yielded 69,003,000 bushels of the value of $18,934,000, compared with 66,788,000 bushels, value $18,643,000; in 1913, hay and clover 10,259,000 tons, value $145,999,000, compared with 10,859,000 tons, value $124,696,000 in 1913; alfalfa 218,400 tons, value $3,096,000, compared with 237,770 tons, value $2,819,000 in 1913; fodder corn 3,251,000 tons, value $15,950,000, compared with 2,616,200 tons, value $12,506,000 in 1913, and sugar beets 146,000 tons, value $1,092,000, compared with 148,000 tons, value $906,000 in 1913. The average yield per acre of turnips, etc., is 394 bushels against 358, of hay and clover, 1.28 ton against 1.33, of fodder corn, 10.25 tons against 8.62, and of alfalfa 2.42 tons against 2.54 in 1913.

The average quality of these crops for all Canada is high, ranging from 89 per cent. of the standard for sugar beets to 96 per cent. for fodder corn. As usual, estimates of the acreage sown to fall wheat this year for the crop of 1915 were collected from correspondents at the end of October. The compilation of the results shows an area estimated in the five fall wheat provinces of 1,294,000 acres, compared with the area sown in 1913 of 1,184,800 acres and the area harvested this year of 973,300 acres. The acreage sown for 1915 represents a net increase over that sown for 1914 of 9.2 per cent. Last year the acreage sown was reported as 7.37 per cent. less than in 1912.

Fall Wheat Crop.

The bulk of the fall wheat crop is grown in Ontario, where, this year, the estimate is for 1,043,000 acres, as compared with 898,000 acres, the area sown in the fall of 1913. The increase under fall wheat for Ontario, therefore, is in the ratio of about 16 per cent. In the three North-west provinces the area sown to fall wheat has again decreased in continuation of a decline attributed to consecutive discouraging seasons for this crop. Alberta, however, is the only western province where fall wheat is largely grown, and the area estimated to be sown is 230,000 acres, compared with 262,000 acres last year, a decrease of about 12 per cent. In British Columbia there is an increase from 5,500 to 6,000 acres, or 10 per cent.

The condition of the fall wheat crop on October 31st is reported for the five provinces as 96.5 per cent. of the standard, which, upon the assumption that average conditions prevail between now and next year's harvest, indicates a yield per acre of about 1.5 per cent. above the average of the past four years, 1910-13. In Ontario the condition on October 31st was [illegible], in Manitoba 82, in Saskatchewan 60, in Alberta 92, and in British Columbia 96 per cent. of the standard.

Favorable Fall Plowing Figures.

The early harvest and favorable conditions for threshing in the western provinces enabled farmers to make excellent progress with fall ploughing on land intended for sowing in the spring. Measured in percentage of the total land intended for next year's crop, it is estimated that in Manitoba 92, in Saskatchewan 77, and in Alberta 56 per cent. of fall ploughing was completed by October 31st. These figures compare very favorably with the two previous seasons, when the highest percentage was not more than 58 in Manitoba (1913), and the lowest only 24 in Saskatchewan and Alberta (1912). The progress made this year, therefore, augurs well for next year's crops. In Eastern Canada the percentage of fall ploughing completed by October 31st ranges from 51 in Nova Scotia to 75 in Quebec; but in the East, especially in the maritime provinces, there is a longer fall ploughing season. The average figure for all Canada is 71, compared with 54 last year and 44 in 1912.

The practice of summer fallowing in the west shows further progress, an increase of about 6 per cent. being reported in Manitoba and of 3 per cent. in Saskatchewan, as compared with last year. Alberta, however, shows a decline of about 5 per cent. All the other provinces show a smaller percentage devoted to summer fallowing, resulting in a net decline for the Dominion of about 1.5 per cent.

◆

COMMERCIAL COUNTRIES NEED EXPERTS

The vital importance to national upbuilding of industrial production and exports is being more and more brought into evidence by the action of leading industrial countries, states Canada's commissioner of commerce, Mr. R. Grigg, in the weekly report of the department of trade and commerce.

For many years British manufacturers have urged the appointment of highly trained men only for duty in commercial capacities abroad; distinguished Americans, among them Mr. Roosevelt and Mr. Elihu Root, have protested against the old method of political appointment regardless of fitness, and decided improvement in the commercial quality of both British and American consuls has resulted.

It is now announced that following the example of Great Britain, the United States have appointed nine gentlemen as commercial attaches. All of these are carefully selected by examination and in nearly every case are university graduates speaking French, German, Italian, Spanish and even Chinese, and in all cases commanding more than one language. This was rendered possible by an appropriation of $100,000 resulting from representations made by the chamber of commerce of the United States and the chief of the bureau of foreign and domestic commerce has been selected as commercial attache in London. The duties of the attache shall be "to investigate and report upon such conditions in the manufacturing industries and trade of foreign countries as may be of interest to the United States." The examination for these appointments was both written and oral and exhaustive tests were applied with regard to personal fitness on the ground of economic information, familiarity with trade details and the literary equipment which will enable the attache to give expression to the result of his work in a form that will command respect and attention. The field of their labors is so open to the competition of all nations, so broad and difficult to work, that those who would hold the foremost position must have the best information and the best men. Commercial work is likely to become increasingly important and increasingly difficult if agents are to act as the eyes and ears of commerce. It will be necessary for commercial experts to gauge the consuming power and exporting capacities of the countries in which they are stationed in relation to foreign trade and for such men a knowledge of the language of the country is an asset of increasing value. The need of to-day is for commercial and financial experts of a high order, and this fact has been grasped by Germany, by the United States, and by Japan. It is hoped that Canadian interests will keep in touch with changing conditions and that they will realize that their position can only be secured by the high standard of their representatives in a field of enormous value and of world wide competition.

TORONTO BRANCH—A. B. PATTERSON, Manager

BRITISH COLUMBIA'S TRUST COMPANIES

Recent Provincial Legislation Provides for Outside Examination

The tangled character of the affairs of the Dominion Trust Company, now being disclosed, has set people inquiring how it could be possible after the recent trust company legislation for a trust company to misuse funds entrusted to it, and what protection the clients of a trust company really have, states Mr. P. Donnelly, of the Canadian Financiers' Trust, in a letter to the press.

The answer is that the Trust Companies Act, passed in March of this year, so far as it could have restored order to the affairs of the Dominion Trust Company, came too late. The evil was already done. Its provisions themselves are stringent enough. It regulates the manner of investment of all funds entrusted to a trust company, including deposits, and even the company's own share capital and accumulated funds, and provides for all trusts to be kept separately, so to speak, in watertight compartments. It limits the classes of business a trust company can undertake, and provided that a deposit, varying from $25,000 to $200,000, had to be made with the minister of finance by every trust company not later than July 1st last. It enacts that no company which has not satisfied the registrar of companies and the inspector of trust companies and obtained registration can carry on business after September 4th, 1915; and last, but not least, it made compulsory a searching periodical examination and report on the company's affairs and securities by the directors themselves, and not merely by officials of the company, in addition to an examination and report by the inspector of trust companies.

No Outside Examination or Control.

It is not too much to say that, had this act been in force early enough, or had the Dominion Trust Company even administered its affairs in accordance with the provisions of its own special acts, the disaster with which we are now confronted could not have occurred. But the weak spot in the special acts of the Dominion Trust Company was that they provided for no effective outside examination and control, as is now provided by the British Columbia Trust Companies Act.

It must be remembered that the Dominion Trust Company was not only a provincial company. It was originally incorporated in British Columbia as the Dominion Trust Company, Limited, but in 1912 a Dominion charter was obtained from the Parliament of Canada incorporating the present Dominion Trust Company, and authorizing it to acquire the old company's business and assets. A somewhat similar authorizing act was also obtained from the provincial Parliament in 1913.

The latter act contained a clause making the company subject to all existing and future provincial trust company legislation, and, consequently, it became subject to the provisions of the Trust Companies Act before mentioned. The Dominion Trust Company provided the requisite deposit with the minister of finance in July last, but it did not obtain registration. Possibly those directly responsible for its affairs realized that, in the condition they were in, the company could not obtain registration, and that to attempt it would be only to reveal its weakness, or, possibly, they may have thought to avoid registration altogether by virtue of its Dominion charter. But, so far as the Dominion Trust Company was concerned, it was a case of the stable door being bolted and padlocked after the steed had slipped out, and the regulations and safeguards intended to be applied were too late.

Provisions Now Enforced.

The Trust Companies Act, however, remains, and its provisions are being enforced. Trust companies have been, and will continue to be, a necessity of our financial and social system. They can no longer gamble or encourage wild-cat enterprises with the funds entrusted to them. Since the Trust Companies Act was passed, six trust companies have obtained registration under it, and a very large number of others have abandoned their trust powers. For those that remain after September 4th next, and they will in all probability be few and well within the inspector's power to adequately examine and control, there will be plenty of business falling to their legitimate field of action, and they will supply a genuine want of the community.

In England that want is partly met by the official trustee, but that system has its defects. It creates a vast monopoly, and it does not bring the best results to the beneficiaries. Of necessity the trusts have to be administered by a host of minor officials. There is no incentive to obtain the best results compatible with security. On the contrary, there is every inducement to put the trust funds into a few classes of government securities yielding but small returns, and even then not free from shrinkage of capital, for, as we know, consols, the premier British government security, in common with other gilt-edged securities, have steadily shrunk within the last eighteen years from 112 to under 70.,

One result of the undoubted blow that has been dealt to trust company business by the recent failure may well be that the public will make a distinction between trust companies that are registered and those that are not, and that the former will rapidly regain popularity and the confidence of the public, and continue in added measure to perform the useful and necessary functions allotted to them.

◆

WANT OPTIMISM AND HOME SUPPORT

Discussing the impetus given by *The Monetary Times* to the made in Canada and business-as-usual movements, the organ of the Hudson Bay Insurance Company, of Vancouver, says:—

"Coming from so high an authority on things financial, the quotations are worthy of deep thought by all interested in the welfare of this Dominion. There has never been a time when every occupation, institution and industry has felt the need of home support as it does at the present. Beyond any reasonable doubt, in like measure as this support is granted will the ability of Canada to weather the storm, which has only just broken, be measured.

"It is impossible to emphasize too strongly the call to buy Canadian goods and support Canadian institutions. The need is vital; it is felt in every village, town and city throughout the land. The war has been in existence for some three short months; only the first breath of it has as yet been felt; yet financial and commercial houses which have been in existence for years have toppled over and are down in worse ruins than Louvain and Termonde.

"Such is the beginning—what will be the end? The end shall be as men make it. It will depend entirely on whether the advice tendered by *The Monetary Times* is accepted or rejected. Two things alone are necessary to pull the country through with the minimum of trouble and hardship—optimism and home support."

◆

SIX MONTHS' TRADE WAS HALF BILLION

Canada's total trade for the six months' period ended September 30th was over the half billion, and was within fifty one millions of the total for the corresponding period in 1912-13, the figures being for the first six months of the present fiscal year $500,067,834, and for the six months of the previous year, $551,602,433.

The imports for six months this year amounted in value to $280,337,828, as against $340,729,891, a drop of $60,392,063, while the exports, domestic and foreign, amounted to $210,872,522, compared with $220,296,771, a decrease of $9,424,249.

The September imports totalled $52,452,793 this year, and $50,545,310 last year, a decrease of $2,042,526. The decrease in the value of exports for the month amounted to only $221,434, the figures being for September this year $40,898,545, and for September last year $41,110,070.

The imports totals are inclusive of coin and bullion, and [illegible] are shown under that head. Coin and bullion entered for consumption in the six months amounted to $28,-[illegible], against $[illegible],506,410, an increase of a little over $26,-[illegible]. The September imports of coin and bullion rose from $[illegible] to $15,8[illegible].

On the other hand, Canada exported less coin and bullion this year than last, the figures being, for the six months of 1914, $[illegible], and for the six months of 1913, $6,807,977.

Domestic exports during the six months show decreases of $[illegible] under agriculture, a little less than a million under forest products, $[illegible],000 under fisheries, and $1,864,115 under mines. Exports of domestic manufactures, on the other hand, increased by nearly six millions, and those of animals and their produce by more than eight and one-half millions.

Safety of Principal, Certainty of Interest

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment—safety of principal and certainty of interest.

To those who have funds for investment only in small sums this most desirable class of security is not directly available. They may, however, secure all those advantages by investing in the bonds of this corporation which are based upon upwards of twenty-nine million dollars of carefully selected first mortgages on improved real estate. These bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest trust funds

INSURANCE AGAINST HAIL DAMAGE

Twenty-five Municipalities United in Alberta's Scheme Covering Four Million Acres

The hail insurance district of Alberta comprises twenty-five rural municipalities, somewhat widely scattered over the province. These municipalities after having taken a vote of the ratepayers, voluntarily joined together to form the district, and the business was carried on under the Rural Municipality Act. The affairs of the district are under the direction of Mr. E. H. Malcolm, of Killam, chairman, appointed by the minister of municipal affairs, Hon. Wilfrid Gariepy, and Messrs. J. H. Lamb, of Youngstown, and F. W. Beynon, of Muhlbach, elected by the reeves of the municipalities comprising the district. At a subsequent meeting of the board, Mr. J. H. Lamb was appointed secretary-treasurer, and offices were opened in the Tegler Building, Edmonton.

An interim report of the Alberta hail insurance district shows that at the beginning of the year the board levied a rate of 5½ cents per acre on all assessable land. This rate was fixed upon the best data obtainable on the part of the board. The outcome, as will be seen from what follows, justifies the rate.

The first report of hail came from a storm of June 16th, and the last report from the storm of September 10th, both of them from the same rural municipality. Between these two dates thirty other storms occurred at different places within the district. The greatest number occurring in any one municipality was seven, two out of the twenty-five suffering from this number. Two municipalities had six storms each, five of them five storms each, two four storms each, four two storms each, one three storms, seven one storm each, and two had no hail at all.

Assets About Quarter Million.

Of the months, June had seven hail storms, July eleven, August twelve, and September two.

Up to the 22nd of October, 1914, the claims for damage to crops by hail numbered one thousand three hundred and thirty-eight.

For the work of inspection eleven men in all were employed. The first storms in four of the municipalities occurred so early in the season it was deemed advisable to make a second inspection, which was made just before the harvest. The length of time given by the law for putting in the claim and afterward for making an appeal from the report of the inspector made the work somewhat difficult. However, the results have shown a commendable thoroughness, and a desire to do justly by the claimant whose crop may have been damaged, and by the ratepayer whose crop was not damaged and yet who was assessed to help bear the burden. The sum total allowed by the inspectors and by the board upon a review of the appeals is in round numbers $190,000, or an average of $142 per claim.

The assets of the board are the taxes for hail insurance, levied and collected by the municipalities comprising the district. These taxes at 5½ cents per acre amount to approximately $241,000. The costs of administration, which include all office expenses, salaries, cost of inspection, etc., will amount to less than $16,000. This will leave a surplus of $[illegible], or thereabouts. The final adjustments may alter these figures slightly, but it is believed they will be substantially correct.

Four Million Acres.

The area assessable for hail insurance purposes in the district is over 4,[illegible],000 acres. From the best information obtainable the board estimates that about twenty-five per cent of this area is under cultivation, and that about 1,000,000 acres of crop was insured for a total of six million dollars. The premium to be received for this insurance is, as said above, $241,000, so that this insurance has been carried at a little over 4 per cent., or about 24 cents per acre.

The hail insurance board report points to the benefits of this scheme for the protection of the farmers. The rates of insurance in companies run from 6½ per cent. to 10 per cent. If a farmer has twenty-four acres in crop on a quarter of land his insurance under this plan is as cheap as the cheapest obtainable. In some districts he need have but fifteen acres in order to be equal with the cheapest insurance obtainable. Any acreage beyond the figure mentioned will reduce the cost of insurance since the cost per quarter is not likely to exceed the present rate, at least not as long as the indemnity for total loss remains at the present figure, $6 per acre.

The board recommended to the department of municipal affairs and through it obtained some changes in the law. Of these changes each municipality will, without doubt, be notified. These amendments refer mostly to details with a view to making the plan more workable, but an important amendment for the protection of the farmer is one making it impossible to garnishee, or attach hail insurance moneys for any purpose, or to assign them to any person. Another amendment exempts lands leased from the Dominion government for hay or pasture from taxation for hail insurance purposes.

"It is evident to the board," says the report, "that a more widely extended territory will not only cheapen the pro rata cost of the administration of the affairs of the hail insurance district, but will also incline to a lower rate per acre. The board would, therefore, bring to the attention of all ratepayers in rural districts the scheme for municipal hail insurance, believing that it is to the interest of the entire farming community of the Province of Alberta to enter heartily into this co-operative scheme for protecting the farmer against loss by the ravages of hail at a minimum cost, and without handing over profits to any one."

As to difficulties encountered by the plan, *The Monetary Times* is informed that the most serious difficulty encountered this year, aside from the fact that this was the first year, is the difficulty in getting the taxes paid. No provision has been made to enforce payment of these taxes until the end of the year. Next year these taxes will become due on October 31st, and this it is expected, will assist in solving this difficulty, and the board anticipates being able to pay claims immediately after November 15th, 1915.

◆

THREE RIVERS FORGING AHEAD

Founded in 1634 and thriving lustily in 1914, Three Rivers, Quebec province, is well described as an old eastern city with new western push. In some attractive booklets issued by the city's industrial department, and of a more business-like type than is typical of this sort of literature, the following six reasons are given as to why so many large manufacturers have put their plants at Three Rivers and why many more are expected to do so:—

1. Paper, pulp and iron industries are in close proximity to the raw material, in practically unlimited quantities. Absence of congestion in shipping (as in larger centres) permits of quick and easy handling of products for transportation by rail or water.

2. Manufacturers of cotton find abundant labor, no strikes, cheapest power in Canada, are supplied with spring water, naturally sand filtered, which is responsible for the remarkable whiteness of their cotton, equal to the imported product, not duplicated elsewhere in Canada.

3. For the boot and shoe industry: abundant and skilled labor, low wage, account of cheap living conditions; favorable manufacturing sites, facilitating transportation, cheap power.

4. Industries of various natures have been attracted by the strategic position Three Rivers occupies, being half-way between the two largest cities in the province, Montreal and Quebec City (about 75 miles from each); because it offers shipping facilities, by rail and water, being situated on the main line of the Canadian Pacific Railway, and having one of the finest harbors in America on the St. Lawrence River.

5. All responsible companies locating in Three Rivers are offered attractive inducements, viz., free sites, tax exemption and other special features, according to the magnitude of the proposed plant.

6. Seven old, representative banking institutions, who have yet to find cause to lose faith in Three Rivers' manufacturing enterprises, are ready and glad to extend a hand of welcome to a new arrival.

NEW BANKING SYSTEM BEGINS

Federal Reserve Plan of the United States Commenced This Week—What It Comprises

On Monday the new federal reserve banking system of the United States was inaugurated. The opening of the 12 regional banks comprising this system marks the culmination of many years' work of legislators, bankers and financial specialists.

Nothing so radical has taken place in United States banking circles since the enactment of the National bank law in 1863. That act abolished all state banks as banks of issue and started the first movement for a uniform currency. The new regional act supplements the National bank law by adding 12 regional reserve banks in the various important financial centres. These are bankers' banks, designed to carry part of the reserves of the country and city banks, to issue circulating notes, to rediscount paper for member banks and to handle the exchange affairs of the commercial banks.

These new banks have varying capital stock ranging from $4,700,000 to over $20,000,000, and totaling about $109,000,000. As all national banks must become members immediately upon being organized, and as state banks and trust companies may become members when properly qualified as regards reserves and examinations, the capital account will be a gradually increasing amount.

Under Federal Reserve Board.

They are under the general supervision of the United States reserve board at Washington, to which body is added an advisory council of 12, one member from each regional district. The federal reserve board is made up of the following members:—Secretary of the treasury W. G. McAdoo, chairman; comptroller of the currency John Skelton Williams, F. A. Delano, Charles S. Hamlin, Paul M. Warburg and Adolph C. Miller. This board has the following powers:—

To examine federal reserve banks and member banks.

To permit or require federal reserve banks to rediscount paper of other federal reserve banks at rates to be fixed by this board.

To suspend for stated periods reserve requirements and to establish a tax on decreasing reserves.

To regulate the issue of notes.

To add to or reclassify existing reserve and central reserve cities.

To suspend or remove officials of federal reserve banks.

To require writing off doubtful assets of federal reserve banks.

To suspend, liquidate or reorganize federal reserve banks violating this act.

To require bonds of federal reserve agents, to perform all duties, etc., specified or implied in this act, and to make all necessary rules and regulations.

May exercise functions of clearing house for federal reserve banks, or may designate federal reserve banks to do the same, or may require each federal reserve bank to so act for its member banks.

To levy upon federal reserve banks semi-annual assessments sufficient to meet estimated expenses of the board.

To exercise general supervision over federal reserve banks.

To define character of bills, eligible for discount by federal reserve banks, and to limit and regulate rediscounts and acceptances.

May establish rate of interest to be charged federal reserve banks on federal reserve notes issued.

May fix the charges to be collected by member banks for cheques cleared through federal reserve banks.

To employ necessary attorneys, clerks, etc., without regard to classified service; but president may place said employees in classified service.

Operations of Regional Banks.

The powers of regional banks are as follows:—

Shall receive for deposit at par cheques and drafts drawn on any of its depositors; and cheques and drafts from other federal reserve banks drawn on any bank in the system.

Shall accept deposits from United States, member banks [illegible] and other federal reserve banks.

May discount commercial notes, drafts and bills of exchange endorsed by member banks protest waived, not including those drawn or issued to carry stocks or securities, except United States bonds; such paper not to run for more than 90 days, except agricultural and cattle paper in amount fixed by federal reserve board, having a maturity not to exceed six months.

May discount acceptances bearing endorsement of one member bank based on exportation or importation of goods, and maturing in not more than three months, amount of such acceptances not to exceed one-half of capital and surplus of bank for which discount is made.

May issue circulating notes under conditions provided in National bank act, except that issue is not limited to amount of capital.

Under regulations of federal reserve board may buy and sell, with or without endorsement of a member bank, cable transfers, bankers' acceptances and bills of exchange of kind named above.

Deal in Gold and Bullion.

May deal in gold coin and bullion.

May buy and sell United States bonds and notes; also state, county, district, or municipal notes, revenue bonds or warrants having not more than six months to run.

May buy from member banks and sell bills of exchange arising out of commercial transactions.

Shall establish branches in district under regulations approved by federal reserve board.

May establish from time to time rates of discount.

May, with consent of federal reserve board, open bank accounts and establish agencies in foreign countries to deal in two-name bills of exchange, having not more than 90 days to run.

May open accounts with other federal reserve banks for exchange purposes.

No government funds, public funds of the Philippine Islands, nor postal savings funds shall be deposited in any bank in the continental United States not belonging to this system.

Reserves of Various Banks.

In estimating reserves, net balance of amounts due to and from other banks shall be basis for ascertaining deposits against which reserves shall be determined.

Demand deposits are those payable within 30 days; time deposits those payable after 30 days and those subject to not less than 30 days' notice.

Reserves must be held as follows:—

Country banks—12 per cent. of demand and 5 per cent. of time deposits, of which 4-12 in own vaults (for first three years 5-12); 5-12 in federal reserve bank of home district (2-12 for first year, and 1-12 for each succeeding six months up to 5-12); 3-12 in own vault or in federal reserve bank (for three years this may be held in own vault, in federal reserve bank, or with reserve agent as at present).

Reserve city banks—15 per cent. of demand and 5 per cent. of time deposits, of which 5-15 in own vault (for first three years 6-15); 6-15 in federal reserve bank (3-15 for first year and 1-15 for each succeeding six months up to 6-15); 4-15 in own vault or in federal reserve bank (for three years this may be held in own vault, in federal reserve bank, or with reserve agent as at present).

Central reserve city banks—18 per cent. of demand and 5 per cent. of time deposits, of which 6-18 in own vault; 7-18 in federal reserve bank; 5-18 in own vault or federal reserve bank.

◆

OTTAWA TO PURCHASE FIRE ENGINES

The Canadian Fire Underwriters' Association have instructed the insurance companies to write no more business in Ottawa unless and until the city makes immediate purchase of three new steam fire engines as a temporary relief from a possible conflagration and adopts measures to construct an overland pipe for a more powerful water pressure.

At a special meeting of the board of control it was decided to call for tenders for the three fire engines.

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors. There are features of this investment offer that make it worth your further investigation.

Why We are at War

(Prepared for the Victoria League)

By SIR EDWARD COOK

II.

Foreseeing all this, Sir Edward Grey, whose efforts during the recent Balkan wars had won for him the title of the peacemaker of Europe, was early in the field with proposals for averting war, and the British government "persisted to the very last moment of the last hour in that great and beneficent but unhappily frustrated purpose" (Mr. Asquith).

Already on July 20th, having received an inkling of what was on foot, Sir Edward Grey spoke to the German ambassador of the importance, if the peace of Europe was to be preserved, of Austria "keeping her demand within reasonable limits." The suggestion was not adopted. The German foreign secretary "considered it inadvisable that the Austro-Hungarian government should be approached by the German government on the matter" (July 22nd). The Austrian ultimatum, which the same minister "admitted that the Servian government could not swallow," was despatched on the following day.

On July 23rd, having heard from the Austrian ambassador an outline of what the Austrian note contained, Sir Edward Grey pressed upon him, as also upon the German government, the desirability of persuading the Austrian government to extend its time-limit. The Russian government took the same line. The German ambassador was instructed to "pass on" Sir Edward Grey's suggestion, but the German foreign secretary said that "there would be delay and difficulty in getting time limit extended," adding, "quite freely, that the Austro Hungarian government wished to give the Servians a lesson and meant to take military action."

Nations to Act Together.

On July 24th, having received the text of the Austrian ultimatum, and foreseeing that if Austria attacked Servia Russia would mobilize, Sir Edward Grey proposed that "Germany, France, Italy, and Great Britain, who had not direct interest in Servia, should act together for the sake of peace, simultaneously in Vienna and St. Petersburg," "in the event of the relations between Austria and Russia becoming threatening." "It would be very desirable," he said to the German ambassador, "to get Austria not to precipitate military action and so gain more time. But none of us could influence Austria in this direction unless Germany would propose and participate in such action at Vienna." France was favorable to this plan. So was Italy. Russia was "quite ready to stand aside and leave the question in the hands of England, France, Germany and Italy." Having thus received assurances that, if only Germany agreed, his plan might be efficacious, Sir Edward Grey on July 26th formally invited the governments of France, Germany and Italy to instruct their several ambassadors to confer with him "for the purpose of discovering an issue which would prevent complications." The invitation was accepted by France and Italy. The German foreign secretary "could not fall in with the suggestion, desirous though he was to co-operate for the maintenance of peace" (July 27th).

Sir Edward Grey thereupon saw the German ambassador (July 27th) and promised "as long as Germany would work to keep the peace I would keep closely in touch. I repeated that after the Servian reply it was at Vienna that some moderation must be urged."

On the following day (July 28th) Austria-Hungary declared war on Servia.

As the German government was understood to have accepted "in principle" the idea of mediation by the four powers between Austria and Russia, it was proposed, "that the German secretary of state should suggest the lines on which this principle should be applied." The German government made no suggestion of the kind.

Sir Edward Grey's scheme had temporarily been in abeyance, as the Russian government had offered to discuss matters with the Austrian government direct. This offer was declined by Austria (July 28th).

Sir Edward Grey next appealed to the German chancellor. "If he can induce Austria to satisfy Russia and to abstain from going so far as to come into collision with her, we shall all join in deep gratitude to his excellency for having saved the peace of Europe" (July 29th). The Italian government had simultaneously appealed to Germany in a like sense.

On that same day the German government made certain proposals to Great Britain to which we shall come presently and which the prime minister afterwards characterized as "infamous." But so persistent was the British government in pursuit of peace that Sir Edward Grey in declining the proposals used language of great restraint (July 30th), and accompanied his refusal by yet another "most earnest" appeal to the German chancellor: "The one way of maintaining the good relations between England and Germany is that they should continue to work together to preserve the peace of Europe; if we succeed in this object, the mutual relations of Germany and England will, I believe, be *ipso facto* improved and strengthened. For that object His Majesty's government will work in that way with all sincerity and good-will. And I will say this: If the peace of Europe can be preserved, and the present crisis safely passed, my own endeavor will be to promote some arrangement to which Germany could be a party, by which she could be assured that no aggressive or hostile policy would be pursued against her or her allies by France, Russia, and ourselves, jointly or separately."

Sound Petrograd and Vienna.

On the following day (July 31st) Sir Edward Grey gave proof of his sincerity and made a further effort for peace. "I said to German ambassador this morning that if Germany could get any reasonable proposal put forward which made it clear that Germany and Austria were striving to preserve European peace, and that Russia and France would be unreasonable if they rejected it, I would support it at St. Petersburg and Paris, and go the length of saying that if Russia and France would not accept it His Majesty's government would have nothing more to do with the consequences." In order not to leave this promise in the region of generalities, Sir Edward Grey threw out a particular suggestion. "The stumbling-block hitherto has been Austrian mistrust of Servian assurances, and Russian mistrust of Austrian intentions with regard to the independence and integrity of Servia." If Germany would sound Vienna, Sir Edward would sound St. Petersburg whether it would be possible for the four disinterested powers to offer to Austria to undertake to see that she obtained full satisfaction for her demands on Servia provided they did not impair Servian sovereignty and the integrity of Servian territory. That Russia was ready to accept such a solution is clear from a peace-formula which her government had drawn up in concert with Sir Edward Grey. Everything turned on Germany. On that day she sent an ultimatum to Russia.

In the early morning of August 1st (3.30 a.m.), the King of England and his ministers made a last attempt to secure peace. The King telegraphed a personal message to the Tsar. In this the King first set out the text of a communication from the German government. The Tsar had previously requested the German Emperor to mediate between Russia and Austria, and had "given most categorical assurances to the Emperor William that Russian troops would not move so long as mediation negotiations continued."

What Germany Said.

The German government in its communication stated that the Emperor was desirous to mediate and complained that such mediation was frustrated by the Russian mobilization. King George went on to say that he was "most anxious not to miss any possibility of avoiding the terrible calamity which threatens the world"; he appealed to the Tsar to remove any misapprehension which might have occurred; he proffered his good offices "to assist in re-opening the interrupted conversations between the powers concerned." The Tsar replied on the same day, "I would gladly have accepted your proposals had not the German ambassador this afternoon presented a note to my government declaring war."

"In this solemn hour I wish," said the Tsar, "to assure you once more that I have done all in my power to avert war." This assurance is borne out by the diplomatic correspondence. It shows, as the Russian foreign minister said, that "No suggestion held out to him had been refused. He had accepted the proposal for a conference of four, for mediation by Great Britain and Italy, for direct conversation between Austria and Russia; but Germany and Austria-Hungary had either rendered these attempts for peace ineffective by evasive replies or had refused them altogether."

(To be continued).

The accumulation of money and the growth of confidence on the part of the investor are strong assurances that a recovery in prices of Municipal securities will shortly take place.

WHAT WARRING NATIONS WANT

Canada May Sell to Empire Only and to Its Allies—List of Prohibited Exports

Proclamations were issued by the governor-general in council, upon the outbreak of the war with Germany and Austria, in regard to the prohibition of exports to certain foreign ports in Europe and on the Mediterranean. The first of these proclamations prohibited the exportation from Canada to all foreign ports in Europe and on the Mediterranean and Black Sea, with the exception of those of France, Russia (except the Baltic ports), Spain and Portugal of the following articles:—

Aluminum; aluminum alloys; armour plating; armour quality castings and similar protective material; asbestos; cables, telegraph and telephone; camp equipment, articles of; cannon and other ordnance, and parts thereof; carbolic acid; carriages and mountings for cannon and other ordnance and for machine guns, and parts thereof; coal, steam, large; compasses and parts thereof, including fittings, such as binnacles; cresol; engine and boiler packings; explosives of all kinds; fuel, manufactured; implements and apparatus designed exclusively for the manufacture of munitions of war, for the manufacture or repair of arms, or of war material for use on land and sea; India rubber-sheet, vulcanized; manganese; mercury; mica; mineral jellies; mines, and parts thereof; molybdenum; nitrocresol; nitrates of ammonium; nitrates of potassium; nitrates of sodium; nitratoluol; nitric acid; picric acid and its components; rope and steel wire and hawsers; saltpetre; sounding machines and gear; steam vessels, lighters and barges of all descriptions; sulphur; sulphuric acid; swords, bayonets and other arms not being firearms and parts thereof; tin; tinplates; torpedo tubes; torpedoes and parts thereof; tungsten; vanadium; four-wheeled wagons capable of carrying one ton and over; two-wheeled carts capable of carrying 15 cwt. and over; harness and saddlery of all kinds; brass wire for long spans, 450 lbs. per mile; horse and pony shoes; materials for telegraphs; wireless telegraphs and telephones; field glasses and telephones; field glasses and telescopes; railway materials, both fixed and rolling stock; men's marching and shooting boots; heliographs, portable forges; farriers', carpenters', wheelers' and saddlers' tools, and transport service sets; glycerine; alcohol as covering rectified spirits; uniform clothing and military equipment; accoutrement; range-finders and parts thereof; walnut wood of scantling which can be made into rifle butts and fore-ends.

Second Prohibitive Proclamation.

The second proclamation prohibited the exportation from Canada to any places other than the United Kingdom or any British possessions of the following articles:—

Arms of all kinds and their distinctive component parts.

Projectiles, charges and cartridges of all kinds and their distinctive component parts.

Powder and explosives, specially manufactured or prepared for use in war.

Gun mountings, limber boxes, limbers, military wagons, field forges, and their distinctive component parts.

Petroleum and its products, used for fuel or as a lubricant.

Saddle, draught and pack animals, suitable for use in war.

Chrome and ferrochrome; cotton suitable for use in the manufacture of explosives; cotton waste, dimithylaniline, fulminate of mercury; blast-furnace oil; fuel oil shale; mineral lubricating oil; silk cloth, silk braid, silk thread suitable for cartridge charges; surgical dressings and bandages.

Clothing and equipment of a military character.

All kinds of harness of a military character.

Articles of military camp equipment and their component parts.

Implements and apparatus, designed for the manufacture or repair of arms or war material.

And further, that the exportation from Canada, to any place other than the United Kingdom, British Possessions, the United States, Japan, France and Russia, of the following article be prohibited: Coal.

In addition to these two proclamations, by order in [illegible] the exportation from Canada of the following articles to all foreign ports in Europe and on the Mediterranean and [illegible] with the exception of those of France, Russia [illegible] Baltic ports), Spain and Portugal is prohibited:—

[illegible] suitable for the manufacture of crucible

Range-finders, [illegible] of all kinds; motor tires; nickel and nickel ore; woolled sheep skins.

Warships, including boats and their distinctive and component parts of such a nature that they can only be used on a vessel of war.

Aeroplanes, airships, balloons and air craft of all kinds, and their component parts, together with accessories and articles recognizable as intended for use in connection with balloons, airships and air craft.

Feeding stuffs for animals and all foodstuffs and raw materials for the same.

Gold and silver in coin bullion, paper money.

Vehicles of all kinds available for use in war, and their component parts.

Vessels, craft and boats of all kinds, floating docks, parts of docks, and their component parts.

Powder and explosives not specially prepared for use in war.

Barbed wire and implements for fixing and cutting same.

Chronometers, and all kinds of nautical instruments.

Copper, unwrought; lead, pig, sheet or pipe; hematite iron ore; magnetite iron ore.

Hides and skins, raw or rough tanned (but not including dressed leather).

Rubber.

PACIFIC TRADES WITH ATLANTIC

Recognition of the British Columbia Apple—Sending Lumber Through Panama

(Staff Correspondence.)

Vancouver November 16th.

The British Columbia apple is to the fore this week. British Columbians have always known that a good apple has been grown in their own province, but it has never been brought home to them more convincingly and persistently than by the campaign this week. This campaign is in line with the proposal to use home products wherever possible, so that the utmost money may be circulated in these times of stress, which call for the greatest co-operation.

On the steamer Niagara, several thousand boxes of British Columbia apples were shipped to Australia and New Zealand. The principal shippers were Messrs. Stirling and Pitcairn, Kelowna, and Messrs. F. R. Stewart and Company, of Vancouver.

Lumber for Eastern Canada.

Orders for a million feet of lumber for Toronto and New York have been received at New Westminster and have been divided among the Canadian Western Lumber Company, the Brunette Sawmills and the Small and Bucklin Lumber Company. While this amount is not particularly large, it is thought that the lumber is intended as a feeler for the market on the Atlantic seaboard, and that it is probable that the order may be followed by other business. Shipment will be made through the Panama Canal.

A sign of wider business relationship is the shipment of large quantities of chemical wood pulp to points in Massachusetts by the British Columbia Sulphite Fibre Company. This is the first time that pulp has been shipped there. The steamer Bessie Dollar is to load at this company's wharf, at the head of Howe Sound, for the Orient.

Smaller Pre-emptions Suggested.

The proposal has been made to the provincial government that pre-emptions should be say 20 acres or even 40 acres, instead of 160 as at present. The contention is that good land in British Columbia is limited, and besides clearing expense is so heavy that a pre-emptor never attempts to clear the whole of his holding. Instead, he clears enough to get along with, erects his dwelling and then tries to stick it out until such times when the land has gone up in value, or until a purchaser happens along. If the smaller size of pre-emption were adopted, it would mean that the land would be more closely tilled, and the people would be living closer together. While this point has been suggested by surveyors who have been in the field, it has not been publicly discussed.

GOLD MOVEMENT TO CANADA

United States Has Sent Nearly $200,000,000 Here and Across the Atlantic During the Year

The largest gold payment made by New York banks so far on the city of New York loan took place recently, when $11,472,000 was turned in out of a call of $16,766,000. There have been eight calls up to now issued by the syndicate managers to the underwriting banks which have resulted in aggregate payments of $51,549,000, or a little over half the amount of the original loan raised by the city of New York to meet its pending maturities. Of this amount, a total of $35,264,000 was paid in gold and shipped to Canada. The first payment on this account was made on September 16.

There has been now very nearly $200,000,000 net of gold shipped out of the country by the New York banks since the beginning of the year. On the outbreak of the European war the gold movement across the Atlantic at once came to a stop. Up to that time a total of $126,000,000 had been shipped to London, Paris and Berlin.

Regulating Gold Outflow.

The outflow, however, immediately became diverted across the border to Canada on account of the United States' continued heavy foreign indebtedness. Owing to the demoralized condition of the exchange market, it became necessary to regulate the outflow by certain orderly arrangements, which were chiefly represented by the city of New York bond plan and the gold fund regulated through the clearing house committee.

The aggregate gold shipments that have taken place so far to Canada on these two operations, in conjunction with some independent transactions, amounts to $73,318,000, states the Wall Street Journal. Against this must be deducted $7,775,000 gold that was received from Canada in the early part of the year, making a net balance of gold lost by the New York banks on the Canadian movement $65,543,000. Added to the $126,000,000 exported to Europe up to the beginning of August, this results in a total of $191,543,000 net gold exported so far this year.

Dominion's Share, Twenty-Five Millions.

There is likely to be some more gold shipped to Canada before the close of the year. It is doubtful whether the gold pool will entail any further shipments of gold beyond the $10,000,000 already sent, on account of the decline in the foreign exchange market to the neighborhood of the gold shipping point. But on the city of New York financing more of the yellow metal may be forwarded since there remains approximately another $50,000,000 still to be called. However, only about four-fifths of the city loan was designed to meet foreign maturities of the city, so that more than half of the foreign obligations has now been provided for. With independent shipments the total additional outflow of gold to Canada before the end of December may be brought up to $25,000,000 or $30,000,000.

◆

UNION LIFE TRIAL DELAYED AGAIN

By consent the trial of Dr. F. G. Hughes, George Millichamp, and Harry Symons, K.C., the three directors of the defunct Union Life Insurance Company charged with conspiracy in connection with the affairs of the company, has been traversed to the next Criminal Assize Court, which opens at the City Hall, Toronto, in January. This order was made by Chief Justice Falconbridge last week, after Crown Prosecutor DuVernet said that the current week was the last of the Assize Court, and that the jurors would have to be dismissed unless special arrangements were made. The Crown's case would take at least three days, and he had been informed by Mr. Lennox, one of the counsel for the defence, that their side of the trial would take at least a week.

The three men appeared on Monday, for the third time, to have their $15,000 bail renewed.

◆

If you had faith in your country in 1912, why not now?

BUSINESS AFTER THE WAR

Canada Must Be Ready to Handle Problems—What J. J. Hill Sees Ahead

What is to happen when the war closes, leaving half a continent in ruins, killed or maimed industries and dead and wounded men, the whole structure of the world's activity and intercourse to be rebuilt? What are to be the new conditions under which we as well as others will have to labor? and how may we, by wise forethought at this time, save ourselves from consequences which affect our own country as well as others; from mistakes that may well, if not avoided, write the name of the United States among those of the great sufferers by this war? asked Mr. J. J. Hill, the well-known Canadian-born railwayman. His answer is of interest to Canadians, for the factors concerned are similar in both Canada and the United States.

Mr. Hill said in part. One common factor will enter into any adjustment after hostilities have ceased, no matter who may be victors. This is the relation of the supply of capital to the demand for it; and the effect of a changed situation in this respect upon the larger interests of the country, in common with the rest of the world.

Before the outbreak, these warring countries had already strained their credit to the breaking point, to provide for internal development and at the same time maintain their enormous military and naval establishments. The combined debts of the five principal nations now fighting amounted, in 1912, to more than $23,000,000,000. They borrowed several billions more in the following two years.

Capital at a Premium.

In the first 30 days, their borrowings or anticipations of credit through note issues ran again into the billions. As soon as peace approaches, not only will all these expenditures and forced loans have to be consolidated and secured on some basis to avoid national bankruptcy, but the financial strain will really only have begun.

The billions upon billions worth of property destroyed will have to be replaced. Whole cities must be rebuilt. Whole agencies of commercial progress, like the German merchant marine, must be renewed. The annual production of wealth will be lessened by the total labor product of the workers who have given their lives during the conflict. There will be such a relative scarcity of available capital as the world has not seen for a century or more, while the demand for it will be greater than the world has ever known.

Cash and credit in the United States, Canada, and elsewhere will command higher rates and be more difficult to obtain probably, than within at least any recent experience. There can be no relief from outside, for the condition must be world-wide. The inequality of capital to the work to be performed will be a world condition. It may affect us almost as seriously as those whose homes and industries lie in ruins. And it is just this possibility that we should now acknowledge, study and endeavor to prevent.

Railways Sap of Industrial Tree.

The largest single industry in the United States is the tilling of the soil, and this will suffer the least of all. Our farmers are gathering crops of unprecedented abundance, and marketing some of them at the highest prices received in recent years. Whatever else the survivors of the war abroad may lack, they must have food.

The next greatest industry is the operation of the railroads of the United States. After analysing the United States railway problems Mr. Hill remarked. The railroad is the sap of the industrial tree. It is the speed regulator of industry. It is the thermometer of credit. Its stability, its prosperity, its ability to confront with confidence a totally new era in the capitalistic and credit conditions of the world must be protected and assured.

IS FINANCING THEM ALL

Great Britain is Financing the Empire, Some of the Allies, and Several Neutrals

Addressing the House of Commons on Monday in moving for an additional vote of credit, Premier Asquith declared that up to November 14th, the war had cost between $4,500,000 and $5,000,000 a day over normal expenditures.

The additional vote of credit asked by the Premier was for $1,125,000,000. This includes loans of $151,250,000 to the self-governing colonies, and is the greatest single demand ever made upon the material resources of Great Britain. The $1,125,000,000 is in addition to the millions already voted in August, with which it is equivalent to an increase of more than 50 per cent. in the national debt.

Heavy Sums Expended.

The Premier told the House that the largest portion of the first £100,000,000 already had been expended in the conduct of military operations, loans to the allies, and disbursements for the securing of food supplies for this country.

The expenditure for sugar, which had been especially large, would, in the belief of the Premier, ultimately be recouped to the Exchequer. A considerable sum had been spent to secure the control of the railroads to the Government, and the expenditure included provisions for refugees.

With regard to the purposes of the new credit, the far greater bulk of this would be for army and navy expenditures, the Premier said. The civil expenditures were inconsiderable, and they would be largely for the purpose of securing food supplies and for further commodities necessary for the British, the use of which must be made impossible for the enemy. Another large item was made up of loans of money to others, amounting to £43,000,000 ($215,000,000).

Loans to Belgium and Servia.

The principal items in this list were to the Belgian Government, £10,000,000, and to Servia, £800,000, on which no interest was to be charged until the end of the war. Other loans to the self-governing Dominions of Canada, South Africa, Australia, and New Zealand, countries which under ordinary circumstances would be compelled to borrow in the London market, would account for £30,250,000 of the new credit, for the reason that the Government has undertaken the responsibility of raising loans for these Dominions.

Heavy Loans to Date.

Taking Premier Asquith's figures, we find that, as the war has lasted over 100 days, the expense to Great Britain has been about $500,000,000. War loans of all nations issued to date approximate about $2,350,000,000.

Among the many advances made by Great Britain since the outbreak of war are the following: £10,000,000 to Belgium; £2,000,000 to India; £2,000,000 to France; £600,000 to Norway; £20,000,000 to Australia; £800,000 to Servia; £1,600,000 to Greece; loans to Canada, as required and guarantee of Egyptian loan. Mr. T. Healy, M.P., suggested in the British House this week that the loans to Belgium and Servia should be made gifts to those countries.

Canada's advances are being obtained on very favorable terms, *The Monetary Times* learns.

COMPANIES INCREASING CAPITAL

The following companies in Manitoba have increased their capital stock: C. D. Peterson Company, Limited, from $20,000 to $100,000.

The following companies in Prince Edward Island have increased their capital stock: The Rideford Fox Company, from $24,000 to $75,000.

The following companies in Alberta have increased their capital stock: The Montreal Oil Company, Limited, from $10,000 to $200,000. The Claresholm Oil Company, Limited, from $500,000 to $750,000.

Orders for copies of the 1915 Monetary Times Annual are now being received—Price 50 cents per copy

RAILROAD EARNINGS

The following are the railroad earnings for the week ended November 7th:—

Canadian Pacific Railway.

	1914	1913.	Decrease.
Nov. 7th	$1,908,000	$3,204,000	$1,296,000

Grand Trunk Railway.

Nov. 7th .	$ 906,941	$1,178,707	$ 271,766

Canadian Northern Railway.

Nov. 7th	$ 384,300	$ 620,400	$ 236,100

SASKATCHEWAN ELEVATOR RESULTS

The net profits of the Saskatchewan Co-operative Elevator Company for the year ended July 31st, 1914, total $285,161. A cash dividend at the rate of 8 per cent. on capital paid up before April 1st, 1914, was declared and paid on August 26th, 1914, out of the above surplus.

The organization department organized 25 new locals during the year, bringing the total number of locals of the company up to 217. At four of these points, however, it has been impossible to build elevators owing to non-completion of railway lines. In connection with the work of this department it is noted that the 217 locals of the company comprise in all 14,022 shareholders, holding an aggregate total of 38,297 shares.

The operating department handled through the 192 elevators operated during the 1913 grain season 19,465,290 bushels of grain, the average per elevator for the season, therefore, being 101,382 bushels.

During the 1913 season the competition offered by line companies was more keen than in any previous year. The report says: "As most of the shareholders know, our street prices last year at every point where we were operating, were at least 2 cents in excess of the line companies' official list prices all the time, and for a period of the season were as high as 3 cents over that list. This fact alone, when carefully considered, illustrates the value of the company to the Saskatchewan farmer; for whether that farmer markets his grain with us or not, he receives the benefit of the increased price, which has been brought about through the company's efforts."

COMMODITY PRICES ARE EASIER.

The Labor Department's index number reviewing prices in October shows a tendency to a lower level. When the war broke out the number rose almost at once from 135.5 to 140.7. It has now eased back to 139.0, or nearly two points. Compared with a year ago, however, it is nearly five points higher. The October relapse is chiefly accounted for by declines under the headings grains and fodders, animals and meats, and fruits and vegetables. Among miscellaneous foods, cream of tartar and glucose fell, but sugar, molasses and honey advanced. Silk and jute lowered the average for textiles. Metals, coke, linseed oil, hops and rubber also developed weakness. On the other hand, New Brunswick spruce deals, glass, starch and newsprint were higher.

The above refer to wholesale prices, of which 272 are included in the review. Retail prices in the several Canadian cities followed pretty generally in the wake of wholesale. From the householders' standpoint, the further advance of nearly one cent per pound in sugar was the most unfavorable feature of the month. On the other hand, potatoes were unusually low in Eastern Canada and meats went down in several places. Bread went up in four cities. Flour went up in three and down in three. Butter was unusually steady, though it usually advances at this time of the year; the rise in September perhaps accounts for this. Milk came down in two places, which is unusual at this time of year. Rents have been falling pretty generally for some months past.

Only one new strike occurred in the whole of Canada in October, that of moulders at Owen Sound, but five remained unsettled from September.

NEW INCORPORATIONS

Ontario and Quebec Supplies Twenty-three Out of Thirty-three Incorporations

Canada's new companies incorporated this week number 33. The head offices of these companies are located in six provinces. The total capitalization amounts to $2,115,000.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
British Columbia	3	$460,000
Manitoba	1	200,000
New Brunswick	1	63,000
Ontario	10	560,000
Prince Edward Island	5	515,000
Quebec	13	317,000
	33	$2,115,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

West Summerland B.C.—Wright Fruit & Farm Company, Limited, $25,000.

Victoria, B.C.—Safety First Airbrake Company (Canada), Limited, $300,000.

Saint Roch l'Achigan, Que.—$20,000. Jos. Emile Amable Decelles, Jos. Noel Décarie, Philias Décarie.

Roberval, Que.—La Compagnie Rivard & Simard, $18,000. Cleophas Rivard, Luc Simard, Arthur Lavallée.

Sudbury, Ont.—Spinaci Bros., Limited, $10,000. Enrico Spinaci, Dominico Spinaci, Augusta Camiletti.

Waterloo, Ont.—Dominion Ironite Company, Limited, $40,000. Hiram Snider, Frank Brown, Frank Campbell.

Berlin, Ont.—Westmount Park, Limited, $100,000. Edwin Perry Clement, Edwin Whyte Clement, Wm. Pope Clement.

Brockville, Ont.—The Robert Craig Company, Limited, $40,000. Robert Craig, Francis Craig, Harold Perry Conklin.

Shediac, N.B.—Shediac Fox and Fur Company, Limited, $63,000. Hon. Chas. Dalton, Hon. David V. Landry, Dosithe J. Doiron.

Valleyfield, Que.—Chateau Salaberry, Limitée, $49,900. Jos. Frederic Rodrigue Leduc, Jos. Alfred Masson, Dolose Cardinal.

Winnipeg, Man.—Canada Grain Securities, Limited, $200,000. Hugh Phillips, Harold St. Clair Scarth, Wm. Miller Shaw.

Parkhill, Ont.—The Parkhill Lumber and Manufacturing Company, Limited, $30,000. Wm. Henry Mark, John C. Mark, John Schafer.

Bull's Head Hotel, $20,000. Philippe Tremblay, J. A. Duchaussoy, Jos. A. Martin. Saint-Gabriel Park House, Limited, $20,000. Napoleon Taillon, Adelard Desroches, Jos. Taillon, Jos. Matte. St. Charles House, $20,000. Télesphore Brais, Azilda Pelletier, Adolphe Pelletier.

◆

GOOD HERRING SEASON

Mr. W. J. Jefferson, manager of Wallace Fisheries, Limited, whose canneries are at Uchucklesit Harbor (now called Kildonan), B.C., says that the herring season is now in full swing, and that the run is unusually large. He thinks that hereafter many canneries on this coast, now operating exclusively in salmon, will take up the herring business as well, which will develop into a source of much wealth to British Columbia.

◆

TIMISKAMING AND NORTHERN ONTARIO RAILWAY

The surplus earnings of the Timiskaming and Northern Ontario Railway for the year ended October, 1913, amounted to $250,000, which sum has been received by Hon. I. B. Lucas, provincial treasurer, from chairman J. L. Englehart, of the Timiskaming and Northern Ontario Railway Commission. The earnings during the year as a result of lessened activity in the lumbering and mining industries fell off considerably, but economy in operation and a smaller expenditure on maintenance, made possible by reduced wear and tear on the line, allowed the commission to equal last year's returns.

Two years ago the Timiskaming and Northern Ontario surplus was $510,000, and with another annual $300,000 in sight as a result of the running rights agreement with the Grand Trunk, the commission had visions of the railway doing a little better than paying interest and sinking fund charges—something over $700,000. Since then, however, traffic has fallen off and the development of the farming areas has not proceeded fast enough to make up for traffic from construction and the mines.

◆

"As to the future," writes an insurance manager, "ask the Kaiser." Not so; the future depends almost entirely upon British arms and the British spirit.

Professor G. R. Mickle, Toronto, has an article in the Ontario bureau of mines report on the composition of natural gas, but omitting all reference to the expert, Count von B[illegible], of Washington.

It is estimated that there have been marketed at Medicine Hat this year by farmers in the district hogs to the value of [illegible]. Of this amount, some $20,000 has been paid out on the [illegible] monthly market days for hogs.

[illegible] A. M. Grenfell has written from camp, that in [illegible] war and the inability of his friends to [illegible] substantial amount, he is reluctantly compelled no [illegible] adjudication in bankruptcy. The proofs of the [illegible] 5,711, included the claim by Canadian [illegible], which was admitted to be for £856,- [illegible] statement of affairs has yet been lodged by the [illegible] estimated his liabilities at only £160,000. [illegible] is written large in England's history, [illegible] European fray the dashing major may [illegible] failed in financial realms.

TORONTO INSURANCE INSTITUTE'S MEETING

The Toronto Insurance Institute continued its winter session on Friday, when its members were privileged to hear an address by Dr. E. L. Fisk, on the topic of "Life Saving as a Function of Life Insurance."

◆

GRAIN GROWERS' COMPANY RESULTS

The Grain Growers' Grain Company's balance sheet shows some clear indications regarding the development of western Canada's productivity and also of the company's advances. In 1907 the grain handled by the company was 2,340,000 bushels, while this latest return shows 29,920,225 bushels passed through the company's hands, the total for the period being 1[illegible]7,821,862 bushels.

The year's trading resulted in the satisfactory profits of $151,[illegible]. According to the balance sheet, assets total $1,[illegible], of which $402,852 is in stocks, shares, etc., $360,[illegible] in real estate; elevator buildings and machinery are valued at $22[illegible],415. The company's subscribed capital is $1,[illegible], of which $771,407 is paid up. Reserve funds amount to $[illegible]. The report is a good one and reflects the rapid and sound development of the company.

"Business as Usual"

SOME of our contemporaries are inclined to be keenly critical of the admirable slogan "Business as Usual." Every sane man knows that during the world's greatest war, business cannot go on as usual. But excellent results are achieved by trying. Nothing can be gained by standing idle, hopeless, pessimistic, complaining. It helps far more than our cynics realize, when the nation is working hard, producing, holding faith in race and country, having optimism of the right kind, ceasing to grouch because of financial indiscretions and because sacrifices have to be made to ensure the Empire's existence. Business is better than usual in many lines, as usual in some, poor or bad in others. That is partly Canada's fault and partly the fault of the war. In any case, we should stand up to the inevitable and try, at least, to do business as usual.

BUSINESS IN THE NORMAL WAY

Great Britain is Just About Ready to Resume, Says Sir George Paish

All [illegible] matters that required adjustment in England as a result of the European war, have now been adjusted, and "we are again prepared to resume business in the normal way." So said Sir George Paish at the third annual convention of the Investment Bankers' Association of America, at Philadelphia, last week. Although the London Stock Exchange is still closed, Sir George said that one of the greatest obstacles to its resumption of business had been removed, and that he hoped to see it reopen in the near future.

"The Stock Exchange," he said, "was caught with loans to bankers of nearly £100,000,000, and recently an arrangement has been made to continue these loans as long as it is necessary, even if beyond the duration of the war, and to provide members of the Stock Exchange with fresh funds in order that they may carry on their business as usual."

To Discount Bills.

Continuing, Sir George said: "We are prepared to discount bills, and I think in a short time you will find that we are prepared to do business in our stock markets as we usually do. There is, however, one matter that is unusual. The supply of banking money in London will, I am convinced, be as great as ever, but it will be obvious to you that the supply of capital in England cannot be as great as ever, at any rate, not for outside purposes. We calculate the savings of the British nation are some £400,000,000 a year. Last year we placed half these savings in foreign countries.

"We are now engaged in the greatest war the country has ever had to fight, and it will be obvious to you that we shall need our savings to pay for that war. I am hopeful. Indeed, I have strong hopes, that we shall be able to pay for that war out of our growing savings, and we shall not [illegible] to encroach upon our capital.

Income Will Be Maintained.

"With the British nation carrying on its business as usual, there is no reason why its income should not be maintained, and if its income is maintained, it will have the [illegible] and the money with which to pay for [illegible] war out of its income. This matter, I know, is of [illegible] on this side, as there is a great deal of [illegible] in England should be compelled to send you back [illegible] of your securities. I do not think there is any serious [illegible] on this. I think the utmost extent of the [illegible] may not be prepared to renew our [illegible] notes, [illegible] bonds, railway notes, New York [illegible] notes, and [illegible]

"[illegible] realize that when our army gets up to a million [illegible] after that, two million men, it will be necessary [illegible] all our savings, and [illegible] we may have to ask [illegible] to repay the short notes at maturity. That will be, I think, if I may here put in a word with regard to the United States—that will be a very small matter for the United States to do—a very small matter, indeed."

Sir George Paish and Mr. Basil Blackett are visiting the United States on [illegible] of the British Treasury to solve financial and [illegible] problems which have arisen as a result of the war.

NOT TOO MUCH WAR NEWS

Addressing the Halifax board of trade, Mr. E. B. McCurdy, M.P., who is president of the board, took "Business as Usual" as his text. He emphasized the importance of making the best of the situation in regard to industry and commerce as it exists in the provinces to-day. He pointed out that the war had not injured our great basic industry of agriculture, and, while some industries would be disturbed by the war, others would not, and it was of the utmost importance that a spirit of confidence prevail. The lands must be tilled and harvested, manufacturing must go on, and the demands of Canada and of foreign trade filled. It should be possible to find new business opportunities in new markets. He urged strongly upon all the importance of not allowing the war to distract their attention to the injury of their business. On this phase, he said:—

"We have the battle of trade and commerce to engage our attention in business hours. We have the care of those left behind. We have the bills to pay. We have work to do. We should not allow ourselves to become unsettled and excited over war news. In business hours let us keep our hands to the plough of commerce."

Mr. McCurdy told of going into offices and factories in business hours and finding the principal and staff paying more attention to the war news than to business, and he advocated the policy of attending strictly to business in business hours, having sufficient optimism to believe that the final outcome of the war would be satisfactory, and that by diligent effort each could keep his own business going successfully.

MORE PLANT FOR THIS FACTORY

The factory of the National Dress Company of Arnprior, Ontario, has been running full time during the present depression.

"We are now booking spring orders," say the company, "and from present business, owing to very little foreign goods coming to Canada for 1915, we find that it will be necessary to install more machines before Christmas, consequently giving employment to more people through the winter."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Crown Reserve Mining Company.—The directors of the Crown Reserve Mining Company will recommend to the incoming board in 1915, that the present dividend rate be reduced. While the question of the new rate will be left, of course, to the discretion of next year's board, the opinion in financial circles is that the present dividend rate of 2 per cent. a month will be cut in half and the stock put on a 12 per cent. per annum basis.

Ontario Power Company.—A meeting of the shareholders of the Ontario Power Company is to be held at the head office of the company, Niagara Falls, on December 8th, for the purpose of considering, and, if deemed advisable, of sanctioning an issue of three-year 6 per cent. convertible gold debentures, in an aggregate amount not exceeding $400,000, the terms of issue, conversion and redemption to be determined at the meeting.

Trust and Loan Company.—The report of the Trust and Loan Company of Canada, for the half-year ended September 30, issued from the head office in London, shows net profits of £62,459, an increase of £871 over the same period last year.

Reserve funds have been increased by £27,674, and now stand at £515,969.

The usual dividend at the rate of 9 per cent. per annum has been declared, and will be paid December 4.

Dominion Power and Transmission Company.—The directors of the Dominion Power and Transmission Company have declared a dividend of 2 per cent. on the $5,100,000 of limited preference shares, payable December 15 to shareholders of record November 30. This makes the second dividend of this amount paid during the present year, bringing the total payments to date to 7½ per cent. When the dividends total 10 per cent., the limited preference stock will become common stock, of which $2,614,500 is now outstanding.

Royal Canadian Agencies.—The final step in connection with the liquidation of the Royal Canadian Agencies, in which Mr. Sanford Evans and other prominent Winnipeg financial men were interested, has been taken. Mr. A. N. Strong, who was with the Royal Canadian Agencies, is the liquidator.

The liquidation is voluntary. Mr. Strong has stated that the corporation was successful until the beginning of the war, when it became impossible to carry on a financial business between Winnipeg and London. As a considerable period might elapse before operations could be resumed, the directors decided to dissolve.

Brazilian Traction, Light and Power Company, Limited. The statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services operated by subsidiary companies, controlled by this company for the month of September, 1914, show

	1914 Milreis.	1913 Milreis.	Increase or decrease. Milreis.
Total gross earnings ...	6,096,940	6,028,078	+ 68,862
Operating expenses	2,552,38[illegible]	2,654,368	- 101,988
Net earnings	3,544,56[illegible]	3,373,710	+ 170,850
Aggregate gross earnings from January 1st .	55,170,088	53,823,815	+1,346,273
Aggregate net earning from January 1st	31,674,128	28,970,057	+2,704,071

The above figures are approximated as closely as possible, and will be subject to final adjustment in the annual accounts of the subsidiary companies. In consequence of the fluctuations in the rate of exchange the earnings are shown in Brazilian currency, so as to show the actual monthly results of operation. The rate of exchange varies greatly during the month, but the companies' remittances were made at about 14 pence.

Acadia Sugar Refining Company.—The financial statement of the Acadia Sugar Refining Company for the year ended September [illegible] shows that, including $26,796 brought forward from last year the net trading profit was $332,086. The dividends paid during the year on the preferred and ordinary shares amounted to $140,893, and after payment of $27,213 interest on loans and $7,300 directors' remuneration a balance of $[illegible] is carried forward to credit of profit and loss account which now totals $257,140.

Last year, including $[illegible]4,286 brought forward, the net trading profit was $176,600.

The statement shows that loans against bonds of the company and current from the bank are $838,387 and $814,456 respectively. Trade debts due by the company are $964,337. It is shown that $2,425,9[illegible] has been expended on account of rebuilding Woodside refinery. In addition the land, buildings and plant at Richmond, Woodside and Moncton are valued at $1,636,723. The stock of sugar on hand is valued at $1,660,625. Trade debts due to the company are $257,139.

Canadian Car and Foundry Company.—The company's announcement regarding the deferred dividend states:—"The directors beg to inform the shareholders that the financial situation and business depression caused by the war make it necessary to defer paying dividends until conditions improve.

"When war was declared the company was negotiating for the sale of a large quantity of equipment, the work of which would have kept the plants busy for many months, and had reason to expect satisfactorily to complete the transactions. The war, however, not only prevented the railway companies from obtaining funds for capital expenditures, but has further depressed trade, and while this depression lasts the purchases by the railways of new equipment in any large volume will be very uncertain.

"In view of these adverse conditions the directors feel it their duty to conserve the company's resources by withholding the payment of dividends from previous surplus account; they believe that any different action would be condemned by the shareholders.

"The directors call the attention of the preference shareholders to the fact that dividends on their shares are cumulative and must be fully paid before any further dividends can be paid on the common shares. They also inform the shareholders that the various plants of the company and its subsidiaries have been maintained, and are now, in a full state of efficiency, and will be kept properly prepared for any work which may develop."

Sherwin-Williams Company.—The report of the Sherwin-Williams Company for the fiscal year ended August 31, 1914, shows net earnings of $682,736, as compared with $763,348 for the preceding year, and $596,916 for the 1911-12 fiscal year. After charging off $59,733 for depreciation and paying bond interest, there remained a balance of $483,266 available for preferred dividends, being equal to 16.1 per cent. on the $3,000,000 seven per cent. preferred stock outstanding. After payment of the preferred dividends a surplus of $273,000 for the year is shown, this balance being equal to 6.8 per cent. on the $4,000,000 stock, on which, however, dividends are not paid. Total surplus now stands at $821,829. Reserves and surplus together amount to $1,268,769, having been accumulated in a little over three years' operations.

The income account for the year compares as follows:—

Net earnings	$682,736	$763,348
Depreciation	59,733	65,600
Special reserve	......	100,000
Bond interest	130,737	140,186
Balance	$483,266	$458,562
Preferred dividends	210,000	210,000
Year's surplus	$273,266	$248,562
Previous surplus	548,562	300,000
Total surplus	$821,829	$548,562

The balance sheet shows total assets of $11,098,782, or about $[illegible] more than the previous year. Property account stands at $[illegible]55,[illegible]77, additions during the year increasing the item by $[illegible]817. Current assets totalled $2,380,087, or about $[illegible] more than last year, while current liabilities amount to only $[illegible]50, or some $164,000 less than a year ago. The surplus of current assets over current liabilities is $[illegible]0,7[illegible]8, an increase of nearly $195,000 for the year.

Should Canada Retain Its Gold?

SITUATION *Created by the Present War Raises Question as to whether the Dominion should by Legislative Authority, keep in the Country the Gold from its Mines, to be Accumulated by the Government.*

IN view of the situation created by the present war, the question as to whether or not by legislative authority, the gold from Canadian mines should be retained in the country and accumulated by the government is of special interest, suggests the well-known Canadian economic authority, Professor Adam Shortt, C.M.G., LL.D., in an article in the Canadian Mining Institute bulletin. To present an answer to this question in the least complex form, it may be advisable to first consider the disposal of our Canadian gold under normal trade conditions, and then to ask what modification of this situation may be necessary under the circumstances of an international crisis, whether due to the outbreak of a great war, or to other causes seriously interfering with international exchange.

We have first to distinguish between gold as a raw material, and gold as a finished or refined product brought to bullion standard and ready for minting. As a raw material, the gold ore, or otherwise unrefined gold, like all other raw materials, bears a varying price, of which the chief factors are the cost of extraction, cost of insurance and transportation to a refining plant, and the cost of refining or manufacture into finished product. As a finished product, in the shape of standard bullion gold, its price becomes identical with the standard of value in gold standard countries. This does not prevent gold coin or bullion from having a special or variable price in local or national markets. In any particular locality, gold itself may be at a discount or at a premium. A bill of exchange, for instance, payable on demand, and whose face value represents standard gold at the place of payment, may be worth either more or less than its face or gold value at the point where it is drawn. Actual gold will be worth less than the face of the bill when it is necessary to ship the gold to the place of payment to balance exchange; because it will cost more, in insurance and transportation, to send the gold abroad than to send the bill of exchange. On the other hand, gold at the place where the bill is drawn will be worth more than the face of the bill when it is necessary, in cashing the bill abroad, to bring back the gold which it commands. These are conditions which materially affect a complete answer to this question.

Most of the raw gold produced from Canadian mines has been sent to American refineries, because the owners obtained there a better price for the product. They obtained a larger share of the refined gold than they could obtain in Canada or elsewhere. When we have in Canada sufficiently well-equipped and conveniently located refineries to treat our various forms of gold as a raw material, we may be able to compete with the United States in the treatment of our own raw materials.

To meet this requirement as completely as possible, the Canadian government has under construction and nearly completed, as a species of annex to the mint in Ottawa, what is expected to be a thoroughly equipped gold assaying and refining plant. At this assaying department of the mint, raw gold bullion will be treated on a liberal basis, which ought to attract a large proportion of the raw gold now being mined in Canada. Once gold has been reduced to standard bullion, the cost of its further conversion into gold coins is practically borne by the Canadian government, in conformity with the practice of Britain and other first-rate powers. Standard gold bullion and standard gold coinage are, therefore, of exactly the same value per unit of weight, and may, when necessary, be converted into each other with practically no additional cost.

Where paper currency is redeemable on demand in gold, the currency is of the same value as gold. As this equivalence depends upon the law of the country, an amendment or suspension of the law may destroy the gold value of any paper currency. Bills of exchange payable on sight or on short notice serve to link up the gold and convertible paper currencies of the leading gold standard nations.

Under normal conditions of international exchange, broadly, there is no special advantage in seeking to retain in one's country by legal enactment any gold which is mined there. Legislative interference with the freedom of disposing of the products of gold mines to the best advantage of the owners, might seriously discourage the gold mining industry of Canada as of any other country. The regulating of the amount of gold to be held in Canada is a matter to be dealt with partly under the Bank Act, but mainly in connection with the issue of Dominion government notes and the provisions made for their redemption. Dominion notes having been made legal tender for both the banks and the public, the chief burden of maintaining an adequate gold reserve in the country is thrown upon the government itself. The banks must maintain an adequate reserve in either gold or Dominion notes. In practice they choose to retain Dominion notes as more convenient, hence the obligation laid upon the government to provide gold for these notes in any quantity required.

When the gold mined in Canada is refined and coined there it does not pass into general circulation. It is simply deposited with the government or one of the Canadian banks. It, therefore, lies at the option of the bank or the government to hold it in its vaults or to use it for payments abroad or, in the case of the banks, for effecting call loans in the United States. Only when exported and loaned, does it bring a profit to the bank.

Reversing this, should a Canadian holder of raw gold from the mines find it more profitable to send it to the United States to be refined, when his gold is reduced to standard bullion and the cost of refining it deducted, he has the option of bringing the gold back to Canada, either as bullion or coin, or of purchasing with it exchange on Canada. The latter option will have the effect, upon the bill of exchange being deposited with a Canadian bank, of giving the bank a command upon the United States either for gold to be imported or for the discharge of an equivalent amount of debt due by the bank in the United States. Thus, whether the Canadian owner of raw gold has it refined in Canada or in the United States, it ultimately falls to the lot of the Canadian banks or the Canadian government to determine whether the actual gold mined in Canada shall be retained here, or an equivalent amount of American gold brought into the country. Under normal conditions, therefore, there is no occasion for interfering with the freedom of the individual owner of Canadian gold to dispose of it as he sees fit. Moreover, so far as the command of Canada upon the gold markets is concerned, there is no difference between the export of Canadian raw gold and Canadian wheat, lumber, or manufactured goods. Foreign bills originating from the export of one will command gold in return as readily as those originating from any other. The same applies to the payment of our debts abroad.

Only when a crisis is sufficiently severe to result in a partial or complete suspension of specie payment would any material modification of normal conditions be involved.

Would Affect International Exchange.

Should there occur a serious restriction of payments, as in the case of the proclamation by the government of a general moratorium, or should the suspension of specie payment by the banks or the government itself be authorized, the situation as regards international exchange would be altered, and it would not be possible to acquire new stocks of gold from without through the usual channels and at the usual rates.

Inasmuch as Canada obtains its chief supply of gold through the United States, should any suspension of specie payment or other serious interference with exchange facilities take place there, the question as to the destination of Canadian gold ores might become a matter of considerable importance. Even under these conditions, however, the prohibition of the export of Canadian gold ores would not be of such benefit to the country as might at first sight appear. There would be practically no advantage in prohibiting the export of gold ore while not prohibiting the export of gold coinage. But the prohibition of the export of gold coin and bullion could not be made effective without the suspension of specie payments by both banks and the government.

But the suspension of specie payment does not entail the disappearance of gold from all the exchange transactions of the country, leaving everything to inconvertible paper currency. It simply means that, as regards its indispensable functions, especially the balancing of foreign exchange, gold immediately passes to a premium, the rate of which depends upon the volume of adverse exchange to be satisfied and the amount of gold available to meet it. If, however, the export of Canadian products, whether as raw materials or finished goods, were [illegible] [illegible] the foreign calls upon Canada for import [illegible] [illegible] due on Canadian loans abroad, then, of course, it would not be necessary to ship any of the [illegible] gold [illegible] country. But, if the exports of [illegible] [illegible] gold materially assisted in balancing our [illegible] [illegible], there would be no special reason for [illegible] [illegible] of gold as a raw material only to [illegible] [illegible] export as a finished product in the shape of [illegible] and bullion. Even a financial crisis, therefore, does not [illegible] alter the relationship of unrefined gold to the [illegible] of Canadian export or the balancing of Canadian [illegible].

When Canada is Hemmed In.

Under one quite exceptional condition, however, it might be entirely advisable and necessary to prohibit the export through private channels of all gold, whether in the shape of new gold, coin, or bullion. That condition would be one in which Canada was at war and so hemmed in that its external trade was paralyzed, while it still urgently required certain supplies from abroad. Under such circumstances, nothing but gold could command even a partial supply of the goods required. In this case, however, the embargo upon gold would simply be part of a more general embargo upon any other supplies of the country which were essential to the conduct of the war. To a large extent this is the condition of Germany and Austria at the present time; but, as regards gold, it is not the situation of Britain, because her trade and exchange communications are still open to the neutral world and her allies. It is obvious, then, that the conditions requiring interference with the free disposal of Canadian gold as produced from our mines are of very exceptional character. Under all other conditions the Dominion government is already fully meeting the situation by furnishing an opportunity for the owners of Canadian raw gold to have it refined and converted into standard bullion or coin in Canada at reasonable rates. It should be left to the Banking and Currency Acts to make suitable provision for maintaining an adequate gold reserve in the country to meet possible commercial and other crises. Beyond that, the government, the banks, and the public alike must consult their own interests and follow their own discretion and judgment in acquiring or disposing of what gold may come to the country or be produced in it.

CANADA'S PLACE IN THE WAR

Commenting on what Australia has done in the present crisis, Mr. Rowley declared, at the Canadian Club, Winnipeg, "We in Canada have been playing football with the important matter of the defence of the British Empire for a lamentably long time. We have brought politics into the question, and events have proved that our politicians were wrong. No matter what the policy, if one had been decided upon, it would have been mighty useful to-day. If our cabinet ministers do not tell us where we as a nation stand, then we ought to tell them where they stand. Although we are delighted to have Canon Murray with us, it seems to me that this would have been a good time for some of the ministers of the crown to tell us about Canada's place in the war. To me it appears that Canada's place is just as great as that of the British Isles, and if Premier Borden means what he says and the leader of the opposition—and there should be no opposition in a matter so vital—there should be no difficulty in arriving at a conclusion as to what Canada ought to do, and no limit to the sacrifice entailed by doing it, even if defence of the Empire meant spending the last dollar."

◆

It's a case of Kitchener, the Sphinx, [illegible] Sam Hughes.

The Pioneer Grain Company, Limited, capital $5[illegible], has been registered to do business in Manitoba.

The exhibit of the Prudential Insurance Company of America will be found in the [illegible] [illegible] of the [illegible] building at the Panama Pacific Exposition, San Francisco. The dimensions of the exhibit are [illegible]. The space occupied is [illegible] square feet. The fundamental [illegible] idea which underlies the exhibit is the [illegible] of the relation of life insurance to public welfare. The [illegible] [illegible] to visualize the facts of [illegible] [illegible] relation to social and economic [illegible]. The [illegible] of the exhibit is primarily scientific, but the [illegible] [illegible] easily comprehended [illegible].

METROPOLITAN MUTUALIZATION PLANS

The Metropolitan Life Insurance Company, of New York, with its $500,000,000 of assets, $40,000,000 of cash surplus and 14,250,000 policyholders, is to be mutualized if all parties interested can agree, according to a letter addressed to certain policyholders by President J. R. Hedeman.

Two of the four steps necessary have already been taken, the majority of the holders of the $2,000,000 capital stock have signified their consent and the board of directors have approved. Under the law there remains only for the policyholders holding $1,000 or more of insurance for a year or longer and the state superintendent of insurance to approve, when the transfer may be made from an old line stock company to a mutual association.

The Metropolitan Life Insurance Company is now a stock corporation with a capital of $2,000,000. Its surplus is estimated at $40,000,000. It is proposed to return the $2,000,000 capital and to pay $4,000,000 of the surplus to the stockholders, under the mutualization plan.

Holders of policies amounting to $1,000 or more, which have been in force for a year or over, will be entitled to vote on the project.

Nobody [illegible] pessimist.

The [illegible] Patent Manufacturing Company, Limited, [illegible] changed its name to Prairie Builders, Limited.

[illegible] is the proper thing, and it takes years [illegible] development. There is need of someone to [illegible] steady under the present excitement [illegible] to his original programme, [illegible] Saskatchewan's minister of [illegible]. "There has been a lot of talk [illegible] available acre for a big crop next [illegible] the loudest do not take into consid[illegible] to be rushed. Besides, the [illegible]. You do not have to urge [illegible] gold mine."

"Business as Usual"

TWO MILLION ADDITIONAL ACRES

Western Canada had 11,000,000 acres in wheat last year, and it will have 13,000,000 acres in wheat this year, according to the estimate of Mr. Thomas S. Acheson, general agricultural agent for the Canadian Pacific Railway at Winnipeg.

"To-day," he says, "the farmer in those areas has every cause for optimism. Never have they had so much moisture in the fall as this year. The snow lies in various depths up to six feet, and the prospects for the crop next year are exceedingly bright.

"What particularly strikes me in the three provinces, and especially in Manitoba and Saskatchewan, is the fact that almost every farmer seems to have been converted to the sheep raising theory. They seem to have at last realized that there is nothing handier on a farm than a few head of sheep. There is nothing better for clearing off the weeds, they are useful in such a variety of directions that the farmers are determined to keep a few head."

"Sit tight and attend to business."—Mr. Grant Hall, general manager of the western lines of the Canadian Pacific Railway.

BIG ORDER FOR IRON FENCE

An order for a $7,500 ornamental iron fence is a good one for war times. Such an order was recently placed with the Page Wire Fence Company at Walkerville. About 3,300 lineal feet will be required to fence in the ten-acre estate of Mr. E. Chandler Walker. The fence is seven feet high and is composed of three horizontal rails. Pickets are ¾ inch square set 4 inch centres.

A new record for quick delivery will probably be made on this order, which was placed in October and is to be delivered complete by December 1st.

General Manager Church of the Page Company says that the fence business for the past year has been considerably better than it was during 1913, with every indication of a substantial increase in the coming year.

COUNTRY IN A SOUNDER POSITION

"'That the trouble is that we have been able to borrow too easily, taking away the incentive to produce.' This sentence from *The Monetary Times*," says the Edmonton Journal, "puts the truth regarding the Canadian economic situation in a nutshell. We not only should recognize it, but we should also recognize that as a result of the temporary cutting down of our borrowing power the country is in a much sounder position, and those who really work for a living can look more hopefully to the future than was the case when things were described as 'on the boom.'"

FROM EDMONTON TO PACIFIC COAST

"The work on the west end of the Grand Trunk line between Prince George and Prince Rupert will probably be closed up about the end of the month, because winter weather has settled down and makes railway construction work impracticable. All the important ballasting is completed. The only work remaining is finishing up the line which will probably take two months in the spring. The road is now fully ballasted from Winnipeg to Prince Rupert," said Mr. Morley Donaldson, vice-president of the Grand Trunk Pacific Railway, on his return from a tour of inspection of the line west of Edmonton.

"There will be a great deal of construction work going on this winter such as [illegible] the banks of streams and this will give employment to a large number of men. The works for four terminal divisions are now under construction and will be completed early in the spring. This will practically complete the construction work on our line. Twelve-stall round houses are being built at Prince George, Endako, Smithers and Pacific. Oil plants terminals and stations are included in the contracts. All bridges will be completed on the main line by the first of January. The contract for the new dock at Prince Rupert, which will handle the oil steamers, will be let within the next two weeks. The Grand Trunk Pacific drydock will be in operation by the first of the year. Part of the plant will be in operation within a fortnight.

"Prince Rupert is feeling the benefits of the Grand Trunk Pacific line. This city is becoming an important fish port.

"Prince George has developed into a lively little city. With the early opening of the construction work of the Pacific Great Eastern, there will be work for a large number of men, both skilled and laborers. Conditions generally throughout central British Columbia are good."

"Don't rest on your laurels; they're fine on your forehead, but they make a mighty poor mattress."

ONTARIO IS RECEIVING MONEY

The lifting of the moratorium in England had an immediate effect upon the cash balance of Ontario's treasurer. The underwriters of the five million loan placed in England just before the outbreak of war are now forwarding large sums to Ontario. Of the total due in the first instance, all but about a million has been received, making close to two millions furnished by the underwriters since the war started.

GOOD BONDS ARE WANTED

"During a trip through New York, Philadelphia and Boston, I noticed a change of feeling in the States, and a general tendency toward business optimism," said Mr. A. R. Doble, vice-president of the Royal Securities Corporation, on his return to Montreal. "Where everybody was in a panic for some time after the war broke out there is now a considerable demand for the better class of securities, particularly municipals—that is for the issues of the larger cities and towns—and first class railroad bonds."

CANADA'S OCTOBER TRADE

An improvement in the total volume of Canadian trade is shown by a comparative statement of exports and imports issued for the month of October. The increase for October is almost equal to the total decrease shown in the figures for the seven months of the fiscal year.

The October trade amounted in value to $139,537,008, an increase of $24,074,093, while the total for the seven months' period was $[illegible], a decrease of $25,99[illegible],741. Despite the heavy increase in imports of coin and bullion, some $52,5[illegible], which do not benefit the revenue, the statement is considered to indicate an encouraging trend.

October exports, domestic and foreign, amounted to $51,[illegible]44,559, a decrease of $[illegible],205,[illegible], but an increase of $128,903 is shown in the statement of exports for the seven months, the amount for the present fiscal year up to October 31 being $27[illegible].

Imports increased by $14,269,410 in October, reaching a total of $87,692,449. They decreased by $26,1[illegible],644 in the seven months, the total imports for this year's period being $368,[illegible],277. Imports of coin and bullion amounted to $52,575,669 in October and $81,228,41[illegible] in the seven months, an increase of $51,536,944 in one case and of $77,[illegible],266 in the other.
